SUPPLEMENTARY INFORMATION: The projects proposed for the Lone Pine recovery include: Timber salvage of fire killed timber; reforestation of conifer and forage species; interpretation and education opportunities; soil and water protection and improvement; wildlife habitat improvement, and fall antelope bitterbrush seeding all aimed at initiating recovery of the Lone Pine Fire which occurred on the Winema National Forest in August 1992. The fire severely burned more than 25,000 acres of National Forest land, killing most of the timber and other vegetation.

Shortly after the fire occurred, an Interdisciplinary Team (IDT) was organized to conduct an environmental analysis for the recovery of the fire area. The IDT began with an initial scoping meeting on August 24, 1992. After public meetings, press releases, and contacts with individuals, environmental and timber industry groups, Federal, State, County and Tribal governments, three urgent concerns were identified. They are:

(1) Expedite economic and resource value recovery of the fire killed timber before it's value deteriorates;

(2) Accomplish the greatest amount of salvage harvest possible during the 1993 winter logging season; and

(3) Implement reforestation of conifer and forage species as quickly as possible.

The action alternatives for the timber salvage will be considering the salvage of an estimated 90 million board feet of timber covering approximately 18,000 acres. Ponderosa pine is the predominant (90%) fire killed timber species, and is subject to a high loss of economic and resource value (30 to 50% by mid summer 1993), due to blue stain fungus. Expediting economic and resource value recovery of the ponderosa pine is critical to maximize:

1. Utilization of the raw material before it deteriorates.

2. Economic value to support local and regional economies.

3. Timber sale receipts for the greatest return to the Federal and County Governments, and sufficient funds derived from the timber sale receipts to pay for area recovery projects in addition to reforestation.

The environmental analysis also supports the need to complete the greatest amount of harvest possible during the 1993 winter logging season. Logging over sufficiently frozen, snow covered soils has proven to be an effective means of diminishing impacts on soil and other resources, resulting in greater protection of those resources. Normally timber sales have two or more winter logging seasons. In the case of Lone Pine fire salvage, the second winter logging season would see a large loss of economic and timber resource value (50% or more). A delay beyond the 1993 winter logging season will compress logging activities into the less desirable spring and summer months.

Reforestation of the fire area is crucial to it's recovery. Conifers and forage need to be re-established early on to begin the process of returning the area to the desired future condition, and to provide critical hiding/thermal cover and forage for mule deer and other wildlife. The fire severely damaged important winter range and fawning habitat. This important habitat needs to be rehabilitated as soon as possible. The ground is presently in a prime condition for reforestation. Conifer and forage species have their best chance for survival before the inevitable competing vegetation becomes established.

Surplus conifer and forage seedlings have been located, and are available for planting in the spring of 1993. In order to utilize the available seedlings, planting areas must be logged prior to the spring planting season. The optimum situation for reforestation in the Lone Pine Fire Area, is completion of harvest over a sufficient number of acres, to utilize as much of the available seedlings as possible in the 1993 spring planting season.

Other projects planned for the burned area include:

—Soil and water protection and improvement (grass seedings, straw check dams, road drain dip construction).

—Interpretation and education opportunities for the public of fire related management activities (interpretation signs and turnout areas)

—Wildlife habitat improvement projects (regeneration of Klamath Plum, Mountain Mahogany planting, aspen stand protection, water guzzlers, regeneration of woody shrug species, and removal of burned fencing).

—Sensitive plant enhancement (22 acres).

In summary, the reasons for exempting the Lone Pine Recovery Projects from administrative appeal are:

1. To expedite economic and resource value recovery of the fire killed ponderosa pine, to avoid deterioration of it's resource and economic value as a result of blue stain fungus.

2. To complete the greatest amount of harvest possible during the 1993 winter logging season to diminish impacts on soil and other resource values.

3. To implement reforestation of conifer and forage seedlings in the 1993 spring planting season, to utilize available surplus seedlings, begin recovery of the fire area toward the desired future condition, and re-establish critical cover and forage vegetation for mule deer and other wildlife species.

The environmental analysis of the Lone Pine Recovery Project is nearly completed. The project and accompanying work in designed to accomplish the objective as quickly as possible and minimize the amount of economic and resource value lost. To expedite these recovery projects, they are exempted from appeal (36 CFR part 217). Under this Regulation the following is exempt from appeal:

> Decisions related to rehabilitation of National Forest System lands and recovery of forest resources resulting from natural disasters or other natural phenomena, such as wildfires * * * when the Regional Forester * * * determines and gives notice in the **Federal Register** that good cause exists to exempt such decisions from review under this part.

After publication of this notice in the **Federal Register**, the Decision Notice for the Lone Pine Recovery Project Timber Salvage and Connected Activities and Decision Memos for Soil and Water Protection and Improvement, Fire Interpretation, Wildlife Habitat Improvement, and Sensitive Plant Enhancement may be signed by the Winema Forest Supervisor. Therefore, these projects will not be subject to review under 36 CFR part 217.

Dated: December 7, 1992.

Richard A. Ferraro,

Deputy Regional Forester.

BILLING CODE 3410-11-M

DEPARTMENT OF COMMERCE

Agency Form Under Review by the Office of Management and Budget

DOC has submitted to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

Agency: Bureau of the Census.

Title: Survey of Technology: Prevalence and Plans for Use.

Form Number(s): SMT–1.

Agency Approval Number: None.

Type of Request: New collection.

Burden: 2,500 hours.

Number of Respondents: 10,000.

Avg Hours Per Response: 15 minutes.

Needs and Uses: The Bureau of the Census will conduct the Survey of Technology: Prevalence and Plans for Use to measure patterns of use and diffusion of advanced manufacturing technologies. The Survey of Manufacturing Technology, conducted in 1988, provided valuable data on the diffusion of advanced technology as well as the characteristics of the establishments that incorporate technologically advanced equipment in their operations. Using data gathered in this survey, Census will evaluate the extent to which the rate of technology usage has changed over time and will determine the factors that influence decisions to acquire advanced technology. The International Trade Administration will use the data in comparing domestic manufacturers' level of technology to that of other countries as well as in appraising charges of unfair trade practices. The Department of Defense (DOD) will use the information to measure the mobilization capabilities and flexibility of our manufacturing industries. In addition, the DOD and the National Institute of Standards and Technology will use the data to more efficiently allocate resources from their technology demonstration and transfer programs.

Affected Public: Business or other for profit organizations.

Frequency: Triennially.
Respondent's Obligation: Mandatory.
OMB Desk Officer: Maria Gonzalez, (202) 395–7313.

Copies of the above information collection proposal can be obtained by calling or writing Edward Michals, DOC Forms Clearance Officer, (202) 482–3271, Department of Commerce, room 5312, 14th and Constitution Avenue, NW, Washington, DC 20230.

Written comments and recommendations for the proposed information collection should be sent to Maria Gonzalez, OMB Desk Officer, room 3208, New Executive Office Building, Washington, DC 20503.

Dated: December 8, 1992.

Edward Michals,

Departmental Forms Clearance Officer, Office of Management and Organization.

Antifriction Bearings (Other Than Tapered Roller Bearings) and Parts Thereof From France, Germany, Italy, Japan, Sweden, and the United Kingdom; Amendment to Final Results of Antidumping Duty Administrative Reviews

AGENCY: International Trade Administration/Import Administration, Department of Commerce.

ACTION: Notice of Amendment to final results of antidumping duty administrative reviews.

SUMMARY: On June 24, 1992, the Department of Commerce published the final results of its 1990–91 administrative reviews of the antidumping duty orders on antifriction bearings (other than tapered roller bearings) and parts thereof, from France, Germany, Italy, Japan, Romania, Singapore, Sweden, Thailand, and the United Kingdom. The classes or kinds of merchandise covered by these reviews were ball bearings and parts thereof, cylindrical roller bearings and parts thereof, and spherical plain bearings and parts thereof. The reviews covered 63 manufacturers/exporters and the period May 1, 1990 through April 30, 1991. Based on the correction of clerical errors, we have changed the margins for ball bearings for 17 companies, and for cylindrical roller bearings for one company.

EFFECTIVE DATE: December 11, 1992.

FOR FURTHER INFORMATION CONTACT: Richard Rimlinger or Bernard Carreau, Office of Antidumping Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377–4733.

SUPPLEMENTARY INFORMATION:

Background

On June 24, 1992, the Department of Commerce (the Department) published in the **Federal Register** (57 FR 28360) the final results of its administrative reviews of the antidumping duty orders on antifriction bearings (other than tapered rolled bearings) and parts thereof, from France, Germany, Italy, Japan, Romania, Singapore, Sweden, Thailand, and the United Kingdom. The classes or kinds of merchandise covered by these reviews were ball bearings and parts thereof (BBs), cylindrical roller bearings and parts thereof (CRBs), and spherical plain bearings and parts thereof (SPBs). The reviews covered 63 manufacturers/exporters and the period May 1, 1990 through April 30, 1991.

After publication of our final results, we received in a timely fashion allegations of clerical errors from the petitioner, the Torrington Company, and from several respondents: Barden, FAG, FiatAvio, IJK, INA, Koyo, MBB, NSK, Pratt & Whitney, SKF, and SNR. In most instances, we agree with the allegations and have made corrections where appropriate.

On July 24, 1992, the Department published in the **Federal Register** (57 FR 32969) an amendment to the final results of these administrative reviews. However, because Federal-Mogul Corporation, a domestic interested party, and NTN Corporation, a Japanese exporter, had each filed a summons at the Court of International Trade (CIT), we did not issue clerical error corrections with respect to BBs from France, Germany, Italy, Japan, Sweden and the United Kingdom, as well as CRBs from Japan at that time. In accordance with *Zenith Elec. Corp.* v. *United States*, 699 F.Supp 296 (CIT 1988), *Aff'd*, 884 F.2d 556 (Fed. Cir. 1989), the Department could not automatically correct ministerial errors made in an administrative review once the court's exclusive jurisdiction had been invoked.

On November 23, 1992, the CIT granted the Department leave to correct the clerical errors for those countries and classes or kinds of merchandise under the court's jurisdiction.

Amended Final Results of Review

The Department inadvertantly excluded the word "not" from the response to Comment 20 found at the top of the first column on 57 FR 28418. The second sentence in the Department's response should read, "However, we agree with Torrington that NSK's early payment discounts or distributor incentives are *not* included as expenses in its COP data."

In its calculations of dumping margins, the Department corrected ministerial errors concerning the following:

France

For Pratt & Whitney, we corrected the application of a level of trade adjustment to home market unit prices that were adjusted for discounts and rebates rather than to Pratt & Whitney's gross unit price.

For SKF, we corrected home market commissions that were set to zero and treated warranty and technical service expenses as direct expenses.

For SNR, we eliminated the double-counting of commissions and U.S. inland freight expenses, corrected a typographical error in connection with domestic inland insurance and implemented a variable for physical differences in merchandise.

Germany

For FAG, we eliminated home market family matches where all sales were below cost, corrected the setting of some indirect selling expenses to zero and eliminated the addition of imputed credit costs and inventory carrying costs to cost of production for the home market cost test. We also eliminated adjustments for differences in merchandise and corrected the failure to include home market inventory carrying costs for some constructed value comparisons.

For Pratt & Whitney, we corrected the application of a level of trade adjustment to home market unit prices that were adjusted for discounts and rebates rather than to Pratt & Whitney's gross unit price.

For SKF, we subtracted (rather than added) a billing adjustment from indirect selling expenses and deleted the billing adjustment from adjusted home market price when applying the sales below cost test. We also corrected the treatment of warranty and technical service expenses as both direct and indirect expenses by treating them as direct expenses.

Italy

For FAG, we corrected the inclusion of inventory carrying costs and credit expenses in cost of production, the application of an adjustment for differences in merchandise to constructed value comparisons, the exclusion of home market indirect

selling expenses from constructed value margin calculations and the double-counting of inventory write-offs in calculating cost of production.

For SKF, we subtracted (rather than added) a billing adjustment from indirect selling expenses and deleted the billing adjustment from adjusted home market price when applying the sales below cost test. We also corrected the treatment of warranty and technical service expenses as both direct and indirect expenses by treating them as direct expenses.

Japan

For IJK, we corrected the calculation of constructed values that used purchase prices that were incorrect by a factor of 100 due to a computer tape formatting error. We also corrected the failure to apply the 20 percent difference in merchandise "cap" to IJK's transactions.

For Koyo, we corrected the failure to apply the intended best information available for U.S. sales for which Koyo failed to provide cost of production data for matching home market sales.

For Nachi, we corrected the failure to apply the ten percent minimum for general expenses and eight percent minimum for profit when calculating constructed value.

For NSK (ball bearings), we corrected the basing of presale U.S. inland freight expenses on an incorrect price, the exclusion of home market indirect selling expenses from the appropriate variable, the placement of consecutive plus signs in the string of variables used to determine United States direct selling expenses, the treatment of NSK's inventory carrying costs and technical service expenses as direct selling expenses rather than indirect selling expenses, the failure to convert presale inland freight expenses for purchase price sales from yen to dollars and the failure to apply the 20 percent difference in merchandise "cap" to NSK's transactions.

For NSK (cylindrical roller bearings), we corrected the exclusion of home market indirect selling expenses from the appropriate variable, the placement of consecutive plus signs in the string of variables used to determine United States direct selling expenses, the treatment of NSK's inventory carrying costs and technical service expenses as direct selling expenses rather than indirect selling expenses, and the failure to apply the 20 percent difference in merchandise "cap" to NSK's transactions.

For NTN, we corrected the failure to convert the price used to calculate the level of trade adjustment from yen to dollars and the failure to apply the ten percent minimum general expenses in calculating constructed value.

Sweden

For SKF, we corrected the treatment of some selling expenses as if reported in Swedish kronor rather than the correct currency of Deutsche marks and the treatment of warranty and technical service expenses as both direct and indirect expenses.

United Kingdom

For Barden, we corrected the addition of the value-added tax percentage to U.S. and home market prices rather than the addition of the result of multiplying the tax percentage by the U.S. price.

For FAG, we corrected the addition of the value-added tax percentage to U.S. and home market prices rather than the addition of the result of multiplying the tax percentage by the U.S. price. We also corrected the failure to apply the 20 percent difference in merchandise "cap" and the failure to deduct commissions from U.S. price.

For SKF, we corrected the double-counting of movement expenses, the treatment of warranty and technical service expenses as both direct and indirect expenses, the subtraction of "other discounts" twice from U.S. price and the addition of the value-added tax percentage to U.S. and home market prices rather than the addition of the result of multiplying the tax percentage by the U.S. price.

The Department also determined that there was no clerical error made with respect to FAG Cuscinetti's home market inventory carrying costs. Therefore, no correction was made.

As a result of our corrections of clerical errors, we have determined the following weighted-average margins to exist for the period May 1, 1990 through April 30, 1991:

Country	Company	Class or kind	Rate
France	Pratt & Whitney.	BBs	8.37
	SKF	BBs	8.37
	SNR	BBs	15.96
	All others	BBs	15.96
Germany	FAG	BBs	17.24
	Pratt & Whitney.	BBs	11.10
	SKF	BBs	11.44
	All others	CRBs	23.52
Italy	FAG	BBs	4.94
	SKF	BBs	9.31
Japan	IJK	BBs	1.43
	Koyo	BBs	6.85
	Nachi	BBs	7.66
	NSK	BBs	4.62
		CRBs	12.69
	NTN	BBs	2.26
Sweden	SKF	BBs	7.81
	All others	BBs	7.81
United Kingdom	Barden	BBs	0.74
	FAG	BBs	41.99
	SKF	BBs	8.41
	All others	BBs	41.99

Based upon these rates, the Department will instruct the Customs Service to collect cash deposits of estimated antidumping duties and to assess antidumping duties on all appropriate entries in accordance with the procedures discussed in the final results of these reviews (57 FR 28361).

These deposit requirements are effective for all shipments of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice and shall remain in effect until publication of the final results of the next administrative review.

This notice also serves as a reminder to importers of their responsibility under 19 CFR 353.26 to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

This notice is published in accordance with section 751(f) of the Tariff Act of 1930, as amended (19 U.S.C. 1675(f)) and 19 CFR 353.28(c).

Dated: December 8, 1992.

Rolf Th. Lundberg, Jr.,

Deputy Assistant Secretary for Import Administration.

BILLING CODE 3510-DS-M

National Institute of Standards and Technology

[Docket No. 921074-2274]

RIN 0693-AB11

Two Proposed Federal Information Processing Standards; Integration Definition for Function Modeling; Integration Definition Information Modeling

AGENCY: National Institute of Standards and Technology (NIST), Commerce.

ACTION: Notice; Request for comments.

SUMMARY: The purpose of this notice is to announce two proposed Federal

Information Processing Standards (FIPS) for software modeling techniques. These proposed standards will enable Federal agencies to improve information resources management through the development and acquisition of vendor-independent and application-independent systems for modeling information system functions and for analyzing data resources.

The proposed FIPS for Integration Definition for Function Modeling (IDEF0) is based on the Air Force Wright Aeronautical Laboratories Integrated Computer Aided Manufacturing (ICAM) Architecture, Part II, Volume IV—Function Modeling Manual. This standard describes the IDEF0 modeling language (semantics and syntax) and associated rules and techniques for developing structured graphical representations of a system or enterprise.

The proposed FIPS for Integration Definition Modeling (IDEF1X) is based on the Integration Information Support System (IISS), Volume V—Common Data Model Subsystem, Part 4—Information Modeling Manual—IDEF1 Extended, 1. This standard describes the IDEF1X modeling language (semantic and syntax) and associated rules and techniques, for developing a logical model of data.

Prior to the submission of these proposed FIPS to the Secretary of Commerce for review and approval, it is essential to assure that consideration is given to the needs and views of manufacturers, the public, and state and local governments. The purpose of this notice is to solicit such views.

The proposed standards contain two sections: (1) An announcement section, which provides information concerning the applicability, implementation, and maintenance of the standards; and (2) a specifications section which deals with the technical requirements of the standards. Only the announcement sections of the standard are provided in this notice. Interested parties may obtain copies of the technical specifications from the Standards Processing Coordinator (ADP), National Institute of Standards Processing coordinator (ADP), National Institute of Standards and Technology, Technology Building, room B–64, Gaithersburg, MD 20899, telephone (301) 975–2816.

DATES: Comments on these proposed FIPS must be received on or before March 15, 1992.

ADDRESSES: Written comments concerning these proposed FIPS should be sent to: Director, Computer Systems Laboratory, ATTN: Proposed FIPS for IDEF0 and IDEF1X, Technology Building, room B–154, National Institute of Standards and Technology, Gaithersburg, MD 20899.

Written comments concerning these proposed FIPS will be made part of the public record and will be made available for inspection and copying in the Central Reference and Records Inspection Facility, room 6020, Herbert C. Hoover Building, 14th Street between Pennsylvania and Constitution Avenues, NW., Washington, DC 20230.

FOR FURTHER INFORMATION CONTACT: Ms. Mary Gunn, National Institute of Standards and Technology, Gaithersburg, MD 20899, (301) 975–3260.

John W. Lyons,
Director.
Dated: December 8, 1992.

Draft Federal Information Processing Standards Publication _____

(Date)

Announcing the Standard for Integration Definition for Function Modeling Manual (IDEF0)

Federal Information Processing Standards Publications (FIPS PUBS) are issued by the National Institute of Standards and Technology after approval by the Secretary of Commerce pursuant to Section 111(d) of the Federal Property and Administrative Services Act of 1949 as amended by the Computer Security Act of 1987, Public Law 100–235.

1. Name of Standard. Integration Definition for Function Modeling (IDEF0).

2. Category of Standard. Software Standard, Modeling Techniques.

3. Explanation. This publication announces the adoption of the Integration Definition Function Modeling (IDEF0) as a Federal Information Processing Standard (FIPS). This standard is based on the Air Force Wright Aeronautical Laboratories Integrated Computer-Aided Manufacturing (ICAM) Architecture, Part II, Volume IV–Function Modeling Manual (IDEF0), June 1981.

This standard describes the IDEF0 modeling language (semantics and syntax), and associated rules and techniques, for developing structured graphical representations of a system or enterprise. Use of this standard permits the construction of models comprising system functions (activities, actions, processes, operations), functional relationships, and data (information or objects) that support systems integration.

This standard is the reference authority for use by system or enterprise modelers required to utilize the IDEF0 modeling technique, by implementors in developing tools for implementing this technique, and by other computer professionals in understanding the precise syntactic and semantic rules of the standard.

4. Approving Authority. Secretary of Commerce.

5. Maintenance Agency. Department of Commerce, National Institute of Standards and Technology, Computer Systems Laboratory.

6. Cross Index.

a. ICAM Architecture Part II-Volume IV-Function Modeling Manual (IDEF0), AFWAL–TR–81–4023, Materials Laboratory, Air Force Wright Aeronautical Laboratories, Air Force Systems Command, Wright-Patterson Air Force Base, Ohio 45433, June 1981.

7. Related Documents

a. Federal Information Resources Management Regulations Subpart 201.20.303, Standards, and Subpart 201.39.1002, Federal Standards.

b. Integrated Information Support System (IISS), Volume V—Common Data Model Subsystem, Part 4—Information Modeling Manual—IDEF1 Extended, December 1985.

c. ICAM Architecture Part II, Volume V—Information Modeling Manual (IDEF1), AFWAL–TR–81–4023, Materials Laboratory, Air Force Wright Aeronautical Laboratories, Air Force Systems Command, Wright-Patterson Air Force Base, Ohio 45433, June 1981.

d. ICAM Configuration Management, Volume II—ICAM Documentation Standards for Systems Development Methodology (SDM), AFWAL–TR–82–4157, Air Force Systems Command, Wright-Patterson Air Force Base, Ohio 45433, October 1983.

8. Objectives. The primary objectives of this standard are:

a. To provide a means for completely and consistently modeling the functions (activities, actions, processes, operations) required by a system or enterprise, and the functional relationships and data (information or objects) that support the integration of those functions;

b. To provide a modeling technique which is independent of Computer-Aided Software Engineering (CASE) methods or tools, but which can be used in conjunction with those methods or tools;

c. To provide a modeling technique that has the following characteristics:

(1) Generic (for analysis of systems of varying purpose, scope and complexity);

(2) Rigorous and precise (for production of correct, usable models);

(3) Concise (to facilitate understanding, communication, consensus and validation);

(4) Conceptual (for representation of functional requirements rather than physical or organizational implementations);

(5) Flexible (to support the full life cycle of a project).

9. Applicability.

Implementations of this standard are required in information resource management applications that are either developed or acquired for Federal Government use. Such applications include:

a. Using a modeling technique for the analysis, development, re-engineering, or integration of information systems;

b. Incorporating a system or enterprise modeling technique into a systems analysis or software engineering methodology.

The use of this standard is strongly recommended for all projects requiring a standard means of defining and analyzing the functions and associated data within an organization.

The specifications of this standard are applicable when system or enterprise modeling techniques are applied to the following:

a. Projects requiring IDEF0 as the modeling technique;

b. Development of automated software tools implementing the IDEF0 modeling technique.

The specifications of this standard are not applicable to those projects requiring a function modeling technique other than IDEF0.

Nonstandard features of the IDEF0 technique should be used only when the needed operation or function cannot reasonably be implemented with the standard features alone. Although nonstandard features can be very useful, it should be recognized that the use of these or any other nonstandard elements may make the integration of models more difficult and costly.

10. Specifications. This standard adopts the Integration Definition for Function Modeling (IDEF0) as a Federal Information Processing Standard (FIPS).

11. Implementation. The implementation of this standard involves two areas of consideration: acquisition of implementations and interpretation of the standard.

11.1 Acquisition of IDEF0 Implementations. This publication (FIPS XXX) is effective XXXX XX, 199X (six months after date of publication of the final document in the Federal Register). For Federal acquisitions after this date, projects utilizing the IDEF0 function modeling technique, or software implementing the IDEF0 modeling technique, should conform to FIPS XXX. Conformance to this standard should be considered whether the project or software utilizing the IDEF0 modeling technique is acquired as part of an ADP system procurement, acquired by separate procurement, used under an ADP leasing arrangement, or specified for use in contracts for programming services.

A transition period provides time for industry to develop products conforming to this standard. The transition period begins on the effective date and continues for one (1) year thereafter. The provisions of this publication apply to orders placed after the date of this publication; however, utilizing a function modeling technique that does not conform to this standard may be permitted during the transition period.

11.2 Interpretation of this FIPS. NIST provides for the resolution of questions regarding the implementation and applicability of this FIPS. All questions concerning the interpretation of this standard should be addressed to: Director, Computer Systems Laboratory, Attn: FIPS IDEF0 Interpretation, National Institute of Standards and Technology, Gaithersburg, MD 20899.

12. Waivers. Under certain exceptional circumstances, the heads of Federal departments and agencies may approve waivers to Federal Information Processing Standards (FIPS). The head of such agencies may redelegate such authority only to a senior official designated pursuant to section 3506(b) of Title 44, United States Code. Requests for waivers shall be granted only when:

a. Compliance with a standard would adversely affect the accomplishment of the mission of an operator of a Federal computer system, or

b. Compliance with a standard would cause a major adverse financial impact on the operator which is not offset by government-wide savings.

Agency heads may approve requests for waivers only by a written decision which explains the basis upon which the agency head made the required findings(s). A copy of each such decision, with procurement sensitive or classified portions clearly identified, shall be sent to: Director, Computer Systems Laboratory, Attn: FIPS Waiver Decisions, National Institute of Standards and Technology, Gaithersburg, MD 20899.

In addition, notice of each waiver granted and each delegation of authority to approve waivers shall be sent promptly to the Committee on Government Operations of the House of Representatives and the Committee of Government Affairs of the Senate and shall be published promptly in the Federal Register.

When the determination on a waiver request applies to the procurement of equipment and/or services, a notice of the waiver determination must be published in the *Commerce Business Daily* as a part of the notice solicitation for offers of an acquisition or, if the waiver determination is made after that notice is published, by amendment of such notice.

A copy of the waiver request, any supporting documents, the document approving the waiver request and any supporting and accompanying documents, with such deletions as the agency is authorized and decides to make under 5 U.S.C. Sec. 552(b), shall be part of the procurement documentation and retained by the agency.

Draft Federal Information Processing Standards Publication _____

(Date)

Announcing the Standard for Integration Definition for Function Modeling (IDEF1X)

Federal Information Processing Standards Publications (FIPS PUBS) are issued by the National Institute of Standards and Technology after approval by the Secretary of Commerce pursuant to Section 111(d) of the Federal Property and Administrative Services Act of 1949 as amended by the Computer Security Act of 1987, Public Law 100–235.

1. Name of Standard. Integration Definition for Information Modeling (IDEF1X).

2. Category of Standard. Software Standard, Modeling Techniques.

3. Explanation. This publication announces the adoption of the Integration Definition for Information Modeling (IDEF1X) as a Federal Information Processing Standard (FIPS). This standard is based on the Integration Information Support System (IISS), Volume V—Common Data Model Subsystem, Part 4—Information Modeling Manual—IDEF1 Extended, 1 (IDEF1X) November 1985.

This standard describes the IDEF1X modeling language (semantics and syntax) and associated rules and techniques, for developing a logical model of data. IDEF1X is used to produce a graphical information model which represents the structure and semantics of information within an environment or system. Use of this standard permits the construction of semantic data models which may serve to support the management of data as a resource, the integration of information systems, and the building of computer databases.

This standard is the reference authority for use by information modelers required to utilize the IDEF1X modeling technique, implementors in developing tools for implementing this technique, and other computer professionals in understanding the precise syntactic and semantic rules of the standard.

4. Approving Authority. Secretary of Commerce.

5. Maintenance Agency. Department of Commerce, National Institute of Standards and Technology, Computer Systems Laboratory.

6. Cross Index.

a. Integration Information Support System (IISS), Volume V—Common Data Model Subsystem, Part 4—Information Modeling Manual—IDEF1 Extended.

7. Related Documents.

a. Federal Information Resources Management Regulations Subpart 201.20.303, Standards, and Subpart 201.39.1002, Federal Standards.

b. ICAM Architecture Part II-Volume V—Information Modeling Manual (IDEF1), AFWAL–TR–81–4023, Materials Laboratory, Air Force Wright Aeronautical Laboratories, Air Force Systems Command, Wright-Patterson Air Force Base, Ohio 45433, June 1981.

c. ICAM Architecture Part II-Volume IV—Function Modeling Manual (IDEF0), AFWAL–TR–81–4023, Materials Laboratory, Air Force Wright Aeronautical Laboratories, Air Force Systems Command, Wright-Patterson Air Force Base, Ohio 45433, June 1981.

d. ICAM Configuration Management, Volume II—ICAM Documentation Standards for Systems Development Methodology (SDM), AFWAL–TR–82–4157, Air Force Systems Command, Wright-Patterson Air Force Base, Ohio 45433, Ohio 1983.

8. Objectives. The primary objectives of this standard are:

a. To provide a means for completely understanding and analyzing an organization's data resources;

b. To provide a common means of representing and communicating the complexity of data;

c. To provide a technique for presenting an overall view of the data required to run an enterprise;

d. To provide a means for defining an application-independent view of data which can be validated by users and transformed into a physical database design;

e. To provide a technique for deriving an integrated data definition from existing data resources.

9. Applicability. An information modeling technique is used to model data in a standard, consistent, predictable manner in order to manage it as a resource.

Implementations of this standard are required in information resource management applications that are either developed or acquired for Federal Government use. Such applications include:

a. Incorporating a data modeling technique into a methodology;

b. Using a data modeling technique to manage data as a resource;

c. Using a data modeling technique for the integration of information systems;

d. Using a data modeling technique for designing computer databases.

The use of this standard is strongly recommended for all projects requiring a standard means of defining and analyzing the data resources within an organization.

The specifications of this standard are applicable when a data modeling technique is applied to the following:

a. Projects requiring IDEF1X as the modeling technique;

b. Development of automated software tools implementing the IDEF1X modeling technique.

The specification of this standard are not applicable to those projects requiring data modeling technique other than IDEF1X.

Nonstandard features of the IDEF1X technique should be used only when the needed operation or function cannot reasonably be implemented with the standard features alone. Although nonstandard features can be very useful, it should be recognized that the use of these or any other nonstandard elements may make the integration of data models more difficult and costly.

10. Specifications. This standard adopts the Integration Definition Method for Information Modeling (IDEF1X) as a Federal Information Processing Standard (FIPS).

11. Implementation. The implementation of this standard involves two areas of consideration: acquisition of implementations and interpretation of the standard.

11.1 Acquisitions of IDEF1X Implementations. This publication (FIPS XXX) is effective XXXX XX, 199X (six months after date of publication of the final document in the **Federal Register**). Projects utilizing the IDEF1X data modeling technique, or software implementing the IDEF1X data modeling technique, acquired for Federal use after this date should conform to FIPS XXX. Conformance to this standard should be considered whether the project utilizing the IDEF1X data modeling technique is acquired as part of an ADP system procurement, acquired by separate procurement, used under an ADP leasing arrangement, or specified for use in contracts of programming services.

A transition period provides time for industry to develop products conforming to this standard. The transition period begins on the effective date and continues for one (1) year thereafter. The provisions of this publication apply to orders placed after the date of this publication; however, utilizing an IDEF1X information modeling technique that does not conform to this standard may be permitted during the transition period.

11.2 Interpretation of this FIPS. NIST provides for the resolution of questions regarding the implementation and applicability of this FIPS. All questions concerning the interpretation of IDEF1X should be addressed to: Director, Computer Systems Laboratory, Attn: FIPS IDEF1X Interpretation, National Institute of Standards and Technology, Gaithersburg, MD 20899.

12. Waivers. Under certain exceptional circumstances, the heads of Federal departments and agencies may approve waivers to Federal Information Processing Standards (FIPS). The head of such agencies may redelegate such authority only to a senior official designated pursuant to section 3506(b) of Title 44, United States Code. Requests for waivers shall be granted only when:

a. Compliance with a standard would adversely affect the accomplishment of the mission of an operator of a Federal computer system, or

b. Compliance with a standard would cause a major adverse financial impact on the operator which is not offset by governmentwide savings.

Agency heads may approve requests for waivers only by a written decision which explains the basis upon which the agency head made the required finding(s). A copy of each such decision, with procurement sensitive or classified portions clearly identified, shall be sent to: Director, Computer Systems Laboratory, Attn: FIPS Waiver Decisions, Technology Building, room B–154, National Institute of Standards and Technology, Gaithersburg, MD 20899.

In addition, notice of each waiver granted and each delegation of authority to approve waivers shall be sent promptly to the Committee on Government Operations of the House of Representatives and the Committee on Government Affairs of the Senate and shall be published promptly in the **Federal Register**.

When the determination on a waiver request applies to the procurement of equipment and/or services, a notice of

the waiver determination must be published in the Commerce Business Daily as a part of the notice of solicitation for offers of acquisition or, if the waiver determination is made after that notice is published, by amendment of such notice.

A copy of the waiver request, any supporting documents, the document approving the waiver request and any supporting and accompanying documents, with such deletions as the agency is authorized and decides to make under 5 U.S.C. Sec. 552(b), shall be part of the procurement documentation and retained by the agency.

BILLING CODE 3510-CN-M

National Institute of Standards and Technology

[Docket No. 910527-2215]

RIN 0693-AA85

Approval of Federal Information Processing Standards Publication 179, Government Network Management Profile (GNMP)

AGENCY: National Institute of Standards and Technology, Commerce.

ACTION: The purpose of this notice is to announce that the Secretary of Commerce has approved a new standard, which will be published as FIPS Publication 179.

SUMMARY: On July 31, 1991, (56 FR 36136) and August 12, 1991 (56 FR 38174) notices were published in the **Federal Register** that a Federal Information Processing Standard for GNMP was being proposed for Federal use.

The written comments submitted by interested parties and other material available to the Department relevant to this standard were reviewed by NIST. On the basis of this review, NIST recommended that the Secretary approve the standard as Federal Information Processing Standard (FIPS), and prepared a detailed justification document for the Secretary's review in support of that recommendation.

The detailed justification document which was presented to the Secretary, and which includes an analysis of the written comments received, is part of the public record and is available for inspection and copying in the Department's Central Reference and Records Inspection Facility, Room 6020, Herbert C. Hoover Building, 14th Street between Pennsylvania and Constitution Avenues, NW, Washington, DC 20230.

This FIPS contains two sections: (1) An announcement section, which provides information concerning the applicability, implementation, and maintenance of the standard, and (2) a specifications section which deals with the technical requirements of the standard. Only the announcement section of the standard is provided in this notice.

EFFECTIVE DATE: This standard is effective June 14, 1993.

ADDRESSES: Interested parties may purchase copies of this standard, including the technical specifications portion, from the National Technical Information Service (NTIS). Specific ordering information from NTIS for this standard is set out in the Where to Obtain Copies Section of the announcement portion of the standard.

FOR FURTHER INFORMATION CONTACT: Ms. Fran Nielsen, National Institute of Standards and Technology, Gaithersburg, MD 20899, telephone (301) 975-3669.

Dated: December 8, 1992.

John W. Lyons,

Director.

Federal Information Processing Standards Publication 179

(date)

Announcing the Standard for Government Network Management Profile (GNMP)

Federal Information Processing Standards Publications (FIPS PUBS) are issued by the National Institute of Standards and Technology after approval by the Secretary of Commerce pursuant to Section 111(d) of the Federal Property and Administrative Services Act of 1949 as amended by the Computer Security Act of 1987, Public Law 100-235.

1. *Name of Standard.* Government Network Management Profile (GNMP) (FIPS PUB 179).

2. *Category of Standard.* Hardware and Software Standards, Computer Network Protocols.

3. *Explanation.* This Federal Information Processing Standard adopts the Version 1.0 GNMP. The Government Network Management Profile (GNMP) specifies the common management information exchange protocol and services, specific management functions and services, and the syntax and semantics of the management information required to support monitoring and control of the network and system components and their resources.

The GNMP builds on FIPS 146-1, Government Open Systems Interconnection Profile (GOSIP), and includes the GOSIP Version 2.0 by reference. The GOSIP specifies lower layers protocols and three applications that support general network management operations. Future versions of the GNMP will add network management functions and services for GOSIP-compliant end systems and intermediate systems. The GNMP and GOSIP are interrelated and will cross-reference each other as required.

The primary source of specifications in the Version 1.0 GNMP is part 18 of the OIW Stable Implementation Agreements, June 1992, developed by the Open Systems Environment Implementors Workshop sponsored by NIST and IEEE Computer Society. This source provides implementation specifications for network management based on the service and protocol standards issued by the ISO.

4. *Approving Authority.* Secretary of Commerce.

5. *Maintenance Agency.* U.S. Department of Commerce, National Institute of Standards and Technology, Computer Systems Laboratory.

6. *Cross Index.*

a. NBS Special Publication 500-202, Stable Implementation Agreements for Open Systems Interconnection Protocols, Version 5, Edition 1, NIST Workshop for Implementors of Open Systems Environment, June 1992.

b. FIPS PUB 146-1, Government Open Systems Interconnection Profile (GOSIP).

7. *Related Documents.* Related documents are listed in the Reference Section of the GNMP document.

8. *Objectives.* The primary objectives of this standard are:

—to achieve interconnection and interoperability of computers and systems that are acquired from different manufacturers in an open systems environment;

—to reduce the costs of computer network systems by increasing alternative sources of supply;

—to facilitate the use of advanced technology by the Federal Government;

—to stimulate the development of commercial products compatible with Open Systems Interconnection (OSI) standards.

9. *Specifications.* GNMP (affixed).

10. *Applicability.* GNMP shall be used by Federal Government agencies when acquiring network management functions and services for computer and communications systems and networks.

11. *Implementation.* This standard is effective June 14, 1993. For a period of 18 months after the effective date, agencies are permitted to acquire

alternative network management functions and services which provide equivalent functionality to this standard. Agencies are encouraged to use this standard for solicitations and contracts for new network management functions and services to be acquired after the effective date. This standard is compulsory and binding for use in all solicitations and contracts for new network management functions and services to be acquired 18 months after the effective date. Additional management support functions will be added to GNMP as implementation specifications for these functions are developed by the NIST Workshop for Implementors of OSI. For a period of 18 months after these new functions are included in GNMP, agencies are permitted to acquire alternative functions and services which provide equivalent functionality. After the 18-month period, the new functions and services should be cited in solicitations and contracts when systems to be acquired provide equivalent functionality to the protocols defined in the GNMP document.

12. *Waivers.* Under certain exceptional circumstances, the heads of Federal departments and agencies may approve waivers to Federal Information Processing Standards (FIPS). The head of such agency may redelegate such authority only to a senior official designated pursuant to section 3506(b) of Title 44, U.S. Code. Waivers shall be granted only when:

a. Compliance with a standard would adversely affect the accomplishment of the mission of an operator of a Federal computer system, or

b. Cause a major adverse financial impact on the operator which is not offset by Governmentwide savings.

Agency heads may act upon a written waiver request containing the information detailed above. Agency heads may also act without a written waiver request when they determine that conditions for meeting the standard cannot be met. Agency heads may approve waivers only by a written decision which explains the basis on which the agency head made the required finding(s). A copy of each such decision, with procurement sensitive or classified portions clearly identified, shall be sent to: Director, National Institute of Standards and Technology; ATTN: FIPS Waiver Decisions, Technology Building, room B–154; Gaithersburg, MD 20899.

In addition, notice of each waiver granted and each delegation of authority to approve waivers shall be sent promptly to the Committee on Government Operations of the House Representatives and the Committee on Governmental Affairs of the Senate and shall be published promptly in the **Federal Register**.

When the determination on a waiver applies to the procurement of equipment and/or services, a notice of the waiver determination must be published in the *Commerce Business Daily* as a part of the notice of solicitation for offer of an acquisition or, if the waiver determination is made after that notice is published, by amendment to such notice.

A copy of the waiver request, any supporting document, the document approving the waiver and any supporting and accompanying documents, with such deletions as the agency is authorized and decides to make under 5 U.S.C. Sec. 552(b), shall be part of the procurement documentation and retained by the agency

13. *Special Information.* The GNMP is being developed in phases. Version 1.0 GNMP specifies the initial phase of the GNMP. Additional management capabilities and managed objects will be included in subsequent releases of the profile. Eventually, as the NM standards all reach technical maturity, the GNMP will embrace the full set of management functionality.

14. *Where to Obtain Copies.* Copies of this publication are for sale by the National Technical Information Service (NTIS), U.S. Department of Commerce, Springfield, VA 22161. When ordering, refer to Federal Information Processing Standards Publication 179 (FIPSPUB179), and title. Specify microfiche if desired. Payment may be made by check, money order, or NTIS deposit account.

[FR Doc. 92–30313 Filed 12–11–92; 8:45 am]

BILLING CODE 3510–CN–M

National Oceanic and Atmospheric Administration

Monterey Bay National Marine Sanctuary: Petition to Suspend, Reconsider and Repeal Those Portions of the Monterey Bay National Marine Sanctuary Regulations Restricting the Use of Motorized Personal Water Craft

AGENCY: Office of Ocean and Coastal Resource Management (OCRM), National Ocean Service (NOS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of receipt of a petition.

SUMMARY: NOS has received a petition, pursuant to section 553(e) of the Administrative Procedure Act (5 U.S.C. 551 *et seq.*), from the Personal Watercraft Industry Association to suspend, reconsider and repeal those portions of the Monterey Bay National Marine Sanctuary regulations that restrict the use of motorized personal water craft to four areas within the Sanctuary.

FOR FURTHER INFORMATION CONTACT: Rafael V. Lopez, Pacific Regional Manager, Sanctuaries and Reserves Division, Office of Ocean and Coastal Resource Management, National Ocean Service, NOAA, 1825 Connecticut Avenue, NW., suite 714, Washington, DC 20235, (202/606–4126).

SUPPLEMENTARY INFORMATION: On September 18, 1992, NOAA published the final rule the Monterey Bay National Marine Sanctuary (57 FR 43310). The rule will become effective on January 1, 1993 (57 FR 55444, November 25, 1992). On November 17, 1992, NOAA received a petition from the Personal Watercraft Industry Association, whose member companies include Arctco, Inc., Kawasaki Motors Corp., U.S.A., Yamaha Motor Corp., U.S.A., WetJet International Ltd., and SurfJet International Ltd., requesting that NOAA: "Initiate rulemaking proceedings to reconsider and repeal those provisions of the recently-promulgated rule which restrict only the use of personal watercraft within the Monterey Sanctuary; Expressly acknowledge that (1) there is currently no basis for distinguishing between personal watercraft and other motorized vehicles with respect to any potential threat posed to Sanctuary resources, and (2) there is no basis for concluding that personal watercraft pose any actual threat to the Sanctuary; and Act expeditiously to suspend the application of the recently-promulgated personal watercraft restrictions, pending completion of the requested rulemaking proceedings." NOS is reviewing the petition and will notify the petitioner of its decision to proceed or not to proceed with the rulemaking suggested by the petition within 120 days of receipt of the petition. A notice of NOS's decision will also be published in the **Federal Register**.

If NOS decides not to open rulemaking proceedings, NOS will provide the petitioner with a brief statement of grounds for its decision. If NOS decides to open rulemaking proceedings, then the public will be provided with an opportunity to comment on the proposed rulemaking in accordance with the procedures of the Administrative Procedure Act. Public comments are not requested at this time.

Dated: December 9, 1992.

W. Stanley Wilson,

Assistant Administrator for Ocean Services and Coastal Zone Management.

BILLING CODE 3510-08-M

Marine Mammals; Correction

AGENCY: National Marine Fisheries Service, NOAA, Commerce.

ACTION: Notice of correction regarding application for scientific research permit (P523).

SUMMARY: This notice revises the fifth paragraph of a notice previously published in the **Federal Register** on November 20, 1992 (57 FR 54771) as follows:

On page 54771, column 2, the first full sentence is revised to read: "The requested animals may be approached and/or presented with sound an average of two times each annually, with some animals possibly approached or presented with sound up to four times each annually, in carrying out photo-identification and acoustic playback studies."

Dated: December 8, 1992.

Michael F. Tillman,

Acting Director, Office of Protected Resources, National Marine Fisheries Service.

[FR Doc. 92-30231 Filed 12-11-92; 8:45 am]

BILLING CODE 3510-22-M

Marine Mammals; Permits; Correction

AGENCY: National Marine Fisheries Service, (NMFS), NOAA, Commerce.

ACTION: Notice of correction; application for permit (P278D).

SUMMARY: This notice revises the fourth paragraph, second sentence, of a notice previously published in the **Federal Register** November 16, 1992 (57 FR 54051). The second sentence is revised to read: "An unspecified number of the listed species, in addition to Steller sea lions (*Eumetopias jubatus*) and Guadalupe fur seals (*Arctocephalus townsendi*), may be unintentionally harassed during ground and aerial surveys."

Dated: December 8, 1992.

Michael F. Tillman,

Acting Director, Office of Protected Resources, National Marine Fisheries Service.

BILLING CODE 3510-22-M

Office of the General Counsel

[Docket No. 920896-2196]

Commercial Law Development Program for Central and Eastern Europe ("CLDP")

AGENCY: Office of the General Counsel, Commerce.

ACTION: Notice of the availability of funds for the CLDP Commercial Law Resident Advisor Program in Central and Eastern Europe, including the Baltic States.

SUMMARY: The Department of Commerce ("Department") Office of the General Counsel established the Commercial Law Development Program for Central and Eastern Europe ("CLDP") in January 1992, as part of the Administration's ongoing efforts to assist Central and Eastern Europe and the Baltic States in the development of a commercial infrastructure consistent with free market principles. The CLDP provides technical legal assistance to the governments of the region with respect to contract law, commercial codes, foreign and domestic investment law, commercial dispute resolution, real property rights, intellectual property rights and public procurement.

In response to the region's governments' numerous requests for U.S. on-site technical assistance with commercial law issues, CLDP will arrange for assignments (not to exceed six months) in the region of qualified U.S. legal advisors, principally from the U.S. Government, with expertise in foreign and or domestic investment law, contracts, dispute resolution, commercial codes, real or intellectual property, government procurement, or related areas of commercial law.

The first objective of CLDP's Resident Advisor Program will be the placement of resident advisors in its priority countries, which currently are Bulgaria, Poland, Lithuania, and Albania, to assist in the development of government procurement procedures, the drafting and implementation of commercial laws and regulations, and the negotiation and implementation of international economic agreements. CLDP will consider placing resident advisors in the other countries of the region after it has addressed the technical assistance needs of its priority countries. The CLDP will rely principally on government attorneys to meet the program's goals. The program reserves the right to invite or recruit Federal government attorneys to participate under non-competitive procedures.

In-country placements of U.S. commercial law advisors will range from approximately one to six month periods, depending upon the type of assistance requested by the Central and Eastern European governments. The goal of the CLDP Resident Advisor Program is to provide the governments of the region with quality, on-site, hands-on technical advice. CLDP will ensure that any CLDP assistance provided is tailored to meet the needs of the specific host government and that legislators, administrators, judges, and the private sector in the host country have the tools to build on the expert's assistance upon the expert's return to the U.S.

CLDP will place only persons who are committed to adequately prepare for their assignments and to complete appropriate follow-up activities. CLDP will screen the candidates for any in-country placement to ascertain whether they meet the criteria set forth in this Federal Register Notice and are available for assignment in a specific country for the length of time agreed upon by CLDP and the appropriate host ministry. CLDP will maintain a list of qualified advisors and make selections for in-country assignments as appropriate and reasonable requests are received from the region's governments. Final selection for any assignment in the region will be made by a panel of public and private experts knowledgeable about the subject of the proposed assignment.

U.S. commercial law experts selected for the Resident Advisor Program may be eligible to receive funds through cooperative agreements from the Department of Commerce to help defray the cost of placement.

DATES: Applications should be submitted no later than 3 p.m., on February 12, 1993.

ADDRESSES: Applications should be sent along with two (2) self-addressed mailing labels, to Susan K. Gurley, Deputy Director, Commercial Law Development Program, Office of the General Counsel, room 3845, U.S. Department of Commerce, Washington, DC 20230.

FOR FURTHER INFORMATION CONTACT: Susan K. Gurley, Deputy Director, Commercial Law Development Program, Office of the General Counsel, room 3845, U.S. Department of Commerce, Tel: (202) 482-5382, Fax: (202) 482-3244.

SUPPLEMENTARY INFORMATION: In addition to the program description contained in the summary, the following information also applies:

I. Funding Availability

Pursuant to sections 521, 635(b) and 632(b) of the Foreign Assistance Act of 1961, as amended (22 U.S.C. 2346, 2395(b) and 2392(b), respectively) and section (a)(1) under the heading "Assistance for Eastern Europe" of title II of the Foreign Operations, Export Financing, and Related Appropriations Act, 1991, funding for the Resident Advisor Program shall be provided by the Agency for International Development (A.I.D.). The present amount available for the in-country placement of U.S. commercial law experts is $350,000, including the funds available for placement of U.S. Government personnel, whether through the in-country placement program described herein or through other programs of the CLDP. This amount is subject to augmentation or reduction depending on the program needs.

II. Funding Instrument and Project Duration

Federal assistance will be awarded pursuant to a cooperative agreement between the Department and the recipient U.S. commercial law advisor. With funds provided by AID, the Department will reimburse experts for the roundtrip coach airfare between the U.S. and the country in which the expert is being placed upon submission to the Department of the travel invoice (Fly America act provisions apply). The recipient will be reimbursed for living expenses and incidentals according to applicable Government Travel regulations. In-country assignments are not to exceed 6 months. The Department of Commerce Travel Regulations suggest that if an advisor is placed in-country for more than 30 days that person make reasonable efforts to obtain lodging at weekly or monthly rates. The Department also will reimburse the recipient for pre-approved instructional materials. The Department will provide cash advances for such expenses as are reasonable and appropriate under the Federal Travel Regulations. All awards are expected to be made prior to March 31, 1993. Recipients are subject to Federal laws and Federal and Departmental policies and procedures applicable to financial assistance.

III. Request for Applications

To obtain a copy of the Competitive Application Kit, please send a written request with two self-addressed mailing labels to Susan K. Gurley, Commercial Law Development Program, room 3845, U.S. Department of Commerce, 14th Street and Constitution Ave., NW., Washington, DC 20230. Only one copy of the Application Kit will be provided to each individual, but Application Kits may be reproduced by the requester.

A signed original and three copies of the Application (Standard Form 424 (Rev. 488)) and supplemental materials must be submitted to the CLDP at the address designated in the Application Kit in order for the application to be considered. Awards are expected to be made on a rolling basis. All awards are expected to be made prior to March 31, 1993.

IV. Eligibility Requirements

Eligible for financial assistance through the CLDP Resident Advisor Program in Central and Eastern Europe are persons licensed to practice law in the U.S. including individual lawyers from private law firms or companies, not-for-profit organizations, Federal, state and local government agencies, and academia.

Each application will receive an objective review by a panel of persons from the public and private sectors knowledgeable about the subject of the program. Applications will be evaluated on a competitive basis, as they are received, in accordance with the selection criteria set forth below. The Department reserves the right to reject any application and to consider other noncompetitive procedures to distribute assistance under this program as appropriate and in accordance with law.

A. Selection Criteria

Consideration for financial assistance will be given to those experts who:

Essential Criteria

1. Have a minimum of five years of practical, substantial legal experience in any of the following: company formation, governance or reorganization, foreign investment, contracts, secured transactions, commercial dispute resolution, real property, intellectual property, or government procurement;

2. Agree to adhere to CLDP conflict of interest requirements; and

3. Are able to be placed in-country during the period of time a person with their expertise has been requested by the host ministry, agree to commit a minimum of 15 hours of time (without recompense) in advance of the assignment to prepare for the work to be done in-country and a minimum of 15 hours (without recompense) after the assignment has ended to complete follow-up activities, and have expressed willingness to be placed in the country for which CLDP is making the placement in the question.

Preferred Criteria

4. Are familiar with the region either through personal, professional or educational background or experience;

5. Are proficient in one of the languages of the region;

6. Have teaching or public speaking facility or experience; and

7. Have experience in legal reform or transnational transactions and legal issues.

Out of a 100 point scale, the critical criteria account for 80 points. The preferred criteria account for 20 points. Selection criteria 1, 2, and 3 are critical elements and are weighted equally. Selection criteria 4 to 7 represent desirable, but not essential, criteria or experience for receiving grants. Selection criteria 4 to 7 are weighted equally. Applicants must provide CLDP with a summary of their educational background, work experience, and of their experience in commercial law matters, including number of years of experience, level of expertise, and any practical application in the areas of commercial law. The summary also should include, information regarding the Applicant's language proficiency, background in Eastern European matters, and teaching experience, and should indicate whether the Applicant has experience in law reform. The summary also must indicate availability (duration of availability), length of assignment preferred, and country preference, if any.

B. Conditions

All Applicants are advised of the following:

1. No award of Federal funds shall be made to an Applicant who has an outstanding delinquent Federal debt until either:

A. The delinquent account is paid in full,

B. A negotiated repayment schedule is established and at least one payment is received, or

C. Other arrangements satisfactory to the Department of Commerce are made.

2. Unsatisfactory performance under prior Federal awards may result in an application not being considered for funding.

3. All Applicants must submit a completed Form CD–511, "Certifications regarding Debarment, Suspension and Other Responsibility Matters; Drug-Free Workplace Requirements and Lobbying," and are advised that:

A. *Nonprocurement Debarment and Suspension.* Prospective participants (as defined at 15 CFR part 26, section 105) are subject to 15 CFR part 26,

"Nonprocurement Debarment and Suspension" and the related section of the certification form;

B. *Drug Free Workplace.* Grantees (as defined at 15 CFR part, 26 section 605) are subject to 15 CFR part 26, subpart F, "Government Wide Requirements for Drug-Free Workplace (Grants)" and the related section of the certification form;

C. *Anti-Lobbying.* Persons (as defined at 15 CFR part 28, section 105) are subject to the lobbying provisions of 31 U.S.C. 1352, "Limitation on use of appropriated funds to influence certain Federal contracting and financial transactions," and the lobbying section of the certification form which applies to applications/bids for grants, cooperative agreements, and contracts for more than $100,000, and loans and guarantees for more than $150,000, or the single family maximum mortgage limit for affected programs, whichever is greater; and

D. *Anti-Lobbying Disclosures.* Any Applicant who has paid or will pay for lobbying using any funds must submit an SF–LLL, "Disclosure of Lobbying Activities," as required under 15 CFR part 28, Appendix B.

4. False statements on the application may be grounds for denial or termination of funding, as well as potential civil and criminal liability. The Department has no further funding liability beyond the time and amount stated in the award.

5. Recipients and subrecipients of financial assistance under this program are subject to all applicable Federal laws and Federal and departmental policies, regulations, and procedures applicable to Federal financial assistance awards.

6. Standard Form 424 (Rev. 488) is subject to the Paperwork Reduction Act and has been approved by OMB.

7. The Grants Officer is the only individual who may legally commit the Government to the expenditure of public funds. No costs chargeable to the proposed award may be incurred before receipt of either a fully executed cooperative agreement or a specific written authorization from the Grants Officer. If an applicant should incur any costs prior to an award being made, the applicant does so solely at its own risk of not being reimbursed by the Government. Notwithstanding any verbal assurance that may have been received, there is no obligation on the part of the DOC to cover pre-award costs.

8. Executive Order 12372 "Intergovernmental Review of Federal Programs" does not apply to this program.

9. If an application is selected for funding, the Department of Commerce has no obligation to provide any additional prospective funding in connection with that award. Renewal of an award to increase funding or extend the period of performance is at the discretion of the Department of Commerce.

10. Applicants are advised that they will be subject to a name check review process. Name checks are intended to reveal if the Applicant or any key individuals associated therewith have been convicted of, or are presently facing, criminal charges such as fraud, theft, perjury, or other matters which significantly reflect on the applicant's management honesty or financial integrity. Recipients and subrecipients will be subject to all applicable Federal laws and Federal and Department of Commerce policies, regulations, and procedures applicable to Federal financial assistance awards.

Dated: December 7, 1992.

Lynn S. West,

Deputy General Counsel.

BILLING CODE 3510–BW–M

[Docket Number 920653–2259]

Commercial Law Development Program for Central and Eastern Europe ("CLDP")

AGENCY: Office of the General Counsel, Commerce.

ACTION: Notice of the availability of funds for the CLDP Legal Intership Program.

SUMMARY: The Department of Commerce ("Department") Office of the General Counsel established the Commercial Law Development Program for Central and Eastern Europe ("CLDP") in January 1992, as part of the Administration's ongoing efforts to assist Central and Eastern Europe, and the Baltic States, in the development of a commercial law infrastructure consistent with free market principles. The CLDP provides technical assistance in the evaluation and revision of the region's commercial legal systems, with a focus on investment law, commercial dispute resolution, real property rights, intellectual property rights, and government procurement. The legal internship component of the CLDP will provide an opportunity for law students and junior attorneys from the region to serve as interns in U.S. law firms and legal offices of U.S. companies, accounting firms, and trade associations for a period of six weeks to four months in order to learn U.S. legal structures and procedures. Only attorneys with no more than five years of legal experience and law students in their final year of law school or enrolled in a graduate legal program are eligible for the internship program. All interns must be proficient in English. The CLDP Legal Internship Program will first place interns from its priority countries, which currently are Albania, Bulgaria, Poland, and Lithuania. Interns from the other countries of the region may also be placed if suitable matches are found and CLDP funding is available or unnecessary.

To ensure that the program's goals will be met, each applicant will be required to submit a plan for utilizing the U.S. experience to support commercial law reform in his or her country. The goal of the program is to provide these law students and recent law school graduates with the expertise necessary to participate in the establishment and implementation of free market legal frameworks in their countries. In addition, host firms will benefit from the program by learning more about these countries and their legal and commercial climates.

Under the CLDP Legal Internship Program, qualified U.S. law firms and the legal departments of companies, accounting firms, and trade associations will be eligible under specified circumstances to receive funds through cooperative agreements with the Department to help defray the cost of hosting an intern in the U.S. Participating U.S. firms will be expected to provide the interns with instruction in one or more of the following areas of commercial law: Commercial or financial transactions, corporate law, foreign investment law, commercial dispute resolution, real property rights, intellectual property rights, or government procurement.

CLDP also may place interns with the Eastern European legal offices of U.S. firms. U.S. firms with Eastern European legal offices interested in providing legal internships to law students and recent law school graduates are invited to participate in CLDP's "matchmaker" service. CLDP will interview candidates and recommend eligible interns for in-country placement. However, no Department funding is available for such placements, and such host firms will be responsible for all costs, including travel expenses, related to sponsoring the intern. In addition, U.S. firms operating in the U.S. who wish to utilize the CLDP's "matchmaker" service without applying for financial assistance may do so. Such firms will be responsible for all costs, including travel expenses, related to sponsoring the intern.

DATES: Applications should be submitted no later than 3 p.m., on February 12, 1993.

ADDRESSES: Applications should be sent, along with two self-addressed mailing labels, to Kathy Burke, International Program Assistant, Commercial Law Development Program, Office of the General Counsel, room 3845, U.S. Department of Commerce, Washington, DC 20230.

FOR FURTHER INFORMATION CONTACT: Kathy Burke, International Program Assistant, Commercial Law Development Program, Office of the General Counsel, room 3845, U.S. Department of Commerce, Tel: (202) 482–5382, Fax: (202) 482–3244.

SUPPLEMENTARY INFORMATION: In addition to the program description contained in the summary, the following information also applies:

I. Funding Availability

Pursuant to sections 532, 635(b) and 632(b) of the Foreign Assistance Act of 1961, as amended (22 U.S.C. 2346, 2395(b) and 2392(b), respectively and section (a)(1) under the heading "Assistance for Eastern Europe" of title II of the Foreign Operations, Export Financing, and Related Appropriations Act, 1991, funding for the Resident Advisor Program shall be provided by the Agency for International Development (A.I.D.). The maximum amount of the financial assistance available for the legal internship portion of the CLDP program is $55,000.

II. Funding Instrument and Project Duration

Federal assistance will be awarded pursuant to a cooperative agreement between the Department and the recipient U.S. firm or company located in the U.S. With funds provided by AID, the Department will reimburse companies for the roundtrip coach airfare of each intern between the intern's home country and the U.S. internship site upon submission to the Department of the travel invoice (Fly America Act provisions apply). The Department will reimburse companies a stipend of $30 per intern per day in the U.S. for up to four months. The Department also will reimburse companies for a portion of the cost of housing the intern. The Department will reimburse companies up to $350 per month, or a prorated portion of that amount for any period during which the intern is provided housing by the host firm. The maximum lodging reimbursement amount per intern will not exceed $1,400. Disbursement of funds for reimbursement of the stipend and lodging will be made upon certification by the companies that the internship program has been completed and the intern has returned to his or her country. Each award will have a cap of $7,400 for total cost of airline, lodging, and stipend per intern. There are no specific matching requirements for the awards. Companies are expected to bear any costs of providing the intern with medical insurance, housing and other necessary incidentals during the entire term of the internship to the extent they are not covered by the award, including payment for the entire cost of medical insurance and any lodging, food and incidental costs in excess of the reimbursable limits described above. Companies also are responsible for sponsoring the intern for the appropriate U.S. visas. Awards will be provided for this program on a rolling basis. All awards are expected to be made prior to March 1993. Individual internships are expected to run from six weeks to four months.

U.S. firms wishing to utilize CLDP assistance in identifying prospective interns for placement with their U.S. or Eastern European offices and requiring no financial support from the Department may do so without competing for the grant program described herein. Such firms will be responsible for all costs, including travel expenses, related to sponsoring the intern.

III. Request for Applications

To obtain a Competitive Application Kit, please send a written request with two self-addressed mailing labels to Kathy Burke, International Program Assistant, Commercial Law Development Program, room 3845, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230. Only one copy of the Application Kit will be provided to each organization requesting it, but it may be reproduced by the requester. A signed original and two copies of the application (Standard Form 424 (Rev. 4–88)) and supplemental materials must be submitted to CLDP at the address designated in the Application Kit in order for the application to be considered. Awards are expected to be made on a rolling basis prior to March 1993.

IV. Eligibility

Applicants for the CLDP Legal Internship Program may be any for-profit or no-profit U.S. law firm, corporation, accounting firm, or trade association, or organization or other pubic or private entity. Each application will receive an objective review by a three-member review panel. Applications will be evaluated on a competitive basis, as they are received, in accordance with the selection criteria set forth below. The Department reserves the right to reject any application, to limit the number of interns per applicant, and to consider other non-competitive procedures to distribute assistance under this program as appropriate and in accordance with law.

A. Selection Criteria

Consideration for financial assistance will be given to CLDP proposals which:

1. Demonstrate a commitment to the intent and goals of the program to provide appropriate instruction in the areas of commercial law, including commercial or financial transactions, corporations law, contract law, foreign investment law, commercial dispute resolution, real property rights, intellectual property rights, or government procurement by presenting a realistic workplan detailing the instruction to be provided to the CLDP intern, with emphasis on how the instruction will assist the intern to utilize the training received to lead in his or her country's establishment and implementation of a free market system;

2. Are proposed by applicants with the financial capacity to successfully undertake the intended activities of hosting an intern (including the provision of providing housing and medical insurance); and

3. Improve the U.S. geographic diversity of placements.

Out of a 100 point scale the critical criteria account for 80 points. Selection criteria 1 and 2 are critical elements and will be weighted equally. Selection criteria 3 is a preferred element and will account for 20 points. Those applicants that meet both critical elements and, in addition, meet the preferred criteria will receive preferential consideration.

B. Conditions

All Applicants are advised of the following:

1. No award of Federal funds shall be made to an applicant who has an outstanding delinquent Federal debt until either:

A. The delinquent account is paid in full;

B. A negotiated repayment schedule is established and at least one payment is received; or

C. Other arrangements satisfactory to the Department are made.

2. Unsatisfactory performance under prior Federal awards may result in an application not being considered for funding.

3. All primary applicants must submit a completed Form CD–511, "Certifications Regarding Debarment, Suspension and Other Responsibility Matters; Drug-Free Workplace Requirements and Lobbying," and applicants are advised that:

A. *Nonprocurement Debarment and Suspension.* Prospective participants (as defined at 15 CFR part 26, section 105) are subject to 15 CFR part 26, "Nonprocurement Debarment and Suspension" and the related section of the certification form;

B. *Drug Free Workplace.* Grantees (as defined at 15 CFR part 26, section 605) are subject to 15 CFR part 26, subpart F, "Government Requirements for Drug-Free Workplace (Grants)" and the related section of the certification form;

C. *Anti-Lobbying.* Persons (as defined at 15 CFR part 28, section 105) are subject to the lobbying provisions of 31 U.S.C. 1352, "Limitation on use of appropriated funds to influence certain Federal contracting and financial transactions," and the lobbying section of the certification form which applies to applications/bids for grants, cooperative agreements, and contracts for more than $100,000, and loans and loan guarantees for more than $150,000, or the single family maximum mortgage limit for affected programs, whichever is greater; and

D. *Anti-Lobbying Disclosures.* Any applicant that has paid or will pay for lobbying using any funds must submit an SF–LLL, "Disclosure of Lobbying Activities," as required under 15 CFR part 28, Appendix B.

4. False statements on the application may be grounds for denial or termination of funding, as well as potential civil and criminal liability.

5. Recipients and subrecipients of financial assistance under this program are subject to all applicable Federal laws and Federal and departmental policies, regulations, and procedures applicable to Federal financial assistance awards.

6. The Standard Form 424 (Rev. 4–88) mentioned in this notice is subject to the Paperwork Reduction Act and has been approved by OMB under Control No. 0348–0006.

7. The Grant Officer is the only individual who may legally commit the Government to the expenditure of public funds. No costs chargeable to the proposed grant may be incurred before receipt of either a fully executed grant or a specific written authorization from the Grants Officer. If an applicant should incur any cost prior to an award being made, the applicant does so solely at its own risk of not being reimbursed by the Government. Notwithstanding any verbal assurance that may have been received, there is no obligation on the part of the DOC to cover pre-award costs.

8. If an application is selected for funding, the Department of Commerce has no obligation to provide any additional future funding in connection with the award. Renewal of an award to increase funding or extend the period of performance is at the sole discretion of the Department of Commerce.

9. Executive Order 12372 "Intergovernmental Review of Federal Programs" does not apply to this program.

Dated: December 8, 1992.

Lynn S. West,

Deputy General Counsel.

BILLING CODE 3510-BW-M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Amendment of Import Limits for Certain Cotton and Man-Made Fiber Textile Products Produced or Manufactured in Mexico

December 4, 1992.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs increasing limits.

EFFECTIVE DATE: December 8, 1992.

FOR FURTHER INFORMATION CONTACT: Anne Novak, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 482–4212. For information on the quota status of these limits, refer to the Quota Status Reports posted on the bulletin boards of each Customs port or call (202) 927–6711. For information on embargoes and quota re-openings, call (202) 482–3715.

SUPPLEMENTARY INFORMATION:

Authority: Executive Order 11651 of March 3, 1972, as amended; section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

The U.S. Government has agreed to increase the Normal Regime limits for Categories 347/348/647/648 and 351/651 for 1992.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see **Federal Register** notice 56 FR 60101, published on November 27, 1991). Also see 56 FR 65244, published on December 16, 1991.

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

Auggie D. Tantillo,

Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

December 4, 1992.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229.

Dear Commissioner: This directive amends, but does not cancel, the directive issued to you on December 10, 1991, by the Chairman, Committee for the Implementation of Textile Agreements. That directive concerns imports of certain cotton, wool and man-made fiber textile products, produced or manufactured in Mexico and exported during the twelve-month period which began on January 1, 1992 and extends through December 31, 1992.

Effective on December 8, 1992 you are directed to amend further the directive dated December 10, 1991, to increase the Normal Regime limits for the following categories. The Special Regime limits for Categories 347/348/647/648 and 351/651 remain unchanged.

Normal Regime Category	Amended twelve-month limit [1]
347/348/647/648	1,170,000 dozen.
351/651	145,000 dozen.

[1] The limits have not been adjusted to account for any imports exported after December 31, 1991

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Auggie D. Tantillo,

Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-DR-F

Denial of Participation in the Special Access and Special Regime Programs

December 8, 1992.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs denying the right to participate in the Special Access and Special Regime Programs.

EFFECTIVE DATE: January 1, 1993.

FOR FURTHER INFORMATION CONTACT: Lori E. Goldberg, International Trade

Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 482–3400.

SUPPLEMENTARY INFORMATION:

Authority: Executive Order 11651 of March 3, 1972, as amended; section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

The Committee for the Implementation of Textile Agreements (CITA) has determined that Luis Narvaez is in violation of the requirements set forth for participation in the Special Access and Special Regime Programs.

In the letter published below, the Chairman of CITA directs the Commissioner of Customs, effective on January 1, 1993, to deny Luis Narvaez the right to participate in the Special Access and Special Regime Programs, for a period of three years, from January 1, 1993 through December 31, 1995.

Requirements for participation in the Special Access Program are available in **Federal Register** notices 51 FR 21208, published on June 11, 1986; 52 FR 26057, published on July 10, 1987; and 54 FR 50425, published on December 6, 1989.

Requirements for participation in the Special Regime Program are available in **Federal Register** notices 53 FR 15724, published on May 3, 1988; 53 FR 32421, published on August 25, 1988; 53 FR 49346, published on December 7, 1988; and 54 FR 50425, published on December 6, 1989.

Auggie D. Tantillo,

Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

December 8, 1992.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229.

Dear Commissioner: The purpose of this directive is to notify you that the Committee for the Implementation of Textile Agreements has determined that Luis Narvaez is in violation of the requirements for participation in the Special Access and Special Regime Programs.

Effective on January 1, 1993, you are directed to prohibit Luis Narvaez from further participation in the Special Access and Special Regime Programs, for a period of three years, from January 1, 1993 through December 31, 1995. Goods accompanied by Form ITA–370P which are presented to U.S. Customs for entry under the Special Access and Special Regime Programs will no longer be accepted. In addition, for the period January 1, 1993 through December 31, 1995, you are directed not to sign ITA–370P forms for export of U.S.-formed and cut fabric.

Sincerely,

Auggie D. Tantillo,

Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 92–30235 Filed 12–11–92; 8:45 am]

BILLING CODE 3510–DR–F

Request for Public Comments on Bilateral Textile Consultations With the Arab Republic of Egypt on Certain Wool Textile Products

December 9, 1992.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Notice.

FOR FURTHER INFORMATION CONTACT: Jennifer Aldrich, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 482–4212. For information on categories for which consultations have been requested, call (202) 482–3740.

SUPPLEMENTARY INFORMATION:

Authority: Executive Order 11651 of March 3, 1972, as amended; section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

On November 27, 1992, under the terms of Article 3 of the Arrangement Regarding International Trade in Textiles, done at Geneva on December 20, 1973, as further extended on July 31, 1986, the Government of the United States requested consultations with the Government of the Arab Republic of Egypt with respect to women's and girls' wool trousers, slacks and breeches in Category 448, produced or manufactured in Egypt.

The purpose of this notice is to advise the public that, if no solution is agreed upon in consultations with the Government of the Arab Republic of Egypt, the Committee for the Implementation of Textile Agreements may later establish a limit for the entry and withdrawal from warehouse for consumption of wool textile products in Category 448, produced or manufactured in Egypt and exported during the twelve-month period which began on November 27, 1992 and extends through November 26, 1993, at a level of not less than 9,450 dozen.

A summary market statement concerning Category 448 follows this notice.

Anyone wishing to comment or provide data or information regarding the treatment of Category 448, or to comment on domestic production or availability of products included in Category 448, is invited to submit 10 copies of such comments or information to Auggie D. Tantillo, Chairman, Committee for the Implementation of Textile Agreements, U.S. Department of Commerce, Washington, DC 20230; ATTN: Helen L. LeGrande. The comments received will be considered in the context of the consultations with the Government of the Arab Republic of Egypt.

Because the exact timing of the consultations is not yet certain, comments should be submitted promptly. Comments or information submitted in response to this notice will be available for public inspection in the Office of Textiles and Apparel, room H3100, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, DC.

Further comments may be invited regarding particular comments or information received from the public which the Committee for the Implementation of Textile Agreements considers appropriate for further consideration.

The solicitation of comments regarding any aspect of the agreement or the implementation thereof is not a waiver in any respect of the exemption contained in 5 U.S.C. 553(a)(1) relating to matters which constitute "a foreign affairs function of the United States."

The United States remains committed to finding a solution concerning Category 448. Should such a solution be reached in consultations with the Government of the Arab Republic of Egypt, further notice will be published in the **Federal Register**.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see **Federal Register** notice 56 FR 60101, published on November 27, 1991).

Auggie D. Tantillo,

Chairman, Committee for the Implementation of Textile Agreements.

Market Statement—Egypt

Category 448—Women's and Girls' Wool Trousers, Slacks and Shorts

November 1992

Import Situation and Conclusion

U.S. imports of women's and girls' wool trousers, slacks and shorts, Category 448, from Egypt reached 11,340 dozen in year ending September 1992. Egypt began shipping women's and girls' wool trousers to the U.S. in June 1992 and in just four months—June 1992-September 1992—shipped 11,340 dozen. Egypt became the tenth largest supplier of women's and girls' wool trousers, slacks and shorts to the U.S. market, accounting for 3.5 percent of

total Category 448 imports during the January-September 1992 period.

The sharp and substantial increase in Category 448 imports from Egypt is causing disruption in the U.S. market for women's and girls' wool trousers, slacks and shorts.

U.S. Production, Import Penetration, and Market Share

U.S. production of women's and girls' wool trousers, slacks and shorts, Category 448, increased in 1988 and then declined in 1989, 1990, and 1991. Production fell to 204,000 dozen in 1991, 14 percent below the 1990 level and 48 percent below the 1987 level. This decline continued in 1992, with production falling to 195,000 for the year ending June 1992, 12 percent below the year ending June 1991 level. In contrast, U.S. imports of women's and girls' wool trousers, slacks and shorts, Category 448, increased 15 percent, from 299,000 dozen in 1987 to 345,000 dozen in 1991. Imports surged in 1992, increasing 22 percent over the January-September 1991 level and reaching 403,876 dozen in the year ending September 1992, 29 percent above the year ending September 1991 level and the highest 12 month level on record.

The ratio of imports to domestic production more than doubled, increasing from 76 percent in 1987 to 169 percent in 1991. This increase continued in 1992, with the ratio of imports to domestic production reaching 191 percent for the year ending June 1992. The domestic manufacturers' share of the U.S. market fell from 57 percent in 1987 to 37 percent in 1991, a decline of 20 percentage points. This decline continued in 1992, with the domestic manufacturers' share of the U.S. market falling to 34 percent for the year ending June 1992.

Duty-Paid Value and U.S. Producers' Price

Approximately 74 percent of Category 448 imports from Egypt during the year ending September 1992 entered the U.S. under HTSUSA number 6204.61.0010—women's wool trousers and breeches. These women's wool trousers and breeches entered the U.S. at landed duty-paid values below U.S. producers' prices for comparable women's wool trousers and breeches.

DEPARTMENT OF DEFENSE

Office of the Secretary

Medical and Dental Reimbursements Rates for Fiscal Year 1993; Correction

This notice corrects the ultrasound charge published in the **Federal Register** on October 15, 1992, in the Medical and Dental Reimbursement Rates for FY 1993, in the section entitled "High Cost Services Requested by External Providers." The Office of the Assistant Secretary of Defense (Health Affairs) has advised that the correct charge for an ultrasound test should be $172.66 instead of $1,109.00. All other charges and provisions of the Medical and Dental Reimbursements Rates for Fiscal Year 1993 remain as stated.

The point-of-contact for this correction is Mr. Walter Fisch, Office of the Deputy Comptroller (Management Systems), Accounting Policy. Mr. Fisch may be reached at (703) 697-3135.

Dated: December 9, 1992.

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 3810-01-M

Per Diem, Travel and Transportation Allowance Committee; Changes in Per Diem Rates

AGENCY: Per Diem, Travel and Transportation Allowance Committee, DOD.

ACTION: Publication of changes in per diem rates.

SUMMARY: The Per Diem, Travel and Transportation Allowance Committee is publishing Civilian Personnel Per Diem Bulletin Number 166. This bulletin lists changes in per diem rates prescribed for U.S. Government employees for official travel in Alaska, Hawaii, Puerto Rico, the Northern Mariana Islands and Possessions of the United States. Bulletin Number 166 is being published in the **Federal Register** to assure that travelers are paid per diem at the most current rates.

EFFECTIVE DATE: 1 December 1992.

SUPPLEMENTARY INFORMATION: This document give notice of changes in per diem rates prescribed by the Per Diem Travel and Transportation Allowance Committee for non-foreign areas outside the continental United States. Distribution of Civilian Personnel Per Diem Bulletins by mail was discontinued effective 1 June 1979. Per Diem Bulletins published periodically in the **Federal Register** now constitute the only notification of change in per diem rates to agencies and establishments outside the Department of Defense.

The text of the Bulletin follows:

FOOTNOTES

1/ Commercial facilities are not available. The meal and incidental expense rate covers charges for meals in available facilities plus an additional allowance for incidental expenses and will be increased by the amount paid for Government quarters by the traveler.

2/ Commercial facilities are not available. Only Government-owned and contractor operated quarters and mess are available at this locality. This per diem rate is the amount necessary to defray the cost of lodging, meals and incidental expenses.

3/ On any day when US Government or contractor quarters are available and U.S. Government or contractor messing facilities are used, a meal and incidental expense rate of $19.65 is prescribed to cover meals and incidental expenses at Shemya AFB, Clear AFS, Galena APT and King Salmon APT. This rate will be increased by the amount paid for U.S. Government or contractor quarters and by $4 for each meal procured at a commercial facility. The rates of per diem prescribed herein apply from 0001 on the day after arrival through 2400 on the day prior to the day of departure.

4/ On any day when U.S. Government or contractor quarters are available and U.S. Government or contractor messing facilities are used, a meal and incidental expense rate of $34 is prescribed to cover meals and incidental expenses at Amchitka Island, Alaska. This rate will be increased by the amount paid for U.S. Government or contractor quarters and by $10 for each meal procured at a commercial facility. The rates of per diem prescribed herein apply from 0001 on the day after arrival through 2400 on the day prior to the day of departure.

5/ On any day when U.S. Government or contractor quarters are available and U.S. Government or contractor messing facilities are used, a meal and incidental expense rate of $25 is prescribed instead of the rate prescribed in the table. This rate will be increased by the amount paid for U.S. Government or contractor quarters.

6/ The meal rates listed below are prescribed for the following locations in Alaska: Cape Lisburne RRL, Cape Newenham RRL, Cape Romanzof APT, Fort Yukon RRL, Indian Mtn RRL, Sparrevohn RRL, Tatalina RRL, Tin City RRL, Barter Island AFS, Point Barrow AFS, Point Lay AFS and Oliktok AFS. The amount to be added to the cost of government quarters in determining the per diem will be $3.50 plus the following amount:

	Daily Rate
DOD Personnel	$13
Non-DOD Personnel	$30

BILLING CODE 3810-01-C

Dated: December 8, 1992.

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

[FR Doc. 92-30283 Filed 12-11-92; 8:45 am]

BILLING CODE 3810-01-M

Public Information Collection Requirement Submitted to OMB for Review

ACTION: Notice. The Department of Defense has submitted to OMB for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

Title, Applicable Form, and Applicable OMB Control Number: Defense FAR Supplement, part 230, Cost Accounting Procedures; DD Form 1861; OMB Control Number 0704–0267.

Type of Request: Extension.

Average Burden Hours/Minutes Per Response: 10 Hours.

Responses per Respondent: 1.

Number of Respondents: 75.

Annual Burden Hours: 750.

Annual Responses: 75.

Needs and Uses: This information is used to distribute contractor facilities capital assets by type for the purpose of developing profit objectives on defense contracts.

Affected Public: Businesses or other for-profit; Small businesses or organizations.

Frequency: On occasion.

Respondent's Obligation: Required to obtain or retain a benefit.

OMB Desk Officer: Mr. Peter N. Weiss. Written comments and recommendations on the proposed information collection should be sent to Mr. Weiss at the Office of Management and Budget, Desk Officer for DoD, room 3235, New Executive Office Building, Washington, DC 20503.

DOD Clearance Officer: Mr. William P. Pearce. Written requests for copies of the information collection proposal should be sent to Mr. Pearce, WHS/DIOR, 1215 Jefferson Davis Highway, suite 1204, Arlington, Virginia 22202–4302.

Dated: December 8, 1992.

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

Defense Logistics Agency

Privacy Act of 1974; Amend Record Systems

AGENCY: Defense Logistics Agency, DoD.

ACTION: Amend record systems.

SUMMARY: The Defense Logistics Agency proposes to amend five existing systems of records in the DLA inventory of systems of records notices subject to the Privacy Act of 1974 (5 U.S.C. 552a), as amended.

DATES: This action will be effective without further notice on January 13, 1993, unless comments are received that would result in a contrary determination.

ADDRESSES: Send comments to the Privacy Act Officer, Administrative Management Branch, Planning and Resource Management Division, Defense Logistics Agency, Room 5A120, Cameron Station, Alexandria, VA 22304–6100.

FOR FURTHER INFORMATION CONTACT: Ms. Susan Salus at (703) 617–7583.

SUPPLEMENTARY INFORMATION: The complete inventory of Defense Logistics Agency record system notices subject to the Privacy Act of 1974 (5 U.S.C. 552a), as amended, have been published in the **Federal Register** as follows:

50 FR 22897, May 29, 1985 (DoD Compilation, changes follow)
50 FR 51898, December 20, 1985

Add at end "The 'Blanket Routine Uses' set forth at the beginning of DLA's compilation of systems of records notices apply to this system."

* * * * *

RETRIEVABILITY:

Add after "name," "or Social Security Number."

* * * * *

SYSTEM MANAGER(S) AND ADDRESS:

Delete entry and replace with "Staff Director, Office of Command Security, HQ DLA-I, Cameron Station, Alexandria, VA 22304–6100, and the heads of the DLA Primary Level Field Activities (PLFA's). Official mailing addresses are published as an appendix to DLA's compilation of systems of records notices."

* * * * *

NOTIFICATION PROCEDURE:

Delete entry and replace with "Individuals seeking to determine whether this system of records contains information about themselves should address written inquiries to or visit the system manager of the particular DLA activity involved. Official mailing addresses are published as an appendix to DLA's compilation of systems of records notices."

* * * * *

RECORD ACCESS PROCEDURES:

Delete entry and replace with "Individuals seeking access to records about themselves contained in this system of records should address written inquiries to or visit the system manager of the particular DLA activity involved. Official mailing addresses are published as an appendix to DLA's compilation of systems of records notices."

* * * * *

CONTESTING RECORD PROCEDURES:

Delete entry and replace with "The DLA rules for contesting contents and appealing initial agency determinations are contained in DLA Regulation 5400.21; 32 CFR part 323; or may be obtained from the system manager."

* * * * *

RECORD SOURCE CATEGORIES:

Delete entry and replace with "Individuals applying for identification badges, cards, passes, computer passwords and log-ons; commanders and facility officials who have barred persons access to their activities or databases."

* * * * *

S500.50 DLA-I

SYSTEM NAME:

Individual Access Records.

SYSTEM LOCATION:

Staff Director, Office of Command Security, HQ DLA-I, Cameron Station, Alexandria, VA 22304–6100, and the DLA Primary Level Field Activities (PLFAs). Official mailing addresses are published as an appendix to DLA's compilation of systems of records notices.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

DLA civilian and military personnel, contractor employees, and individuals granted or denied access to DLA activities, installations, or databases.

CATEGORIES OF RECORDS IN THE SYSTEM:

Documents relating to the request for authorization, issue, receipt, surrender, withdrawal, and accountability pertaining to identification badges, cards and passes, to include application forms, photographs, letters of debarment, and related papers.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Section 21 of the Internal Security Act of 1950 (50 U.S.C. 781), et seq.; and E.O. 10450, Security Requirements for Government Employment.

PURPOSE(S):

Information is used to control access to DLA databases and access to and movement on DLA activities and facilities.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Information is maintained and used by General Services Administration Protective Service personnel to adequately control access to, and movement on DLA activities and facilities. The 'Blanket Routine Uses' set forth at the beginning of DLA's compilation of systems of records notices apply to this system.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS:

STORAGE:

Paper records in file folders, application cards, index cards, computer magnetic tapes or discs, and computer paper printouts.

RETRIEVABILITY:

Retrieved alphabetically by name or Social Security Number.

SAFEGUARDS:

Records are maintained in areas accessible only to authorized DLA personnel.

RETENTION AND DISPOSAL:

Records are destroyed 1 year after termination or transfer of person granted access, except that individual badges, photographs or passes will be destroyed

upon revocation, cancellation, or expiration. Records relating to persons barred from a facility will be destroyed 5 years after the person is notified he/she is barred from an activity or installation.

SYSTEM MANAGER(S) AND ADDRESS:

Staff Director, Office of Command Security, HQ DLA-I, Cameron Station, Alexandria, VA 22304–6100, and the heads of the DLA Primary Level Field Activities (PLFA's). Official mailing addresses are published as an appendix to DLA's compilation of systems of records notices.

NOTIFICATION PROCEDURE:

Individuals seeking to determine whether this system of records contains information about themselves should address written inquiries to or visit the system manager of the particular DLA activity involved. Official mailing addresses are published as an appendix to DLA's compilation of systems of records notices.

RECORD ACCESS PROCEDURES:

Individuals seeking access to records about themselves contained in this system of records should address written inquiries to or visit the system manager of the particular DLA activity involved. Official mailing addresses are published as an appendix to DLA's compilation of systems of records notices.

CONTESTING RECORD PROCEDURES:

The DLA rules for contesting contents and appealing initial agency determinations are contained in DLA Regulation 5400.21; 32 CFR part 323; or may be obtained from the system manager.

RECORD SOURCE CATEGORIES:

Individuals applying for identification badges, cards, passes, computer passwords and log-ons; commanders and facility officials who have barred persons access to their activities or databases.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

S322.15 DLA-M/DMLPO

SYSTEM NAME:

Information Military Personnel Records, (50 FR 22918, May 29, 1985).

S200.10 DLA-M

SYSTEM NAME:

Information Military Personnel Records.

SYSTEM LOCATION:

Staff Director, Office of Military Personnel, HQ DLA-M, Cameron Station, Alexandria, VA 22304–6100, and DLA Primary Level Field Activities (PLFAs). Official mailing addresses are published as an appendix to DLA's compilation of systems of records notices.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Active duty and reserve personnel assigned to DLA.

CATEGORIES OF RECORDS IN THE SYSTEM:

Evaluation reports, general and special orders, leave slips, qualification records, applications for ID Cards, security clearance, and miscellaneous correspondence.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

10 U.S.C. Part II, Personnel; 5 U.S.C. 302(b)(1), Delegation of authority; and E.O. 9397, Social Security Number.

PURPOSE(S):

To accumulate documents relating to the military member while assigned to DLA. The records are used by the Staff Director and his staff and Heads of PLFAs and their staff for notification of assignments, career briefs, assignment orders, promotion data, personal data, awards and decorations, training data, recommendations for disciplinary action, review procedures instituted to control incidents, and advising the Director of incidents.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The 'Blanket Routine Uses' set forth at the beginning of DLA's compilation of systems of records notices apply to this system.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS:

STORAGE:

Records are stored in paper and computerized form.

RETRIEVABILITY:

Retrieved alphabetically by last name.

SAFEGUARDS:

Records are maintained in areas accessible only to DLA personnel who must access the records to perform their duties. The computerized files are password protected with access restricted to authorized users.

RETENTION AND DISPOSAL:

Retained during individual's assignment to DLA and destroyed within 1 year of departure.

SYSTEM MANAGER(S) AND ADDRESS:

Staff Director, Office of Military Personnel, HQ DLA-M, Cameron Station, Alexandria, VA 22304–6100, and DLA Primary Level Field Activities (PLFAs). Official mailing addresses are published as an appendix to DLA's compilation of systems of records notices.

NOTIFICATION PROCEDURE:

Individuals seeking to determine whether this system of records contains information about themselves should address written inquiries to or visit the system manager of the particular activity involved. Official mailing addresses are published as an appendix to DLA's compilation of systems of records notices.

RECORD ACCESS PROCEDURES:

Individuals seeking access to records about themselves contained in this system of records should address written inquiries to or visit the system manager of the particular DLA activity involved. Official mailing addresses are published as an appendix to DLA's compilation of systems of records notices.

CONTESTING RECORD PROCEDURES:

The DLA rules for contesting contents and appealing initial agency determinations are contained in DLA Regulation 5400.21; 32 CFR part 323; or may be obtained from the system manager.

RECORD SOURCE CATEGORIES:

Special orders, service records, in/out processing documents, and computer listings.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

S200.30 DLA-M

SYSTEM NAME:

Reserve Affairs.

SYSTEM LOCATION:

Staff Director, Office of Military Personnel, HQ DLA-M, Cameron Station, Alexandria, VA 22304–6100, and the heads of the DLA Primary Level Field Activities (PLFA's). Official mailing addresses are published as an appendix to DLA's compilation of systems of records notices.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

All Ready Reserve, Army, Air Force, Navy and Marine personnel assigned to DLA Individual Mobilization Augmentee (IMA) positions.

CATEGORIES OF RECORDS IN THE SYSTEM:

Computer records and printouts containing such items as, name, grade, Social Security Number, service, career specialty, position title, date of birth, commission date, promotion date, release date, security clearance, education, home address and civilian occupation of the individuals involved.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

10 U.S.C. Part II, Personnel; 5 U.S.C. 302(b)(1), Delegation of authority; E.O. 9397, Social Security Number; and DoD Directive 5105.22, Defense Logistics Agency.

PURPOSE(S):

The purpose of the system is to have information readily available in the day-to-day operation of the Reserve Mobilization program. It is used by the Staff Director, his Deputy and the Reserve personnel specialist. Data is used in preparation of personnel actions such as reassignments, classification actions, promotions; scheduling, and verification of active duty and inactive duty training.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The 'Blanket Routine Uses' set forth at the beginning of DLA's compilation of systems of records notices apply to this system.

BILLING CODE 3910–01–M

Department of the Army

Withdrawal of a Notice of Intent To Prepare a Draft Environmental Impact Statement; Rio Grande de Manati at Barceloneta, PR

AGENCY: Army Crops of Engineers, DOD.

ACTION: Notice of intent.

SUMMARY: A Notice of Intent to prepare a DEIS for a flood protection study of the Rio Grande de Manati at Barceloneta, Municipality of Barceloneta, Puerto Rico, is withdrawn because the flood protection works have been planned so that they will have no significant effect on the human environment.

FOR FURTHER INFORMATION CONTACT: Questions about the proposed action can be answered by: Dr. Gerald Atmar, U.S. Engineer District, P.O. Box 4970, Jacksonville, Florida 32232–0019; telephone (904) 323–2615.

SUPPLEMENTARY INFORMATION: A Notice of Intent to prepare a DEIS on the feasibility of providing flood control along the Rio Grande de Manati in the vicinity Barceloneta, Municipality of Barceloneta, Puerto Rico, was published in the FR 11731, 20 March 1991. At that time anticipated significant issues included impacts on wetlands, water quality, agricultural lands, wildlife, fisheries, surface and ground water resources, recreation and Federally listed threatened species and endangered species. Subsequent coordination with all affect agencies and planning that was responsive to the listed concerns permitted formulation of a plan that avoids impacts on significant cultural resources present in the study area and provides for salvage of any such resources as yet unevaluated. The plan produces not net loss of wetlands and other important fish and wildlife habitat and does not adversely impact water quality or other resources originally thought to be at issue. The Corps, Preliminary Environmental Assessment indicates that the planned action will produce no significant impact to the human environment, and that an Environmental Impact Statement is not required. All affected state and Federal agencies and interested private groups have been involved in ongoing scoping, and documentation has been received from the State Historic Preservation Office, the Puerto Rico Department of Natural Resources, the U.S. Fish and Wildlife Service under the Fish and Wildlife Coordination Act and the Endangered Species Act, and the U.S. Department of Agriculture.

A draft feasibility report and environmental assessment are scheduled to be made available for public and agency review in December 1992.

Kenneth L. Denton,

Army Federal Register Liaison Officer.

BILLING CODE 3710–AJ–M

DEPARTMENT OF ENERGY

Energy Information Administration

Agency Information Collections Under Review by the Office of Management and Budget

AGENCY: Energy Information Administration, Energy.

ACTION: Notice of request submitted for review by the Office of Management and Budget.

SUMMARY: The Energy Information Administration (EIA) has submitted the energy information collection(s) listed at the end of this notice to the Office of Management and Budget (OMB) for review under provisions of the Paperwork Reduction Act (Pub. L. No.

96–511, 44 U.S.C. 3501 et seq.). The listing does not include collections of information contained in new or revised regulations which are to be submitted under section 3504(h) of the Paperwork Reduction Act, nor management and procurement assistance requirements collected by the Department of Energy (DOE).

Each entry contains the following information: (1) The sponsor of the collection (the DOE component or Federal Energy Regulatory Commission (FERC)); (2) Collection number(s); (3) Current OMB docket number (if applicable); (4) Collection title; (5) Type of request, e.g., new, revision, extension, or reinstatement; (6) Frequency of collection; (7) Response obligation, i.e., mandatory, voluntary, or required to obtain or retain benefit; (8) Affected public; (9) An estimate of the number of respondents per report period; (10) An estimate of the number of responses per respondent annually; (11) An estimate of the average hours per response; (12) The estimated total annual respondent burden; and (13) A brief abstract describing the proposed collection and the respondents.

DATES: Comments must be filed within 30 days of publication of this notice. If you anticipate that you will be submitting comments but find it difficult to do so within the time allowed by this notice, you should advise the OMB DOE Desk Officer listed below of your intention to do so as soon as possible. The Desk Officer may be telephoned at (202) 395–3084. (Also, please notify the EIA contact listed below.)

ADDRESSES: Address comments to the Department of Energy Desk Officer, Office of Information and Regulatory Affairs, Office of Management and Budget, 726 Jackson Place NW., Washington, DC 20503. (Comments should also be addressed to the Office of Statistical Standards at the address below.)

FOR FURTHER INFORMATION AND COPIES OF RELEVANT MATERIALS CONTACT: Jay Casselberry, Office of Statistical Standards, (EI–73), Forrestal Building, U.S. Department of Energy, Washington, DC 20585. Mr. Casselberry may be telephoned at (202) 254–5348.

SUPPLEMENTARY INFORMATION: The energy information collection submitted to OMB for review was:

1. Energy Information Administration.
2. EIA–254, EIA–851 and EIA–858.
3. 1905–0160.
4. Nuclear and Uranium Data Program Package.
5. Revision—The purpose of this request is to obtain OMB approval of revisions on Form EIA–858, Uranium Industry Annual Survey. Changes made to Form EIA–858 for 1992 include clarifications to the instructions for Schedule A. On Schedule B, each Custody Transaction involving uranium of foreign origin as well as each Transfer of Title Transaction must be reported under Item 1.C; natural and enriched uranium inventories at enrichment suppliers must be reported separately under Item 3; and a new data element, Item 7, requests the total amounts of unirradiated (new) uranium in fuel assemblies loaded into reactors during the Survey Year and prior year.
6. Monthly, quarterly, semi-annually, and annually.
7. Mandatory.
8. State or local governments, businesses or other for-profit, and small businesses or organizations.
9. 176 respondents.
10. 2.06 responses.
11. 13.45 hours per response.
12. 4,868 hours.
13. Forms EIA–254, 851 and 858 collect data on the costs of nuclear power plants under construction, domestic uranium production, and certain aspects of uranium marketing, exploration and finance. Data are used in determining the viability of the domestic uranium industry. Respondents are firms in the uranium business and electric utilities.

Statutory Authority: Sec. 5(a), 5(b), 13(b), and 52, Pub. L. No. 93–275, Federal Energy Administration Act of 1974, 15 U.S.C. 764(a), 764(b), 772(b), and 790a.

Issued in Washington, DC, December 7, 1992.

Yvonne M. Bishop,

Director, Statistical Standards, Energy Information Adminstration.

BILLING CODE 6450–01–M

Agency Information Collections Under Review by the Office of Management and Budget

AGENCY: Energy Information Administration, Energy.

ACTION: Notice of request submitted for review by the Office of Management and Budget.

SUMMARY: The Energy Information Administration (EIA) has submitted the energy information collection(s) listed at the end of this notice to the Office of Management and Budget (OMB) for review under provisions of the Paperwork Reduction Act (Pub. L. No. 96–511, 44 U.S.C. 3501 *et seq.*). The listing does not include collections of information contained in new or revised regulations which are to be submitted under section 3504(h) of the Paperwork Reduction Act, nor management and procurement assistance requirements collected by the Department of Energy (DOE).

Each entry contains the following information: (1) The sponsor of the collection (the DOE component or Federal Energy Regulatory Commission (FERC)); (2) Collection number(s); (3) Current OMB docket number (if applicable); (4) Collection title; (5) Type of request, e.g., new, revision, extension, or reinstatement; (6) Frequency of collection; (7) Response obligation, i.e., mandatory, voluntary, or required to obtain or retain benefit; (8) Affected public; (9) An estimate of the number of respondents per report period; (10) An estimate of the number of responses per respondent annually; (11) An estimate of the average hours per response; (12) The estimated total annual respondent burden; and (13) A brief abstract describing the proposed collection and the respondents.

DATES: Comments must be filed within 30 days of publication of this notice. If you anticipate that you will be submitting comments but find it difficult to do so, within the time allowed by this notice, you should advise the OMB DOE Desk Officer listed below of your intention to do so, as soon as possible. The Desk Officer may be telephoned at (202) 395–3084. (Also, please notify the EIA contact listed below.)

ADDRESSES: Address comments to the Department of Energy Desk Officer, Office of Information and Regulatory Affairs, Office of Management and Budget, 726 Jackson Place NW., Washington, DC 20503. (Comments should also be addressed to the Office of Statistical Standards at the address below.)

FOR FURTHER INFORMATION AND COPIES OF RELEVANT MATERIALS CONTACT: Jay Casselberry, Office of Statistical Standards, (EI–73), Forrestal Building, U.S. Department of Energy, Washington, DC 20585. Mr. Casselberry may be telephoned at (202) 254–5348.

SUPPLEMENTARY INFORMATION: The energy information collection submitted to OMB for review was:

1. Federal Energy Regulatory Commission.
2. FERC–598.
3. Not Applicable.

4. Certification for Entities Seeking Exempt Wholesale Generator Status.
5. New.
6. On occasion.
7. Mandatory.
8. Businesses or other for-profit, small businesses or organizations.
9. 1 respondent.
10. 1 response per respondent.
11. 1 hour per response.
12. 1 hour.
13. The Energy Policy Act of 1992 amended section 32 of the Public Utility Holding Company Act (PUHCA) to create a category of power producers known as exempt wholesale generators (EWGs). Persons seeking to become an EWG must file an application with the Commission. Persons that are granted EWG status will not be considered electric utility companies under section 2(a)(3) of PUHCA, and will be exempt from regulation under PUHCA.

Statutory Authority: Sections 5(a), 5(b), 13(b), and 52, Pub. L. No. 93–275, Federal Energy Administration Act of 1974, 15 U.S.C. 764(a), 764(b), 772(b), and 790a.

Issued in Washington, DC, December 8, 1992.

Yvonne M. Bishop,

Director, Statistical Standards, Energy Information Administration.

BILLING CODE 6450–01–M

Federal Energy Regulatory Commission

[Docket Nos. ER93–83–000, et al.]

Tampa Electric Company, et al; Electric rate, Small Power Production, and Interlocking Directorate Filings

Take notice that the following filings have been made with the Commission:

1. Tampa Electric Company

[Docket No. ER93–83–000]

December 3, 1992.

Take notice that on November 25, 1992, Tampa Electric Company (Tampa Electric) tendered for filing a clarification and amendment to the Letter of Commitment between Tampa Electric and the Kissimmee Utility Authority (Kissimmee) that was tendered for filing on October 30, 1992.

Tampa Electric's submittal clarifies the provisions of the Letter of Commitment concerning purchased costs and transmission service, and amends the provisions concerning capacity charges for supplemental capacity.

Tampa Electric propose an effective date of January 1, 1993, for the letter of Commitment, as amended, and therefore requests waiver of the Commission's notice requirements.

Copies of the filing have been served on Kissimmee and the Florida Public Service Commission.

Comment date: December 16, 1992, in accordance with Standard Paragraph E at the end of this notice.

2. Washington Water Power Company

[Docket No. ER93–221–000]

December 3, 1992.

Take notice that on November 18, 1992, Washington Water Power Company tendered for filing a Notice of Termination of Rate Schedule No. 158.

Comment date: December 17, 1992, in accordance with Standard Paragraph E at the end of this notice.

3. Appalachian Power Company

[Docket No. ER93–200–000]

December 3, 1992.

Take notice that on November 18, 1992, Appalachian Power Company (APCO) tendered for filing the following agreements, pursuant to the CIAC Amnesty Order:

(1) Letter Agreement among APCO, the City of Bedford, Virginia and the Wheelabrator Corporation, dated November 14, 1985.

(2) Letter Agreement between APCO and the City of Radford, Virginia, dated February 5, 1979.

(3) Letter Agreement between APCO and the City of Salem, Virginia, dated August 12, 1982.

(4) Letter Agreement between APCO and the City of Danville, Virginia, dated June 22, 1977.

Comment date: December 17, 1992, in accordance with Standard Paragraph E at the end of this notice.

4. Consumers Power Company

[Docket No. ER93–88–000]

December 3, 1992.

Take notice that on November 19, 1992, Consumers Power Company (Consumers) tendered for filing an amendment in the above-referenced docket.

Comment date: December 16, 1992, in accordance with Standard Paragraph E at the end of this notice.

5. Southern Company Services, Inc.

[Docket Nos. ER92–517–003 and ER92–517–001].

Errata

December 4, 1992.
November 27, 1992.

Take notice that the Notice of Filing issued on November 27, 1992 under Docket Nos. ER92–517–000 and ER92–517–001 should have been issued under Docket Nos. ER92–517–003 and ER92–517–001 instead of Docket Nos. ER92–517–000 and ER92–517–001.

6. Ohio Power Company

[Docket No. ER93–197–000]

December 4, 1992.

Take notice that on November 17, 1992, Ohio Power Comnpany (OPCo) tendered for filing an Agreement between OPCo and the City of Clyde, Ohio pursuant to the CIAC Amnesty Order issued on October 13, 1992 in Docket No. ER92–183–002.

Comment date: December 18, 1992, in accordance with Standard Paragraph E at the end of this notice.

7. Central Vermont Public Service Corporation

[Docket No. ER93–283–000]

December 4, 1992.

Take notice that on November 25, 1992, Central Vermont Public Service Corporation (CVPS) tendered for filing the Forecast 1993 Cost Report for the RS–2 rate schedule under which CVPS sells electric power to Connecticut Valley Electric Company Inc.

Comment date: December 18, 1992, in accordance with Standard Paragraph E at the end of this notice.

8. Union Electric Company

[Docket No. ER93–243–000]

December 4, 1992.

Take notice that on November 25, 1992, Union Electric Company (UE) tendered for filing an Amendment dated September 25, 1992, to the Interchange Agreement dated June 28, 1978, between Associated Electric Cooperative, Incorporated and UE. UE asserts that the Amendment primarily provides for new and revised interconnection points and intertie points.

Comment date: December 18, 1992, in accordance with Standard Paragraph E at the end of this notice.

9. Central Vermont Public Service Corporation

[Docket No. ER93–240–000]

December 4, 1992.

Take notice that on November 25, 1992, Central Vermont Public Service Corporation (CVPS) tendered for filing the Forecast 1993 Cost Report for FERC Electric Tariff, Original Volume No. 4 under which CVPS provides unreserved system power service to the following customers:

Lyndonville Electric Department
Village of Ludlow Electric Light Department

Village of Johnson Water and Light Department
Village of Hyde Park Water and Light Department

Comment date: December 18, 1992, in accordance with Standard Paragraph E at the end of this notice.

10. Florida Power & Light Company

[Docket No. ER93–241–000]

December 4, 1992.

Take notice that on November 27, 1992, Florida Power & Light Company (FPL) tendered for filing the Letter Agreement Extending the Contract for Purchases and Sales of Scheduled Power and Energy Between Florida Power & Light Company and Tampa Electric Company (Letter Agreement). FPL requests that the Letter Agreement be made effective January 1, 1993.

Comment date: December 18, 1992, in accordance with Standard Paragraph E at the end of this notice.

11. Kansas Gas and Electric Company

[Docket No. ER93–231–000]

December 4, 1992.

Take notice that on November 23, 1992, Kansas Gas and Electric Company (KG&E) tendered for filing a proposed change to its Federal Energy Regulatory Commission Supplement No. 5 to Electric Service Schedule No. 182. KG&E states the purpose of the change is to extend the term of the existing Short-Term Participation Power Service Schedule between KG&E and The City of Girard, Kansas. The change is proposed to become effective February 1, 1993.

Copies of the filing were served upon the City of Girard and the Kansas Corporation Commission.

Comment date: December 18, 1992, in accordance with Standard Paragraph E at the end of this notice.

12. Otter Tail Power Company

[Docket No. ER93–233–000]

December 4, 1992.

Take notice that on November 23, 1992, Otter Tail Power Company (Otter Tail) tendered for filing a Notice of Cancellation of Rate Schedule No. 0153.

Comment date: December 18, 1992, in accordance with Standard Paragraph E at the end of this notice.

13. Arizona Public Service Company

[Docket No. ER93–53–000]

December 4, 1992.

Take notice that on November 20, 1992, Arizona Public Service Company (APS) tendered for filing in this docket a copy of an agreement between APS and the City of Williams providing for Operation, Maintenance, Construction and Office Functions. APS states that it is making the filing in light of earlier Commission orders announcing an amnesty period for filing of jurisdictional agreements involving contributions in aid of construction.

Comment date: December 18, 1992, in accordance with Standard Paragraph E at the end of this notice.

14. Puget Sound Power & Light Company

[Docket No. ER93–173–000]

December 4, 1992.

Take notice that on November 17, 1992, Puget Sound Power & Light Company (Puget) tendered for filing, as an initial rate schedule, "Agreement for Firm Power Purchase" between Puget and Cascade Hydro, Inc. (the "Agreement"), containing provisions for construction of facilities, power purchase by Puget or Parallel operation of facilities. A copy of the filing was served upon Cascade Hydro, Inc.

Comment date: December 18, 1992, in accordance with Standard Paragraph E at the end of this notice.

15. Delmarva Power and Light Company

[Docket No. ER93–229–000]

December 4, 1992.

Take notice that on November 23, 1992, Delmarva Power and Light Company (DPL) tendered for filing as an initial Rate Schedule an Agreement for Installed Capacity Credit Transactions between Philadelphia Electric Company (PE) and DPL dated November 23, 1993. This contract sets forth the terms under which DPL will sell PJM installed capacity credits to PE. DPL requests that the Commission permit this Agreement to become effective on January 22, 1993.

DPL states that a copy of this filing has been served by mail upon PE, the Pennsylvania Public Utility Commission, the Delaware Public Service Commission, the Maryland Public Service Commission, and the Virginia State Corporation Commission.

Comment date: December 18, 1992, in accordance with Standard Paragraph E at the end of this notice.

16. Florida Power & Light Company

[Docket No. ER93–227–000]

December 4, 1992

Take notice that on November 20, 1992, Florida Power & Light Company tendered for filing a notice of cancellation of its service agreement with Florida Keys Electric Cooperative Association, Inc. and a conforming change to Sheet No. 23 to its FERC Electric Tariff.

Comment date: December 18, 1992, in accordance with Standard Paragraph E at the end of this notice.

17. Southerwesten Public Service Company

[Docket No. ER85–477–012]

December 4, 1992

Take notice that on November 20, 1992, Southwestern Public Service Company (Southwestern) tendered for filing its compliance report in the above-referenced docket.

Comment date: December 22, 1992, in accordance with Standard Paragraph E at the end of this notice.

18. United Illuminating Company

[Docket No. ER92–2–002]

December 4, 1992

Take notice that on November 20, 1992, United Illuminating Company (UI) tendered for filing its compliance report in the above-referenced docket.

Comment date: December 18, 1992, in accordance with Standard Paragraph E at the end of this notice.

19. Florida Power & Light Company

[Docket No. ER93–242–000]

December 4, 1992

Take notice that on November 27, 1992, Florida Power & Light Company (FPL) filed Amendment Number One to the Contract for Purchases and Sales of Scheduled Power and Energy Between Florida Power & Light Company and Tampa Electric Company. FPL requests an effective date of February 1, 1993.

Comment date: December 18, 1992, in accordance with Standard Paragraph E at the end of this notice.

20. Electric Energy, Inc

[Docket No. ER93–236–000]

December 4, 1992

Take notice that on November 25, 1992, Electric Energy, Inc. (EEInc.) tendered for filing proposed changes in its FERC Electric Service Tariff, including Modification 15 to the Service Agreement between EEInc. and the Department of Energy of the United States of America (DOE) and a Letter Supplement dated October 7, 1992 to the Power Supply Agreement dated September 2, 1987 between EEInc., on the one hand, and Union Electric Company, Illinois Power Company, Kentucky Utilities Company and Central Illinois Public Service Company (collectively, the "Sponsoring Companies"), on the other. The proposed changes modify the method of calculating demand charges and base excess energy charges under the Agreements. For the calendar year 1991, the proposed changes would have

increased jurisdictional revenues to EEInc. by $623,708.70, or 0.44%.

The proposed changes are implemented to remove the variable fuel cost factor from the formulae by which demand charges and excess Joppa energy charges are calculated. In addition, the base plant availability factor for use in the demand charge calculation has been reduced to 92.5%, rather than 100%. The proposed changes were requested by DOE to remove this variable rate element from the calculation of the charges in question.

Copies of the filing were served upon DOE, the Sponsoring Companies, and the Illinois Commerce Commission. Copies are also available for inspection at EEInc.'s offices in Joppa, Illinois.

Comment date: December 18, 1992, in accordance with Standard Paragraph E at the end of this notice.

21. Central Vermont Public Service Corporation

[Docket No. ER93–239–000]

December 4, 1992

Take notice that on November 25, 1992, Central Vermont Public Service Corporation (CVPS) tendered for filing the Forecast 1993 Cost Report for FERC Electric Tariff, Original Volume No. 3 under which CVPS provides Transmission and Distribution Service to the following customers:

Vermont Electric Cooperative, Inc.
Lyndonville Electric Department Village of Ludlow Electric Light Department
Village of Hyde Park Water and Light Department Rochester Electric Light and Power Company

Comment date: December 18, 1992, in accordance with Standard Paragraph E at the end of this notice.

22. Kansas City Power & Light Company

[Docket No. ER93–237–000]

December 4, 1992

Take notice that on November 25, 1992, Kansas City Power & Light Company (KCP&L) tendered for filing, pursuant to 18 CFR 35.12, an open access transmission tariff to be effective January 1, 1993. The tariff provides rates and terms for firm and non-firm transmission service for all eligible utilities, as defined in the tariff. KCP&L has requested waiver of certain Commission requirements, including notice, cost of service data and revenue estimates.

Copies of the filing were served upon the Kansas State Corporation Commission and Missouri Public Service Commission.

Comment date: December 18, 1992, in accordance with Standard Paragraph E at the end of this notice.

23. Florida Power & Light Company

[Docket No. ER93–228–000]

December 4, 1992

Take notice that on November 23, 1992, Florida Power & Light Company (FPL) tendered for filing the Letter of Agreement Regarding Construction and Reimbursement of Caluss-Lee No. 2 Line Terminal at Caluss between FPL and Lee County Electric Cooperative, Inc.

Comment date: December 18, 1992, in accordance with Standard Paragraph E at the end of this notice.

24. Municipal Resale Service Customer v. Ohio Power Company

[Docket No. EL93–6–000]

December 4, 1992.

Take notice that on November 18, 1992, Municipal Resale Service Customers (MRS) tendered for filing a Complaint and Request for Investigation against Ohio Power Company (Ohio Power). MRS request the Commission to investigate whether Ohio Power has charged and is charging wholesale rates that are unjust, unreasonably, unduly discriminatory, or otherwise unlawful under the Act.

Comment date: January 4, 1993, in accordance with Standard Paragraph E at the end of this notice.

25. PacifiCorp

[Docket No. ER93–247–000]

December 4, 1992.

Take notice that on December 1, 1992, PacifiCorp tendered for filing in accordance with 18 CFR part 35 of the Commission's Rules and Regulations, revisions to Exhibit B, D and H of the General Transfer Agreement, Contract No. DE–MS79–82BP90049, between Pacificorp and Bonneville Power Administration (Bonneville), PacifiCorp's Rate Schedule FERC No. 237.

The Exhibits have been revised to add or delete points of delivery and the associated transfer charges, loss factors and power factors.

PacifiCorp requests an effective date not later than sixty days from the Commission's receipt of this filing.

Copies of this filing were supplied to Bonneville and the Public Utility Commission of Oregon.

Comment date: December 18, 1992, in accordance with Standard Paragraph E at the end of this notice.

26. Shirley Ann Bird Perry

[Docket No. ID–2755–000]

Take notice that on December 1, 1992, Shirley Ann Bird Perry (Applicant) tendered for filing a supplemental application under section 305(b) of the Federal Power Act to hold the following positions:

Director—Southwestern Public Service Company
Advisory Director—Texas Commerce Bank-Austin, National Association

Comment date: December 22, 1992, in accordance with Standard Paragraph E at the end of this notice.

27. Consolidated Edison Company of New York, Inc.

[Docket No. ER92–50–000]

December 7, 1992.

Take notice that on November 27, 1992, Consolidated Edison Company of New York, Inc. (Con Edison), in response to a deficiency letter herein, tendered for filing additional information relative to an agreement to provide transmission and interconnection service to Long Island Lighting Company (LILCO), together with two supplements to the agreement. One supplement provides for construction and maintenance of interconnection facilities between Con Edison and LILCO; the other supplement would decrease annual transmission revenues from LILCO by $328,558.46. Con Edison has requested waivers so that the interconnection supplement can become effective as of August 22, 1977, and the transmission rate reduction supplement as of July 1, 1992.

Con Edison states that a copy of this filing has been served by mail upon LILCO and the parties to Docket No. ER92–50–000.

Comment date: December 22, 1992, in accordance with Standard Paragraph E at the end of this notice.

28. New England Power Company

[Docket No. ER93–2–000]

December 7, 1992.

Take notice that on November 16, 1992, New England Power Company (NEP) tendered for filing an amendment to its original filing submitted on October 1, 1992, in the above-referenced docket.

Comment date: December 21, 1992, in accordance with Standard Paragraph E at the end of this notice.

29. Wisconsin Electric Power Company

[Docket No. ER93–251–000]

December 7, 1992.

Take notice that Wisconsin Electric Power Company (Wisconsin Electric) on

December 3, 1992, tendered for filing the MIN–WUMS Capability Allocation Agreement between itself, Wisconsin Power and Light Company, Wisconsin Public Service Corporation. The Agreement resolves the apportionment of the limited transmission capability between Minnesota and the Wisconsin-Upper Michigan subregion of the Mid America Interpool Network (MAIN).

The parties request an effective date coincident with the Commission's acceptance of the Agreement.

A copy of the filing has been served on the Public Service Commission of Wisconsin.

Comment date: December 22, 1992, in accordance with Standard Paragraph E at the end of this notice.

30. Florida Power Corporation

[Docket No. ER93–252–000]

December 7, 1992.

Take notice that on December 3, 1992, Florida Power Corporation filed an agreement between itself and Seminole Electric Cooperative, Inc., which provides for a reduction in rates for service by Florida Power to serve extraterritorial load. The Company requests waiver of the 60 day notice requirement so that the rate reduction which the service agreement provides for may be allowed to become effective on June 1, 1987.

Comment date: December 22, 1992, in accordance with Standard Paragraph E at the end of this notice.

31. Bangor Hydro-Electric Company

[Docket No. ER93–244–000]

December 7, 1992.

Take notice that on November 30, 1992, Bangor Hydro-Electric Company (Bangor) tendered for filing Notices of Cancellation of the following rate schedules:

Rate schedule	Affected customers	Termination date
0050	Boston Edison Company	1/30/93
	Down East Peat, L.P	1/30/93
0051	Boston Edison Company	1/30/93

Comment date: December 22, 1992, in accordance with Standard Paragraph E at the end of this notice.

32. Southwestern Electric Power Company

[Docket No. ER93–249–000]

December 7, 1992.

Take notice that on December 2, 1992, Southwestern Electric Power Company (SWEPCO) tendered for filing a Scheduling Agreement between SWEPCO and Northeast Texas Electric Cooperative, Inc. (NTEC) dated April 22, 1992 and a related Letter Agreement dated September 18, 1992. Under such agreements, SWEPCO will act as NTEC's agent for the purpose of scheduling power and energy purchased by NTEC from Entergy Power, Inc. (EPI) and Entergy Services, Inc. (ESI). The Scheduling Agreement also makes provision for the sale by SWEPCO to NTEC of Backup Energy, Emergency Energy and Substitute Energy which may be used in certain circumstances in place of energy provided by EPI or ESI.

SWEPCO requests that such agreements be made effective on the later of February 1, 1993 or the date on which the Commission permits to become effective the Unit Power Sales Agreement between NTEC and EPI filed by ESI in Docket No. ER92–365–000.

Copies of the filing have been served on NTEC and on the Public Utility Commission of Texas.

Comment date: December 22, 1992, in accordance with Standard Paragraph E at the end of this notice.

33. Arizona Public Service Company

[Docket No. ER93–248–000]

December 7, 1992.

Take notice that on December 2, 1992, Arizona Public Service Company (APS) tendered for filing revised Exhibit B to the Wholesale Power Supply Agreement between Arizona Public Service Company (APS or Company) and Wellton-Mohawk Irrigation and Drainage District (Wellton-Mohawk) (APS–FPC Rate Schedule No. 58) and revised Exhibit B to Service Schedule D of the Power Coordination Agreement between Plains Electric Generation and Transmission Cooperative, Inc. (Plains) and APS (APS–FERC Rate Schedule No. 82) (collectively Exhibits and Agreements). The Exhibits list Contract Demands applicable under the Agreements.

No change to the rate and revenue levels currently on file with the Commission for the 12 months immediately after the proposed effective date is proposed herein.

No new facilities or modifications to existing facilities are required as a result of this revision.

A copy of this filing has been served on Wellton-Mohawk, Plains, the Arizona Corporation Commission, and the New Mexico Public Service Commission.

Comment date: December 22, 1992, in accordance with Standard Paragraph E at the end of this notice.

34. Idaho Power Company

[Docket No. ER92–787–000]

December 7, 1992.

Take notice that on December 1, 1992, in response to the Commission's deficiency letter of October 1, 1992, Idaho Power Company (IPC) tendered for filing a Draft Transmission Service Agreement between Sierra Pacific Power Company and Idaho Power Company.

IPC has requested that the Commission suspend further consideration of this Agreement until the parties have concluded negotiations.

Comment date: December 22, 1992, in accordance with Standard Paragraph E at the end of this notice.

35. LG&E—Westmoreland Hopewell

[Docket No. QF88–85–004]

December 7, 1992.

On December 3, 1992, LG&E—Westmoreland Hopewell, tendered for filing an amendment to its filing in this docket. No determination has been made that the submittal constitutes a complete filing.

The amendment pertains to the revision of the facility's testing period and provides additional information for computation of the operating values subsequent to the testing period.

Comment date: December 28, 1992, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraphs

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 92–30199 Filed 12–11–92; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. CP85-221-008]

Frontier Gas Storage Co.; Sale Pursuant to Settlement Agreement

December 3, 1992.

Take notice that on November 24, 1992, Frontier Gas Storage Company (Frontier), % Reid & Priest, Market Square, 701 Pennsylvania Avenue, NW., Washington, DC 20004, in compliance with the provisions of the Commission's February 13, 1985 Order in Docket No. CP82-487-000 et. al., submitted an executed Service Agreement under Rate Schedule LVS-1, providing for the possible sale of 2,000,000 MMBtu of Frontier's gas storage inventory on an "in place" basis to Williston Basin Interstate Pipeline Company (Williston Basin).

Under Subpart (b) of Ordering Paragraph (G) of the Commission's February 13, 1985 Order, Frontier is "authorized to consummate the proposed sale in place unless the Commission issues an order within 20 days after expiration of such notice period either directing that the sale not take place and setting it for hearing or permitting the sale to go forward and establishing other procedures for resolving the matter. Deliveries of gas sold in place shall be made pursuant to a schedule to be set forth in an exhibit to the executed service agreement."

Any person desiring to be heard or to make a protest with reference to said tariff sheet filing should, on or before December 14, 1992, file with the Federal Energy Regulatory Commission (825 North Capitol Street, NE., Washington, DC 20426) a motion to intervene or protest in accordance with the requirements of the Commission's Rules of Practice and Procedures, 18 CFR 385.214 or 385.211. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[Docket Nos. RS92-23-000, RP91-203-000, and RP92-132-000 (Consolidated, in Part)]

Tennessee Gas Pipeline Co.; Notice of Conference

December 4, 1992.

Take notice that on December 17, 1992, beginning at 9:30 a.m., a conference will be convened in the above-captioned restructuring docket. The conference will be held in Hearing Room Number 1 at the Federal Energy Regulatory Commission, 810 1st Street, NE., Washington, DC.

This conference is being held to discuss Tennessee Gas Pipeline Company's (Tennessee) Order No. 636 restructuring compliance filing, which Tennessee filed on November 2, 1992, and also to discuss the comments filed by the parties in response to Tennessee's filing.

All interested parties are invited to attend. Attendance at the conference, however, will not confer party status. For additional information, interested parties can call Sharon Dameron at (202) 208-2017.

Lois D. Cashell,

Secretary.

[Docket No. RP92-137-000 (Phase II)]

Transcontinental Gas Pipe Line Corp.; Notice of Informal Settlement Conference

December 7, 1992.

Take notice that an informal settlement conference will be convened in this proceeding on December 16, 1992, at 10 a.m., at the offices of the Federal Energy Regulatory Commission, 810 First Street, NE., Washington, DC.

Any party, as defined by 18 CFR 385.102(c), or any participant as defined by 18 CFR 385.102(b), is invited to attend. Persons wishing to become a party must move to intervene and receive intervenor status pursuant to the Commission's regulations (18 CFR 385.214).

For additional information, contact Donald A. Heydt at (202) 208-0740 or Joanne Leveque at (202) 208-5705.

Office of Fossil Energy

[FE Docket No. 91-106-NG]

Northwest Natural Gas Co.; Order Granting Long-Term Authorization To Import Natural Gas From Canada

AGENCY: Office of Fossil Energy, DOE.

ACTION: Notice of order.

SUMMARY: The Office of Fossil Energy of the Department of Energy gives notice that it has issued an order granting Northwest Natural Gas Company authorization to import, at Kingsgate, British Columbia, up to 48,168 Mcf per day of Canadian natural gas over a period of ten years, beginning the earlier of November 1, 1993, or the date the Pacific Gas Transmission Expansion Project becomes operational, through October 31, 2003.

This order is available for inspection and copying in the Office of Fuels Programs Docket Room, 3F-056, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586-9478. The docket room is open between the hours of 8 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC, December 4, 1992.

Charles F. Vacek,

Deputy Assistant Secretary for Fuels Programs, Office of Fossil Energy.

BILLING CODE 6450-01-M

ENVIRONMENTAL PROTECTION AGENCY

[OPPTS-44593; FRL-4178-6]

TSCA Chemical Testing; Receipt of Test Data

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces the receipt of test data on dibenzo-para-dioxins/dibenzofurans: decabromodiphenyloxide (CAS No. 1163-19-5), submitted pursuant to a final test rule. Data were also submitted on methyl tertiary butyl ether (MTBE) (Cas No. 1634-04-4) pursuant to a testing consent order. All data were submitted under the Toxic Substances Control Act (TSCA). Publication of this notice is in compliance with section 4(d) of TSCA.

FOR FURTHER INFORMATION CONTACT: Susan B. Hazen, Director, Environmental Assistance Division (TS-799), Office of Pollution Prevention and Toxics, Environmental Protection Agency, Rm. E-543B, 401 M St., SW., Washington, DC 20460, (202) 554-1404, TDD (202) 554-0551.

SUPPLEMENTARY INFORMATION: Section 4(d) of TSCA requires EPA to publish a notice in the **Federal Register** reporting the receipt of test data submitted pursuant to test rules promulgated under section 4(a) within 15 days after it is received. Under 40 CFR 790.60, all TSCA section 4 consent orders must contain a statement that results of testing conducted pursuant to these

testing consent orders will be announced to the public in accordance with section 4(d).

I. Test Data Submissions

Test data for decabromodiphenyloxide were submitted by Ameribrom, Inc., pursuant to a test rule at 40 CFR Part 766. They were received by EPA on November 18, 1992. The submission describes the determination of polybrominated dibenzo-p-dioxins and dibenzofurans by high-resolution gas chromatography/ medium high resolution mass spectrometry in decabromodiphenyloxide. These chemical analyses are required by this test rule.

Test data for MTBE were submitted by the Methyl Tertiary Butyl Ether Task Force in behalf of the test sponsors and pursuant to a testing consent order at 40 CFR 799.5000. They were received by EPA on October 29th and November 19, 1992. The submissions describe vapor inhalation oncogenicity studies in CD-1® mice and Fischer 344 rats. Health effects testing is required by this consent order.

EPA has initiated its review and evaluation process for these data submissions. At this time, the Agency is unable to provide any determination as to the completeness of the submissions.

II. Public Record

EPA has established a public record for this TSCA section 4(d) receipt of data notice (docket number OPPTS–44593). This record includes copies of all studies reported in this notice. The record is available for inspection from 8 a.m. to 12 noon, and 1 p.m. to 4 p.m., Monday through Friday, except legal holidays, in the TSCA Public Docket Office, Rm. NE–G004, 401 M St., SW., Washington, DC 20460.

Authority: 15 U.S.C. 2603.

Dated: November 30, 1992.

Charles M. Auer,

Director, Chemical Control Division, Office of Pollution Prevention and Toxics.

BILLING CODE 6560–50–F

[OPP–50753; FRL–4180–7]

Receipt of an Application for an Experimental Use Permit for a Transgenic Plant Pesticide

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has received an application from the Monsanto Company for an EPA Experimental Use Permit (EUP) for a transgenic plant pesticide. This is the second EUP application under the Federal Insecticide, Fungicide, and Rodenticide Act for testing with a plant that has been genetically-altered to produce a pesticide. The Agency has determined that this application may be of regional and national significance. Therefore, the Agency is soliciting public comments on this application.

DATES: Written comments must be received on or before January 13, 1993.

ADDRESSES: Comments, in triplicate, should bear the docket control number OPP–50753 and be submitted to: Public Response and Program Resources Branch, Field Operations Division (H7506C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. In person bring comments to: Rm. 1128, Crystal Mall 2 1921, Jefferson Davis Highway, Crystal City, VA 22202.

Information submitted in any comment concerning this notice may be claimed confidential by marking any part or all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice to the submitter. Written comments will be available for public inspection in Rm. 1128 at the address given above, from 8 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays.

FOR FURTHER INFORMATION CONTACT: By mail: Phillip O. Hutton, Product Manager (PM) 18, Registration Division (H7505C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: Rm. 213, Crystal Mall 2, 1921 Jefferson Davis Highway, Crystal City, VA 22202, (703)305–7690

SUPPLEMENTARY INFORMATION: On October 22, 1992, an application for an EUP was received from Monsanto Company, 700 Chesterfield Village Parkway, St. Louis, Missouri 63198. The application was assigned EPA File Symbol 524–EUP–TO. Monsanto proposes to test the Colorado Potato Beetle (CPB) control protein, delta-endotoxin, derived from the soil microbe *Bacillus thuringiensis* subspecies *tenebrionis* (B.t.t.), as expressed in plants and tubers of several lines of potato cultivars. According to the application, CPB control protein, B.t.t. delta-endotoxin, will be present at no more than .01% of the total weight of the potato plants or tubers. The delta-endotoxin gene of B.t.t. is transferred to potato via the Ti plasmid of *Agrobacterium tumefaciens* strain ABI (vector PV-STBTO__). The vector agent, *Agrobacterium tumefaciens* strain ABI, however, is not associated with the transformed potato plants or tubers; during the gene transfer procedure, the potato explants are treated with an antibiotic known to inhibit the growth of the bacterium, *Agrobacterium tumefaciens* strain ABI. According to the application, the expressed B.t.t. delta-endotoxin is contained intracellularly within the tubers and plants; as a result, humans handling the plants and tubers will have an extremely low dermal exposure to the CPB control protein. In addition, Monsanto has submitted, as part of their EUP protocols, specific precautionary measures they will take to reduce the possibility of accidental ingestion of plant parts or tubers by humans or domestic animals.

Some of the potato cultivar lines will contain only the B.t.t. gene for mediating CPB resistance. Other potato cultivar lines have been modified to contain genes mediating CPB and Potato Virus Y (PVY) or Potato Leaf Roll Virus (PLRV) resistance.

Forty and one-half acres of CPB resistant potato plants and 48 acres of CPB resistant potato tubers will be planted for a total of 88.5 acres. A maximum of 15,000 plants or tubers will be planted per acre, each weighing approximately 5.6 grams per plant and 60 grams per tuber. The total plant material, at planting, will contain a maximum of 129.3 grams B.t.t. protein, with levels rising to a maximum of 34.6 kilograms of B.t.t. protein at harvest.

Individual test sites range from one-fifth to 15 acres in size; however, the majority will be under 1 acre. Proposed test sites are located in the following 14 states: Colorado, Hawaii, Idaho, Maine, Maryland, Michigan, Montana, New York, North Dakota, Ohio, Oregon, Pennsylvania, Washington, and Wisconsin. Upon completion of testing, some potato plants and tubers will be collected and saved for future research, analyses, or plantings. All other plant material will be destroyed. Because no plants or tubers will be used for food or feed, no tolerances for this EUP are requested.

The application proposes that the permit be issued for 1 year, beginning March 1, 1993, and ending March 30, 1994. The labeling proposed by

Monsanto Company states the following:

This package contains Colorado potato beetle resistant potato plants containing a *Bacillus thuringiensis* subspecies *tenebrionis* protein. Contains plants containing vector PV-STBTO____. For use only at an application site of a cooperator and in accordance with the terms and conditions of the Experimental Use Permit. This labeling must be in the possession of the user at the time of planting of the potato plants. It is a violation of Federal law to use these plants in any manner inconsistent with this labeling. These plants contain *Bacillus thuringiensis* subspecies *tenebrionis* insecticidal protein and may only be used according to the protocols as included in the approved EUP program for evaluation of the control of the following insect:
Colorado Potato Beetle/*Leptinotarsa decemlineata*

Cooperators must have a copy of each applicable protocol prior to initiating any research with these plants. Plants should be planted at a maximum of 15,000 plants per acre depending on the site variety. Do not contaminate water, food or feed by storage and/or disposal. Store in cool dry place inaccessible to children. Any plants not used in these experiments must be returned to Monsanto or disposed of as specified in the field protocols. All plant material that is not saved for further research, analyses, or future plantings must be destroyed as specified in the field protocols. None of the plants or plant material may be sold or allowed to enter into commerce. Do not reuse bag. Discard in trash. Ensure that the bag is completely empty of plants before disposing in the trash.

Proposed EUP Program

The proposed EUP program will include the following five experiments designed to evaluate the performance of the expressed protein against the CPB: efficacy and agronomic evaluations; performance confirmation; population dynamics and resistance management. In addition, seed increase trials will be conducted in order to produce seed for future plantings. In keeping with acceptable agronomic practices for each region, fertilizer, herbicides, and fungicides will be used, if needed, to improve soil nutrient levels, and to control weeds and diseases. If CPB populations exceed economic threshold levels, additional insecticides will be applied in accordance with local integrated pest management (IPM) practices to meet the objectives of the experiment. Any conventional pesticides used in this EUP program will be applied according to each pesticide's application rate as specified on its label.

Upon review of the Monsanto application, any comments received in response to this notice and any other relevant information, EPA will decide whether to issue or deny the EUP. If issued, EPA will set conditions under which the experiments are to be conducted. Any issuance of an EUP by the Agency will be announced in the **Federal Register**.

A copy of the Monsanto EUP application deleted of all CBI is available for public inspection in the Public Docket Office at the address listed under the ADDRESSES unit.

Dated: December 8, 1992.

Lawrence E. Culleen

Ambient Air Monitoring Reference and Equivalent Methods; Receipt of Application for a Reference Method and an Equivalent Method Determination

Notice is hereby given that on November 2, 1992, the Environmental Protection Agency received two applications from Horiba Instruments Incorporated, 17671 Armstrong Avenue, Irvine, California 92714. The first application is to determine if the Horiba Model APNA-350E Oxides of Nitrogen Monitoring System should be designated by the Administrator of the EPA as a reference method under 40 CFR part 53. The second application is to determine if the Horiba Model APSA-350E Sulfur Dixoide Monitoring System should be designated by the Administrator of the EPA as an equivalent method under 40 CFR part 53. If, after appropriate technical study, the Administrator determines that either of these methods should be so designated, notice thereof will be given in a subsequent issue of the **Federal Register**.

FEDERAL DEPOSIT INSURANCE CORPORATION

Information Collection Submitted to OMB for Review

AGENCY: Federal Deposit Insurance Corporation.

ACTION: Notice of information collection submitted to OMB for review and approval under the Paperwork Reduction Act of 1980.

SUMMARY: In accordance with requirements of the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35), the FDIC hereby gives notice that it has submitted to the Office of Management and Budget a request for OMB review of the information collection system described below.

Type of Review: Extension of the expiration date of a currently approved collection without any change in the substance or method of collection.
Title: Procedures for Monitoring Bank Secrecy Act Compliance.
Form Number: None.
OMB number: 3064-0087.
Expiration Date of OMB Clearance: January 31, 1993.
Frequency of Response: Recordkeeping, on occasion.
Respondents: Insured State nonmember banks.
Number of Recordkeepers: 8,400.
Annual Hours Per Recordkeepner: 0.5.
Total Annual Burden Hours: 4,200.
OMB Reviewer: Gary Waxma, (202) 395-7340, Office of Management and Budget, Paperwork Reduction Project (3064-0087), Washington, DC 20503.
FDIC Contact: Steven F. Hanft, (202) 898-3907, Office of the Executive Secretary, room F-400, Federal Deposit Insurance Corporation, 550 17th Street NW., Washington, DC 20429.
Comments: Comments on this collection of information are welcome and should be submitted before February 12, 1992.

ADDRESSES: A copy of the submission may be obtained by calling or writing the FDIC contact listed above. Comments regarding the submission should be addressed to both the OMB reviewer and the FDIC contact listed above.

SUPPLEMENTARY INFORMATION: Insured state nonmember banks must establish and maintain written procedures to assure and monitor compliance with the requirements of the Bank Secrecy Act (31 U.S.C. 5311 *et seq.*), and with Treasury Department regulations 31 CFR part 103.

Dated: December 8, 1992.

Federal Deposit Insurance Corporation.
Hoyle L. Robinson,
Executive Secretary.

FEDERAL RESERVE SYSTEM

BankAmerica Corporation; Acquisition of Company Engaged in Permissible Nonbanking Activities

The organization listed in this notice has applied under § 225.23(a)(2) or (f) of the Board's Regulation Y (12 CFR 225.23(a)(2) or (f)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to acquire or control voting securities or assets of a company engaged in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Comments regarding the application must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than December 28, 1992.

A. Federal Reserve Bank of San Francisco (Kenneth R. Binning, Director, Bank Holding Company) 101

Market Street, San Francisco, California 94105:

1. BankAmerica Corporation, San Francisco, California; to acquire First Associates Financial, Inc., Tampa, Florida, and thereby engage in manufactured housing lending, pursuant to § 225.25(b)(1) of the Board's Regulation Y.

Board of Governors of the Federal Reserve System, December 8, 1992.

Jennifer J. Johnson,

Associate Secretary of the Board.

[FR Doc. 92-30238 Filed 12-11-92; 8:45 am]

BILLING CODE 6210-01-F

Federal Open Market Committee; Domestic Policy Directive of August 18, 1992

In accordance with § 271.5 of its rules regarding availability of information, there is set forth below the domestic policy directive issued by the Federal Open Market Committee at its meeting held on August 18, 1992.[1] The Directive was issued to the Federal Reserve Bank of New York as follows:

The information reviewed at this meeting suggests that economic activity is continuing to expand at a subdued pace. Total nonfarm payroll employment rebounded in July after declining in June, and the civilian unemployment rate edged down to 7.7 percent. Manufacturing output was unchanged in July, but overall industrial production was boosted by a higher level of mining and utility output. Retail sales increased moderately in July. Permits issued for the construction of new housing units rose slightly in July, but housing starts fell. Recent data on orders and shipments of nondefense capital goods indicate further increases in outlays for business equipment, while nonresidential construction has remained soft. The nominal U.S. merchandise trade deficit in April-May was substantially above its average rate in the first quarter. Incoming data on wages and prices suggest that inflation is slowing.

Interest rates have declined considerably since the Committee meeting on June 30-July 1. The Board of Governors approved a reduction in the discount rate from 3-1/2 to 3 percent on July 2. In foreign exchange markets, the trade-weighted value of the dollar in terms of the other G-10 currencies declined further over the first several weeks of the intermeeting period, but it has stabilized more recently.

M2 and M3 contracted somewhat further in July. Through July, both aggregates were appreciably below the lower ends of the ranges established by the Committee for the year.

The Federal Open Market Committee seeks monetary and financial conditions that will foster price stability and promote sustainable growth in output. In furtherance of these objectives, the Committee at its meeting on June 30-July 1 reaffirmed the ranges it had established in February for growth of M2 and M3 of 2-1/2 to 6-1/2 percent and 1 to 5 percent respectively, measured from the fourth quarter of 1991 to the fourth quarter of 1992. The Committee anticipated that developments contributing to unusual velocity increases could persist in the second half of the year. The monitoring range for growth of total domestic nonfinancial debt also was maintained at 4-1/2 to 8-1/2 percent for the year. For 1993, the Committee on a tentative basis set the same ranges as in 1992 for growth of the monetary aggregates and debt measured from the fourth quarter of 1992 to the fourth quarter of 1993. The behavior of the monetary aggregates will continue to be evaluated in the light of progress toward price level stability, movements in their velocities, and developments in the economy and financial markets.

In the implementation of policy for the immediate future, the Committee seeks to maintain the existing degree of pressure on reserve positions. In the context of the Committee's long-run objectives for price stability and sustainable economic growth, and giving careful consideration to economic, financial and monetary developments, slightly greater reserve restraint might or slightly lesser reserve restraint would be acceptable in the intermeeting period. The contemplated reserve conditions are expected to be consistent with growth of M2 and M3 over the period from June through December at annual rates of about 2 and 1/2 percent, respectively.

By order of the Federal Open Market Committee, December 4, 1992.

Normand Bernard,

Deputy Secretary, Federal Open Market Committee.

Brooke Holdings, Inc.; Acquisition of Company Engaged in Permissible Nonbanking Activities; Correction

This notice corrects a previous **Federal Register** notice (FR Doc. 92-29195) published at page 57067 of the issue for Wednesday, December 2, 1992.

Under the Federal Reserve Bank of Kansas City, the entry for Brooke Holdings, Inc. is revised to read as follows:

Federal Reserve Bank of Kansas City (John E. Yorke, Senior Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. Brooke Holdings, Inc., Jewell, Kansas, parent of Brooke Corporation, Jewell, Kansas; to engage, through a subsidiary known as Mid Kansas Insurance Agency, Inc., Wichita, Kansas, in insurance activities, pursuant to § 225.25(b)(8)(vi) of the Board's Regulation Y.

Comments on this application must be received by December 16, 1992.

Board of Governors of the Federal Reserve System, December 8, 1992.

Jennifer J. Johnson,

Associate Secretary of the Board.

Leland P. Cook, et al.; Change in Bank Control Notices; Acquisitions of Shares of Banks or Bank Holding Companies

The notificants listed below have applied under the Change in Bank Control Act (12 U.S.C. 1817(j)) and § 225.41 of the Board's Regulation Y (12 CFR 225.41) to acquire a bank or bank holding company. The factors that are considered in acting on the notices are set forth in paragraph 7 of the Act (12 U.S.C. 1817(j)(7)).

The notices are available for immediate inspection at the Federal Reserve Bank indicated. Once the notices have been accepted for processing, they will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for that notice or to the offices of the Board of Governors. Comments must be received not later than December 31, 1992.

A. Federal Reserve Bank of Dallas (W. Arthur Tribble, Vice President) 400 South Akard Street, Dallas, Texas 75222:

1. Leland P. Cook, Corsicana, Texas; to acquire an additional 5.88 percent for a total of 16.79 percent, and Byron Cook, Corsicana, Texas, to acquire an additional 5.88 percent for a total of 12.77 percent of the voting shares of Corsicana Bancshares, Inc., Corsicana, Texas, and thereby indirectly acquire Corsicana National Bank, Corsicana, Texas.

Board of Governors of the Federal Reserve System, December 7, 1992.

Jennifer J. Johnson,

Associate Secretary of the Board.

Exchange National Bancshares, Inc., et al.; Formation of, Acquisition by, or Merger of Bank Holding Companies

The company listed in this notice has applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for that application or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Comments regarding this application must be received not later than January 4, 1993.

A. Federal Reserve Bank of St. Louis (Randall C. Sumner, Vice President) 411 Locust Street, St. Louis, Missouri 63166:

1. Exchange National Bancshares, Inc., Jefferson City, Missouri; to become a bank holding company by acquiring 100 percent of the voting shares of The Exchange National Bank of Jefferson City, Jefferson City, Missouri.

Board of Governors of the Federal Reserve System, December 7, 1992.

Jennifer J. Johnson,

Associate Secretary of the Board.

BILLING CODE 6210-01-F

Forest Bancorp; Notice of Application to Engage de novo in Permissible Nonbanking Activities

The company listed in this notice has filed an application under § 225.23(a)(1) of the Board's Regulation Y (12 CFR 225.23(a)(1)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to commence or to engage *de novo*, either directly or through a subsidiary, in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Comments regarding the application must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than December 31, 1992.

A. Federal Reserve Bank of Atlanta (Zane R. Kelley, Vice President) 104 Marietta Street, N.W., Atlanta, Georgia 30303:

1. Forest Bancorp, Forest, Mississippi; to engage *de novo* through its subsidiary, Bankers Capital Corporation, Forest, Mississippi, in making, acquiring, or servicing loans or other extensions of credit pursuant to § 225.25(b)(1) of the Board's Regulation Y.

Board of Governors of the Federal Reserve System, December 7, 1992.

Jennifer J. Johnson,

Associate Secretary of the Board.

BILLING CODE 6210-01-F

Bank of Montana System, et al.; Acquisitions of Companies Engaged in Permissible Nonbanking Activities

The organizations listed in this notice have applied under § 225.23(a)(2) or (f) of the Board's Regulation Y (12 CFR 225.23(a)(2) or (f)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to acquire or control voting securities or assets of a company engaged in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise

noted, such activities will be conducted throughout the United States.

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding each of these applications must be received at the Reserve Bank indicated for the application or the offices of the Board of Governors not later than January 4, 1993.

A. Federal Reserve Bank of Minneapolis (James M. Lyon, Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

1. Bank of Montana System, Great Falls, Montana; to acquire Montana Bancsystem, Inc., Billings, Montana, and thereby engage in general insurance agency activities in Circle, Roundup, Red Lodge, and Forsyth, Montana, towns with populations of less than 5,000 pursuant to § 225.25(b)(8)(iii) of the Board's Regulation Y.

2. Marquette Bancshares, Inc., Minneapolis, Minnesota; to acquire Marquette Fund Advisors, Inc., Minneapolis, Minnesota, and thereby engage in serving as investment adviser to an investment company pursuant to § 225.25(b)(4)(ii); and to provide portfolio investment advice to any other person pursuant to § 225.25(b)(4) of the Board's Regulation Y.

3. Norwest Corporation, Minneapolis, Minnesota; to acquire Boris Systems, Inc., East Lansing, Michigan, and thereby engage in data processing activities pursuant to § 225.25(b)(7) of the Board's Regulation Y.

Board of Governors of the Federal Reserve System, December 7, 1992.

Jennifer J. Johnson,

Associate Secretary of the Board.

BILLING CODE 6210-01-F

FEDERAL TRADE COMMISSION

Granting of Request for Early Termination of the Waiting Period Under the Premerger Notification Rules

Section 7A of the Clayton Act, 15 U.S.C. 18a, as added by title II of the Hart-Scott-Rodino Antitrust Improvements Act of 1976, requires persons contemplating certain mergers or acquisitions to give the Federal Trade Commission and the Assistant Attorney General advance notice and to wait designated periods before consummation of such plans. Section 7A(b)(2) of the Act permits the agencies, in individual cases, to terminate this waiting period to its expiration and requires that notice of this action be published in the **Federal Register**.

The following transactions were granted early termination of the waiting period provided by law and the premerger notification rules. The grants were made by the Federal Trade Commission and the Assistant Attorney General for the Antitrust Division of the Department of Justice. Neither agency intends to take any action with respect to these proposed acquisitions during the applicable waiting period.

Realty Computer Associates, Inc., d/b/a Computer Listing Service; Prohibited Trade Practices, and Affirmative Corrective Actions

AGENCY: Federal Trade Commission.

ACTION: Consent order.

SUMMARY: In settlement of alleged violations of federal law prohibiting unfair acts and practices and unfair methods of competition, this consent order prohibits, among other things, a Missouri-based real-estate multiple listing service (MLS) from refusing to publish exclusive-agency listings, or restricting its members from offering such listings. In addition, the respondent is prohibited from requiring, as a condition of membership or use of its MLS, that any applicant or member engage in real-estate brokerage full time, or that any applicant or member maintain an office located on commercially zoned property or within the respondent's service area.

DATES: Complaint and Order issued November 23, 1992.[1]

FOR FURTHER INFORMATION CONTACT: Michael Miller, Chicago Regional Office, Federal Trade Commission, 55 East Monroe St., Suite 1437, Chicago, IL 60603. (312) 353–8156.

SUPPLEMENTARY INFORMATION: On Thursday, September 10, 1992, there was published in the **Federal Register**, 57 FR 41500, a proposed consent agreement with analysis In the Matter of Realty Computer Associates, Inc., d/b/a Computer Listing Service, for the purpose of soliciting public comment. Interested parties were given sixty (60) days in which to submit comments, suggestions or objections regarding the proposed form of the order.

No comments having been received, the Commission has ordered the issuance of the complaint in the form contemplated by the agreement, made its jurisdictional findings and entered an order to cease and desist, as set forth in the proposed consent agreement, in disposition of this proceeding.

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interprets or applies sec. 5, 38 Stat. 719, as amended; 15 U.S.C. 45)

Donald S. Clark,

Secretary.

BILLING CODE 4160–18–M

[Program Announcement 913]

Grants for Injury Control Research Centers and Injury Control Research Program Project Grants; Availability of Funds for Fiscal Year 1993 Amendment

A notice announcing the availability of Fiscal Year 1993 funds for grants to support Injury Control Research Centers (ICRCs) and Injury Control Research Program Projects (RPPGs) was published in the **Federal Register** on April 7, 1992, [57 FR 11722], and amended on August 3, 1992 [57 FR 34140]. The notice is further amended as follows:

On page 11722 of the April 7, 1992 notice, third column, under the heading "**AVAILABILITY OF FUNDS**," following the first sentence insert: "An additional $250,000 supplement is available for a demonstration project at an existing ICRC that would provide support for new field studies conducted by new investigators."

On page 11723, first column, under the heading "**PURPOSE**," insert the following: "I. To support training of new investigators through the design and implementation of applied injury prevention and control projects as a component of the NCIPC's (National Center for Injury Prevention and Control) plan to build and enhance the field of injury control research."

On page 11723, under the heading "**PROGRAM REQUIREMENTS**" following section B., third column, insert the following:

"C. Essential Requirements for Applicants for a New Investigator Pilot Project Demonstration Supplement

1. A nationally recognized injury control research center program with existing ties to schools of medicine, public health and engineering should be in place to facilitate research training.

2. A documented mechanism that provides for the collection, management, and coordination of data necessary for injury control studies should be in place. This would include:

a. External coding of the cause of injury for hospital discharges;

b. Availability of worker compensation records for research purposes;

c. Established trauma center, preferably with a trauma registry, that is part of a research university; and

d. Demonstrated access to, and linkage with, drivers' records, traffic safety records, and criminal justice system reports.

3. An existing relationship with a successful statewide injury control program that will provide for the translation of research findings into community-based intervention programs and evaluation of these injury control interventions should be in place.

4. An established working relationship in a program for community involvement in injury control intervention and for mobilizing and coordinating professional groups and community-based organizations should be in place."

On page 11723, third column, under the heading "**EVALUATION CRITERIA**," fourth and fifth sentences, delete "senior Federal staff" and insert "the Advisory Committee for Injury Prevention and Control."

On page 11724, second column, section B., delete the heading "Review by Senior Federal Staff" and insert "Review by Advisory Committee for Injury Prevention and Control." In the first sentence of this section, delete the words "senior Federal staff" and insert "the Advisory Committee for Injury Prevention and Control."

All other information and requirements of the notice as amended remain the same.

Dated: December 7, 1992.

Robert L. Foster,

Acting Associate Director for Management and Operations, Centers for Disease Control and Prevention (CDC).

BILLING CODE 4160-18-M

Food and Drug Administration

Antibody to Human Immunodeficiency Virus Type 2 (HIV-2) Reference Panel 1; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing the availability of a new FDA reference panel for tests intended to detect the antibody to Human Immunodeficiency Virus Type 2 (HIV-2 Reference Panel 1). FDA recommends that manufacturers of currently licensed HIV-2 and HIV-1/HIV-2 test kits amend their product license to incorporate a lot release testing protocol using the HIV-2 Reference Panel 1.

DATES: FDA recommends that manufacturers amend their product licenses by February 12, 1993.

ADDRESSES: The HIV-2 Reference Panel 1 is available for distribution from Charles O. Roberts, Food and Drug Administration, Center for Biologics Evaluation and Research (HFB-920), 8800 Rockville Pike, Bethesda, MD 20892.

FOR FURTHER INFORMATION CONTACT: Charles O. Roberts (address above), 301-227-6721.

SUPPLEMENTARY INFORMATION: The HIV-2 Reference Panel 1 is intended for the qualitative and semiquantitative evaluation of in vitro tests to detect antibody to HIV-2 in human serum or plasma. It is a regulatory test panel of sera designed to provide a lot release criterion for HIV-2 and HIV-1/HIV-2 antibody detection kits produced by licensed manufacturers or by manufacturers pursuing licensure of such kits. The Center for Biologics Evaluation and Research will limit the distribution of the HIV-2 Reference Panel 1 to conserve these reagents when necessary. These reagents should not be used for experimental or other reference purposes. Since the HIV-2 Reference Panel 1 is now available, FDA is recommending that manufacturers amend their product licenses to incorporate a lot release testing protocol using the HIV-2 Reference Panel 1.

Dated: December 1, 1992.

Michael R. Taylor,

Deputy Commissioner for Policy.

DEPARTMENT OF THE INTERIOR

Office of the Secretary

Notice of Meeting of the Exxon Valdez Oil Spill Public Advisory Group

AGENCY: Office of the Secretary, Interior.

ACTION: Notice of meeting.

SUMMARY: The Department of the Interior announces a public meeting of the Exxon Valdez Oil Spill Public Advisory Group to be held on January 6 and 7, 1993, at 9:30 a.m., in the first floor conference room, 645 "G" Street, Anchorage, Alaska.

FOR FURTHER INFORMATION CONTACT: Douglas Mutter, Department of the Interior, Office of Environmental Affairs, 1689 "C" Street, suite 119, Anchorage, Alaska (907) 271-5011.

SUPPLEMENTARY INFORMATION: The Public Advisory Group was created by paragraph V.A. 4 of the Memorandum of Agreement and Consent Decree entered into by the United States of America and the State of Alaska on August 27, 1991, and approved by the United States District Court for the District of Alaska in settlement of *United States of America* v. *State of Alaska*, Civil Action No. A91-081 CV. This meeting will include: (1) A status review of the restoration plan and related activities;

(2) a discussion and recommendations for the 1993 restoration work plan and budget; and (3) reports from various working groups.

Dated: December 8, 1992.

Jonathan P. Deason,

Director, Office of Environmental Affairs.

Bureau of Land Management

[MT-070-03-4210-04; M81796]

Realty Action: Exchange, MT

AGENCY: Bureau of Land Management, Butte District Office, Interior.

ACTION: Designation of public lands in Beaverhead, Broadwater, Gallatin, Granite, Jefferson, Lewis & Clark, Madison, Missoula, Park and Powell counties, Montana, for possible transfer out of Federal ownership via exchange.

SUMMARY: BLM proposes to exchange isolated public land tracts, with Clearwater Investments, Inc., an Idaho Corporation, as the proponent, in order to achieve more efficient management of the public land through consolidation of ownership and to acquire lands with high natural resource values.

The following public land is being considered for disposal by exchange pursuant to section 206 of the Federal Land Policy and Management Act of October 21, 1976, as amended by the Federal Land Exchange Facilitation Act of January 25, 1988, 43 U.S.C. 1716.

The lands described above are segregated from entry under the mining laws, except the mineral leasing laws, effective upon publication of this notice in the **Federal Register**. The segregative effect will terminate upon issuance of patent, upon publication in the **Federal Register** of termination of the segregation, or five years from the date of this publication, whichever comes first.

Final determination on disposal will await completion of an Environmental Assessment. Upon completion of the Environmental Assessment and land use decision, a Notice of Realty Action shall be published specifying the lands to be exchanged and the lands to be acquired.

DATE: For a period of 45 days from the date of publication in the **Federal Register**, interested parties may submit comments to the Butte District Manager, P.O. Box 3388, Butte, MT 59702.

SUPPLEMENTARY INFORMATION: Detailed information concerning the exchange is available at the Butte District Office.

Dated: December 4, 1992.

James R. Owings,

District Manager.

Recreation Management Restrictions: Occupancy Stay Limitation

AGENCY: Bureau of Land Management, Interior.

ACTION: Policy Statement

SUMMARY: This notice establishes occupancy stay limits on public lands managed by the Bureau of Land Management (BLM) in Utah. Notice is given that a person or persons may not occupy undeveloped public lands or designated sites or areas for more than 14 days within a 28-consecutive-day interval. The 14-day limit may be reached either through a number of individual visits or through 14 days of continuous occupation during the 28-day interval. A 28-day interval begins when an occupant initially occupies a specific site on public land. Beyond the 14-day period, occupation of another site shall not be within a 30-mile radius of the heretofore occupied location. When the 14 days have been reached, site occupation shall not reoccur until at least 14 days have expired from the last day of use. Under unique circumstances, and upon request by the site occupant, an authorized officer may give written permission for an extension of the 14-day limit.

In order to protect resources, or for other administrative purposes, an authorized officer may, by posting notification, close a given site to occupancy, even if the same person or persons have not occupied the site for 14-consecutive days. In this situation, upon notification by an authorized officer, campers and other occupants may be allowed to change to a reasonably proximate site within a 30-mile radius.

Additionally, a person or persons may not keep unattended personal property on public lands for a period of more than 48 hours without written permission from an authorized officer, with the exception that vehicles may be parked in designated parking areas for up to 14 consecutive days.

This occupancy limitation rule does not apply to Long Term Visitor Use Areas which may be so designated by the BLM in the future.

DATES: This occupancy limitation rule will take effect January 1, 1993.

FOR FURTHER INFORMATION CONTACT: Margaret S. Kelsey, Bureau of Land Management, Utah State Office, 324 South State Street, suite 301, Salt Lake City, Utah 84111-2303.

SUPPLEMENTARY INFORMATION: This public land occupancy limitation rule is being established to reduce user conflicts caused by long-term occupancy done under a recreational pretense which, nevertheless, hampers reasonable opportunities for other members of the general public to camp in or use the same area. In addition, long-term occupancy precipitates vegetation trampling, erosion, wildlife disruption, and improper waste disposal among other problems, all of which were considered significant factors in the institution of this rule.

Authority for this pubic land occupancy limitation rule is contained in CFR title 43, chapter II, part 8360; subparts 8364.1, 8365, 8365.1-2, 8365.1-6, and 8365.2-3.

Definitions

(a) *Occupation:* Taking or holding possession of a camp or residence on public land.

(b) *Camp or camping:* Erecting a tent or shelter of natural and/or synthetic material, preparing a sleeping bag or other bedding material for use, or parking of a motor vehicle, motor home, or trailer for the presumable purpose of overnight occupancy.

(c) *Public lands:* Any lands or interest in lands owned by the United States and administered by the Bureau of Land

Management without regard to how the United States acquired ownership.

(d) *Authorized officer:* Any employee of the Bureau of Land Management who has been assigned the authority to perform under Title 43 of the Code of Federal Regulations.

(e) *Designated sites or areas:* Areas or sites that contain structures or capital improvements primarily used by the public for recreation purposes. Such sites or areas may include features such as: defined spaces for parking, camping or boat launching, sanitary facilities; potable water; grills or fire rings; tables; or controlled access.

Penalties

Violations of this rule by a member of the public are punishable by a fine not to exceed $1000 and/or imprisonment not to exceed 12 months.

G. William Lamb,

Associate State Director.

Notice of Scoping; Road Rights-of-Way Under Revised Statute 2477

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The Bureau of Land Management is preparing a report to Congress concerning the history, as well as current and future administration of road rights-of-way granted under the provisions of Revised Statute 2477 (R.S. 2477). This statute was repealed with the enactment of the Federal Land Policy and Management Act of 1976 (Pub. L. 94–579), but valid existing rights were protected. The report will address the impacts of current and potential claims of R.S. 2477 rights-of-way and possible alternative methods for assessing the validity of such claims, and alternatives to obtaining rights-of-way. Public input from all Western public land states and other affected interests is being sought.

SUPPLEMENTARY INFORMATION: Conference Report 102–901, which accompanied the 1993 Appropriations Act for the Department of the Interior and related agencies, directed the Department of the Interior to report to the appropriate Congressional committees on the following aspects of the management of R.S. 2477 rights-of-way. Input regarding all of the information listed below is requested from all Western public land states and affected interests.

1. The likely impacts of current and potential claims under R.S. 2477 on: The management of Federal lands; access to Federal lands, private lands, State lands, Indian and Native lands; and multiple use activities.

2. The current status of claims under R.S. 2477.

3. Possible alternatives for assessing the validity of claims under R.S. 2477.

4. Possible alternatives to obtaining rights-of-way.

Other significant aspects of the report include the following:

The Bureau of Land Management has been charged with the preparation of this report, which will be completed by a task force based in the Utah State Office, and supplemented by additional Bureau of Land Management task force members from other Western public land states and representatives from other Federal land managing agencies.

There are two phases of work associated with this report which must be submitted to Congress by May 1, 1993. The first phase is information gathering, and will consist of internal research, requests for written input from the public, and scoping meetings to gather additional information. The information gathering phase will end on January 4, 1993. Examples of the types of information desired include:

—Historical information on legislative intent of R.S. 2477 and the Federal Land Policy and Management Act;
—Regulations, policy and guidance on handling assertions of rights under R.S. 2477;
—State statutes in effect since the passage of R.S. 2477 and dates of repeal, if applicable;
—Case law related to this subject;
—Status of current claims under R.S. 2477;
—Impacts on the multiple use activities and management of Federal lands;
—Alternatives for assessing the validity of claims, and anticipated impacts;
—Alternatives for obtaining rights-of-way, and anticipated impacts;
—Any other issues or concerns.

The second phase is reporting, where public input and data collection will be used to prepare a draft report that will include legislative history, issues and concerns, impacts to public and private lands/interests, analysis of alternative methods of assessing the validity of R.S. 2477 claims, and alternatives to obtaining rights-of-way. There will be public hearings associated with this phase of the report, tentatively planned for March 1993, in Salt Lake City, Utah and Fairbanks and Anchorage, Alaska.

Any group or individual desiring to provide input into the preparation of this report or interested in receiving a copy of the draft report, can be put on the mailing list by writing to the R.S. 2477 Project listed below. Anyone submitting material for the information gathering stage will automatically be added to the mailing list.

FOR FURTHER INFORMATION CONTACT: Ted Stephenson or Terry Catlin, R.S. 2477 Project, Utah State Office BLM, P.O. Box 45155, Salt Lake City, Utah 84145–0155; Telephone (801) 539–4105.

Ted D. Stephenson,

R.S. 2477 Task Force Leader.

BILLING CODE 4310–DQ–M

Fish and Wildlife Service

Convention on International Trade in Endangered Species of Wild Fauna and Flora; Conservation of the Rhinoceros; Twenty-Ninth Meeting of the Standing Committee; Public Meeting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice.

SUMMARY: The world's total population of the five living species of rhinoceroses is now estimated to be less than 10,000 in the wild and 1,000 in captivity, an 85 percent decline since 1970, and the African black rhino in particular is now undergoing a catastrophic population crash. This notice requests comments on a number of potential rhinoceros conservation actions proposed for the consideration of party countries to the Convention on International Trade in Endangered Species (CITES), in preparation for a proposed meeting of rhinoceros range states and assistance donors in Kenya, in February or March, 1993, and on both rhinoceros and other CITES issues to be taken up at the Twenty-Ninth Meeting of the CITES Standing Committee, to be held in Washington, DC, in March. It also requests comments on what action should be taken in response to a petition from two conservation organizations requesting certification of Asian rhino horn trading countries under the Pelly Amendment to the Fishermen's Protective Act.

DATES: A public meeting will be held at 1 p.m. on Thursday, 21 January 1993, in the North Penthouse, Main Interior Building, 18th and C Streets, NW., Washington, DC. The Fish and Wildlife Service (Service) will consider written comments received by 29 January 1993.

ADDRESSES: Comments should be submitted to the Director in care of the Chief, Office of Management Authority,

4401 Fairfax Drive, room 432, Arlington, Virginia 22203, telefax 703–358–2281.
FOR FURTHER INFORMATION CONTACT: Marshall P. Jones, Chief, Office of Management Authority at the above address, telephone 703–358–2093.

SUPPLEMENTARY INFORMATION:

Background

Four of the world's five species of rhinos are among the most highly endangered of all living mammals, due to poaching for their exceedingly valuable horn, as well as the loss of their habitats as a result of human population growth throughout Africa and Asia. A recent report by the TRAFFIC Network (an international wildlife trade monitoring organization based in Cambridge, England) estimates the following remaining populations of each species:

1. Javan rhino (*Rhinoceros sondaisuc*): Less than 80 animals, confined to a single isolated peninsula in Western Java, Indonesia;

2. Sumatran rhino (*Dicerorhinus sumatrensis*): 500–900 animals, declining throughout its Southeast Asian range due to deforestation and hunting;

3. Great one-horned rhino (*Rhinoceros unicornis*): About 2,000 in Nepal and the Indian states of Assam and West Bengal, hopefully stable but subject to periodic poaching;

4. Black rhino (*Diceros bicornis*): Currently undergoing a catastrophic population decline, with even TRAFFIC International's July 1992 estimate of 2,400-already down from 3,500 a year ago and 65,000 in 1970-now appearing to be too high, based on the most recent reports from Zimbabwe, the country with the largest remaining population but also the highest rate of poaching;

5. White rhino (*Ceratotherium simum*): About 5,000 members of the Southern subspecies (*C. s. simum*) in South Africa represent the only rhino taxon which currently seems secure (but still vulnerable), and the northern subspecies (*C.s. cottoni*) has been reduced to less than 30 animals in a single park in Zaire.

Because of their imperiled or vulnerable status, in 1973 all five rhino species were listed in Appendix I of the Convention on International Trade in Endangered Species (CITES), and all except the Southern subspecies of the white rhino (*Ceratotherium simum*) are also now listed as endangered species under the U.S. Endangered Species Act. However, the prohibitions on international commercial trade attendant to the CITES Appendix I listing have not been effectively implemented, and rhino populations have continued to decline. Rhino horn is highly prized in North and South Korea, Taiwan, and China as a fever-reducing drug, and in Yemen for ceremonial dagger handles. Unfortunately, as rhino populations have plummeted the price paid for horn has risen, so that it is now more valuable than gold. Rhino range states, most of which are among the world's poorest countries, have been unable to halt the activities of poachers and the middlemen who pay them for illegally taken horn. Many of the Asian rhino horn consumers who ultimately drive the cycle of poaching live in wealthier societies and can afford to pay ever higher prices for a mystically valued and increasingly scarce commodity.

At the third CITES Conference of the Parties in 1981 in India, recognizing that the Appendix I trade prohibitions had not stopped the poaching and illegal trade, the party countries adopted resolution Conf. 3.11, calling on the CITES Secretariat to urge both party and non-party countries to halt all international trade in rhino products. When it became clear that this resolution had not been successful, at the sixth Conference of the Parties in 1987, in Ottawa, Canada, the parties adopted a stronger resolution Conf. 6.10, which called for a complete prohibition on all domestic and international trade in rhino products (other than legal hunting trophies); use of economic, political, and diplomatic pressure on countries continuing to allow trade; the destruction of all government and parastatal stocks of horn; increased law enforcement action against poachers and traders; encouragement of the use of substitutes for rhino horn; and development of rhino conversation strategies.

Actions taken to implement the Ottawa resolution were also not sufficient to stop the rhinos' decline. However, there was little opportunity for discussion of the rhino trade at the next CITES Conference in Switzerland in 1989, due to the time consumed by the debate on the status of the African elephant and the ivory trade. The rhino discussion was resumed at the 1992 CITES Conference in Kyoto, Japan, where the Southern African nations proposed to open up legal, sustainable trade in rhino horn removed from living animals as part of a captive breeding or ranching operation, in conjunction with the sale of stockpiles of rhino horn, as a means of raising funds for rhino conservation programs. These proposals were rejected because the majority of party countries felt that they did not meet CITES' criteria for such down-listing actions. Nevertheless, the parties engaged in a general discussion of the critical need for further action, ranging from innovative methods of legalizing (and hopefully controlling) the trade to the imposition of sanctions against the Asian rhino horn consuming countries and entities. No agreement was reached, and so the issue was carried over to CITES committees scheduled to meet later in the year.

At its June, 1992 meeting in Switzerland, the CITES Standing Committee adopted a resolution calling for a number of rhino conservation actions which are detailed below. The United States, as a member of the Standing Committee, supported the adoption of this resolution, and also participated actively in a further discussion of rhino alternatives at the July meeting of the CITES Animals Committee in Zimbabwe. The Animals Committee developed an expanded list of potential conservation measures which the parties should consider (also detailed below). Finally, in August, the Executive Director of the United Nations Environmental Program (UNEP), at the urging of the CITES Secretary General, decided to convene a conference of rhino range states and potential donors (both governmental and non-governmental), to take place at the UNEP headquarters in Nairobi, Kenya, in January, 1993. UNEP also decided to send a rhino trade expert on a mission to key rhino range states and consumers—including Zambia, Zimbabwe, South Africa, Namibia, Hong Kong, Taiwan, Korea, United Arab Emirates, and Yemen—to help close down the trade in illegal rhino horn. He will also urge Yemen and Korea to become parties to CITES. A report detailing the results of the mission and making recommendations is expected to be available by January, 1993.

The first CITES Asian Region Meeting was held in Thailand in early November, 1992. Participating countries expressed profound alarm at the precipitous decline of rhino populations worldwide, and called on all consuming countries to abide by the resolutions adopted at the 1987 Ottawa CITES Conference and at the June, 1992 Standing Committee Meeting.

Potential Conservation Measures, Including Pelly Amendment Certification

The CITES Standing Committee and Animals Committee meetings discussed above each developed lists of potential rhino conservation actions for consideration by the parties. Some of these actions are identical to those recommended in the New Delhi and

Ottawa CITES resolutions, but others are new, innovative, or even unprecedented. The Service has already started an internal review of these and other actions which it might undertake to address this critical situation, and is actively soliciting further information and views from all knowledgeable organizations and individuals.

In addition, on 12 November 1922, the World Wildlife Fund and the National Wildlife Federation submitted a petition to the Secretary of Interior, requesting that China, South Korea, Taiwan, and Yemen be certified to the President under the terms of the Pelly Amendment to the Fishermen's Protective Act because of their continuing involvement in the rhino horn trade. The petition outlines evidence that these nations together are responsible for creating the demand which has resulted in the death of over 60,000 rhinos since 1944. Since this petition addresses actions which are included in the second recommendation of the CITES Standing Committee resolution, it is discussed in category 2, below

The CITES Standing Committee resolution asks all party nations to:

1. Make the rhino trade a special project for Standing Committee activities leading up to the Ninth Conference of Parties (COP9): The twenty-ninth meeting of the Standing Committee will take place in Washington, DC, in March, 1993, and the Ninth Conference of the Parties will take place in the United States in the second half of 1994. As host country for both meetings, the United States, represented by the Service in close cooperation the Department of State, will strongly support efforts by the Standing Committee Chairman, the CITES Secretary General, and CITES party countries to keep rhino alternatives at the forefront of agenda items for each meeting.

2. Use their influence with other party and non-party governments to convince them to constrain illegal trade and to acquire and destroy stockpiles of illegal rhino horn, with failure of trading governments to take such action viewed as a serious infraction likely to result in calls for trade bans or appropriate actions: The existence of huge stockpiles in Asia derived from poached, illegally exported horn is one of the greatest obstacles to gaining control of the current situation, whether the desired outcome is immediate cessation of all trade, tapering off of trade gradually during an interim educational and cultural adjustment period, or eventual institution of a new, legal trade. However, in view of the large social and economic value of these stockpiles, substantial international incentives or pressure will be needed to get governments involved to undertake effective registration, confiscation, or destruction programs.

On 12 November 1992 the Presidents of the World Wildlife Fund and the National Wildlife Federation petitioned the Secretary of Interior to invoke the Pelly Amendment to the Fishermen's Protective Act of 1967 against these countries. The petition outlines evidence that the continuing rhino horn trade in these four countries has resulted in the death of more than 60,000 rhinos (85 percent of the world's rhino population) since 1970. All four continue to allow internal rhino horn trade for medicinal purposes, or in the case of Yemen, for traditional dagger handles. Korea, Yemen, and Taiwan are not parties to CITES and are thus not bound by its trade prohibitions; China, while it is a CITES party, can never achieve any real control of imports, the petitioners contend, as long as it continues to allow a thriving internal trade.

WWF and NWF argue that this ongoing trade warrants certification to the President that these four countries are undermining the effectiveness of CITES. The Pelly Amendment calls for the Secretary of the Interior to make such a certification whenever he determines that the nationals of a country are engaged in taking or trade which undermines the effectiveness of any international program for the protection of endangered species; the legislative history of the Pelly Amendment specifically mentions CITES as one of the international programs covered by the law. Once certification is made, the President has discretionary authority to impose certain import restrictions; certification can be terminated only if the actions which precipitated the certification are ended. The Service seeks all available information about the rhinoceros trade and about what action the Secretary of the Interior should take on the petitioned Pelly Amendment certification of these four countries.

3. Support and encourage agencies and countries which are working towards rhino conservation compatible with CITES: The Service is continuing close contacts with rhino range countries. Over the past three years, a number of Service grants to African nations for elephant conservation under the African Elephant Conservation Fund (AECF) have had significant secondary benefits to rhino protection, through enhancement of anti-poaching capabilities; the Service is now considering changing the criteria for award of grants under the AECF during Fiscal Year 1993 to give priority to projects having rhino, as well as elephant, benefits. Recent Service contacts with African nations experiencing heavy poaching has indicated that field priorities are for training of anti-poaching forces, providing aircraft for surveillance and communications equipment, and better cross-border coordination of anti-poaching efforts. Asian countries, at the recent Asian Regional CITES Meeting, called for increased financial and technical assistance to range states.

4. Direct the CITES Secretariat to collect information on the rhino trade; to make contacts with party and non-party nations to urge control of the trade, education of the public, and research on substitutes for rhino horn; to provide support to range countries; and to urge re-opening of a TRAFFIC office in Taiwan to monitor wildlife trade, including rhino horn. The UNEP-sponsored mission to key African and Asian countries, which was conceived after the Standing Committee meeting, will result in a new report on the state of conservation and trade, and the TRAFFIC Network has suggested that exiting information may be sufficient for decision-making. The Nairobi rhino conference will provide an opportunity for assessment of whether there is the need—or the time—for undertaking new studies. (See also the discussion of other *research* activities below, under the CITES Animals Committee recommendations.) The Service will continue to encourage the Secretariat to use its offices with party countries to effect trade controls, and will consider all of the measures discussed in this notice to effect similar changes in non-parties. The U.S. has already agreed to consider financial support to the re-opening of the TRAFFIC office in Taiwan.

Using these Standing Committee recommendations as a starting point, the CITES Animals Committee recommended that CITES parties also consider:

5. Undertake field Management actions, including endorsement of current dehorning and translation programs; support for installation of breeding nuclei in areas safe from poaching; creation of incentive systems for detecting poachers; use of sport-hunting as a management and revenue-enhancing technique and acceptance of "dehorning" safaris: No Service or other U.S. government funds have so far been provided specifically for rhino dehorning or translocation projects in Africa, nor have any funds from the

fiscal year 1993 appropriation been identified which could be used for such projects. However, if available evidence indicates that dehorning or translocation is feasible and is likely to reduce the level of poaching, the Service could work with other agencies to encourage these programs. Previous Service grants for African Elephant conservation projects have included establishment of incentive awards for anti-poaching forces, undoubtedly benefiting rhinos as well as elephants; the Service could revise its African Elephant Conservation Fund guidelines for fiscal year 1993 to emphasize projects which address the needs of both species. Regarding trophy imports, the Service already allows import of sport-hunted white rhinos taken in South Africa, having determined that these animals are not endangered and that the hunting program generates revenues which are used to enhance the conservation of the species. Consideration could be given to allowing the non-commercial import of rhino horn trophies taken during safaris where the hunter has paid to participate in tranquilizing and dehorning of animals; the trophy fees would help pay for the operation, and after dehorning animals would be released unharmed and hopefully undesirable to poachers. However, no permit applications have so far been received, and the Service needs more information on the success of dehorning programs.

6. Encourage trade and law enforcement actions, including: recognition of the potential benefits of sanctioned trade, within a law enforcement framework of tight control; and implementation of import/export legislation and improved controls of stockpiles of rhino horn, including registration: Some range countries are reportedly considering a sale of their stockpiles of horn (obtained from animals found dead or confiscated from poachers) in order to gain funds needed for rhino protection programs; some believe that this might also temporarily depress the price for illegal horn, perhaps also reducing poaching. Without a significant change in CITES policy, however, such transactions would be considered to be serious CITES infractions. In addition, it is also possible that Asian traders dedicated to building their stockpiles against the day when all rhinos are gone might be willing to buy all available legal horn while still financing poaching operations. The UNEP expert's new report on the rhino trade may shed further light on the possible market effects of such a one-time sale. An alternative would be acquisition of stockpiles by other governments or by private organizations desiring to remove them from commercial trade. The Service also needs more information on whether it should support non-commercial acquisition of stockpiles, or their use in highly regulated transition programs which would provide for a gradual tapering off of internal commercial use as education programs proceed; as noted previously, total inventory and government control of stockpiles would be a prerequisite in either case.

Rhino horn can be periodically harvested from living animals, like vicuna wool (and unlike elephant ivory); the institution of a long-term, sustainable, legal trade from dehorned animals could provide a stable source of income for rhino conservation, provided dehorning does not have unintended, adverse effects on rhino behavior and survival. However, such trade would not be legal under the current the CITES Appendix I listing of all rhino species, and it could also reinforce demand for poached horn and provide the cover for the continuation of illegal trade. For a legal trade program to succeed, the long-term biological effects of dehorning would have to be evaluated. In addition, range countries would have to make a firm commitment to the use of revenues received for rhino conservation, rather than for the many other competing social and economic priorities which these nations face.

Particular attention would have to be given to improving wildlife law enforcement capabilities, including uncompromising action against middlemen who put poachers into the field, and perhaps coordinated cross-border operations and/or treaties allowing "hot pursuit" across these borders. The Service strongly supports extradition of poachers fleeing across international borders; consideration could also be given to proposals for establishing regional anti-poaching forces which could be deployed at the request of countries experiencing critical poaching or illegal trade problems. Finally, rhino horn consuming nations could show their will and competence to gain control of their existing stockpiles and control future imports, whether motivated by the threat of multilateral or unilateral trade sanctions or the incentive of future legal trade. The Service seeks more information on what specific enforcement actions these countries should take.

7. Conduct short-term research projects on rhino conservation and trade: The Service can encourage research projects which address immediate questions about the conservation needs and the rhino horn trade, in Asia as well as in Africa. The CITES Standing Committee Chairman has suggested that CITES parties should concentrate on "assessing the consequences of legalizing a controlled trade in horn from dehorning sources * * * attendant upon any COP9 approval by parties to down-listing rhino horn from dehorning", either through immediate new studies or through utilization of existing work already done on stockpiles, markets, etc. More information is needed about research priorities, such as assessment of the success of dehorning operations and other protection strategies, determining the demand for rhino horn, and predicting the likely outcome of various conservation alternatives. While granting the urgent need for short-term research, the Service also seeks information about how long-term research, the Service also seeks information about how long-term research and conservation measures should be developed, particularly in view of the length of time which may be required for law enforcement and educational programs to produce a reduction is demand.

8. Initiate public awareness programs to promote understanding and new approaches, and including rhino conservation in all CITES seminars: The Service believes that public awareness programs must be culturally based to appeal to the motivations most appropriate for the particular society involved; Asian governments could show that they are taking responsibility for the effects of their rhino horn consumption by immediately developing and implementing educational programs to bring about changes in the attitudes of their citizens. Under current conditions, the supply of horn will be exhausted by the continuing demand; the Service seeks information on how these countries can reverse this situation and reduce the demand *before* the wild populations of rhinos completely disappear.

At the recent Asian CITES Regional Meeting, the Service participated and played an active role in the adoption of an initiative to monitor the rhino horn trade; Asian countries also appealed to all consuming countries to abide by CITES resolutions—particularly resolution 6.10 and the June Standing Committee resolution—and cease all trade. This is particularly significant since the three rhino species native to Asia together exist in lower numbers than the two African species (though the gap is closing), and all of the rhino

poaching in Africa or Asia is ultimately the result of Asian demand. The Service, through its close working relationship with the CITES Secretariat, the United States membership on the Standing Committee, and its participation in the Animals Committee and other meetings, will work with the CITES Secretariat to encourage the inclusion of the rhino issue in similar international meetings in the future.

Twenty-Ninth Meeting of the CITES Standing Committee

The Service, with the assistance of the Department of State, will be hosting the Twenty-ninth Meeting of the CITES Standing Committee in Washington, DC, from 1–5 March 1993, coinciding with the twentieth anniversary of the negotiation and signing of CITES, at a plenipotentiary conference in Washington, DC, on 3 March 1973. While the Standing Committee meeting is an executive session not open to the public, the Service anticipates that there will be a public announcement or event, as well as a ceremony for Standing Committee members and party country observers, to commemorate the CITES anniversary during the week. In addition, although the agenda of substantive issues for the meeting has not yet been developed, it will undoubtedly include rhino conservation options and a number of other CITES issues of general interest. Thus the Service is also seeking comments and suggestions on such as issues as: Development of new criteria for listing of species on CITES appendices; review and revision of CITES resolutions; regulation of wildlife trade in Italy and Thailand; and other ongoing CITES issues. The agenda for the meeting will be available from the Service's Office of Management Authority (see **ADDRESSES** section) as soon as it has been received. It will also be distributed at the public meeting discussed below.

Public Comments Solicited

The Service requests comments from all interested organizations and individuals on all of the potential rhino conservation activities suggested by CITES committees, on the petitioned certification of these countries under the Pelly Amendment, on any other rhino conservation measures not addressed in the discussion, and on the other CITES issues discussed above relevant to the Standing Committee meeting. Comments should be sent to the address given above (see **ADDRESSES** section) by 29 January 1993 in order to ensure their consideration. The Service will also hold a public meeting to solicit information and views on these issues, as well as other CITES issues relevant to the March meeting of the CITES Standing Committee, at 1 p.m. on 21 January 1993 in the North Penthouse of the Main Interior Building, 1849 C Street, NW., Washington, DC.

Office of Surface Mining Reclamation and Enforcement

Information Collection Submitted to the Office of Management and Budget for Review Under the Paperwork Reduction Act

The proposal for the collection of information listed below has been submitted to the Office of Management and Budget for approval under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35). Copies of the proposed collection of information and related forms and explanatory material law be obtained by contacting the Bureau's clearance officer at the phone number listed below. Comments and suggestions on the requirements should be made directly to the Bureau clearance officer and to the Office of Management and Budget, Paperwork Reduction Project (1029–0063), Washington, DC 20503, telephone 202–395–7340.

Title: Coal; Production and Reclamation Fee Report, OSM–1

OMB Number: 1029–0063

Abstract: This Part requires the regulatory authority to conduct periodic inspections of coal mining activities, and prepare and maintain inspection reports for public review. This information is necessary to meet the requirements of the Surface Mining Control and Reclamation Act of 1977.

Bureau Form Number: None

Frequency: Monthly

Description of Respondents: State Regulatory Authorities

Estimated Completion Time: 4 hours

Annual Responses: 170,580

Annual Burden Hours: 622,500

Bureau Clearance officer: John A. Trelease (202) 343–1475

Dated: October 8, 1992.

John P. Mocsseo,

Chief, Division of Technical Services.

INTERSTATE COMMERCE COMMISSION

[Finance Docket No. 32035]

Fox Valley & Western Ltd.—Exemption, Acquisition and Operation—Certain Lines of Green Bay and Western Railroad Co., Fox River Valley Railroad Corp., and the Ahnapee & Western Railway Co.

AGENCY: Interstate Commerce Commission.

ACTION: Notice of exemption.

SUMMARY: Pursuant to 49 U.S.C. 10505, the Commission exempts from the prior approval requirements of 49 U.S.C. 11343 *et seq.*, the acquisition by Fox Valley & Western Ltd. of substantially all of the assets of the Fox River Valley Railroad Corporation, the Green Bay and Western Railroad Company and its wholly owned subsidiary, the Ahnapee & Western Railway Company.

DATES: The exemption is effective on December 30, 1992. Petitions for stay must be filed by December 20, 1992 and petitions for reconsideration must be filed by December 24, 1992.

ADDRESSES: Send pleadings referring to Finance Docket No. 32035 to:

(1) Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423.

(2) Petitioner's representatives: Robert H. Wheeler, Oppenheimer Wolff & Donnelly, Two Illinois Center, 233 North Michigan Avenue, Suite 2400, Chicago, IL 60601.

and

Janet H. Gilbert, 6250 North River Road, Suite 9000, P.O. Box 5062, Rosemont, IL 60017–5062.

FOR FURTHER INFORMATION CONTACT: Donald J. Shaw, Jr., (202) 927–5610 [TDD for hearing impaired: (202) 927–5721].

SUPPLEMENTARY INFORMATION: Additional information is contained in the Commission's decision. To purchase a copy of the full decision, write to, call, or pick up in person from: Dynamic Concepts, Inc., room 2229, Interstate Commerce Commission Building, Washington, DC 20423. Telephone: (202) 289–4357/4359. [Assistance for the hearing-impaired is available through TDD services (202) 927–5721.]

Decided: December 4, 1992.

By the Commission, Chairman Philbin, Vice Chairman McDonald, Commissioners Simmons and Phillips. Vice Chairman McDonald and Commissioner Phillips commented with separate expressions. Chairman Philbin dissented with a separate expression.

Sidney L. Strickland, Jr.,

Secretary.

BILLING CODE 7035–01–M

[Finance Docket No. 32202]

Peninsula Corridor Joint Powers Board—Trackage Rights Exemption—Southern Pacific Transportation Co.

Southern Pacific Transportation Company (SPT) has agreed to extend for an additional 180 days, its previous grants of 4.7 miles of overhead trackage rights to Peninsula Coorridor Joint Powers Board (JPB) between Santa Clara Junction (milepost 44.0), and Tamien, CA (milepost 48.70).[1] The extension was to become effective on or after December 1, 1992.

This notice is filed under 49 CFR 1180.2(d)(7). Petitions to revoke the exemption under 49 U.S.C. 10505(d) may be filed at any time. The filing of a petition to revoke will not stay the transaction. Pleadings must be filed with the Commission and served on: David J. Miller, Hanson, Bridgett, Marcus, Vlahos & Rudy, 333 Market St., suite 2300, San Francisco, CA 94105.

As a condition to the use of this exemption, any employees adversely affected by the trackage rights will be protected under *Norfolk and Western Ry. Co.—Trackage Rights—BN*, 354 I.C.C. 605 (1978), as modified in *Mendocino Coast Ry., Inc.—Lease and Operate*, 360 I.C.C. 653 (1980).

Dated: December 8, 1992.

By the Commission, David M. Konschnik, Director, Office of Proceedings.

Sidney L. Strickland, Jr.,

Secretary.

[FR Doc. 92–30278 Filed 12–11–92; 8:45 am]

BILLING CODE 7035–01–M

[Finance Docket No. 32200]

Southern Pacific Transportation Company—Trackage Rights Exemption—Peninsula Corridor Joint Powers Board

Peninsula Corridor Joint Powers Board (JPB) has agreed to grant trackage rights to Southern Pacific Transportation Company (SP) over 4.7 miles of JPB's lines, between Santa Clara Junction (milepost 44.0) and Tamien (milepost 48.70), CA. The trackage rights are to be on an interim basis (for a period of 180 days) and were to become effective on or after December 1, 1992.

This grant of trackage rights is one of a series of transactions[1] that will facilitate freight, intercity passenger, and commuter service between Santa Clara Junction and Tamien, CA, during the transfer of commuter operations from SP to Amtrak. This notice is related to a notice filed in Finance Docket No. 32202, Peninsula Corridor Joint Powers Board—Trackage Rights Exemption—Southern Pacific Transportation Company, in which SP is granting JPB trackage rights over SP lines, on an interim basis for a period of 180 days.

This notice is filed under 49 CFR 1180.2(d)(7). If the notice contains false or misleading information the exemption is void *ab initio*. Petitions to revoke the exemption under 49 U.S.C. 10505(d) may be filed at any time. The filing of a petition to revoke will not stay the transaction. Pleadings must be filed with the Commission and served on: Gary A. Laakso, Southern Pacific Transportation Company, Southern Pacific Building, One Market Plaza, Room 846, San Francisco, CA 94105.

As a condition to the use of this exemption, any employee affected by the trackage rights will be protected pursuant to Norfolk and Western Ry. Co.—Trackage Rights—BN, 354 I.C.C. 605 (1978), as modified in Mendocino Coast RY., Inc.—Lease and Operate, 360 I.C.C. 653 (1980).

Dated: December 8, 1992.

---

[1] SPT and JPB own parallel lines between these points. They recently agreed to grant limited, 90-day term trackage rights to each other while they studied the feasibility of entering into a coordinated use agreement to achieve more efficient freight, intercity passenger, and commuter train operations. See Finance Docket No. 32094, Penin. Corr. Jt. Powers Bd.—Tr. Rts. Exemp.—Sou. Pac. Transp. Co. (not printed), served July 13, 1992, and Finance Docket No. 32091, Sou. Pac. Transp. Co.—Tr. Rts. Exemp.—Penin. Corr. Jt. Powers Bd. (not printed), served July 13, 1992. The term was subsequently extended for an additional 60-day period in Finance Docket No. 32159, Penin. Corr. Jt. Powers Bd.—Tr. Rts. Exemp.—Sou. Pac. Transp. Co. (not printed), served October 8, 1992, and Finance Docket No. 32161, Sou. Pac. Transp. Co.—Tr. Rts. Exemp.—Penin. Corr. Jt. Powers Bd. (not printed), served October 7, 1992. This further extension is necessary because the parties have been unable to complete their negotiations. JPB has agreed to grant SPT a similar trackage rights extension in Finance Docket No. 32200.

[1] Verified notices have been filed and approved in Finance Docket No. 31960, Peninsula Corridor Joint Powers Board and San Mateo County Transit District—Acquisition Exemption—Southern Pacific Transportation Company (not printed), served January 17, 1992, to exempt JPB's and Samtrans' acquisition of certain SP main lines; in Finance Docket No. 31963, Southern Pacific Transportation Company—Trackage Rights Exemption—Peninsula Corridor Joint Powers Board and San Mateo County Transit District (not printed), served January 17, 1992, to exempt JPB's and Samtrans' grant back to SP of trackage rights over certain main line that they are acquiring from SP; in Finance Docket No. 31965, Peninsula Corridor Joint Powers Board—Trackage Rights Exemption—Southern Pacific Transportation Company (not printed), served January 17, 1992, to exempt SP's related grants of certain trackage rights to JPB; in Finance Docket No. 32091, Southern Pacific Transportation Company—Trackage Rights Exemption—Peninsula Corridor Joint Powers Board (not printed), served July 13, 1992, to exempt JPB's related grants of certain trackage rights to SP on an interim basis for a period of 90 days; and in Finance Docket No. 32094, Peninsula Corridor Joint Powers Board—Trackage Rights Exemption—Southern Pacific Transportation Company (not printed), served July 13, 1992, to exempt SP's related grants of certain trackage rights to JPB, also on an interim basis for a period of 90 days.

By the Commission, David M. Konschnik, Director, Office of Proceedings.

Sidney L. Strickland, Jr.,

Secretary.

BILLING CODE 7035-01-M

DEPARTMENT OF JUSTICE

Antitrust Division

Notice Pursuant to the National Cooperative Research Act of 1984; the SQL Access Group, Inc.

Notice is hereby given that, on July 16, 1992, pursuant to section 6(a) of the National Cooperative Research Act of 1984, 15 U.S.C. 4301 *et seq.* ("the Act"), the SQL Access Group, Inc. ("the Group") has filed written notifications simultaneously with the Attorney General and the Federal Trade Commission disclosing (1) the identities of the parties and (2) the nature and objectives of the venture. The notifications were filed for the purpose of invoking the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances. Pursuant to section 6(b) of the Act, the identities of the parties and its general areas of planned activity, are as follows: The SQL Access Group, Inc., Manchester, NH; and X/Open Company Limited, Reading, United Kingdom, are current parties to the venture. Current members of the SQL Access Group are: Apple Computer, Cupertino, CA; Boeing Computer Services, Seattle, WA; Borland International, Scotts Valley, CA; British Telecom Research, Ipswich, Suffolk, United Kingdom; Bull HN Information Systems, Inc., Phoenix, AZ; Cincom Systems, Cincinnati, OH; Cognos Incorporated, Ottawa, Ontario, Canada; Computer Associates Int'l, Garden City, NY; Computer Corporation of America, Cambridge, MA; Digital Equipment Corp., Nashua, NH; E.I. DuPont de Nemours & Co., Inc., Newark, DE; Fujitsu America, Inc., San Jose, CA; Fulcrum Technologies, Inc., Ottawa, Canada; GUPTA Technologies, Menlo Park, CA; Hewlett Packard, Cupertino, CA; Information Builders, Inc., New York, NY; Informix Software, Inc., Menlo Park, CA; Ingress, Alameda, CA; Lotus Development Corp., Cambridge, MA; Metaphor, Mountain View, CA; Micro Decisionware, Boulder, CO; Microsoft Corporation, Redmond, WA; Mimer Software AB, Upsala, Sweden; Must Software International, Norwalk, CT; NCR/Teradata, El Segundo, CA; Novell, Austin, TX; Oracle Corporation, Redwood Shores, CA; Progress, Bedford, MA; Retix, Santa Monica, CA; Revelation Technologies, Stanford, CT; Siemens Nixdorf Information Systems, Inc., Santa Clara, CA and Muenchen, Germany; Software AG, Reston, VA and Darmstadt, Germany; Sybase, Emeryville, CA; Tandem Computers, Inc., Cupertino, CA; Unify Corporation, Sacramento, CA; Unisys, San Jose, CA; and VMark Software, Framingham, MA.

The objective of the venture is to facilitate cooperation between X/Open and the Group in accordance with procedures established by this agreement with a view to generating jointly, and publishing (either jointly or separately) computer software specifications that may be incorporated in database and applications programs to permit applications to access information stored in databases, regardless of the computer system on which the application or the database is running.

Joseph H. Widmar,

Director of Operations, Antitrust Division.

BILLING CODE 4410-01-M

DEPARTMENT OF LABOR

Employment and Training Administration

[TA-W-27,722]

Ozark Cutting Hermann, Missouri; Dismissal of Application for Reconsideration

Pursuant to 29 CFR 90.18 an application for administrative reconsideration was filed with the Director of the Office of Trade Adjustment Assistance for workers at Ozark Cutting, Hermann, Missouri. The review indicated that the application contained no new substantial information which would bear importantly on the Department's determination. Therefore, dismissal of the application was issued.

TA-W-27,722; Ozark Cutting Hermann, Missouri (November 25, 1992)

Signed at Washington, DC, this 4th day of December, 1992.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

[FR Doc. 92-30164 Filed 12-11-92; 8:45 am]

BILLING CODE 4510-30-M

NATIONAL INDIAN GAMING COMMISSION

Fee Rates

AGENCY: National Indian Gaming Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given, pursuant to 25 CFR 514.1(a)(3), that the National Indian Gaming Commission has adopted preliminarily a revised annual fee rate of .75% for calendar year 1992. This rate shall apply to all assessable gross revenues (tier 1 and tier 2) from each class II gaming operation regulated by the Commission.

FOR FURTHER INFORMATION CONTACT: Fred W. Stuckwisch, National Indian Gaming Commission, 1850 M Street, NW., suite 250, Washington, DC 20036; telephone 202/632-7003; fax 202/632-7066 (these are not toll-free numbers).

SUPPLEMENTARY INFORMATION: The Indian Gaming Regulatory Act established the National Indian Gaming Commission which is charged with, among other things, regulating class II gaming on Indian lands.

The regulations of the Commission (25 CFR part 500) provide for a system of fee assessment and payment that is self-administered by the class II gaming operations. Pursuant to those regulations, the Commission is required to adopt and communicate assessment rates; the gaming operations are required to apply those rates to their revenues, compute the fees to be paid, report the revenues, and remit the fees to the Commission on a quarterly basis.

The Commission is unable (at this time) to adopt a final fee rate for calendar year 1992 because all class II gaming operations regulated by the Commission have not reported their assessable gross revenues and paid their fees for the first three quarters of 1992.

The regulations of the Commission and the rate being adopted today are effective for calendar year 1992. Therefore, all Class II gaming operations within the jurisdiction of the Commission are required to self-administer the provisions of these regulations and report and pay any fees that are due to the Commission before the end of calendar year 1992 (December 31).

Dated: December 9, 1992.

Anthony J. Hope,

Chairman, National Indian Gaming Commission.

BILLING CODE 7565-01-M

NUCLEAR REGULATORY COMMISSION

Studies of Plant Components Using Yankee-Rowe Nuclear Plant

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of meeting.

SUMMARY: The staff of the Nuclear Regulatory Commission will meet with the staffs of the Yankee Atomic Power Station, Nuclear Management and Resources Council (NUMARC) and other members of the nuclear industry to discuss the possible use of the Yankee-Rowe Nuclear Power Station for studies of generic plant systems, structures and components to improve our knowledge of aging and degradation.

DATE: Tuesday, January 12, 1993.

TIME: 9 a.m.–6 p.m..

ADDRESS: 11555 Rockville Pike, Room: 1 F7/9, Rockville, Maryland.

FOR FURTHER INFORMATION CONTACT: Mr. Charles Z. Serpan, Jr., Chief, Materials Engineering Branch, Office of Nuclear Regulatory Research, Nuclear Regulatory Commission, Washington DC 20555. Telephone: (301) 492–3835.

SUPPLEMENTARY INFORMATION: This meeting was originally scheduled for November 5, 1992, but was postponed due to conflicting meetings.

Aging degradation of the systems, structures and components (SSC) of nuclear power plants has been an issue of increased concern to operators and regulators of nuclear power plants in the recent years. The USA and virtually all other countries have initiated programs to monitor, detect, and mitigate the effects of aging degradation, so as to improve current plant operations and enhance plant safety. An exceptionally valuable resource for such studies is a shut-down nuclear plant; therefore, on July 9, 1992, NRC wrote to Yankee Atomic Electric Co. as well as NUMARC, EPRI and DOE, proposing that NRC hold a meeting to discuss the possible use of the shut-down Yankee Rowe Nuclear Power Station as a source of SSC for aging degradation studies; the meeting described in this notice is a result of that invitation. The meeting is expected to include a statement by the Yankee Atomic Electric Co. of its interest in this program, and the availability of its SSC for study. NRC and other participants are expected to make statements about their plans for aging studies, and of their interest in incorporating the Yankee Rowe SSC into their plans. Other persons wishing to make statements at the meeting should inform the NRC contact person by January 5, 1993. It is expected that common interests can be identified for future action by the parties concerned.

Dated at Rockville, Maryland, this 7th day of December, 1992, for the Nuclear Regulatory Commission.

Lawrence C. Shao,

Director, Division of Engineering, Office of Nuclear Regulatory Research.

[FR Doc. 92–30263 Filed 12–11–92; 8:45 am]

BILLING CODE 7590–01–M

OFFICE OF PERSONNEL MANAGEMENT

Director's Advisory Committee on Law Enforcement and Protective Occupations; Meeting

AGENCY: Office of Personnel Management.

ACTION: Notice of open meeting.

SUMMARY: According to the provisions of section 10 of the Federal Advisory Committee Act (Pub. L. 92–463), notice is hereby given that the tenth meeting of the Director's Advisory Committee on Law Enforcement and Protective Occupations will be held at the time and place shown below:

DATE: December 16, 1992, 1:30 p.m.

PLACE: U.S. Office of Personnel Management, room 5A06A, 1900 E Street, NW., Washington, DC.

Less than 15 days notice is being given for this meeting because of a short deadline for completion of OPM's study of pay and job evaluation issues for Federal firefighters. OPM has made a commitment to complete this study at about the same time as the study of pay and job evaluation for Federal law enforcement officers. That study has a statutory deadline of January 1, 1993.

AGENDA: The focus of the December 16th meeting will be to solicit views on the Office of Personnel Management's staff proposals for Federal firefighter pay reform.

FOR FURTHER INFORMATION CONTACT: Phyllis G. Foley, Director, Law Enforcement and Protective Occupations Task Force, Office of Compensation Policy, Personnel Systems and Oversight Group, Office of Personnel Management, room 7H30, 1900 E Street, NW., Washington, DC 20415.

SUPPLEMENTARY INFORMATION: The meeting is open to the public. If time permits, an opportunity will be provided for members of the public in attendance at the meeting to provide their views. Persons wishing to address the Advisory Committee orally at the meeting should submit a written request no later than the close of business on December 14, 1992. The request must include the name and address of the person wishing to appear, the capacity in which the appearance will be made, a short summary of the intended presentation, and the amount of time desired.

Office of Personnel Management.

Douglas A. Brook,

Acting Director.

BILLING CODE 6325–01–M

PENSION BENEFIT GUARANTY CORPORATION

Request for OMB Extension of Approval of Collection of Information in Single-Employer Plan Terminations

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Notice of request for extension of OMB approval.

SUMMARY: The Pension Benefit Guaranty Corporation ("PBGC") has requested an extension of approval by the Office of Management and Budget ("OMB") of a collection of information from plan administrators of single-employer pension plans terminating under section 4041 of the Employee Retirement Income Security Act of 1974 ("ERISA"). This information collection is contained in the PBGC's termination regulations (29 CFR parts 2616 and 2617) and the implementing forms and instructions. The PBGC has requested expedited review by OMB pursuant to 5 CFR 1320.18(g) and, therefore, is publishing the revised termination forms and instructions with this notice.

ADDRESSES: All written comments (at least three copies) should be addressed to: Office of Management and Budget, Paperwork Reduction Project (1212–0036), Washington, DC 20503, with a copy to the Pension Benefit Guaranty Corporation, Office of the General Counsel, Code 22000, 2020 K Street, NW., Washington, DC 20006. The request for extension will be available for public inspection at the PBGC Communication and Public Affairs Department, suite 7100, at the above address, between the hours of 9 a.m. and 4 p.m.

FOR FURTHER INFORMATION CONTACT: Harold J. Ashner, Assistant General Counsel, Office of the General Counsel, Code 22000, Pension Benefit Guaranty Corporation, 2020 K Street, NW., Washington, DC 20006, 202–778–8850 (202–778–1958 for TTY and TDD). (These are not toll-free numbers.)

SUPPLEMENTARY INFORMATION: The Paperwork Reduction Act of 1980 ("PRA") (44 U.S.C. chapter 35) establishes policies and procedures for controlling the paperwork burdens imposed by Federal agencies on the public. The Act vests the Office of Management and Budget ("OMB") with regulatory responsibility over these burdens, and OMB has promulgated rules on the clearance of collections of information by Federal agencies.

The Single-Employer Pension Plan Amendments Act of 1986 ("SEPPAA"), which amended the Employee Retirement Income Security Act of 1974 ("ERISA"), imposed new rules for, and restrictions on, the voluntary termination of single-employer pension plans. Under SEPPAA, pension plans covered by ERISA's title IV insurance program may voluntarily terminate only in a standard or a distress termination, and then only if the statutory prerequisites are satisfied. SEPPAA also mandated the submission to the Pension Benefit Guaranty Corporation ("PBGC") of information necessary for it to determine whether the requirements for a standard or a distress termination have been met. ERISA's rules for voluntary terminations were further modified by the Pension Protection Act ("PPA") (a part of the Omnibus Budget Reconciliation Act of 1987) and clarified in the Omnibus Budget Reconciliation Act of 1989.

When the SEPPAA changes were enacted, the PBGC published a Notice of Interim Procedures (51 FR 12491, April 10, 1986). That notice summarized SEPPAA's requirements relating to terminations of single-employer pension plans and described the specific steps to be followed to terminate a pension plan under SEPPAA, including temporary changes to be made to the then-current termination forms. The PBGC also published proposed regulations to reflect and interpret the new statutory termination rules (52 FR 33318, September 2, 1987, to be codified as 29 CFR parts 2616 and 2617, replacing the previously promulgated 29 CFR parts 2616 and 2617). When PPA was enacted, the PBGC published a Notice of Revised Termination Rules summarizing the PPA statutory changes in the termination requirements and describing additional temporary changes to be made to the termination forms (53 FR 1904, January 22, 1988).

On December 22, 1989, the PBGC issued new forms that incorporated the statutory rules and procedures in SEPPAA and PPA, *i.e.*, Form 500 (Standard Termination Notice, including Schedule EA–S, the enrolled actuary certification of sufficiency); Form 501 (Post-Distribution Certification for Standard Terminations); Form 600 (Distress Termination Notice of Intent to Terminate); and Form 601 (Distress Termination Notice, including Schedule EA–D, the enrolled actuary certification) (see 54 FR 52904). These forms replaced the termination forms then in use and have been approved by OMB under PRA. In February 1990, to augment Form 500, the PBGC requested OMB approval of two unnumbered forms for submitting information to the PBGC when benefits are, or may be, distributed through the purchase of irrevocable commitments from an insurer, in order that it might receive such information earlier in the termination process (55 FR 6138, February 21, 1990). Finally, in May 1992, the PBGC issued a rule requiring that information about the insurer(s) be submitted with the Form 500 or as a supplement thereto (29 CFR part 2617, subpart E, 57 FR 22167, May 27, 1992). Both modifications to the information collection were approved by OMB.

With the promulgation of its final termination regulations (appearing elsewhere in today's Federal Register) the PBGC has revised the existing forms and drafted several new forms (including instructions thereto) to be used in fulfilling the requirements under the statute and PBGC's regulations that specified information be filed with the PBGC. The final termination regulations will apply, and the revised terminations forms would be required to be used, for single-employer plan terminations for which a notice of intent to terminate is issued on or after January 28, 1993.

The final regulations generally provide for submission of required information in accordance with the termination forms and instructions (see, *e.g.*, 2616.22(a)(4); 2616.24(a); 2616.24(b)(1); 2616.29(b); 2617.25(a); 2617.28(h)). The regulations also provide for submission of certain information in specified circumstances or at the request of the PBGC (see, *e.g.*, 2616.23(d); 2616.24(c); 2617.25(b); 2617.26(d)). Finally, the regulations contain recordkeeping requirements (2616.9, 2617.10) that track those in the existing termination regulation (2617.23) and in section 107 of ERISA.

The revised termination forms and instructions parallel the forms currently in use. (Most of the specific information called for both by the current forms and instructions and by the revised forms and instructions was included in the proposed version of the termination regulations.) However, the PBGC has added three new forms: (1) Form Rep–S (Designation of Representative—Standard Terminations); (2) Form Rep–D (Designation of Representative—Distress Terminations); and 3) Form 602 (Post-Distribution Certification—Distress Termination). The PBGC developed the designation of representative forms in response to numerous requests from members of the public that it do so. (Also in response to such requests, the PBGC has decided not to require that the forms be notarized.) The post-distribution form, which parallels current Form 501, will apply only where a plan undergoing a distress termination is sufficient for at least all guaranteed benefits, and is able to close out in the private sector; while such cases will likely be rare, Form 602 should simplify the plan administrator's task in providing needed information to the PBGC.

As noted above, the new and revised forms would be required to be used for plan terminations for which a notice of intent to terminate was issued on or after January 28, 1993. The PBGC expects that the forms and instructions, as approved by OMB, will be published in the pension reporting services and be available for mass distribution by the PBGC in adequate time to be used by plan administrators who issue the notice of intent to terminate in a standard termination on or after that date; under the final regulation (§§ 2617.22 and 2617.25), the Form 500 is not due until approximately 6 to 7 months after issuance of the notice of intent to terminate. (The PBGC hopes also to have the forms available in time for use in distress terminations, where the Form 600 would have to be filed with the PBGC within the same time limits as the notice of intent to terminate issued to other parties (2616.22); plan administrators who may be initiating distress terminations on or shortly after the above effective date should contact the PBGC for copies of Form 600.)

The PBGC also notes that there will be an overlapping period of time in which both the old and new sets of forms and instructions will be in use. Plan administrators of plans undergoing terminations in progress, *i.e.*, terminations in which the notice of intent to terminate is issued prior to the above effective date, may continue to use the current forms and instructions. (The PBGC is requesting that OMB approve the current regulations and the implementing forms and instructions, without change, for use by plan administrators of terminations in progress.) Alternatively, they may use the revised forms and instructions; if they do so, they must submit completed

forms in accordance with the instructions. Plan administrators of plans undergoing terminations in which the notice of intent to terminate is issued on or after the above effective date must use the revised forms and instructions.

Because the new and revised forms and their instructions have been drafted to implement the information collection in the final termination regulations that will become effective January 28, 1993, and because their use will greatly simplify the termination process, the PBGC has requested expedited review by OMB, pursuant to 5 CFR 1320.18(g), of the information collection requirements in the final termination regulations and the implementing forms and instructions. As part of the expedited review process, the PBGC is publishing the implementing forms and instructions as an attachment to this notice.

The PBGC anticipates receiving 8,500 standard terminations and 30 distress terminations annually. Public reporting burden for this collection of information is estimated to vary from 1.5 to 288.5 hours per response, with an average of 1.888 hours per response, including the time for reviewing instructions, collecting the information from existing data sources, completing the forms, and submitting the supplemental insurer notice. Additional information to be submitted apart from the forms and instructions is included in the above average estimate.

Issued in Washington, DC, this 7th day of December, 1992.

James B. Lockhart III,

Executive Director, Pension Benefit Guaranty Corporation.

BILLING CODE 7708-01-M

STANDARD TERMINATION FILING INSTRUCTIONS

DRAFT

PAPERWORK REDUCTION ACT NOTICE

The PBGC needs this information in order to determine whether to issue a notice of noncompliance under section 4041(b)(2)(C) of ERISA nullifying a proposed standard termination. You are required to provide this information pursuant to section 4041(b) of ERISA and 29 CFR Part 2617. The information provided to the PBGC may be subject to disclosure under the Freedom of Information Act and the Privacy Act, as applicable.

The estimated time needed to complete and file these standard termination forms is 1.5 hours per termination. This time is an estimated average time and will vary depending on the circumstances of a given plan.

If you have comments concerning the accuracy of this time estimate or suggestions for making the forms simpler, please send your comments to Pension Benefit Guaranty Corporation, Office of the General Counsel, (Code 22000), 2020 K Street, NW, Washington, DC 20006-1860 and Office of Management and Budget, Paperwork Reduction Project (1212-0036), Washington, DC 20503. .

I. INTRODUCTION

The plan administrator of a single-employer pension plan that (1) is covered by the PBGC insurance program pursuant to section 4021 of ERISA and (2) has sufficient assets to satisfy all benefit liabilities must file Form 500 and Form 501 with the PBGC in order to terminate the plan in a standard termination in accordance with the requirements of section 4041 of ERISA and 29 CFR Part 2617. This package contains copies of these forms and detailed instructions for completing and filing them.

Form 500 is the Standard Termination Notice that must be filed with the PBGC pursuant to section 4041(b)(2) of ERISA and 29 CFR § 2617.25 in order to advise the PBGC of a proposed standard termination and to provide various plan data. Form 500 includes Schedule EA-S and Schedule REP-S.

Schedule EA-S is the Standard Termination Certification of Sufficiency that must be used by the enrolled actuary or, in certain situations, the plan administrator to certify that a single-employer plan terminating in a standard termination is projected to have sufficient assets to provide all benefit liabilities.

Schedule REP-S is the Designation of Representative form that may be used by a plan administrator to designate a representative or representatives to act on his or her behalf before the PBGC on some or all matters relating to the termination of a specified pension plan. Schedule REP-S also may be used to revoke a prior designation.

Form 501 is the Post-Distribution Certification that must be filed with the PBGC pursuant to section 4041(b)(3)(B) of ERISA and 29 CFR § 2617.28(h) to certify that the distribution of plan assets pursuant to the standard termination was completed in accordance with section 4041(b) of ERISA and 29 CFR § 2617.28(a) and (c).

Note: *A covered single-employer plan that does not have sufficient assets to satisfy all benefit liabilities can terminate voluntarily only if the contributing sponsor(s) and each member of the contributing sponsor's controlled group satisfy the requirements for a distress termination pursuant to section 4041(c) of ERISA and 29 CFR Part 2616. You must file Form 600 and Form 601 with Schedule EA-D with the PBGC in order to terminate in a distress termination.*

If, after beginning a standard termination proceeding, you determine that the plan is insufficient for benefit liabilities, you should stop the termination process and notify the PBGC. (In very limited circumstances, the PBGC may, upon request, permit a conversion of a standard termination to a distress termination.)

The rules and procedures for terminating a single-employer pension plan in a standard termination are set forth in section 4041(a) and (b) of ERISA and 29 CFR Part 2617. The plan administrator must follow specific steps in order to have a valid standard termination. These steps include (1) issuing the notice of intent to terminate to each person who is (as of the proposed termination date) an affected party at least 60 days and not more than 90 days before the proposed termination date; (2) issuing notices of plan benefits to plan participants and beneficiaries no later than the date the Form 500 is filed with the PBGC; (3) filing a complete and accurate Form 500 with the PBGC on or before the 120th day after the proposed termination date; and (4) distributing assets to satisfy all plan obligations for benefit liabilities within a 180-day period after PBGC's 60-day period for reviewing Form 500 ends (these time periods may be extended in accordance with 29 CFR §§ 2617.26(a)(2) and 2617.28).

It is important that you follow these rules and procedures, as set forth in ERISA, PBGC's regulations, and these instructions, because failure to do so will nullify the proposed termination. In that case, if you still intend to terminate the plan, you will have to start the process again, beginning with issuance of a new notice of intent to terminate establishing a new termination date for the plan.

Note: *Whenever the PBGC has reason to believe that any of these termination requirements have not been met, or in any proposed termination that will result in a reversion of residual assets to the contributing sponsor, the PBGC may require that additional information be submitted at such time as the PBGC requests in writing.*

Finally, by no later than the 30th day after distribution is completed, you must, in accordance with these instructions, provide notice of the annuity contract to each participant and beneficiary receiving his or her benefit through the purchase of an annuity contract and file Form 501 with the PBGC.

II. DEFINITIONS

As used in these instructions –

"Affected party" means, with respect to a terminating plan, (a) each participant; (b) each beneficiary of a deceased participant; (c) each alternate payee under an applicable qualified domestic relations order, as defined in section 206(d)(3) of ERISA; (d) each employee organization that currently represents any group of participants; and (e) for any group of participants not currently represented by an employee organization, the employee organization, if any, that last represented such group of participants within the 5-year period preceding issuance of the notice of intent to terminate. In connection with any notice required under 29 CFR Part 2617, if an affected party has designated in writing another person to receive the notice, any reference to the affected party shall be deemed to refer to the designated person.

"Benefit liabilities" means the benefits of participants and their beneficiaries under the plan (within the meaning of section 401(a)(2) of the Code).

"Code" means the Internal Revenue Code of 1986, as amended.

"Contributing sponsor" means the person entitled to receive a deduction under section 404(a) of the Code (or that would be entitled to receive a deduction except for the limitations in section 404(a)) for contributions required to be made to the plan under section 302 of ERISA and section 412 of the Code.

"Controlled group" means, in connection with any person, a group consisting of such person and all other persons under common control with such person, determined in accordance with 29 CFR Part 2612.

"Date of distribution" means (a) for benefits provided through the purchase of irrevocable commitments, the date on which the obligation to provide the benefit passes from the plan to the insurer; and (b) for benefits provided other than through the purchase of irrevocable commitments, the date on which the benefits are delivered to the participant or beneficiary (or to another plan or benefit arrangement or other recipient authorized by the participant or beneficiary in accordance with applicable law and regulations) personally or by deposit with a mail or courier service (as evidenced by a postmark or written receipt).

"ERISA" means the Employee Retirement Income Security Act of 1974, as amended (29 U.S.C. 1001, *et seq.*).

"Guidelines" means the Joint Implementation Guidelines issued by the PBGC, the Department of the Treasury, and the Department of Labor on May 24, 1984, for processing defined benefit pension plan terminations involving asset reversions to the contributing sponsor.

"Insurer" means a company authorized to do business as an insurance carrier under the laws of a state or the District of Columbia.

"Irrevocable commitment" means an obligation by an insurer to pay benefits to a named participant or surviving beneficiary, if the obligation cannot be cancelled under the terms of the insurance contract (except for fraud or mistake) without the consent of the participant or beneficiary and is legally enforceable by the participant or beneficiary.

"Majority owner" means, with respect to a contributing sponsor of a single-employer plan, an individual who owns, directly, or indirectly, 50 percent or more of (a) an unincorporated trade or business, (b) the capital interest or the profits interest of a partnership, or (c) either the voting stock of a corporation or the value of all the stock of a corporation. For this purpose, the constructive ownership rules of sections 414(b) and (c) of the Code shall apply.

"Mandatory employee contributions" means amounts contributed to the plan by a participant that are required as a condition of employment, as a condition of participation in the plan, or as a condition of obtaining benefits under the plan attributable to employer contributions.

"Notice of intent to terminate" means the notice to affected parties advising each of a proposed plan termination, as required by section 4041(a)(2) of ERISA and 29 CFR § 2617.22.

"Notice of noncompliance" means a notice issued to a plan administrator by the PBGC within a 60-day (or extended) period after a complete standard termination notice has been filed, advising the plan administrator that the requirements for a standard termination have not been satisfied and that the plan is an ongoing plan. The 60-day review period begins on the day following the filing of a complete standard termination notice and includes the 60th day.

"Notice of plan benefits" means the notice to each participant and beneficiary required by section 4041(b)(2)(B) of ERISA and 29 CFR §§ 2617.23 and 2617.24, describing his or her plan benefits.

"Participant" means—

(a) Any individual who is currently in employment covered by the plan and who is earning or retaining credited service under the plan, including any individual who is considered covered under the plan for purposes of meeting the minimum participation requirements but who, because of offset or similar provisions, does not have any accrued benefits;

(b) Any nonvested individual who is not currently in employment covered by the plan but who is earning or retaining credited service under the plan; and

(c) Any individual who is retired or separated from employment covered by the plan and who is receiving benefits under the plan or is entitled to begin receiving benefits under the plan in the future, excluding any such individual to whom an insurer has made an irrevocable commitment to pay all the benefits to which the individual is entitled under the plan.

"PBGC" means the Pension Benefit Guaranty Corporation.

"Plan benefits" means the benefits to which a participant is, or may become, entitled under the plan's provisions in effect as of the termination date, based on the participant's accrued benefit under the plan as of that date. Each participant's "plan benefits" equals that participant's "benefit liabilities," and the sum of all "plan benefits" equals the plan's "benefit liabilities."

"Proposed distribution date" means the date chosen by the plan administrator as the tentative date for the distribution of plan assets pursuant to a standard termination. A proposed distribution date may not be earlier than the 61st day, nor later than the 240th day, following the day on which the plan administrator files the Form 500 with the PBGC.

"Proposed termination date" means the date specified as such by the plan administrator in the notice of intent to terminate or, if later, in the standard termination notice. If a plan terminates in a standard termination, this date becomes the "termination date." A proposed termination date may not be earlier than the 60th day, nor later than the 90th day, after the date of issuance of the notice of

intent to terminate. If the notice of intent to terminate is issued on two or more dates, the proposed termination date must be between 60 and 90 days after each date of issuance.

"Residual assets" means the plan assets remaining after all benefit liabilities and other liabilities of the plan have been satisfied.

"Section 412(i) plan" means a plan described in section 412(i) of the Code and the regulations thereunder.

"Single-employer plan" means any defined benefit plan (as defined in section 3(35) of ERISA) that is not a multiemployer plan (as defined in section 4001(a)(3) of ERISA).

"Standard termination" means the voluntary termination, in accordance with section 4041(b) of ERISA and 29 CFR Part 2617, of a single-employer plan that is able to provide for all its benefit liabilities when plan assets are distributed.

"Standard termination notice" means the notice filed with the PBGC pursuant to section 4041(b) of ERISA and 29 CFR § 2617.25, advising the PBGC of a proposed standard termination. PBGC Form 500 (including Schedule EA-S and, where required, schedule REP-S) is the standard termination notice.

III. GENERAL INSTRUCTIONS FOR FORM 500 and FORM 501

The PBGC will return incomplete filings. Therefore, the filer should assure that an appropriate response is provided for each item, as follows:

1. If an item requests a numeric response, a number must be entered.

2. If an item provides a box or boxes to be checked, written responses are not acceptable.

3. No additions or deletions may be made to the certifications required to be signed by the plan administrator or enrolled actuary.

If an item requests a date, you should enter two digits in each box, *e.g.*, enter "07" for July.

Who Must File

The plan administrator or the plan administrator's authorized representative must submit all filings required to be made with the PBGC. Schedule REP-S (PBGC Form 500) must accompany the filing if it is made by a representative of the plan administrator.

Note: While an authorized representative may submit the filing and sign any cover letter, the plan administrator must sign the Form 500, Schedule REP-S (where required), and Form 501 in all cases. If the designated plan administrator is a board (or similar group) composed of employer and employee representatives, then at least one employer representative and one employee representative must sign the forms. If the designated plan administrator is other than an individual or a board, the forms must be signed by an officer of the designated plan administrator who has the authority to sign on behalf of that entity. Schedule EA-S must be signed by an enrolled actuary unless the plan is a section 412(i) plan. In that case, the Schedule EA-S must be signed either by the enrolled actuary or by the plan administrator.

The PBGC will accept reproductions or other facsimiles of the forms. However, all signature pages require an original signature.

What and When to File

Form 500 with Schedule EA-S and Form 501 must be filed with the PBGC for all standard terminations.

Form 500 with Schedule EA-S and any required supplemental information must be filed simultaneously no later than 120 days after the proposed termination date.

Form 501 must be filed no later than 30 days after completion of the distribution of plan assets pursuant to the termination. The distribution of plan assets must generally be completed within 180 days after the expiration of the PBGC's 60-day (or extended) review period for determining whether to issue a notice of noncompliance. (See Section VII of these instructions for the requirements for the distribution of plan assets and for extension of the distribution deadline.)

The filing date for a document is the date on which the PBGC receives it, provided it is received no later than 4 p.m. on a weekday, other than a Federal holiday. Documents received after 4 p.m. or on weekends or Federal holidays will be deemed filed on the next regular business day.

In computing time periods, begin counting on the day after the event occurs. If the last day of the period falls on a Saturday, Sunday, or Federal holiday, then the period runs until the next regular business day.

Note: *The proposed termination date may be any day, including a Saturday, Sunday, or Federal holiday, and is not deemed otherwise by the computation rule discussed above. For example, a notice of intent to terminate issued September 2, 1992, specifies a proposed termination date of October 31, 1992. The notice of intent to terminate was issued only 59 days, rather than the required 60 days, before the proposed termination date. The fact that October 31st falls on Saturday does not cause the time period for this purpose to run until the following Monday.*

Where to File

Any document being filed for a standard termination may be delivered by mail or by hand to:

Pension Benefit Guaranty Corporation
Case Operations and Compliance Department
Room 5500 (Code 45200)
2020 K Street, NW
Washington, DC 20006-1860

For Questions, Problems, Copies of Forms

Plan administrators who are unsure whether their plans are covered by PBGC or who have other questions or problems may contact:

FORM 500

Pension Benefit Guaranty Corporation
Administrative Review and Technical
Assistance Division (Code 45400)
2020 K Street, NW
Washington, DC 20006-1860
Telephone: (202) 778-8800

Hearing impaired persons may telephone (202) 778-1958.

These phone numbers, and all other phone numbers in these instructions, are not toll-free numbers, and the PBGC cannot accept collect calls.

To request copies of the forms, contact the Pension Benefit Guaranty Corporation's Case Operations and Compliance Department (Code 45200) at the same address shown above or by telephoning (202) 778-8800.

IV. SPECIFIC INSTRUCTIONS - FORM 500

Part I. Identifying Information

1a Enter the complete name of the plan as it appears on the plan document.

2a Enter the name, address, and telephone number of the contributing sponsor. If the plan covers the employees of more than one contributing sponsor, enter the name of the contributing sponsor with the greatest number of participants.

2b Enter the 9-digit employer identification number (EIN) assigned to the contributing sponsor by the Internal Revenue Service for income tax purposes and the 3-digit plan number (PN) assigned by the plan sponsor.

2c If the EIN/PN entered in item 2b is different from that used in earlier filings with the PBGC (including premium and reportable event filings for this plan), enter the EIN/PN previously reported.

FORM 500

2d Enter the same 4-digit industry code that you entered on your most recent PBGC Form 1 (premium) filing.

3a Enter the name, address, and telephone number of the individual, board, or other entity, if any, specifically designated as plan administrator by the terms of the plan or trust agreement. If none is so designated or if the contributing sponsor is so designated, enter "same".

Part II. General Plan Information

4a If you are filing for an Internal Revenue Service determination letter, you should submit that request no later than the date on which you file the Form 500 with the PBGC. The automatic extension of the deadline for the distribution of assets (described in Section VII of these instructions) is only available to a plan that files with the IRS on or before the date the Form 500 is filed with the PBGC.

5a For this purpose, "multiple employer plan" means a single-employer plan maintained by two or more contributing sponsors that are not members of the same controlled group. Under such a plan, all plan assets are available to pay benefits to all plan participants and beneficiaries, regardless of employer.

7 Check whichever statement(s) best describes any change in the organization or structure of the contributing sponsor that is associated with, or resulted in, the decision to terminate the plan.

8a For this purpose, "active participants" includes both currently employed participants and separated, nonvested participants who are earning or retaining credited service under the plan.

9 Any currently employed participant who you expect will be covered under more than one type of new or existing plan should be included in each item that applies.

FORM 500

11a The proposed termination date entered in item 11a may be later than the proposed termination date specified in the notice of intent to terminate, but it may not be later than the 90th day after the issuance of the notice of intent to terminate is begun, *i.e.*, the earliest date a notice of intent to terminate is issued to any affected party.

EXAMPLE - *The plan administrator begins issuing the notice of intent to terminate on September 29, 1992, and completes the issuance to all affected parties on October 1, 1992, specifying a proposed termination date 63 days later, December 3, 1992. In item 11a, the plan administrator may specify a proposed termination date of any day from December 3, 1992, to and including December 28, 1992.*

12a Enter the earliest date any notice of intent to terminate was handed to, or deposited with a mail or courier service directed to, any affected party.

12b Enter the latest date any notice of intent to terminate was handed to, or deposited with a mail or courier service directed to, any affected party.

The "latest" date of issuance of any notice of intent to terminate is the date when the last copy is issued to any affected party reasonably known or discovered during the 60-90 day period before the proposed termination date. It is your responsibility to use your best efforts to locate all affected parties by taking all necessary and appropriate steps under the circumstances. (The discovery of additional affected parties after the above 60-90 day period will not cause the notice to be untimely if you could not reasonably have been expected to know of the additional affected parties and if you promptly issue the notice of intent to terminate to each additional affected party.)

FORM 500

13 Enter the latest date on which any notice of plan benefits was handed to, or deposited with a mail or courier service directed to, any affected party (other than any employee organization). This date can be no later than the date on which the plan administrator files the Form 500 with the PBGC.

The "latest" date of issuance of any notice of plan benefits is the date when the last notice is issued to each person reasonably identified as being entitled to a notice of plan benefits on or before the date of filing of Form 500. It is your responsibility to use your best efforts to locate all persons entitled to a notice of plan benefits by taking all necessary and appropriate steps under the circumstances. (The discovery of additional persons entitled to a notice of plan benefits after the Form 500 is filed with the PBGC will not cause such notices to be untimely if you could not reasonably have been expected to know of the additional persons and if you promptly issue a notice of plan benefits to each additional person entitled to receive one.)

14a If the PBGC is advised, before the 60-day (or extended) period in 29 CFR § 2617.26 ends, that a formal challenge to the plan termination has been initiated, the PBGC will suspend the termination proceeding and will so advise the plan administrator in writing. If the PBGC is advised of a challenge to the termination after the 60-day (or extended) period ends but before the termination procedure is concluded, the PBGC may suspend the termination proceedings and, if it does, will so advise the plan administrator in writing. For this purpose, the following definitions apply:

(1) "Formal challenge to a termination" means the occurrence of any of the following actions asserting that the termination would violate the terms and conditions of an existing collective bargaining agreement: (A) the commencement of any procedure specified in the collective bargaining agreement for resolving disputes under the agreement, or (B) the commencement of any action before an arbitrator, administrative agency or board, or court under applicable labor-management relations law.

(2) "Existing collective bargaining agreement" means a collective bargaining agreement that (A) by its terms, (i) has not expired or (ii) is extended beyond its stated expiration date because neither of the collective bargaining parties took the required action to terminate it, and (B) has not been made inoperative by judicial ruling.

When a collective bargaining agreement no longer meets these conditions, it ceases to be an "existing collective bargaining agreement," whether or not any or all of its terms continue to apply by operation of law.

14b If you checked "Yes" in item 14a, attach a copy of the formal challenge and a statement showing what action was initiated, who initiated the action, the date it was initiated, and the current status of the challenge.

15 PBGC premiums are due for each year up to and including the plan year in which assets are distributed pursuant to the termination.

PART III. IRREVOCABLE COMMITMENTS

16a Each participant must be offered all optional forms of benefits for which he or she is eligible under the terms of the plan. Benefit liabilities may be distributed in a form other than an annuity (*e.g.*, an immediate lump sum or rollover) only if the plan provides for such a distribution and (1) for non-retired participants, the present value of the participant's benefit (valued in accordance with the rules described under "Valuation of Other Benefits" in the instructions to item 6 of Schedule EA-S), including amounts previously distributed, is $3500 or less, or

FORM 500

assets attributable to those contributions must be equitably distributed to the participants who made such contributions (see section 4044(d)(3) of ERISA and 29 CFR Part 2618).

18 Under section 4044(d)(2) of ERISA, a plan provision permitting an employer to recover residual assets, or a plan amendment increasing the amount of such assets that may revert to the employer, may not be effective before the end of the fifth calendar year following the adoption of the amendment.

Exceptions: A plan provision providing for a reversion is not subject to the five-year rule described above if (1) such a provision was adopted on or before December 17, 1987, (2) a plan that had no provision relating to a reversion to the employer adopted such a provision after December 17, 1987, and before December 18, 1988, or (3) a plan that has been in effect for less than five years has contained such a provision since the effective date of the plan.

A plan amendment increasing the amount of the reversion is not subject to the five-year rule if the amendment was adopted on or before December 17, 1987.

19a Check "Yes" if, during the 36-month period immediately preceding the proposed termination date, the plan has transferred assets or liabilities to a newly-created plan or to an existing plan or had transferred to it assets or liabilities from another plan.

19b A spin-off/termination occurs when a single defined benefit plan is split into two or more plans, in conjunction with the termination of one or more of the plans, resulting in a reversion of residual assets to the employer. If a transfer of assets or liabilities is part of a spin-off/termination, generally the termination would not be recognized and any attempt to recover residual assets would be treated as a diversion of assets for a purpose other than the exclusive benefit of employees and beneficiaries, unless the requirements set forth in the Guidelines are satisfied as follows:

SCHEDULE EA-S

(1) All participants and beneficiaries in the original plan who are covered by the ongoing plan must be given advance notice of the transaction in similar time and manner as if the entire original plan were being terminated. (These notice requirements are also set forth at 29 CFR §§ 2617.22 and 2617.23.) Accordingly, you must either hand deliver or deliver by first-class mail or courier service to the last known address of each affected party (other than a collective bargaining representative): (A) a notice describing the transaction, which must be issued no later than the latest date on which the notice of intent to terminate is issued with respect to the terminating plan; and (B) notices of plan benefits, which must be issued no later than the latest date on which notices of plan benefits are issued with respect to the terminating plan;

(2) The plan benefits under the ongoing plan of participants and beneficiaries described in (1) above must be fully vested as of the termination date of the terminating plan; and

(3) All plan benefits described in (2) above must be provided for by the purchase of annuity contracts that represent irrevocable commitments for the plan benefits of each participant or beneficiary.

V. SPECIFIC INSTRUCTIONS - FORM 500, SCHEDULE EA-S

Schedule EA-S must be used to certify that a plan terminating in a standard termination is projected to have sufficient assets to provide all benefit liabilities as of the proposed distribution date, as required under section 4041(b)(2)(A) of ERISA.

The plan administrator must file the completed Schedule EA-S together with the Form 500. The Schedule EA-S must be signed by the enrolled actuary, unless the plan is a Code section 412(i) plan. For a section 412(i) plan, either the enrolled actuary or the plan administrator must sign the Schedule EA-S.

SCHEDULE EA-S

Part I. Code Section 412(i) Plan

1 Check "Yes" if this is a plan described in Code section 412(i) and enter the name and address of the insurer in item 2.

Part II. Plan Sufficiency

3 Enter the proposed distribution date. The proposed distribution date may not be earlier than the 61st day, nor later than the 240th day, following the filing date of the Form 500.

EXAMPLE - *The plan administrator files a Form 500 with the PBGC on March 30, 1992. The earliest possible proposed distribution date is May 30, 1992. The latest possible proposed distribution date is November 25, 1992.*

5 Enter the estimated fair market value of the plan assets available to pay for benefits, valued as of the proposed distribution date. Plan assets available to pay for benefits include all plan assets remaining after subtracting all liabilities (other than the future benefit liabilities that will be provided when assets are distributed). Liabilities include, *e.g.*, benefit payments due before the distribution date; PBGC premiums for all plan years through and including the plan year in which assets are distributed; expenses, fees, and other administrative costs. The enrolled actuary may include as a plan asset for this purpose the value of a commitment by a contributing sponsor or controlled group member to contribute any additional sums necessary to make a plan sufficient for all benefit liabilities, in accordance with the rules in 29 CFR § 2617.7(a).

6 Enter the estimated present value of benefit liabilities as of the proposed distribution date.

SCHEDULE EA-S

Value of Annuity Contracts

The value of benefit liabilities that will be provided through the purchase of annuity contracts is the cost quoted by an insurer to provide such benefit liabilities (see also instructions to item 14a of Form 500).

Note: *Because insurers may require that bids be exercised within a fairly short period of time, it may not be possible prior to filing the Form 500 to obtain a bid that would remain open until the proposed distribution date. Accordingly, the plan administrator is not required to actually obtain a bid before item 6 is completed.*

Value of Other Benefits

To value benefit liabilities that will be provided other than through the purchase of annuity contracts, the enrolled actuary must use an interest rate or rates determined in accordance with sections 411(a)(11) and 417(e)(3) of the Code and the regulations thereunder. The interest rate(s) shall be determined as of the date set forth in the plan if the plan provision is in accord with the IRS rules concerning the date as of which the interest rate is determined; otherwise, the interest rate(s) shall be determined as of the date of distribution. (See 26 CFR § 1.417(e)-1(d)(3).)

Note: *If a plan contains a provision that complies with Treasury Reg. § 1.417(e)-1(d)(3), the interest rate is determined by substituting "date of distribution" for "annuity starting date" wherever used in the plan.*

Generally, the rate described in sections 411(a)(11) and 417(e)(3) of the Code and the regulations thereunder is whichever of the following two rates or rate structures provides the greater benefit: (1) the rate specified in the plan or (2) the "applicable interest rate " (or, if the present value of vested accrued benefits exceeds $25,000

SCHEDULE EA-S

using the applicable interest rate, a rate no greater than 120 percent of the applicable interest rate).

Note: *When using the alternative 120 percent of the applicable interest rate, the resulting present value of the vested accrued benefits may not be less than $25,000.*

The "applicable interest rate" is the interest rate that would be used by the PBGC for purposes of determining the present value of a lump sum distribution on plan termination. Note: *The appropriate deferral factors must be used for valuing deferred annuities.*

The applicable interest rates and factors are published at 29 CFR Part 2619, Appendix B, and updated in accordance with that regulation. Any change in the rates normally will be published in the Federal Register by the 15th of the month preceding the effective date of the new rates or as close to that date as circumstances permit.

The PBGC also makes interest rate information available through a telephone hotline. The hotline number is (202) 778-8899.

Note: *In order to facilitate the termination of a plan and distribution of assets in a standard termination, a majority owner may agree to an alternative treatment of his or her benefit by foregoing the receipt of all or part of the benefit until the benefit liabilities of all other plan participants have been satisfied. (In accordance with the Code and IRS regulations thereunder, if the present value of the benefit is more than $3,500, the spouse of the majority owner must consent to this alternative treatment of the benefit. See Treas. Reg. §§ 1.411(d)-4 and 1.417(e)-1.) An election to forego payment of benefits is permitted merely to facilitate a standard termination; if assets become available when final distribution occurs, such assets must be used to satisfy the benefit liabilities of the majority owner before any assets may revert to the contributing sponsor. See 29 CFR § 2617.7(b).*

SCHEDULE REP-S

7 Enter the total amount of residual assets.

8 Enter that portion of the amount in item 7 that will be distributed to the employer pursuant to section 4044(d) of ERISA.

9 Enter that portion of the amount in item 7 that will be distributed to participants. This amount includes the amount of the residual assets, if any, attributable to mandatory employee contributions. (The sum of the amounts in item 8 and item 9 must equal the amount in item 7.)

10 Check "Yes" if the plan has ever required that participants contribute to the plan.

If there are residual assets and the plan required employee contributions, the portion of the residual assets attributable to such employee contributions must be determined pursuant to section 4044(d)(3) of ERISA. For rules on allocating residual assets among participants and beneficiaries, see 29 CFR Part 2618.

11 State the interest rate or rates that will be used to value the benefits that are to be distributed other than through the purchase of annuity contracts and the source of those rates, *e.g.*, the rate specified in the plan or the PBGC rate(s) as of the appropriate date (see instructions to item 6, above). Include the deferral factors or rate structure that will be used to value the benefits for participants who are not immediately eligible for an annuity.

VI. SPECIFIC INSTRUCTIONS - FORM 500, SCHEDULE REP-S

Schedule REP-S may be used to designate a person or persons to represent you before the PBGC on some or all matters relating to the termination of your pension plan. Schedule REP-S (or another designation of representative form) must be filed simultaneously with Form 500 and Schedule EA-S if Form 500 is submitted by a representative or representatives of the plan administrator. However, you may file Schedule REP-S at any time that you

wish to designate a representative or representatives in connection with a standard termination. Schedule REP-S also may be used to revoke a prior designation.

Part I. Identifying Information

The information entered in Part I should be the same as that entered in Part I of the Form 500 that you filed, or are filing, with the PBGC.

Part III. Retention/Revocation of Prior Designation(s)

If you wish a previous designation for the same termination to remain in effect, check "Yes" in items 7a and 7b and attach to this schedule a copy of the earlier designation(s) of representative that will remain in effect.

Part IV. Signature

You, as plan administrator, must sign the Schedule REP-S. (The PBGC will accept facsimiles of the form, but your signature must be an original).

Note: *If the plan administrator is a board (or similar group) composed of employer and employee representatives, at least one employer representative and one employee representative must sign this form. If the plan administrator is other than an individual or a board, this form must be signed by an officer of the plan administrator who has the authority to do so.*

VII. SPECIFIC INSTRUCTIONS - FORM 501

Form 501 is the form that must be used by the plan administrator to certify that the distribution of assets was completed in accordance with section 4041(b) of ERISA. You must file Form 501 with the PBGC within 30 days after the completion of the distribution of assets.

Note: *Pursuant to section 4071 of ERISA, the PBGC may impose a civil penalty of up to $1,000 per day for each day for which the Form 501 is overdue. This penalty may be imposed beginning on the 31st day after the distribution is completed.*

You must complete the distribution of plan assets within 180 days after the expiration of the PBGC's review period for determining whether to issue a notice of noncompliance. This 180-day period may be extended according to the following rules:

Automatic extension

The distribution deadline will automatically be extended until the 60th day after the plan's receipt of a favorable IRS determination letter, if –

(1) on or before the date that the plan administrator files the Standard Termination Notice (Form 500) with the PBGC, the plan administrator submitted to the IRS a complete request for a determination letter with respect to the plan's tax-qualification status upon termination;

(2) the plan administrator does not receive the IRS's determination letter at least 60 days before the expiration of the 180-day period for distribution; and

(3) on or before the expiration of the 180-day period, the plan administrator notifies the PBGC in writing that an extension of the distribution deadline is required and certifies that the conditions in (1) and (2) have been met.

Discretionary extension

If the plan administrator will be unable to complete the distribution of plan assets within the 180-day (or extended) period, the plan administrator may file a written request with the PBGC for an extension of the distribution deadline. The PBGC will not grant any request based on: (1) insufficient plan assets to provide all benefit liabilities within the 180-day (or extended) period; (2) failure to meet the requirements for an automatic extension; or (3) failure to locate all participants and beneficiaries.

The PBGC will grant a discretionary extension only if the PBGC is satisfied that the delay in making the distribution is not due to the action or inaction of the plan administrator or the contributing sponsor and distribution can in fact be completed by the date requested.

The request must be filed no later than 30 days before the expiration of the 180-day (or extended) period, must explain the reasons for the request, and must provide a date certain by which the distribution will be made if the extension is granted. All requests for extensions must be in writing and addressed to:

Manager, Standard Processing Division
Pension Benefit Guaranty Corporation
Room 5500 (Code 45300)
2020 K Street, NW
Washington, DC 20006-1860

Part I. Distribution Information

3 Enter the PBGC Case Number. You will find this number on the letter that the PBGC sent to you acknowledging receipt of the Form 500 for this plan.

4 Enter the date on which the distribution of assets was completed.

A distribution of assets by the purchase of annuity contracts occurs when the obligation for providing the benefit liabilities passes irrevocably from the plan to the insurer.

A distribution of assets in a manner other than by the purchase of an annuity contract occurs on the date on which the benefits are delivered to the participant or beneficiary (or to another plan or benefit arrangement or other recipient authorized by the participant or beneficiary in accordance with applicable law and regulations) personally or by deposit with a mail or courier service (as evidenced by a postmark or written receipt).

6 If you have been unable to locate certain participants after having made a reasonable effort to do so, you must (except as described below) purchase irrevocable commitments to provide benefits for each participant who has not been located. In the alternative, if the benefit of any unlocatable participant is valued at $3,500 or less and would otherwise be distributed in a lump sum, you may deposit the monies that would otherwise be distributed into an interest-bearing bank account opened in the participant's name at a federally insured institution. In the limited case where you have made every reasonable effort to locate missing participants and to locate institutions that are willing to open individual interest-bearing accounts, but are still unable to complete the distribution in this manner, then the use of a pooled interest-bearing account may be appropriate.

If such an account (individual or pooled) is opened, it must be maintained by a fiduciary whom you have designated and who continues to have ongoing fiduciary obligations to those missing plan participants. The fiduciary must keep clear, up-to-date records of each participant's opening balance and earnings throughout the life of the account and must be available to make every reasonable effort to assist those participants who do come forward to claim their benefits.

7a As soon as practicable after a distribution by the purchase of an irrevocable commitment, either you or the insurer must provide each participant and beneficiary with a copy of the annuity contract or a certificate showing the insurer's name and address and clearly reflecting the insurer's obligation to provide the participant's or beneficiary's benefit. If such a contract or certificate is not available before the deadline for filing Form 501, you must, no later than that deadline, provide each participant and beneficiary with a written notice stating:

(1) that the obligation for providing the benefit has transferred to the insurer;

(2) the name and address of the insurer;

(3) the name, address, and telephone number of the person designated by the insurer to answer questions concerning the annuity; and

(4) that the participant or beneficiary will receive from the plan administrator or the insurer a copy of the annuity contract or a certificate showing the insurer's name and address and clearly reflecting the insurer's obligation to provide the participant's or beneficiary's benefit.

8 Enter the name and address of the insurer(s), if any, that made an irrevocable commitment to provide benefit liabilities under the plan. The name must be the full official name of record.

FORM 501

9 Enter the name, address, and telephone number of the person keeping the plan records. The contributing sponsor or plan administrator must keep records supporting the calculation and valuation of benefits and assets for at least six years after the date the post-distribution certification is filed.

10 In reporting values, use the actual cost to the plan of the distribution (the amount of any lump sum distribution; the price paid for a nonparticipating annuity contract).

PART IV. RESIDUAL ASSET PLANS

17a Will residual assets be returned to the employer as a result of this termination?

Yes ☐ No ☐

If "No", do not complete the rest of Part IV; go to Part V.

b If "Yes," enter the estimated amount $ _____

18a Is there a plan provision permitting a reversion of residual assets to the employer?

Yes ☐ No ☐

b If "Yes", was the provision adopted prior to December 18, 1988?

Yes ☐ No ☐

c If you checked "No" in item 18b, enter:

i) Adoption date of plan provision

Month	Day	Year

ii) Effective date of plan

Month	Day	Year

19a Has the plan been involved in a spin-off or other transfer of assets or liabilities within the 36-month period immediately preceding the proposed termination date?

Yes ☐ No ☐

b If "Yes", have the requirements set forth in the Guidelines been satisfied?

Yes ☐ No ☐ N/A ☐

i) If "Yes", enter date, or latest date, a description of the transaction(s) was issued to participants in the ongoing plan.

Month	Day	Year

ii) If "Yes", enter date, or latest date, notices of plan benefits were issued to participants in the ongoing plan.

Month	Day	Year

iii) If "Yes", have annuities been purchased or will annuities be purchased, to provide all benefit liabilities for participants in the ongoing plan at the time of the spin-off?

Yes ☐ No ☐

c If you checked "No" or "N/A" in item 19b, attach a statement that describes the transaction(s) and explains why the Guidelines were not, or need not have been, followed.

PART V. PLAN ADMINISTRATOR CERTIFICATION

I, the Plan Administrator, certify that, to the best of my knowledge and belief:

- I am implementing the termination of the plan in accordance with all applicable laws and regulations; and
- the information contained in this filing and made available to the enrolled actuary is true, correct, and complete.

In making this certification, I recognize that knowingly and willfully making false, fictitious, or fraudulent statements to the PBGC is punishable under 18 U.S.C. 1001.

6 Estimated value of benefit liabilities as of the proposed distribution date $_____

7 Total amount of residual assets $_____

8 Amount of residual assets to be distributed to the employer $_____

9 Amount of residual assets to be distributed to participants and beneficiaries $_____

10 Has the plan ever required employee contributions?

Yes ☐ No ☐

11 If the amount in item 8 is $1 million or more and if any benefits are to be distributed other than through the purchase of annuity contracts, attach a statement showing interest rate/structure used to value the benefits.

PART III. ENROLLED ACTUARY CERTIFICATION

I, the Enrolled Actuary, certify that:

- I have reviewed all plan documents and plan and participant data, and applied all relevant provisions of ERISA, the Code, and the regulations promulgated thereunder;

- to the best of my knowledge and belief, this plan's assets equal or exceed the value of the plan's benefit liabilities as of the proposed distribution date; and

- to the best of my knowledge and belief, the information contained in this schedule is true, correct, and complete.

In making this certification, I recognize that knowingly and willfully making false, fictitious, or fraudulent statements to the PBGC is punishable under 18 U.S.C. 1001.

PART II. PLAN ADMINISTRATOR CERTIFICATION

I, the Plan Administrator, certify that

- I have made a reasonable effort to locate all participants;
- to the best of my knowledge and belief, benefits payable with respect to participants have been calculated and valued correctly in accordance with applicable provisions of ERISA and the regulations thereunder;
- to the best of my knowledge and belief, all benefit liabilities under the plan have been satisfied;
- to the best of my knowledge and belief, plan assets in excess of those needed to satisfy all benefit liabilities have been or will be distributed in accordance with applicable provisions of ERISA and the regulations thereunder;
- to the best of my knowledge and belief, the information contained in this filing is true, correct, and complete; and
- I am aware that records supporting the calculation and valuation of benefits and assets must be kept at least six years after the date this post-distribution certification is filed.

In making this certification, I recognize that knowingly and willfully making false, fictitious, or fraudulent statements to the PBGC is punishable under 18 U.S.C. 1001.

DISTRESS TERMINATION FILING INSTRUCTIONS

DRAFT

PAPERWORK REDUCTION ACT NOTICE

The PBGC needs this information in order to determine whether the termination qualifies as a distress termination under section 4041(c) of ERISA and 29 CFR Part 2616. You are required to provide this information pursuant to section 4041(c) of ERISA and 29 CFR Part 2616. The information provided to the PBGC may be subject to disclosure under the Freedom of Information Act and the Privacy Act, as applicable.

The estimated times needed to complete and file these distress termination forms are listed below. These times are averages for the plans in each of the listed categories. These times will vary depending on the circumstances of a given plan.

Plans with under 100 participants-
Bankruptcy or insolvency proceeding .....29.35 hours
Other distress criteria.....43.75 hours

Plans with 100 or more participants-
Bankruptcy or insolvency proceeding..... 274.1 hours
Other distress criteria.....288.5 hours

If you have comments concerning the accuracy of these time estimates or suggestions for making the forms simpler, please send your comments to Pension Benefit Guaranty Corporation, Office of the General Counsel, (Code 22000), 2020 K Street, NW, Washington, DC 20006-1860 and Office of Management and Budget, Paperwork Reduction Project (1212-0036), Washington, DC 20503.

I. INTRODUCTION

The plan administrator of a single-employer pension plan that is covered by the PBGC insurance program pursuant to section 4021 of ERISA must file Form 600 and Form 601 with the PBGC in order to terminate the plan in a distress termination. (In addition, if the plan is sufficient for at least guaranteed benefits and thus closes out in the private sector, the plan administrator must file Form 602.) This package contains copies of these forms and detailed instructions for completing and filing them. The rules and procedures for terminating a single-employer plan in a distress termination are set forth in section 4041(a) and (c) of ERISA and 29 CFR Part 2616.

Form 600 is the Notice of Intent to Terminate that must be filed with the PBGC pursuant to section 4041(a)(2) of ERISA and 29 CFR § 2616.22 in order to advise the PBGC of a proposed distress termination and to provide various plan and sponsor data. Form 600 includes Schedule REP-D.

Schedule REP-D is the Designation of Representative form that may be used by a plan administrator to designate a representative or representatives to act on his or her behalf before the PBGC on some or all matters relating to the termination of a specified pension plan. Schedule REP-D also may be used to revoke a prior designation.

Form 601 is the Distress Termination Notice that must be filed with the PBGC pursuant to section 4041(c)(2)(A) of ERISA and 29 CFR § 2616.24 to provide information demonstrating satisfaction of the distress criteria and various plan, sponsor, and participant data. Form 601 includes Schedule EA-D.

Schedule EA-D is the Distress Termination Enrolled Actuary Certification that must be used by an enrolled actuary to certify the level of plan benefits that can be provided by plan assets.

Note: *A terminating plan that has sufficient assets to satisfy all benefit liabilities normally should be terminated in a standard termination, not a distress termination, even if the contributing sponsor(s) and controlled group members can meet the requirements for a distress termination, because the standard termination process is faster and less costly for the plan. You must file Form 500 with Schedule EA-S and Form 501 with the PBGC in order to terminate in a standard termination in accordance with the requirements of section 4041(b) of ERISA and 29 CFR Part 2617.*

Form 602 is the Post-Distribution Certification that must be filed with the PBGC pursuant to 29 CFR § 2616.29(b), if the plan is sufficient for at least guaranteed benefits (and thus closes out in the private sector), to certify that the distribution of plan assets pursuant to the distress termination was completed in accordance with section 4041(c) of ERISA and 29 CFR § 2616.29(a).

If, after beginning a distress termination proceeding, you find that the plan qualifies for a standard termination, you may be able to convert from a distress termination to a standard termination. In that event, please contact the PBGC Case Officer assigned to your case.

A plan may terminate in a distress termination only if the following conditions are met: (1) The plan administrator issues the notice of intent to terminate to each person who is (as of the proposed termination date) an affected party at least 60 days and no more than 90 days before the proposed termination date. (Form 600 is to be filed with the PBGC for this purpose. There is no prescribed form for the notice of intent to terminate that must be issued to the other affected parties; however, the notice must meet the requirements set forth in 29 CFR § 2616.22.) (2) The PBGC determines that the contributing sponsor(s) and each member of each contributing sponsor's controlled group satisfies at least one (but not necessarily the same one) of four statutory distress tests. (3) The plan administrator files a distress termination notice (Form 601, including a Schedule EA-D signed by an enrolled actuary) with the PBGC in a timely manner. Briefly, the four statutory distress tests are –

1. Liquidation in bankruptcy or insolvency proceedings;

2. Reorganization in bankruptcy or insolvency proceedings with court approval of the termination;

3. Inability to pay debts when due and to continue in business unless a distress termination occurs; and

4. Unreasonably burdensome pension costs due solely to a decline in employment.

It is important that you follow the rules set forth in ERISA, PBGC's regulations, and these instructions for terminating the plan, because failure to do so may nullify the proposed termination.

Note: *Whenever the PBGC has reason to believe that any of the termination requirements have not been met, or that it may be necessary or appropriate for the PBGC to institute termination or trusteeship proceedings pursuant to section 4042 or ERISA, the PBGC may require that additional information be submitted at such time as the PBGC requests in writing.*

The PBGC will trustee a plan if the plan qualifies for a distress termination and the PBGC determines, pursuant to section 4041(c)(3) of ERISA and 29 CFR § 2616.26, that the plan has insufficient assets to provide benefits guaranteed by the PBGC under section 4022(a) and (b) of ERISA.

If the PBGC determines that the plan has sufficient assets to provide at least all guaranteed benefits, the PBGC will issue a distribution notice. In that case, the plan administrator must (1) issue a notice of benefit distribution in accordance with 29 CFR §2616.27 to each participant/beneficiary no later than 60 days after receiving the distribution notice; (2) file a certification with the PBGC that the notices of benefit distribution were issued in accordance with 29 CFR § 2616.27, no later than 15 days after the issuance of the notices is completed; (3) make a distribution of plan assets in accordance with 29 CFR § 2616.29 no earlier that the 61st day, and no later than the 240th day (except as extended in accordance with Section IX, below), following completion of issuance of the notices of benefit distribution; and (4) file a Form 602 with the PBGC within 30 days after the distribution of assets is completed.

Note: ***Whenever a plan terminates in a distress termination without sufficient assets to pay all benefit liabilities, the contributing sponsor(s) and each controlled group member are jointly and severally liable to the PBGC under section 4062(b) of ERISA for the total amount of unfunded benefit liabilities under the plan.***

II. DEFINITIONS

As used in these instructions –

"Affected party" means the PBGC and, with respect to a terminating plan, (a) each participant; (b) each beneficiary of a deceased participant; (c) each alternate payee under an applicable qualified domestic relations order, as defined in section 206(d)(3) of ERISA; (d) each employee organization that currently represents any group of participants; and (e) for any group of participants not currently represented by an employee organization, the employee organization, if any, that last represented such group of participants within the 5-year period preceding issuance of the notice of intent to terminate. In connection with any notice required under 29 CFR Part 2616, if an affected party has designated in writing another person to receive the notice, any reference to the affected party shall be deemed to refer to the designated party.

"Benefit liabilities" means the benefits of participants and their beneficiaries under the plan (within the meaning of section 401(a)(2) of the Code).

"Code" means the Internal Revenue Code of 1986, as amended.

"Contributing sponsor" means the person entitled to receive a deduction under section 404(a) of the Code (or that would be entitled to receive a deduction except for the limitations in section 404(a)) for contributions required to be made to the plan under section 302 of ERISA and section 412 of the Code.

"Controlled group" means, in connection with any person, a group consisting of such person and all other persons under common control with such person, determined in accordance with 29 CFR Part 2612.

"Date of distribution" means (a) for benefits provided through the purchase of irrevocable commitments, the date on which the obligation to provide the benefit passes from the plan to the insurer; and (b) for benefits provided other than through the purchase of irrevocable commitments, the date on which the benefits are delivered to the participant or beneficiary (or to another plan or benefit arrangement or other recipient authorized by the participant or beneficiary in accordance with applicable law and regulations) personally or by deposit with a mail or courier service (as evidenced by a postmark or written receipt).

"Distress termination notice" means the notice filed with the PBGC pursuant to section 4041(c)(2)(A) of ERISA and 29 CFR § 2616.24. PBGC Form 601 (including Schedule EA-D) is the distress termination notice.

"Distribution notice" means the notice issued to the plan administrator by the PBGC pursuant to 29 CFR § 2616.26(c), upon the PBGC's determination that the plan has sufficient assets to pay at least guaranteed benefits. The notice instructs the plan administrator to distribute all plan assets in accordance with section 4044 of ERISA, and details the requirements for filing the post-distribution certification with the PBGC.

"ERISA" means the Employee Retirement Income Security Act of 1974, as amended (29 U.S.C. 1001 *et. seq.*).

"Guaranteed benefit" means a benefit that is guaranteed by the PBGC under section 4022(a) and (b) of ERISA and 29 CFR Parts 2613 and 2621.

"Insurer" means a company authorized to do business as an insurance carrier under the laws of a state or the District of Columbia.

"Irrevocable commitment" means an obligation by an insurer to pay benefits to a named participant or surviving beneficiary, if the obligation cannot be cancelled under the terms of the insurance contract (except for fraud or mistake) without the consent of the participant or beneficiary and is legally enforceable by the participant or beneficiary.

"Mandatory employee contributions" means amounts contributed to the plan by a participant that are required as a condition of employment, as a condition of participation in the plan, or as a condition of obtaining benefits under the plan attributable to employer contributions.

"Notice of benefit distribution" means the notice to each participant and beneficiary, as required under 29 CFR § 2616.27, describing the benefit to be distributed to him or her.

"Notice of intent to terminate" means the notice to affected parties advising each of a proposed plan termination, as required by section 4041(a)(2) of ERISA and 29 CFR § 2616.22. PBGC Form 600 is the notice of intent to terminate that must be filed with the PBGC. There is no prescribed form for the notice of intent to terminate for other affected parties. However, the notice must meet the requirements set forth in 29 CFR § 2616.22.

"Participant" means--

(a) Any individual who is currently in employment covered by the plan and who is earning or retaining credited service under the plan, including any individual who is considered covered under the plan for purposes of meeting the minimum participation requirements but who, because of offset or similar provisions, does not have any accrued benefits;

(b) Any nonvested individual who is not currently in employment covered by the plan but who is earning or retaining credited service under the plan; and

(c) Any individual who is retired or separated from employment covered by the plan and who is receiving benefits under the plan or is entitled to begin receiving benefits under the plan in the future, excluding any such individual to whom an insurer has made an irrevocable commitment to pay all the benefits to which the individual is entitled under the plan.

"PBGC" means the Pension Benefit Guaranty Corporation.

"Person" means an individual, partnership, joint venture, corporation, mutual company, joint-stock company, trust, estate, unincorporated organization, association, or employee organization.

"Proposed termination date" means the date specified as such by the plan administrator in a notice of intent to terminate or, if later, in the distress termination notice. A proposed termination date specified in the notice of intent to terminate may not be earlier than the 60th day, nor later than the 90th day, after the date of issuance/filing of the notice of intent to terminate. If the notice of intent to terminate is issued (or filed with the PBGC) on two or more dates, the proposed termination date in the notice of intent to terminate must be between 60 and 90 days after each date of issuance (or filing). A proposed termination date specified in the distress termination notice may not be earlier than the proposed termination date specified in the notice of intent to terminate, or (except with PBGC approval) later than the 90th day after the earliest date of issuance of any notice of intent to terminate.

"Single-employer plan" means any defined benefit plan (as defined in section 3(35) of ERISA) that is not a multiemployer plan (as defined in section 4001(a)(3) of ERISA).

"Sufficient for benefit liabilities" means that there is no amount of unfunded benefit liabilities, as defined in section 4001(a) (18) of ERISA.

"Sufficient for guaranteed benefits" means that there is no amount of unfunded guaranteed benefits, as defined in section 4001(a) (17) of ERISA.

"Termination date" means the date established pursuant to section 4048(a) of ERISA.

"Title IV benefit" means the guaranteed benefit plus any additional benefits to which plan assets are allocated pursuant to section 4044 of ERISA and 29 CFR Part 2618. (This does not include any benefit that may be payable pursuant to section 4022(c) of ERISA.)

III. GENERAL INSTRUCTIONS FOR FORM 600, FORM 601, and FORM 602

The PBGC may return incomplete filings. Therefore, the filer should assure that an appropriate response is provided for each item, as follows:

1. If an item requests a numeric response, a number must be entered.

2. If an item provides a box or boxes to be checked, written responses are not acceptable.

3. No additions or deletions may be made to the certifications required to be signed by the plan administrator or enrolled actuary.

If an item requests a date, you should enter two digits in each box, *e.g.*, enter "07" for July.

Who Must File

The plan administrator or the plan administrator's authorized representative must submit all filings required to be made with the PBGC as part of a distress termination. Schedule REP-D (PBGC Form 600) must accompany the filing if it is made by a representative of the plan administrator.

Note: *While an authorized representative may submit the filing and sign any cover letter, in all cases the plan administrator must sign the Form 600, Form 601, and (where required) Schedule REP-D and Form 602. If the designated plan administrator is a board (or similar group) composed of employer and employee representatives, then at least one employer representative and one employee representative must sign the forms. If the designated plan administrator is other than an individual or a board, the forms must be signed by an officer of the designated plan administrator who has the authority to sign on behalf of that entity. Schedule EA-D must always be signed by an enrolled actuary.*

The PBGC will accept reproductions or other facsimiles of the forms. However, all forms require an original signature.

What and When to File

Form 600 and Form 601 with Schedule EA-D must be filed with the PBGC for all distress terminations. (In addition, if the plan is sufficient for at least guaranteed benefits and thus closes out in the private sector, the plan administrator must file Form 602.)

Form 600 must be filed at least 60 days and no more than 90 days prior to the proposed termination date, and it may not be filed before the notice of intent to terminate is issued to all other affected parties.

Form 601 with Schedule EA-D and any required supplemental information must be filed simultaneously no later than 120 days after the proposed termination date. You must complete the distress termination notice by submitting detailed participant and benefit information to the PBGC by the later of (1) 120 days after the proposed termination date or (2) 30 days after receipt of the PBGC's determination that the requirements for a distress termination have been satisfied pursuant to section 4041(c)(2)(B) of ERISA and 29 CFR § 2616.25. **Exception:** *If the enrolled actuary certifies that the plan is sufficient for at least all guaranteed benefits, you will not need to submit the participant and benefit information until the PBGC requests, in writing, that you do so.*

Note: *Initiation of a formal challenge to the termination under section 4041(a)(3) of ERISA does not relieve the plan administrator of the obligation to timely file Form 600 and Form 601 with Schedule EA-D.*

Form 602 must be filed no later than 30 days after completion of the distribution of plan assets pursuant to the termination. The distribution of plan assets must generally be completed within 180 days after you complete the issuance of the notices of benefit distribution. (See Section IX of these instructions for the requirements for the distribution of plan assets and for extension of the distribution deadline.)

The filing date for a document is the date on which the PBGC receives it, provided it is received no later than 4 p.m. on a weekday, other than a Federal holiday. Documents received after 4 p.m. or on weekends or Federal holidays will be deemed filed on the next regular business day.

In computing time periods, begin counting on the day after the event occurs. If the last day of the period falls on a Saturday, Sunday, or Federal holiday, then the period runs until the next regular business day.

Note: *The proposed termination date may be any day, including a Saturday, Sunday, or Federal holiday, and is not deemed otherwise by the computation rule discussed above. For example, a notice of intent to terminate issued September 2, 1992, specifies a proposed termination date of October 31, 1992. The notice of intent to terminate was issued only 59 days, rather than the required 60 days, before the proposed termination date. The fact that October 31st falls on a Saturday does not cause the time period for this purpose to run until the following Monday.*

Where to File

Any document being filed for a distress termination may be delivered by mail or by hand to:

Pension Benefit Guaranty Corporation
Case Operations and Compliance Department
Room 5500 (Code 45200)
2020 K Street, NW
Washington, DC 20006-1860

For Questions, Problems, Copies of Forms

Plan administrators who are unsure whether their plans are covered by PBGC or who have other questions or problems may contact:

Pension Benefit Guaranty Corporation
Administrative Review and Technical
Assistance Division (Code 45400)
2020 K Street, NW
Washington, DC 20006-1860
Telephone: (202) 778-8800

Hearing impaired persons may telephone (202) 778-1958.

These phone numbers, and all other phone numbers in these instructions, are not toll-free numbers, and the PBGC cannot accept collect calls.

To request copies of the forms, contact the Pension Benefit Guaranty Corporation's Control Division (Code 45200) at the same address and telephone number as shown above.

Failure to Timely File Required Forms

Failure to timely file the completed forms may nullify the proposed plan termination. In addition, the PBGC may assess penalties pursuant to section 4071 of ERISA.

IV. SPECIFIC INSTRUCTIONS - FORM 600

Part I. Identifying Information

1a Enter the complete name of the plan as it appears on the plan document.

2a Enter the name, address, and telephone number of the contributing sponsor. If the plan covers the employees of more than one contributing sponsor, enter the name of the contributing sponsor with the greatest number of participants.

2b Enter the 9-digit employer identification number (EIN) assigned to the contributing sponsor by the Internal Revenue Service for income tax purposes and the 3-digit plan number (PN) assigned by the plan sponsor.

2c If the EIN/PN entered in item 2b is different from that used in earlier filings with the PBGC (including premium and reportable event filings for this plan), the Department of Labor, or the Internal Revenue Service, enter the EIN/PN previously reported.

2e Enter the same 4-digit industry code that you entered on your most recent PBGC Form 1 (premium) filing.

3a Enter the name, address, and telephone number of the individual, board, or other entity, if any, specifically designated as plan

administrator by the terms of the plan or trust agreement. If none is so designated or if the contributing sponsor is so designated, enter "same".

Part II. General Plan Information

4 The proposed termination date may not be earlier than the 60th day after Form 600 is filed with the PBGC, nor later than the 90th day after the earliest date a notice of intent to terminate is issued (handed to affected parties or deposited with a mail or courier service) to any affected party.

5a For this purpose, "active participants" includes both currently employed participants and separated nonvested participants who are earning or retaining credited service under the plan.

6 Check whichever statement(s) best describes any change in the organization or structure of the contributing sponsor that is associated with, or resulted in, the decision to terminate the plan. These changes are not intended to correspond to the four statutory distress tests.

7 Check all that apply.

8b For this purpose, "multiple employer plan" means a single-employer plan maintained by two or more contributing sponsors that are not members of the same controlled group. Under such a plan, all plan assets are available to pay benefits to all plan participants and beneficiaries, regardless of employer.

9b If you checked "Yes" in either items 8a or 9a, attach a statement listing the name and address of each contributing sponsor and each member of the contributing sponsor's controlled group as of the proposed termination date. For each entity listed, provide the employer identification number and identify the distress test each entity expects to meet.

FORM 600

10b If you checked "Yes" in item 10a, attach a statement describing each transaction that changed the composition of the contributing sponsor's controlled group. Include in the statement a listing of each member of the contributing sponsor's controlled group as of the transaction date(s) and a listing of each member of the controlled group after the transaction.

11d Section 4041(c)(2)(B)(ii) of ERISA and 29 CFR § 2616.3(d)(2) require that, in order to meet the reorganization distress test, the following conditions must be satisfied: (1) the reorganization proceedings have not been dismissed as of the proposed termination date; (2) the PBGC is notified concurrently with the appropriate court of any request to approve the termination; and (3) the termination is approved by the court.

11e A copy of the motion requesting court approval under the reorganization test, including any documents submitted in support of the request, must be submitted concurrently to the PBGC pursuant to section 4041(c)(2)(B)(ii)(III) of ERISA and 29 CFR § 2616.3(d)(2). If court approval was requested before the Form 600 is filed with the PBGC, enter the date on which the motion was filed and documents were submitted to the PBGC.

13a Check "Yes" if the plan has sufficient funds (cash, cash equivalents, and other liquid assets) available to pay estimated Title IV benefits when due for at least 180 days after the Form 600 is filed with the PBGC.

14 Beginning on the proposed termination date, section 4041(c)(3)(D)(ii)(IV) of ERISA and 29 CFR § 2616.4(c) require that the plan administrator reduce the benefits paid to a plan's participants and beneficiaries in pay status to the estimated benefit amounts determined in accordance with 29 CFR Part 2623. Note: *If you need assistance, you may call the PBGC's Actuarial Services Division at (202) 778-8838.*

FORM 600

SCHEDULE REP-D

15 All documents described in item 15 and submitted to the PBGC must be executed copies. Each document submitted must include the complete text as well as the signature page, and must indicate the effective date of the document and the date it was adopted. The PBGC will accept clear photocopies.

15a If your plan was adopted and has been in effect for 5 or more years, submit the plan document(s) and amendment(s) showing the provisions of the plan adopted and effective at the beginning of the 5-year period ending on the proposed termination date. You must also submit any plan amendments adopted and effective during the period. For plans in effect less than 5 years, submit the document establishing the plan and each subsequent amendment to the plan adopted and effective before the proposed termination date. (Attach a statement giving all actuarial equivalent factors, including early retirement reduction factors, if these factors are not included in the plan documents.)

15b Attach each trust agreement and/or each group annuity or group insurance contract that provides for management of plan assets, plan administration, or payment of benefits under the plan.

15c Attach a copy of the latest available financial statement of the plan and include a full listing of all assets.

15d Attach a copy of the most recent collective bargaining agreement (if any) that contains provisions relating to the plan.

15e Attach the most recent determination letter issued by the IRS that relates to the establishment of the plan, amendments to the plan, or partial termination of the plan. Attach all determination letters that relate to disqualification of the plan, and any later requalification.

15f Attach a copy of the most recent actuarial valuation of the plan.

15g Attach copies of the Form 5500, Schedule B and Schedule SSA filed for the 3 plan years ending before the proposed termination date.

V. SPECIFIC INSTRUCTIONS - FORM 600, SCHEDULE REP-D

Schedule REP-D may be used to designate a person or persons to represent you before the PBGC on some or all matters relating to the termination of your pension plan. Schedule REP-D must be filed simultaneously with Form 600 if Form 600 is submitted by a representative or representatives of the plan administrator. However, you may file Schedule REP-D at any time that you wish to designate a representative or representatives. Schedule REP-D also may be used to revoke a prior designation.

Part I. Identifying Information

The information entered in Part I should be the same as that entered in Part I of the Form 600 that you filed, or are filing, with the PBGC.

Part III. Retention/Revocation of Prior Designation(s)

If you wish a previous designation for the same termination to remain in effect, check "Yes" in items 7a and 7b and attach to this schedule a copy of the earlier designation(s) of representative that will remain in effect.

Part IV. Signature

You, as plan administrator, must sign the Schedule REP-D. (The PBGC will accept facsimiles of the form, but your signature must be an original.) Note: *If the plan administrator is a board (or similar group) composed of employer and employee representatives, at least one employer representative and one employee representative must sign this form. If the plan administrator is other than an individual or a board, this form must be signed by an officer of the plan administrator who has the authority to do so.*

VI. SPECIFIC INSTRUCTIONS - FORM 601

The plan administrator must file a Form 601 including a Schedule EA-D to request a distress termination. The Form 601 must be signed by the plan administrator and the Schedule EA-D must be signed by an enrolled actuary.

Part I. Identifying Information

4 Enter the PBGC Case Number. You will find this number on the letter that the PBGC sent to you acknowledging receipt of the Form 600 for this plan.

Part II. Specific Plan Information

5a The proposed termination date entered in item 5a may be later than the proposed termination date specified in the notice of intent to terminate, but may not be later (except with PBGC approval) than the 90th day after issuance of the notice of intent to terminate is begun, *i.e.*, the earliest date a notice of intent to terminate is issued to any affected party.

EXAMPLE - *The plan administrator begins issuing the notice of intent to terminate on September 29, 1992, and completes the issuance to all affected parties (and files Form 600 with the PBGC) on October 1, 1992, specifying a proposed termination date 63 days later, December 3, 1992. In item 5a, the plan administrator may specify a proposed termination date of any day from December 3, 1992, to and including December 28, 1992.*

6a Enter the earliest date the notice of intent to terminate was handed to, or deposited with a mail or courier service directed to, any affected party.

6b Enter the latest date the notice of intent to terminate was handed to, or deposited with a mail or courier service directed to, any affected party (other than the PBGC).

The "latest" date of issuance of any notice of intent to terminate is the date the last copy is issued to any affected party reasonably known or discovered during the 60-90 day period before the proposed termination date. It is your responsibility to use your best efforts to locate all affected parties by taking all necessary and appropriate steps under the circumstances. (The discovery of additional affected parties after the above 60-90 day period will not cause the notice to be untimely if you could not reasonably have been expected to know of the additional affected parties and if you promptly issue the notice of intent to terminate to each additional affected party.)

7a Section 4041(c)(2)(B) of ERISA and 29 CFR § 2616.3(d) provide that a plan may terminate in a distress termination only if each contributing sponsor and each member of the sponsor's controlled group meet at least one of the distress tests.

7b If you checked "Yes" in item 7a, attach a statement listing the name, address, and employer identification number of each contributing sponsor and each controlled group member and identify the distress test met by each. Also attach the information (listed below) required to prove that the contributing sponsor and each controlled group member satisfies the distress test(s) identified.

If you checked "No" in item 7a, the plan may not terminate in a distress termination and you should not complete the rest of this form. Unless the PBGC determines that the plan can qualify for a standard termination, the plan is an ongoing plan.

The distress tests are as follows:

FORM 601

"Liquidation test". A person has filed, or had filed against it, as of the proposed termination date, a petition seeking liquidation in a case under Title 11, United States Code, or under any similar law of a State or political subdivision of a State and such case has not, as of the proposed termination date, been dismissed; or a reorganization case (described below) is converted to a liquidation case as of the proposed termination date.

Section 4041(c)(2)(B)(i) of ERISA and 29 CFR § 2616.3(d)(1) refer explicitly only to liquidation under federal bankruptcy or state insolvency law and require that the liquidation case, as of the proposed termination date, not be dismissed. In determining whether a person meets the liquidation distress test, the PBGC will consider a case in which liquidation was completed prior to the proposed termination date, or was achieved through a foreclosure by secured creditors (as a result of which the person ceased operations and had all of its assets seized by such secured creditors) or through an assignment of all of the person's assets for the benefit of creditors. (In any such case, however, the PBGC will find the liquidation test is met only if it concludes that there is no indication that a principal purpose of the liquidation is to evade liability with respect to the plan or the PBGC or otherwise to abuse the termination insurance program.)

"Reorganization test". A person has filed, or had filed against it, as of the proposed termination date, a petition seeking reorganization in a case under Title 11, United States Code, or under any similar law of a State or political subdivision of a State; such case has not, as of the proposed termination date, been dismissed; such person timely submits a copy of any requests for the approval of the bankruptcy court (or other appropriate court in a case under such similar law of a State or political subdivision) of the plan termination to the PBGC at the time the request is made; and the bankruptcy court (or other appropriate court) determines that, unless the plan is terminated, such person will be unable to pay all of its debts pursuant to a plan of reorganization and will be unable to continue in business outside the chapter 11 reorganization process and approves the termination.

"Business continuation test". A person demonstrates to the satisfaction of the PBGC that, unless a distress termination occurs, such person will be unable to pay its debts when due and will be unable to continue in business.

"Pension costs test". A person demonstrates to the satisfaction of the PBGC that the costs of providing pension coverage have become unreasonably burdensome to such person, solely as a result of a decline of its workforce covered as participants under all single-employer pension plans for which it is a contributing sponsor.

The following proof of satisfaction of a distress test(s) must be attached:

Liquidation test: A copy of the filed petition showing the court docket number or a copy of any documents showing a foreclosure by a secured creditor or an assignment for the benefit of creditors. If this information was provided to the PBGC with Form 600, it need not be provided again.

Reorganization test: A copy of the filed petition showing the court docket number, a copy of the notification to the PBGC of the request for approval of the plan termination by the bankruptcy court or appropriate state court, and a copy of the order (if any) of the bankruptcy court or the appropriate state court approving the termination. If any of this information was provided to the PBGC with Form 600, it need not be provided again.

FORM 601

FORM 601

Business continuation test:

(1) Financial statements: Audited financial statements of the person for the 5 most recent fiscal years ending prior to the proposed termination date. If audited financial statements are not available, submit available statements and include a brief statement explaining why audited statements are not available. The financial statements must be augmented as follows:

(A) Identify pension costs recorded in each year for the pension plan that is the subject of this application. Pension costs should include an estimate of the annual and quarterly minimum funding requirements for the year in progress at the time of the application and for the next 3 years.

(B) If the person has undergone or is in the process of undergoing a partial liquidation, estimate the sales, gross profit, and operating profit that would have been reported for each of the 5 years covered by the financial statement for only the portion of the business that is currently expected to continue. State the significant assumptions made about the allocation of joint costs.

(C) State the estimated liquidation values for any assets related to discontinued operations or operations that are not expected to continue, along with the sources for the estimates.

(D) If financial statements are submitted that do not contain complete footnote disclosures, they must be augmented by a schedule identifying all outstanding indebtedness, including the name of the lender, the amount of the outstanding loan, scheduled repayments, interest rate, collateral, significant covenants, and whether the loan is in default.

(E) Identify and explain any material changes in financial position since the date of the last financial statement.

(2) Business plans and projections: Projections of future revenues, expenses, and cash flow for a minimum of 3 fiscal years in addition to the year in progress at the time of the distress application. Explicitly state all major strategic and economic assumptions made in development of the projections. Explain the reasons for any material changes from historical to projected results. If the company has or intends to obtain a line of credit with borrowing availability based on the amount of eligible collateral, include in the projections of cash flow a projection of the amount available under the line of credit and the amount of borrowing against that availability. The projections must include, or be augmented by, the projected cost of meeting minimum funding standards and, alternatively, the cost of plan termination based on payment of projected plan termination liabilities. The business plans and projections must be further augmented by submission of documents or information as follows:

(A) All business or operating plans prepared by or for management, including all explanatory text and schedules.

(B) All financial submissions, if any, made within the prior 3 years to a financial institution, government agency, or investment banker in support of possible outside financing or sale of the business.

(C) All recent financial analyses done by an outside party, with a certification by the company's chief executive officer that the information on which each analysis is based is accurate and complete.

(3) Certification by the chief executive officer that all of the information submitted is accurate and complete to the best of the individual's knowledge, and that the entity will not be able to continue in business unless the plan is terminated.

(4) Any other relevant information.

Pension costs test:

(1) The name and plan number (PN) of each single-employer defined benefit plan maintained by the contributing sponsor and each controlled group member.

(2) The latest Form 5500, Schedule B, filed for each plan named in (1).

(3) For each plan named in (1), a plan census showing total, active, and retired participants for the most recent 5 plan years ending prior to the proposed termination date (this data may be provided by submitting the relevant Form 5500, Schedule B).

(4) Audited financial statements for the person's most recent 5 fiscal years ending prior to the proposed termination date, updated to show any material changes, with a breakout of the contributing sponsor's total pension costs, including any defined contribution plans, as a percentage of the person's total wage costs and a statement of the total costs per plan. If audited financial statements are not available, submit unaudited statements and include a brief statement explaining why audited statements are not available.

(5) Reason(s) for the decline in workforce.

(6) Any other relevant information.

8a If the PBGC is advised, before issuance of a notice of inability to determine sufficiency or a distribution notice pursuant to 29 CFR § 2616.26(b) or (c), that a formal challenge to the termination has been initiated, the PBGC will suspend the termination proceeding and will so advise the plan administrator in writing. If the PBGC is advised of such a challenge to the termination after the issuance of either notice but before the termination procedure is concluded, the PBGC may suspend the termination proceeding and, if it does, will

so advise the plan administrator in writing. For this purpose, the following definitions apply:

(1)"Formal challenge to a termination" means the occurrence of any of the following actions asserting that the termination would violate the terms and conditions of an existing collective bargaining agreement: (A) the commencement of any procedure specified in the collective bargaining agreement for resolving disputes under the agreement; or (B) the commencement of any action before an arbitrator, administrative agency or board, or court under applicable labor-management relations law.

(2)"Existing collective bargaining agreement" mean a collective bargaining agreement that (A) by its terms, (i) has not expired or (ii) is extended beyond its stated expiration date because neither of the collective bargaining parties took the required action to terminate it, and (B) has not been made inoperative by judicial ruling. When a collective bargaining agreement no longer meets these conditions, it ceases to be an "existing collective bargaining agreement" whether or not any or all of its terms continue to apply by operation of law.

8b If you checked "Yes" to item 8a, attach a copy of the formal challenge and a statement showing what action was initiated, who initiated the action, the date it was initiated, and the current status of the challenge.

9 If the plan does not have sufficient assets to provide all guaranteed benefits, the benefits of participants and beneficiaries currently receiving benefits must be reduced pursuant to section 4041(c) of ERISA and 29 CFR § 2616.4(c), to the estimated benefit amounts determined in accordance with 29 CFR Part 2623, as of the proposed termination date. *Note: If you need assistance, you may call the PBGC's Actuarial Services Division at (202) 778-8838.*

FORM 601 **SCHEDULE EA-D**

12 Check "Yes" if (1) the Internal Revenue Service has waived the minimum funding requirements for this plan pursuant to section 303 of ERISA and section 412(d) of the Code for one or more plan years and (2) the amounts waived have not been fully paid to the plan as of the date this form is filed with the PBGC.

13 Check "Yes" if there are any requests for a waiver of the minimum funding requirements pending before the IRS.

14a Check "Yes" if there are amounts due and owing the plan pursuant to the minimum funding requirements of ERISA and the Code that (1) have not been paid to the plan and (2) for which no minimum funding waivers have been granted and no waiver requests are pending before the IRS.

Note: *Controlled group members are jointly and severally liable for amounts that are required to be contributed to the plan pursuant to section 302 of ERISA and section 412 of the Code. All amounts owed the plan, including unpaid contributions, are plan assets and it is generally the plan administrator's responsibility to attempt to collect such amounts.*

VII. SPECIFIC INSTRUCTIONS - FORM 601, SCHEDULE EA-D

Schedule EA-D must be used to certify the funding level of a plan terminating in a distress termination. An enrolled actuary must certify whether, as of the proposed termination date, a plan is (1) insufficient to provide all guaranteed benefits, (2) sufficient to provide all guaranteed benefits but not sufficient to provide all benefit liabilities, or (3) sufficient to provide all benefit liabilities.

The plan administrator must file the completed Schedule EA-D together with the Form 601. Schedule EA-D must be signed by an enrolled actuary.

If plan assets are sufficient (as of the proposed termination date) to provide at least all guaranteed benefits, the plan administrator must distribute plan assets in accordance with section 4041(c)(3)(B)(ii) of ERISA and 29 CFR § 2616.29. Distribution may be made only after the PBGC issues a distribution notice.

If you find, after a distribution notice is issued, that the plan is no longer sufficient for guaranteed benefits, you must promptly notify the PBGC in writing of that fact, and shall take no further action to implement the plan termination pending the PBGC's determination and notice of concurrence or non-concurrence with your finding pursuant to 29 CFR § 2616.28(b). If you find that the plan is sufficient for guaranteed benefits but no longer sufficient for benefit liabilities, you must promptly notify the PBGC in writing of this fact, but shall continue with the distribution in accordance with 29 CFR § 2616.29.

Note: *If the plan has sufficient assets to provide all benefit liabilities, the plan should be terminated in a standard termination, because the standard termination process is faster and less costly for the plan. If, after beginning a distress termination proceeding, you determine that the plan is sufficient for all benefit liabilities, you should promptly notify the PBGC. (In appropriate circumstances, PBGC may, upon request, permit a conversion of the distress termination to a standard termination.)*

Please follow the instructions below when completing this form. If you have questions about how a particular item applies to your situation, contact the PBGC Case Officer assigned to your case. If you have any questions on determining or valuing guaranteed benefits, or on determining the amount of due and unpaid employer contributions, contact:

Pension Benefit Guaranty Corporation
Actuarial Services Division (Code 41300)
2020 K Street, NW
Washington, DC 20006-1860
Telephone: (202) 778-8838

SCHEDULE EA-D

Part I. Sufficiency Level as of Proposed Termination Date

1 For the purpose of determining if a plan is sufficient for guaranteed benefits, you must include any nonguaranteed benefits that a participant is entitled to receive because of the allocation of assets priorities in section 4044 of ERISA and 29 CFR Part 2618. This means that you must include all nonguaranteed benefits to which assets are allocated. (To determine what benefits are guaranteed benefits, see 29 CFR Parts 2613 and 2621.)

2a Enter the estimated fair market value, as of the proposed termination date, of the plan assets available to pay plan benefits, excluding contributions that are owed to the plan but unpaid. Plan assets available to pay for benefits include all plan assets remaining after subtracting all liabilities (other than the future benefit liabilities that will be provided when assets are distributed), *e.g.*, benefit payments due before the termination date, expenses, fees, and other administrative costs.

2b Enter the total amount of contributions owed to the plan but unpaid as of the proposed termination date. The amount of unpaid contributions is the greater of (1) amounts required to be contributed to the plan pursuant to section 302 of ERISA and section 412 of the Code, or (2) amounts required to be contributed to the plan pursuant to commitments contained in plan or trust agreements or a collective bargaining agreement; less amounts actually contributed.

2c Enter the value (as of the proposed termination date) of the amount of unpaid contributions included in item 2b that is estimated to be collectible, valued in the same manner as other receivables. If that amount cannot be valued, enter "0".

SCHEDULE EA-D

2d Enter the sum of the amounts entered on lines 2a and 2c.

3 Enter the estimated present value of Title IV benefits. Title IV benefits are determined by allocating plan assets to plan benefits in accordance with section 4044 of ERISA and 29 CFR Part 2618. Value Title IV benefits as of the proposed termination date in accordance with Subpart C of 29 CFR Part 2619.

4 Enter the estimated present value of all benefit liabilities, valued as of the proposed termination date in accordance with 29 CFR Part 2619, Subpart C. With respect to a participant who, as of the proposed termination date, is not receiving benefits and has not made a valid benefit election, the value of the participant's benefit must include the value of all optional forms of benefits for which he or she is eligible under the terms of the plan.

Part II. Sufficiency Level as of Proposed Distribution Date

Complete this Part only if the plan is sufficient (as of the proposed termination date) for at least guaranteed benefits.

5 The proposed distribution date is the date chosen by the plan administrator as the tentative date for the distribution of plan assets pursuant to a distribution notice from the PBGC when plan assets are sufficient (as of the proposed termination date) for at least guaranteed benefits. The proposed distribution date must be no earlier than the 61st day after the Form 601 is filed with the PBGC. (Actual distribution must be made no earlier than the 61st day, and no later than the 180th day, following the day on which the plan administrator completes issuance of the notices of benefit distribution.)

SCHEDULE EA-D

6 In determining whether the plan's assets are projected to be sufficient (as of the proposed distribution date) to provide for all guaranteed benefits or all benefit liabilities, take receivables (*e.g.*, due and unpaid employer contributions) into account only to the extent they are projected to be collected on or before the proposed distribution date. All plan assets must be allocated to plan benefits in accordance with section 4044 of ERISA and 29 CFR Part 2618.

Value of Annuity Contracts

The value of benefit liabilities that will be provided through the purchase of annuity contracts is the cost quoted by an insurer to provide such benefit liabilities (see instructions to item 5a of Form 602).

Note: *Because insurers may require that bids be exercised within a fairly short period of time, it may not be possible prior to filing the Form 601 to obtain a bid that would remain open until the proposed distribution date. Accordingly, the plan administrator is not required to actually obtain a bid before completing item 6.*

Value of Other Benefits

To value benefits that will be provided other than through the purchase of annuity contracts, the enrolled actuary must use the rate of interest in sections 411(a)(11) and 417(e)(3) of the Code. The interest rate(s) shall be determined as of the date set forth in the plan if the plan provision is in accord with the IRS rules concerning the date as of which the interest rate is determined; otherwise, the interest rate(s) shall be determined as of the date of distribution. (See 26 CFR § 1.417(e)-1(d)(3).) Note: *If a plan contains a provision that complies with Treasury Reg. § 1.417(e)-1(d)(3), the interest rate is determined by substituting "date of distribution" for "annuity starting date" wherever used in the plan.*

SCHEDULE EA-D

Generally, the rate described in sections 411(a)(11) and 417(e)(3) of the Code and the regulations thereunder is whichever of the following two rates or rate structures provides the greater benefit: (1) the rate specified in the plan; or (2) the "applicable interest rate" (or, if the present value of vested accrued benefits exceeds $25,000 using the applicable interest rate, a rate no greater than 120 percent of the applicable interest rate). Note: *When using the alternative 120 percent of the applicable interest rate, the resulting present value of the vested accrued benefit may not be less than $25,000.*

The "applicable interest rate" is the interest rate that would be used by the PBGC for purposes of determining the present value of a lump sum distribution on plan termination. Note: *The appropriate deferral factors must be used for valuing deferred annuities.*

The applicable interest rates and factors are published at 29 CFR Part 2619, Appendix B, and updated in accordance with that regulation. Any change in the rates normally will be published in the Federal Register by the 15th of the month preceding the effective date of the new rates or as close to that date as circumstances permit.

The PBGC also makes interest rate information available through a telephone hotline. The hotline number is (202) 778-8899.

VIII. PARTICIPANT AND BENEFIT INFORMATION REQUIREMENTS

Unless the enrolled actuary certifies that the plan is sufficient for at least all guaranteed benefits, the plan administrator is required to provide participant and benefit information to the PBGC by the later of (1) 120 days after the proposed termination date or (2) 30 days after receipt of the PBGC's determination that the requirements for a distress termination have been satisfied. (If the enrolled actuary certifies that

SCHEDULE EA-D

the plan is sufficient for at least guaranteed benefits, the participant and beneficiary information must be provided, in accordance with the PBGC's instructions, at such time as the PBGC requests it in writing.) Failure to provide complete participant and benefit information may result in the PBGC's nullifying the distress termination for your plan.

You are required to provide all information necessary to calculate and value monthly benefits and plan benefits for each plan participant/beneficiary. All information, benefit determinations, and benefit valuations must be as of the proposed termination date. The information that is required to be submitted to the PBGC is not required to be in any specific format; however the PBGC requests that this data be provided electronically. We will provide you with the format in which we would like your data if and when we determine that you satisfy the distress criteria. If you have any questions concerning this electronic data transfer to the PBGC, contact the Actuarial Services Division at the address and telephone number set forth in Section VII of these instructions.

The following information, at a minimum, must be provided for each participant/beneficiary.

1. **Participant categories.** Information must be provided by categories as follows: (a) retired participants including any beneficiary receiving benefits from the plan; (b) inactive participants entitled to future benefits; (c) active participants with vested benefits; and (d) active participants without vested benefits.

2. **Name of participant.** Denote each substantial owner, as defined in section 4022(b)(5)(A) of ERISA, by entering an asterisk (*) in front of the person's name, and enter in parentheses the highest percentage of ownership during the five years preceding the proposed termination date for each substantial owner.

3. **Address.**

4. **Social security number.**

5. **Marital status and, if available, the following information on spouse:** name, social security number, and date of birth.

SCHEDULE EA-D

6. **Sex.**

7. **Date of birth.**

8. **Beneficiaries.** If the participant is entitled to a benefit form that provides an annuity or lump-sum death benefit to a surviving beneficiary, *e.g.*, a qualified joint and survivor benefit, provide the name of the beneficiary for that participant and the beneficiary's address, social security number, sex, and date of birth.

9. **Retiree benefit information.** For each retiree, provide the benefit commencement date, form of benefit, and the type of benefit (normal, early, late, or disability).

10. **Date employment began or, if different, date plan participation began.**

11. **Date employment terminated, if earlier than proposed termination date.**

12. **Credited service.** Provide the amount of all credited service as defined in the plan document. Show any break(s) in service between date of hire and date of termination of employment or proposed termination date.

13. **Compensation.** If compensation is a factor in the benefit formula, provide the applicable compensation figure(s) as defined in the plan document. If the benefit formula provides that the past service benefit and the future service benefit are determined using different compensation figures, enter the compensation for the past service benefit in one column and the compensation for the future service benefit in another.

14. **Monthly plan benefit.** This is the monthly plan benefit in the normal annuity form under the plan based on credited service as of the proposed termination date. If the monthly plan benefit is greater than the accrued benefit, show how the benefit was calculated. Provide any other information that is necessary to show the determination of each participant's plan benefit.

The following are examples of the type of data to be provided.

SCHEDULE EA-D

SCHEDULED EA-D

a. If the plan is contributory, provide the total amount of each employee's contributions with and without interest credited by the plan and the portion of the normal retirement benefit attributable to employee contributions. If the plan credits interest at a rate (or rates) other than those specified in section 411(c)(2)(C)(iii) of the Code, provide the amount of employee contributions plus interest computed in accordance with that Code provision.

b. If the accrued monthly benefit is integrated using an offset or excess method, provide the offset or the excess benefit and the data used in determining these amounts.

c. If, before retirement, the accrued monthly benefit is determined from the cash value of insurance or annuity contracts, provide the cash value.

15. **Adjusted monthly plan benefit.** If, as of the proposed termination date, an individual is receiving or has elected to receive benefits in an optional form or at an early retirement age permitted by the plan, show the amount payable under that election.

16. **Plan adjustment factors.** Provide any factors used by the plan to adjust benefits for payment in an optional form or as an early or late retirement benefit.

17. **Value of adjusted monthly plan benefit.** Provide the estimated value of the plan benefit as of the proposed termination date, calculated in accordance with 29 CFR Part 2619, Subpart C. With respect to a participant who, as of the proposed termination date, is not receiving benefits and has not made a benefit election, the value of the participant's benefit must include the value of all optional forms of benefits for which he or she is eligible under the terms of the plan.

18. **Vesting percentage.** The vesting percentage is to be calculated without regard to any increase in vesting due to the termination. For contributory plans, enter the percentage applicable to the portion of the accrued benefit provided by employer contributions.

19. **Monthly vested adjusted plan benefit.** The portion of the adjusted monthly plan benefit provided by employer contributions is multiplied by the vesting percentage and this amount is added to the benefit, if any, provided by employee contributions.

20. **Monthly guaranteed benefit.** This is the monthly vested adjusted benefit (number 19) reduced, if necessary, in accordance with PBGC regulations and limitations for single-employer plans. Provide the calculations, *i.e.*, phase-in, substantial owner limitation, or maximum guaranteeable benefit. These benefits should be calculated without regard to any asset allocation.

21. **Value of monthly guaranteed benefit.** Estimated value of monthly guaranteed benefit as of the proposed termination date, calculated in accordance with 29 CFR Part 2619, Subpart C.

22. **Title IV benefits.** If plan assets, when allocated in accordance with section 4044 of ERISA and 29 CFR Part 2618, can provide benefits to any participant in excess of the monthly guaranteed benefit, then the benefits that can be provided should be computed.

All computations used in the completed allocation process should be furnished along with an explanation as to how the participant's Title IV benefits were determined including any adjustments made to the amount of the benefit for the annuity form and the age at which it is assumed to be payable, *i.e.*, expected retirement age. Include any special schedules that were required to be prepared for the plan under section 414(l) of the Code.

23. **Value of Title IV benefits.** Estimated value of Title IV benefits (number 22) as of the proposed termination date calculated in accordance with 29 CFR Part 2619, Subpart C.

Note: *If additional participant and beneficiary information is needed by the PBGC to pay benefits pursuant to section 4061 or 4042(c) of ERISA, the PBGC may require that additional information be submitted at such time as the PBGC requests in writing.*

IX. SPECIFIC INSTRUCTIONS - FORM 602

Form 602 is the form that must be used by the plan administrator to certify that the distribution of assets was completed in accordance with section 4041(c) of ERISA. Form 602 must be filed with the PBGC within 30 days after the completion of the distribution of assets.

Note: *Pursuant to section 4071 of ERISA, the PBGC may impose a civil penalty of up to $1,000 per day for each day for which the Form 602 is overdue. This penalty may be imposed beginning on the 31st day after the distribution is completed.*

You must make the distribution of plan assets, after receiving a distribution notice from the PBGC, no earlier than the 61st day, and no later than the 180th day, following the day on which you complete the issuance of the notices of benefit distribution pursuant to 29 CFR § 2616.27(c). This 180-day period may be extended according to the rules set forth below.

Note: *Plan assets may not be distributed if either the plan administrator or the PBGC has made a finding that the plan is insufficient for guaranteed benefits.*

Automatic extension

The distribution deadline will automatically be extended until the 60th day after the plan's receipt of a favorable IRS determination letter, if --

(1) on or before the date that the plan administrator completes issuance of the notices of benefit distribution, the plan administrator submitted to the IRS a complete request for a determination letter with respect to the plan's tax-qualification status upon termination;

(2) the plan administrator does not receive the IRS's determination letter at least 60 days before the expiration of the 180-day period for distribution; and

(3) on or before the last day of the 180-day period, the plan administrator notifies the PBGC in writing that an extension of the distribution deadline is required and certifies that the conditions in (1) and (2) have been met.

Discretionary extension

If the plan administrator will be unable to complete the distribution of plan assets within the 180-day (or extended) period, the plan administrator may file a written request with the PBGC for an extension of the distribution deadline.

The PBGC will grant a discretionary extension only if the PBGC is satisfied that the delay in making the distribution is not due to the action or inaction of the plan administrator or the contributing sponsor and distribution can in fact be completed by the date requested.

The request must be filed no later than 30 days before the expiration of the 180-day (or extended) period, must explain the reason for the request, and must provide a date certain by which the distribution will be made if the extension is granted. All requests for extensions must be in writing addressed to:

Case Officer, Case Processing Division
Pension Benefit Guaranty Corporation
Room 5500 (Code 41400)
2020 K Street, NW
Washington, DC 20006-1860

Part I. Distribution Information

3 Enter the PBGC Case Number. You will find this number on the letter that the PBGC sent to you acknowledging receipt of the Form 600 for this plan.

4 Enter the date on which the distribution of assets was completed.

A distribution of assets by the purchase of annuity contracts occurs when the obligation for providing benefit liabilities passes irrevocably from the plan administrator to the insurer.

A distribution of assets in a manner other than by the purchase of an annuity contract occurs on the date on which the benefits are delivered to the participant or beneficiary (or to another plan or benefit arrangement or other recipient authorized by the participant

or beneficiary in accordance with applicable law and regulations) personally or by deposit with a mail or courier service (as evidenced by a postmark or written receipt).

6a The contract that is purchased must be a single premium, non-participating (except as discussed below), non-surrenderable annuity contract that constitutes an irrevocable commitment by the insurer to provide the benefits purchased. A participating annuity contract may be purchased to provide the annuity benefits only if the plan is sufficient for all benefit liabilities and: (1) all benefit liabilities will be guaranteed under the annuity contract as the unconditional, irrevocable, and non-cancellable obligation of the insurer; (2) in no event, including unfavorable investment or actuarial experience, can the amounts payable to participants under the annuity contract decrease except to correct mistakes; and (3) no amount of residual assets to which participants are entitled will be used to pay for the participation feature. Specifically, if all or a portion of the residual assets will be distributed to participants, the additional premium for the participation feature must be paid from the contributing sponsor's share, if any, of the residual assets or from assets of the contributing sponsor. If the plan provided for mandatory employee contributions, the amount of residual assets must be determined using the price of the annuities for all benefit liabilities without the participation feature. If these requirements are not satisfied, a nonparticipating annuity contract must be purchased to close out the plan.

7 If you have been unable to locate certain participants after having made a reasonable effort to do so, you must purchase irrevocable commitments to provide benefits for each participant who has not been located. In the alternative, if the benefit of any unlocatable participant is valued at $3,500 or less and would otherwise be distributed in a lump sum, you may deposit the monies that would otherwise be distributed into an interest-bearing bank account opened in the participant's name at a federally insured institution. In the limited case where you have made every reasonable effort to locate missing participants and to locate institutions that are willing to open individual interest-bearing accounts, but are still unable to complete the distribution in this manner, then the use of a pooled interest-bearing account may be appropriate.

If such an account (individual or pooled) is opened, it must be maintained by a fiduciary whom you have designated and who continues to have ongoing fiduciary obligations to those missing plan participants. The fiduciary must keep clear, up-to-date records of each participant's opening balance and earnings throughout the life of the account and must be available to make every reasonable effort to assist those participants who do come forward to claim their benefits.

8a As soon as practicable after a distribution by the purchase of an irrevocable commitment, you or the insurer must provide each participant and beneficiary with a copy of the annuity contract or a certificate showing the insurer's name and address and clearly reflecting the insurer's obligation to provide the participant's or beneficiary's benefit.

If such a contract or certificate is not available before the deadline for filing Form 602, you must, no later than that deadline, provide each participant and beneficiary with a written notice stating:

(1) that the obligation for providing the benefit has transferred to the insurer;

(2) the name and address of the insurer;

(3) the name, address, and telephone number of the person designated by the insurer to answer questions concerning the annuity; and

(4) that the participant or beneficiary will receive from the plan administrator or the insurer a copy of the annuity contract or a certificate showing the insurer's name and address and clearly reflecting the insurer's obligation to provide the participant's or beneficiary's benefit.

9 Enter the name and address of the insurer(s), if any, that made an irrevocable commitment to provide benefits under the plan. The name must be the full official name of record.

FORM 602

10 Enter the name, address, and telephone number of the person keeping the plan records. The contributing sponsor or plan administrator must keep records supporting the calculation and valuation of benefits and assets for at least six years after the date the post-distribution certification is filed.

11 In reporting values, use the actual cost to the plan of the distribution (the amount of any lump sum distribution; the price paid for a nonparticipating annuity contract).

City or town State Zip Code Area code

b Name, address, and telephone number of person to be contacted if more information is needed. (If same as 3a, enter "same".)

Name

Address (number and street)

City or town State Zip Code Telephone number ( ) Area code

PART II. GENERAL PLAN INFORMATION

4 Proposed termination date

Month Day Year

5 Estimated number of plan participants as of the proposed termination date:

a Active Participants:
(i) Fully vested _____
(ii) Partially vested _____
(iii) Nonvested _____
(iv) Total active participants (add a(i) through (iii)) _____

b Retirees or beneficiaries receiving benefits _____

c Separated vested participants entitled to receive benefits _____

d Total (add a(iv) through c) _____

6 Changes in contributing sponsor associated with plan termination:

a ☐ No change
b ☐ Reorganization as part of bankruptcy or similar proceeding
c ☐ Merger of existing subsidiaries or divisions, not involving bankruptcy
d ☐ Sale or closing of subsidiaries or divisions, not involving bankruptcy
e ☐ Acquisition by another business
f ☐ Acquisition of another business
g ☐ Liquidation

7 Intention concerning expected pension coverage for currently employed participants covered under the terminated plan:

a ☐ No new plan
b ☐ New or existing defined benefit plan
c ☐ New or existing profit-sharing plan
d ☐ New or existing 401(k) plan
e ☐ Other new or existing plan, specify _____

8a Is there more than one contributing sponsor?

Yes ☐ No ☐

b If "Yes", is this a multiple employer plan?

Yes ☐ No ☐

9a Is the contributing sponsor(s) a member of a controlled group?

Yes ☐ No ☐

b If you checked "Yes" in 8a or 9a, attach a statement identifying each contributing sponsor and each member of the contributing sponsor's controlled group as of the proposed termination date and the distress test each entity expects to meet.

10a Has there been a change in the composition of a contributing sponsor's controlled group within the 5-year period prior to the proposed termination date?

Yes ☐ No ☐

b If "Yes", attach a statement that describes the transaction(s).

11a Has the contributing sponsor(s) filed, or had filed against it, a petition seeking reorganization in bankruptcy under Chapter 11, liquidation in bankruptcy under Chapter 7, or reorganization or liquidation in a similar proceeding under the laws of a state or a political subdivision of a state?

Yes ☐ No ☐

b If you checked "Yes" in 11a, are the proceedings still ongoing?

Yes ☐ No ☐

c If "Yes", attach a copy of the petition showing the court docket number. If "No", attach a copy of the order dismissing or otherwise resolving the proceedings.

For reorganization under Chapter 11 or similar state proceeding, complete item 11d.

d Has the bankruptcy court been requested to approve the termination of the plan?

Yes ☐ No ☐

e If "Yes":

(i) Enter the date of request to the court

Month	Day	Year

(ii) Enter the date documents were submitted to the PBGC

Month	Day	Year

12a Are all eligible participants/beneficiaries, who are entitled to and have applied for benefits, receiving such monthly benefits from the plan?

Yes ☐ No ☐

b If "No", attach a statement as to the reason for non-payment, including the number of participants/beneficiaries and total monthly benefits not being paid.

13a Are the plan assets expected to be sufficient to continue to pay all benefits when due during the next 180 days?

Yes ☐ No ☐

b If "No", attach an explanation.

14a Are any participants/beneficiaries receiving benefits in excess of estimated Title IV benefits?

Yes ☐ No ☐

b If "Yes", are they scheduled to be reduced to the estimated Title IV level as of the proposed termination date?

Yes ☐ No ☐

15 Attach copies of the following documents:

a All plan documents, including all amendments within last five years;
b Trust documents and/or insurance contracts;
c Most recent financial statement of plan assets;
d Collective bargaining agreements relating to the plan;
e IRS determination letter(s);
f Most recent plan actuarial report; and
g Form 5500, Schedules B and SSA (last three years).

16 The plan records are currently available at:

PART I. SUFFICIENCY LEVEL AS OF PROPOSED TERMINATION DATE

1 As of the proposed termination date, is the value of plan assets available to pay for plan benefits, when allocated in accordance with section 4044 of ERISA--

a Less than the value of all benefits guaranteed by the PBGC under section 4022(a) and (b) of ERISA?

Yes ☐ No ☐

b Equal to or greater than the value of guaranteed benefits, but less than the value of benefit liabilities?

Yes ☐ No ☐

c Equal to or greater than the value of benefit liabilities?

Yes ☐ No ☐

If you checked "Yes" in 1a, complete the rest of Part I and complete Part III. Do not complete Part II. If you checked "No" in 1a, complete the rest of Part I, Part II, and Part III.

2 Estimated value of plan assets available to pay for plan benefits, determined as of the proposed termination date:

a Estimated value of plan assets (excluding value of contributions owed to the plan) $_____

b Estimated total contributions owed to the plan $_____

c Estimated collectible value of 2b $_____

d Estimated value of total plan assets (sum of a and c) $_____

3 Estimated value of Title IV benefits as of the proposed termination date $_____

4 Estimated value of all benefit liabilities as of the proposed termination date $_____

PART II. SUFFICIENCY LEVEL AS OF PROPOSED DISTRIBUTION DATE

5 Proposed distribution date

☐☐☐
Month Day Year

6 As of the proposed distribution date, do you project that the plan will have sufficient assets available to pay for plan benefits, when allocated in accordance with section 4044 of ERISA, to provide--

a All benefits guaranteed by the PBGC under section 4022(a) and (b) of ERISA, but not benefit liabilities?

Yes ☐ No ☐

b All benefit liabilities?

Yes ☐ No ☐

PART III. ENROLLED ACTUARY CERTIFICATION

I, the Enrolled Actuary, certify that:

- I have reviewed all relevant plan documents, plan and participant data, and the method used to value the plan assets;
- I have applied all relevant provisions of ERISA, the Code, and the regulations promulgated thereunder;
- to the best of my knowledge and belief, the information contained in this schedule is true, correct, and complete; and
- to the best of my knowledge and belief, the plan's assets and benefits have been valued in accordance with Title IV and PBGC regulations; and the value of the plan's assets, when allocated in accordance with the PBGC's regulation on allocation of assets (29 CFR Part 2618), is sufficient (as of the proposed termination date) to provide plan benefits as indicated:

(Check one) ☐ Insufficient for guaranteed benefits ☐ Sufficient for guaranteed benefits but not for benefit liabilities ☐ Sufficient for benefit liabilities

In making this certification, I recognize that knowingly and willfully making false, fictitious, or fraudulent statements to the PBGC is punishable under 18 U.S.C. 1001.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-31571; File No. SR-CBOE-92-19]

Self-Regulatory Organizations; Filing of Proposed Rule Change by the Chicago Board Options Exchange, Inc., Relating to OEX RAES Eligibility Standards

December 7, 1992.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on September 16, 1992, the Chicago Board Options Exchange, Inc. ("CBOE" or "Exchange") filed with the Securities and Exchange Commission ("SEC" or "Commission") the proposed rule change as described in Items I, II and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The CBOE proposes to amend the eligibility standards under which individuals, member organizations and joint accounts may participate in the CBOE's Retail Automatic Execution System ("RAES" or "System") for Standard & Poor's ("S&P") 100 Index ("OEX") options, and to include the revised eligibility standards in the Exchange's rules as CBOE Rule 24.17, "RAES Eligibility in OEX."[1] The text of the proposal is available at the Office of the Secretary, CBOE and at the Commission.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

[1] The current RAES eligibility standards were approved by the Commission in Securities Exchange Act Release No. 27378 (October 24, 1989), 54 FR 27378 (order approving File No. SR-CBOE-87-22).

(A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

(1) Purpose

The CBOE proposes to amend the eligibility standards under which individuals, member organizations and joint accounts may participate in RAES for OEX options, and to include the revised eligibility standards in the Exchange's rules as CBOE Rule 24.17, "RAES Eligibility in OEX." The CBOE states that the proposed amendments reflect changes in the marketplace, as well as the Exchange's experience to date with the existing eligibility standards. The Exchange explains that the purpose of the proposed rule change is to promote (1) greater depth and liquidity in OEX options markets, and (2) more equitable participation in RAES by active Market-Makers in the OEX crowd.

Specifically, with regard to an individual Market-Maker's eligibility to participate in RAES, the proposal provides that: (1) The Exchange will consider a Market-Maker's OEX trades for the preceding month, rather than reviewing his OEX and S&P 500 Index ("SPX") trades for the preceding quarter; (2) a Market-Maker must execute at least 75% of his Market-Maker contracts for the preceding month in OEX; and (3) a Market-Maker must execute at least 75% of his trades for the preceding month in person.[2] In addition, the proposal requires individuals logged onto RAES to log off the System when they leave the trading crowd; failure to log off RAES after leaving the trading crowd will result in a fine of $500.00, imposed by the OEX Floor Procedures Committee ("OFPC").

For joint accounts, the proposal allows the manager of a joint account to log onto RAES all eligible account members present in the OEX trading crowd. In addition, the proposal provides that (1) members of a joint account who are not present in the OEX trading crowd may not be logged onto RAES; (2) a joint account member must log off RAES whenever he leaves the OEX trading crowd; and (3) once a member of a joint account has been logged onto OEX RAES at any time during an expiration cycle, each member of that account must be logged onto the System at any time that he enters the OEX trading crowd from the date of the initial log-on through the business day immediately preceding expiration. The proposed rule change mandates a fine of $500.00 per joint account member, imposed by the OFPC, for violations of the preceding requirements. In addition, a joint account member who fails to log onto the System on the last business day immediately preceding expiration will be disqualified from signing onto OEX RAES for a period of time to be determined by the OFPC.

The CBOE proposes similar rules for members with multiple nominees. Specifically, the proposal allows the manager of a multiple nominee account to log onto RAES all eligible nominees present in the OEX trading crowd. In addition, the proposal provides that: (1) Nominees not present in the OEX trading crowd may not be logged onto RAES; (2) a participating nominee must log off the System when he leaves the OEX trading crowd; and (3) once a participating nominee has been logged onto OEX RAES at any time during an expiration cycle, each participating nominee of the member organization must be logged onto the System at any time that he enters the OEX trading crowd from the date of the initial log-on through the business day immediately preceding expiration. The proposal mandates a fine, imposed by the OFPC, of $500.00 per member for violations of the preceding requirements. In addition, a participating nominee who fails to log into the System on the last business day immediately preceding expiration will be disqualified from signing onto OEX RAES for a period of time to be determined by the OFPC.

Finally, the proposed rule change would authorize the chairperson of the OFPC, or his or her designee, in consultation with a senior Exchange executive officer, to require Market-Makers who are member of the OEX trading crowd to log onto RAES if there appears to be inadequate RAES participation.

By increasing the in-person and OEX volume quotas, decreasing the length of the review period, and restricting RAES participation to members that are present in the trading crowd, the Exchange seeks to achieve several objectives. First, the CBOE believes that the proposed criteria promote greater in-percent participation in the OEX trading crowd and, concomitantly, greater liquidity and depth in OEX options markets. The Exchange anticipates that participating Market-Makers generally will trade out of their RAES positions, thereby creating greater liquidity and tighter bid-ask spreads, even in less active series. The CBOE believes that

[2] Currently, to participate in RAES, a Market-Maker must execute 50% of his Market-Maker contracts for the preceding month in OEX or SPX and must execute 25% of his Market-Maker trades for the preceding month in person in OEX or SPX.

the mandatory presence of RAES participants in the trading crowd will also promote greater accountability and is consistent with the current standard for participation in RAES and SPX and in equity options.

In addition, the proposed eligibility criteria are designed to promote more equitable participation in RAES by those OEX Market-Makers that regularly assume the responsibility for making markets in OEX. Under the existing standards, Market-Makers that are neither present in the trading crowd nor active Market-Makers in OEX options may, nevertheless, participate in OEX RAES. This expansive pool of eligible Market-Makers deprives active in-crowd Market-Makers of the opportunity to participate proportionately in the customer order flow routed thought RAES. Under the revised standards, Market-Makers that do not assume a significant responsibility for making markets in the OEX crowd will be precluded from taking the other side of RAES-executed customer orders.

The Exchange does not believe that the potential reduction in the number of Market-Makers eligible to participate in RAES will adversely affect the efficient functioning of the RAES system. Of the more than 280 Market-Makers currently logged onto RAES on an average day, approximately 210 would remain eligible under the proposed rule change. The CBOE states that in the past this has proven to be more than adequate to ensure the continued smooth operation of OEX RAES. In addition, the CBOE believes that the mandatory log-on provisions should ensure that there is adequate participation throughout the expiration cycle and, in particular, on expiration Fridays.

Moreover, the CBOE believes that the proposal enhances those safeguards currently in place to ensure sufficient Market-Maker participation on OEX RAES during periods of market volatility. Specifically, as noted above, if there appears to be inadequate RAES participation in OEX, the proposed rule change would enable the chairman of the OFPC or his designee, in consultation with a senior executive Exchange officer, to require members of the OEX trading crowd to participate in RAES, regardless of eligibility, and to request participation by members outside of the OEX trading crowd. Currently, the entire OFPC must make this determination. In addition, the separate sanctions previously imposed, respectively, against individual Market-Makers and group participants for failure to comply with the OEX RAES rules and standards have been made co-extensive. Accordingly, any participant that fails to satisfy his long-on requirement on the last business day preceding expiration will be disqualified from signing onto the system for a period of time to be determined by the OFPC. Likewise, any participant that fails to abide by the long-on and long-off requirements set forth in the proposal will be subject to a free in the amount of $500.00.

The CBOE explains that the amendments also reflect several administrative changes that have been implemented since the institution of the existing eligibility standards. First, only the manager of a group account, rather than each member of the account, is required to complete the RAES instructional program for purposes of satisfying the eligibility criteria. Likewise, the group manager has been authorized to log onto RAES all account members present in the OEX trading crowd. In addition, the revisions reflect the fact that the OFPC has assumed the enforcement responsibilities previously held by the Index Floor Procedure Committee. The format of the rule has also been amended to make it more consistent with other rules of the Exchange.

The Exchange will provide those Market-Makers currently eligible to participate on RAES with a 60-day grace period following the effective date of the rule change to satisfy the new eligibility criteria if they desire to continue their participation in OEX RAES. The Exchange believes that this will alleviate any unnecessary burden on participating Market-Makers and public customers.

(2) Basis

The CBOE believes that the proposed rule change is consistent with section 6(b) of the Act, in general, and furthers the objectives of section 6(b)(5), in particular, in that it is designed to increase market depth and liquidity and to provide an efficient and fair system for the accommodation of customer transactions on the Exchange.

(B) Self-Regulatory Organization's Statement on Burden on Competition

The CBOE does not believe that the proposed rule change will impose any burden on competition.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reason for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(a) By order approve such proposed rule change, or

(b) Institute proceedings to determine whether the proposed rule change . . should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by January 5, 1993.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Margaret H. McFarland,

Deputy Secretary.

Self-Regulatory Organizations; Notice of Filing and Immediate Effectiveness of Proposed Rule Change by the Chicago Board Options Exchange, Inc., Relating to the Expiration Cycle for Options on the Financial Times-Stock Exchange 100 Index

December 7, 1992.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on October 2, 1992, the Chicago Board Options Exchange, Inc. ("CBOE" or "Exchange") filed with the Securities and Exchange Commission ("SEC" or "Commission") the proposed rule change as described in Items I, II and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Currently, the CBOE lists options on a reduced value Financial Times-Stock Exchange 100 Index ("FT–SE 100" or "Index") on a March quarterly cycle of expiration months.[1] Exchange Rule 24.9(b) authorizes the CBOE to list up to six expiration months for index options; the options may expire at three-month intervals or in consecutive months. Pursuant to Exchange Rule 24.9(b) and the FT–SE Approval Order, the CBOE proposes to amend the pattern of expiration months for the Index options by increasing the number of expiration months from four to six. Specifically, the Exchange proposes to add two near-term months to the March quarterly cycle.

The text of the proposed rule change is available at the Office of the Secretary, CBOE and at the Commission.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The test of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

(A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

Pursuant to Exchange Rule 24.9(b) and the FT–SE Approval Order,[2] the CBOE proposes to amend the pattern of expiration months for the Index options by increasing the number of expiration months from four to six. Specifically, the Exchange proposes to add two near-term months to the March quarterly cycle. Accordingly, the proposal will enable the Exchange to list series of reduced-value Index options with up to six different expiration months at any one time (*i.e.*, the three consecutive near-term months and the three farther out months in the March quarterly cycle. Under this pattern, for example, in January the Exchange may list series of reduced value Index options that expire in each of the three consecutive near-term months, namely January, February, and March, and in the three far out months of the March quarterly expiration cycle, namely, June, September, and December.

At no time will there be more than six expiration months in this class of options, exclusive of long-term options listed pursuant to Exchange Rule 24.9(d). Likewise, at no time will the Exchange list a series of reduced value Index options that expires more than twelve months from the date the series is listed, again with the exception of long-term options listed pursuant to Exchange Rule 24.9(d).

The purpose of the proposal is to provide the CBOE with the flexibility to list series of reduced value Index options expiring in each of the three near-term months in addition to the three further out months in the March quarterly expiration cycle. This will enable the Exchange to list reduced value Index options having the same pattern of expiration months that apply to Index options and options on futures on the Index traded on the London International Financial Futures and Options Exchange and the Chicago Mercantile Exchange, respectively. In addition, the amended pattern of expiration months is consistent with the pattern currently applicable for Exchange-listed options on the Standard & Poor's 500 Index.

The CBOE notes that the proposed change in the pattern of expiration months was expressly contemplated in the original FT–SE Approval Order.[3] In addition, the CBOE notes that the proposal is consistent with Exchange Rule 24.9(b), which contemplates as many as six expiration months, in three-month intervals or consecutive months.

The CBOE believes that the proposal is consistent with section 6(b) of the Act, in general, and furthers the objectives of section 6(b)(5), in particular, in that it is designed to protect investors and the public interest.

(B) Self-Regulatory Organization's Statement on Burden on Competition

The CBOE does not believe that the proposed rule change will impose any burden on competition.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change constitutes a stated policy, practice or interpretation with respect to the administration of an existing CBOE rule. The Commission notes that the CBOE's rules provide the Exchange with some discretion to add additional expiration months, and that the proposal is consistent with the procedures for changing the pattern of expiration months previously approved by the Commission.[4] Accordingly, the proposal has become effective pursuant to section 19(b)(3)(A) of the Act and subparagraph (e) of Rule 19b–4 thereunder. At any time within 60 days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the proposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent

BILLING CODE 8010-01-M

[Release No. 34-31566; International Series Release No. 504; File No. SR-OCC-92-29]

Self-Regulatory Organizations; The Options Clearing Corporation; Notice of Filing of Proposed Rule Change Relating to Delivery-Versus-Payment Settlement Procedures

December 4, 1992.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),[1] notice is hereby given that on September 17, 1992, The Options Clearing Corporation ("OCC") filed with the Securities and Exchange Commission ("Commission") the proposed rule change (File No. SR-OCC-92-29) as described in Items I, II, and III below, which Items have been prepared primarily by OCC, a self-regulatory organization ("SRO"). The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. SRO's Statement of the Terms of Substance of the Proposed Rule Change

OCC proposes to amend chapter XVI, Rule 1606A, of its Rules to modify the delivery-versus-payment ("DVP") settlement procedures: (1) To provide that a Clearing Member is not discharged from its obligation to pay U.S. dollars or to deliver foreign currency in settlement of an exercise of foreign currency options until the earlier of (i) the time when its agent bank makes final settlement or (ii) the time when OCC's correspondent bank irrevocably credits OCC's account with the U.S. dollars or foreign currency deliverable by the Clearing Member's agent bank; (2) to emphasize that OCC is obligated in the DVP settlement processes to cause its correspondent bank to make settlement only against receipt of the agent bank's counter-settlement; and (3) to clarify that OCC's obligation to make payment or delivery is to the party designated by the Clearing Member's agent bank in the DVP Authorization, which may or may not be the agent bank.

II. SRO's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the SRO included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The SRO has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. SRO's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

The proposed rule change to chapter XVI, Rule 1606A of OCC's Rules has three purposes. First, the proposal will clarify that a Clearing Member that elects to settle via DVP procedures permitted by Rule 1606A is not discharged from its obligation to pay U.S. dollars or to deliver foreign currency in settlement of an exercise of foreign currency options until the earlier of (i) the time when its agent bank makes final settlement or (ii) the time when OCC's correspondent bank irrevocably credits OCC's account with the U.S. dollars or foreign currency deliverable by the Clearing Member's agent bank. Secondly, the proposal will emphasize the conditional nature of OCC's obligation in the DVP settlement process. OCC is obligated to cause its correspondent bank to make settlement only against receipt of the agent bank's counter-settlement. Finally, the proposal will clarify that OCC's obligation to make payment or delivery is to the party designated by the Clearing Member's agent bank in the DVP authorization, which may or may not be the agent bank.

OCC believes that the proposed rule change is consistent with the purposes and requirements of section 17A of the Act[2] because it conforms the allocation of the settlement risk in the DVP process to that of the regular way settlement process and avoids a situation where OCC would be obligated to release margin or deliver currency to a Clearing Member whose agent bank has failed to settle with OCC's correspondent bank.

B. SRO's Statement on Burden on Competition

OCC believes that the proposed rule change will not impose any burden on competition.

C. SRO's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

OCC has not solicited comments with respect to the proposed rule change, and none have been received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within thirty-five days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to ninety days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the SRO consents, the Commission will:

(A) By order approve such proposed rule change or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of OCC. All submissions should

BILLING CODE 8010–01–M

[Rel. No. IC–19147; File No. 812–7911]

Anchor National Life Insurance Company, et al.

December 4, 1992.

AGENCY: Securities and Exchange Commission (the "Commission" or the "SEC").

ACTION: Notice of application for exemption under the Investment Company Act of 1940 (the "1940 Act").

APPLICANTS: Anchor National Life Insurance Company ("Anchor National"), Variable Separate Account (the "Separate Account"), SunAmerica Securities, Inc. ("SunAmerica") and Royal Alliance Associates, Inc. ("Royal Alliance").

RELEVANT 1940 ACT SECTIONS: Order requested under section 6(c) for exemptions from sections 26(a)(2) and 27(c)(2) of the 1940 Act.

SUMMARY OF APPLICATION: Applicants seek an order to permit the deduction of a mortality and expense risk charge and a distribution expense charge from the assets of the Separate Account under certain individual and group flexible payment deferred annuity contracts ("Contracts").

FILING DATE: The application was filed on April 28, 1992 and amended on October 27, 1992.

HEARING OR NOTIFICATION OF HEARING: An order granting the application will be issued unless the Commission orders a hearing. Interested persons may request a hearing by writing to the SEC's Secretary and serving Applicants with a copy of the request, personally or by mail. Hearing requests should be received by the SEC by 5:30 p.m. on December 29, 1992, and should be accompanied by proof of service on Applicants in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issues contested. Persons may request notification of a hearing by writing to the SEC's Secretary.

ADDRESSES: Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Applicants, c/o Routier, Mackey and Johnson, 1700 K Street, NW., suite 1003, Washington, DC 20006.

FOR FURTHER INFORMATION CONTACT: Wendy Finck Friedlander, Senior Attorney, at (202) 272–3045, or Wendell M. Faria, Deputy Chief, at (202) 272–2060, Office of Insurance Products (Division of Investment Management).

SUPPLEMENTARY INFORMATION: Following is a summary of the application. The complete application is available for a fee from the Commission's Public Reference Branch.

Applicants' Representations

1. Anchor National is a stock life insurance company organized under the laws of the State of California.

2. The Separate Account was established by Anchor National to fund variable annuity contracts and is registered as a unit investment trust under the 1940 Act.

3. SunAmerica and Royal Alliance, broker-dealers registered under the Securities Exchange Act of 1934, are the principal underwriters for the securities issued by the Separate Account.

4. The Contracts provide for the accumulation of contract values and the payment of annuity benefits on a variable or a fixed basis. Purchase payments may be allocated to portfolios of the Separate Account or to the general account of Anchor National under one of the Contract's fixed options (the "Fixed Account"), or to a combination thereof. The minimum initial purchase payment for a Contract issued to fund a retirement plan that qualifies for special federal tax advantages ("Qualified Contracts") is $2,000; the minimum initial payment for a Contract that does not qualify for federal tax advantages ("Non-Qualified Contracts") is $5,000. Additional payments may be made in the amount of $250 for Qualified Contracts and $500 for Non-Qualified Contracts.

5. Anchor Series Trust ("Anchor Trust") and SunAmerica Trust ("SunAmerica Trust") are diversified, open-end management investment companies registered under the 1940 Act. Each portfolio of the Separate Account invests Contract payments in one of six series of Anchor Trust or one of ten series of SunAmerica Trust. Additional underlying funds may be available in the future.

6. If a Contract owner or participant dies during the accumulation period, a death benefit is paid to the beneficiary under the Contract. The standard death benefit is the greater of (1) the Contract value at the end of the valuation period during which due proof of death is received by Anchor National and (2) the amount of purchase payments less the sum of partial withdrawals, partial annuitizations and premium taxes incurred.

7. An enhanced death benefit also is provided where permitted by state law. During the first seven Contract years, the enhanced death benefit is determined by recomputing the standard death benefit by accumulating all amounts under (2) in paragraph 6 at 4% annually (or 3% if the Contract owner or participant was age 70 or older on the date of issue) to the date of death. After the seventh Contract year, the enhanced death benefit is the greater of the amount recomputed during the first seven Contract years, or the Contract value at the seventh Contract anniversary less the sum of partial withdrawals, partial annuitizations since the seventh anniversary and premium taxes incurred since the seventh anniversary, all accumulated at 4% annually (or 3% annually if the Contract owner or participant was age 70 or older on the date of issue) to the date of death.

8. During the accumulation period, amounts allocated to the Separate Account may be transferred among the portfolios and/or the Fixed Account. Any amounts allocated or transferred to the Fixed Account may, however, be transferred from the Fixed Account to the Separate Account only on or before seven calendar days prior to the annuity date. There is no charge for the first fifteen transfers in any Contract year. A transfer fee of $25 ($10 in Texas and Pennsylvania) is assessed for the sixteenth and each subsequent transfer in any Contract year.

9. A contingent deferred sales charge ("Withdrawal Charge") may be imposed on certain withdrawals. Withdrawal Charges will vary in amount depending upon the contribution year of the purchase payment at the time of withdrawal, in accordance with the following table:

WITHDRAWAL CHARGE TABLE

Contribution year	Applicable withdrawal charge (percent)
Zero	7
First	6
Second	5
Third	4
Fourth	3
Fifth	2
Sixth	1
Seventh and later	0

[3] 17 CFR 200.30–3(a)(23) (1991)

Withdrawals are allocated first to investment income, if any (which generally may be withdrawn free of Withdrawal Charge), and then to purchase payments on a first-in, first-out basis so that all withdrawals are allocated to purchase payments to which the lowest Withdrawal Charge applies.

There is a free withdrawal amount for the first withdrawal during a Contract year after the first Contract year. The free withdrawal amount is equal to the sum of (1) purchase payments that are no longer subject to the Withdrawal Charge and that have not previously been withdrawn, and (2) the greater of (A) 10% of purchase payments made more than one year prior to the date of withdrawal that remain subject to the withdrawal charge and that have not previously been withdrawn, or (B) earnings in the Contract owner's or participant's account. Amounts in excess of earnings that are withdrawn free of the Withdrawal Charge pursuant to the 10% free withdrawal provision are charged against future earnings for purposes of determining the Withdrawal Charge; that is, they reduce the amount of future earnings that can be withdrawn free of Withdrawal Charge.[1]

10. Anchor National deducts a distribution expense charge from each portfolio of the Separate Account during each valuation period on an annual basis of 0.15% of the net asset value of each portfolio. The distribution expense charge is designed to compensate Anchor National for assuming the risk that the cost of distributing the Contracts will exceed the revenues from the Withdrawal Charge. In no event will this charge be increased. The distribution expense charge is assessed during both the accumulation period and the annuity period but not applied to Contract values allocated to the Fixed Account.

11. An annual Contract administration charge of $35 is charged against each Contract. The amount of this charge is guaranteed and cannot be increased. The administrative charge is at cost with no anticipation of profit.

12. Anchor National imposes a charge for bearing certain mortality and expense risks under the Contract. The total annual mortality and expense risk charge is 1.37% of the net asset value of each portfolio of the Separate Account during each valuation period.

(a) The mortality risk portion of the charge is at an annual rate of 1.02%, of which 0.90% is assessed for providing the standard death benefit and 0.12% is assessed for providing the enhanced death benefit. The mortality risk charge is deducted to compensate Anchor National for assuming the risks that the life expectancy of an annuitant will be greater than that assumed in the guaranteed annuity purchase rates, for waiving the withdrawal charge in the event of the death of the Contract owner or participant, and for providing standard and enhanced death benefits prior to the annuity date. If the mortality risk charge is insufficient to cover the actual costs of assuming the mortality risks, Anchor National will bear the loss; however, if the charge proves more than sufficient, the excess will be a gain to Anchor National. The mortality risk charge may not be increased under the Contract.

(b) The expense risk portion of the charge is at the annual rate of 0.35% of the net asset value of each portfolio. The expense risk charge is to compensate Anchor National for assuming the risk that the Contract administration charge will be insufficient to cover the cost of administering the Contracts. If the expense risk charge is insufficient to cover the actual cost of administering the Contracts, Anchor National will bear the loss; however, if the charge is more than sufficient, the excess will be a gain to Anchor National. The expense risk charge may not be increased under the Contracts.

Applicants' Legal Analysis and Conditions

1. Applicants request an exemption from sections 26(a)(2) and 27(c)(2) of the 1940 Act to the extent necessary to permit the deductions of the mortality and expense risk charge and a distribution expense charge from the assets of the Separate Account under the Contracts.

2. Applicants represent that the mortality and expense risk charge of 1.25% (which does not include the 0.12% risk charge for the enhanced death benefit) is reasonable in relation to the risks assumed by Anchor National under the Contracts and reasonable in amount as determined by industry practice with respect to comparable annuity products. Applicants represent that these determinations are based on their analysis of publicly available information about similar industry practices and by taking into consideration such factors as current charge levels and benefits provided, the existence of expense charge guarantees and guaranteed annuity rates. Anchor National undertakes to maintain at its home office a memorandum, available to the Commission upon request, setting forth in detail the methodology used in making these determinations.

3. Applicants represent that the mortality risk charge of 0.12% for the enhanced death benefit is reasonable in relation to the risks assumed by Anchor National under the Contracts. In arriving at this determination, Anchor National ran a large number of computer-generated trials at various issue ages to determine the expected cost of the enhanced death benefit. First, hypothetical asset returns were projected using generally accepted actuarial simulation methods. For each asset return pattern thus generated, hypothetical accumulated values were calculated by applying the projected asset returns to the initial value in a hypothetical account. Each accumulated value so calculated was then compared to the amount of the enhanced death benefit payable in the event of the hypothetical Contract owner's or participant's death during the year in question. By analyzing the results of several thousand such simulations, Anchor National was able to determine actuarially the level cost of providing the enhanced death benefit. Based on this analysis, Anchor National determined that a mortality risk charge of 0.12% was a reasonable charge for the enhanced death benefit. Anchor National undertakes to maintain at its home office a memorandum, available to the Commission upon request, setting forth in detail the methodology used in determining that the risk charge of 0.12% for the enhanced death benefit is reasonable in relation to the risks assumed by Anchor National under the Contracts.

4. Anchor National represents that the assets of the Separate Account will be invested only in management investment companies which undertake, in the event they should adopt a plan for financing distribution expenses pursuant to Rule 12b–1 under the 1940 Act, to have such plan formulated and approved by their board of directors, the majority of whom are not "interested persons" of the management investment company within the meaning of section 2(a)(19) of the 1940 Act. Anchor National has concluded that there is a reasonable likelihood that the Separate Account's distribution financing arrangement will benefit the Separate Account and its investors. Anchor National represents that it will maintain and make available to the Commission upon request a memorandum setting forth the basis of such conclusion.

5. Applicants represent that the amount of any Withdrawal Charge imposed when added to any distribution expense charge previously

[1] Applicants represent that, during the Notice Period, the application will be amended to reflect these representations.

paid, will not exceed 9% of purchase payments and that Anchor National will monitor each Contract owner's and participant's account for the purpose of ensuring that this limitation is not exceeded. Applicants undertake to include in the prospectus for the Contracts statements describing the purpose of the distribution expense charge, and that the staff of the Commission deems such charge to constitute a deferred sales charge.

Conclusion

Applicants assert that, for the reasons and upon the facts set forth above, the requested exemption from sections 26(a)(2) and 27(c)(2) of the 1940 Act to deduct the mortality and expense risk charges and the distribution expense charge from the assets of the Separate Account under the Contracts meets the standards in section 6(c) of the 1940 Act. Applicants assert that the exemptions requested are necessary and appropriate in the public interest and consistent with the protection of investors and the policies and provisions of the 1940 Act.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Margaret H. McFarland,

Deputy Secretary.

SUPPLEMENTARY INFORMATION: Following is a summary of the application; the complete application is available for a fee from the SEC's Public Reference Branch.

Applicants' Representations

1. Golden American Life Insurance Company is a stock life insurance company organized under the laws of the State of Minnesota. From January 2, 1973 through December 31, 1987, the name of the company was St. Paul Life Insurance Company. On December 31, 1987, after the sale of St. Paul Life Insurance Company's business, the name was changed to Golden American Life Insurance Company. On March 7, 1988, all of the stock of Golden American was acquired by The Golden Financial Group, Inc. ("GFG"), a financial services holding company. On October 19, 1990, GFG merged with and into MBL Variable, Inc. ("MBLV"), a wholly owned direct subsidiary of the Mutual Benefit Life Insurance Company ("MBL"). On January 1, 1991 MBLV became a wholly owned indirect subsidiary of MBL and Golden American became a wholly owned direct subsidiary of MBL.

In September 1992, Bankers Trust Company ("Bankers Trust"), a New York banking corporation, acquired Golden American and DSI. As of June 30, 1992, Bankers Trust New York Corp., parent of Bankers Trust, was the eighth largest bank holding company in the United States with total assets of approximately $64 billion. Bankers Trust conducts a variety of general banking and trust activities and is a wholesale supplier of financial services to the domestic and international market.

2. The Account, registered with the Commission as a managed separate account on Form N-3, is a separate investment account of Golden American established on April 18, 1990 to act as a funding vehicle for variable annuity contracts. The Account consists of the U.S. Government Bond Division (the "Division") and the Global Asset Allocation Portfolio ("Portfolio") (collectively the "Divisions"). The Division's investment objective is to achieve high total investment return consistent with a prudent regard for capital preservation. Currently, only Deferred Annuity Contracts are funded by the Divisions. Other Divisions may be added in the future.

3. On July 16, 1991, the Superior Court of New Jersey entered an order (the "Order") appointing the Commissioner of Insurance of the State of New Jersey as Rehabilitator of MBL. The Order granted the Rehabilitator immediate exclusive possession and control of, and title to, the business and all assets of MBL. The Rehabilitator has been directed to conduct the business of MBL and to begin taking such steps as he may deem appropriate toward removing the causes and conditions which have made rehabilitation necessary.

Golden American is not subject to rehabilitation under the Order. However, to protect Golden American and its Contract Owners, on July 16, 1991 a Minnesota Superior Court ordered that Golden American temporarily be placed under the supervision of the Minnesota Commissioner of Commerce and that various actions, including certain transfers of company assets, cannot be taken without the prior written consent of the Commissioner of Commerce. Golden American is permitted to accept new premiums, pay all claims and benefits and honor all requests for cash withdrawals and surrenders.

4. As previously noted, DSI will serve as the Manager to the Account. Granite Financial Services, Inc. will serve as the

Portfolio Manager to the Division and Zulauf Asset Management AG will serve as the Portfolio Manager to the Portfolio. Pursuant to a distribution agreement between Golden American and DSI, DSI will act as the principal underwriter and distributor of the Contracts and will enter into sales agreements with broker-dealers to solicit sales of the Contracts through registered representatives. The offering of the Contracts will be continuous.

5. The Contracts are currently intended to be used in connection with either a retirement plan qualified under sections 401(a), 408(a), 408(b) and 457 of the Internal Revenue Code or a non-qualified plan, or by any other purchaser for whom they may provide a suitable investment.

6. The Deferred Annuity is an individual flexible premium payment contract which provides of an initial premium payment and for subsequent premium payments if the Contract owner so desires. There is, however, no obligation to make additional payments.

7. The Annuity Certain is an immediate annuity which provides for payment of a single premium and allows for variable annuity payments to be made to the Annuitant over a fixed period of time.

8. The sales charges imposed under the Contracts may be structured in one of two ways, as described in (a) and (b) below. If Contracts are sold with both types of sales load structures a separate sub-division of the Divisions will be established to hold assets attributable to Contracts with each type of sales load.

a. Certain Contracts may provide for deferred loading at a maximum rate of 7.5% of each payment. Initially, the deferred load for the Deferred Annuity Contracts investing in the Division will be 3.00% and 6.00% for Deferred Annuity Contracts investing in the Portfolio. For both the Deferred Annuity Contracts and the Annuity Certain Contracts, the deferred loading may differ based on the size of the initial or single premium. For the Deferred Annuity Contracts, the deferred loading percentage is applicable to all subsequent premium payments and may not be modified. All deferred loading applicable to initial or additional premium payments or single premium payments is deducted by Golden American at the time of payment but is advanced back to the Divisions and recovered periodically in equal installments over a period specified in the Contracts by Golden American from the accumulation value following receipt and acceptance of the payment. If the Contract Owner surrenders a Contract, any remaining deferred loading will be recovered by Golden American at that time, and a portion of the remaining deferred loading will be immediately deducted from the accumulation value for partial withdrawals in excess of 15% of accumulation value. For purposes of the provisions of the 1940 Act applicable to sales loads, the deferred loading is a front-end sales load.

b. In the future, certain Contracts may provide for a combination of a premium-based sales load and a contingent deferred sales load in lieu of the deferred load. Golden American will deduct the premium-based sales load from accumulation value in an amount equal to a maximum of 7.50% of each premium payment. The premium-based charge will be deducted in equal installments for a period of up to ten years or until such time as the Contract Owner surrenders the Contract or annuitizes. A contingent deferred sales load may be deducted if a Contract Owner surrenders a Contract or makes a partial withdrawal thereunder in excess of 15% of accumulation value. The contingent deferred sales load upon surrender will be a maximum of 7.50% in Contract year one and will decline to zero for surrenders after Contract year eight. In no event will the sum of the premium-based sales load and any contingent deferred sales load exceed 9.00% of each premium payment.

9. Generally, premium taxes are incurred on the annuity commencement date, and a charge for premium taxes is then deducted from the accumulation value of such date. Currently, these charges range from 0% to 3.5%. Some jurisdictions impose a premium tax at the time the initial or additional premiums are paid, regardless of the annuity commencement date. In those states, Golden American advances the amount of the premium tax charge to the accumulation value and then deducts it in equal installments on each Contract processing date over a six-year period. Currently in those states where Golden American advances the charge for premium taxes, Golden American will waive the deduction of the applicable installments on each contract processing date. However, Golden American deducts the applicable unrecovered portion of the charge for premium taxes (not including installments which were waived) when determining the cash surrender value payable if the Contract Owner surrenders the Contract. Golden American reserves the right to deduct the total amount of the charge for premium taxes previously waived and unrecovered on the annuity commencement date.

10. Under the Contracts, Golden American in the future may impose an administrative charge of $40 annually which will be deducted in equal installments from the accumulation value of a Contract to reimburse Golden American for the anticipated actual cost of administrative expenses relating to the Contracts. The amount of the charge may be changed by Golden American but is guaranteed not to exceed $60 annually. There may also be an asset-based administrative charge accrued daily at a rate of 0.00276%, not to exceed 0.10% annually of the assets of the Contracts. This administrative charge, if assessed under the Contracts, would remain in effect for the life of the Contracts.

11. The Contracts provide that a maximum mortality and expense risk daily charge equal to the rate of 0.003445% (equivalent to an annual charge of 1.25%) of the asset values in each division of the Account will be deducted. The mortality risk assumed by Golden American arises from its obligation to continue to make annuity payments under the income plan provisions of the Contracts, determined in accordance with the guaranteed annuity tables and other provisions of the Contract, regardless of how long each annuitant lives and regardless of how long all payees as a group live. The mortality risk under the Deferred Annuity is the risk that, after annuitization or upon selection of an annuity option with a life contingency, annuitants will possibly live longer than Golden American's actuarial projections indicated, resulting in higher than expected payments during the payout phase, since the payment options are guaranteed not to be less than the tables set forth in the Deferred Annuity. In the Deferred Annuity Contract, Golden American also assumes a risk that it may be required to pay out a guaranteed death benefit if in excess of the accumulation value. The mortality risk assumed by Golden American under the Annuity Certain is the risk that annuitants, or beneficiaries after the death of the annuitant, will choose one such option and will possibly live longer than Golden American's actuarial projections indicate, resulting in higher than expected payments during the payout phase, since any payment option is guaranteed not to be less than the tables set forth in the Annuity Certain. In addition, Golden American assumes a risk that the charges for the administrative expenses may not be adequate to cover such expenses.

12. With respect to the Deferred Annuity, Golden American guarantees a death benefit payable to the beneficiary

if the Contract Owner or annuitant (when there is no contingent annuitant) dies prior to the annuity commencement date. Currently, Golden American will not impose a charge for its guarantee of a minimum death benefit under the Deferred Annuity. In connection with Contracts that invest in the U.S. Government Bond Division, Golden American pays the lesser of the guaranteed death benefit and the maximum guaranteed death benefit. The guaranteed death benefit is the accumulated value of the premium paid adjusted at a specified annual interest rate of up to 8.00% minus the accumulated value of the partial withdrawals (when available) adjusted at a specified annual interest rate of up to 8.00%. In connection with Contracts that invest in the Portfolio, when the annuitant and owner are both age 80 or younger at issue, Golden American pays the greater of the guaranteed death benefit and the accumulation value of the premium paid adjusted at a specified annual interest rate of up to 7.00% minus the accumulation value of any partial withdrawals (when available) adjusted at a specified annual interest rate of up to 7.00%. If the annuitant or owner is 81 years or older at issue, the death benefit is the greater of the cash surrender value and the sum of premiums paid less any partial withdrawals. Golden American reserves the right to modify this interest rate structure with newly issued Contracts. The maximum guaranteed death benefit is two times the sum of premiums paid minus the sum of partial withdrawals taken. Golden American may impose, in the future, a charge for its guarantee of a minimum death benefit ("Guaranteed Death Benefit Charge"). This charge will not be an asset based charge, but will be an account charge imposed to compensate Golden American for the risk that the guaranteed death benefit due under a Deferred Annuity Contract when the annuitant dies during the accumulation phase may exceed the normal death benefit otherwise payable. In the Deferred Annuity Contract, the guaranteed death benefit charge, if assessed, will be at a rate of $1.20 per $1,000 of guaranteed death benefit per year. All guaranteed death benefit charges will be deducted in equal installments on the contract processing date. The guaranteed death benefit in effect on the previous processing date will be multiplied by the annual rate and divided by the number of processing dates in each contract year to determine the actual charge. As an asset charge (assuming a hypothetical gross return of 5%), it would effectively increase the mortality and expense risk charge by approximately 0.10%. For higher hypothetical gross returns, this charge, when expressed as an asset charge, would be less; and, for lower hypothetical gross returns, it would be more. Assessment of the charge in this manner would benefit Contract Owners because it provides a better match of the charge and the risk than assessing the charge as a daily percentage of assets charged against assets in a division of the Account.

Applicants' Legal Analysis and Conditions

1. Section 6(c) of the 1940 Act authorizes the Commission to exempt any person, security, or transaction or any class or classes of persons, securities, or transactions from the provisions of the 1940 Act and rules promulgated thereunder if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policies and provisions of the 1940 Act.

2. To the extent any relief is necessary to permit the deduction from the Account of the mortality and expense risk charge and, from the accumulation value of the Contracts, the guaranteed death benefit charge, Applicants request an exemption from sections 12(b), 26(a)(c) and 27(c)(2) of the 1940 Act and Rule 12b–1 thereunder.

3. To the extent that a guaranteed death benefit charge (as described immediately below) is imposed with respect to a particular Deferred Annuity Contract, the mortality and expense risk charge will be limited to a level such that the sum of the mortality and expense risk charge and an asset based approximation of the guaranteed death benefit charge (assuming a 5% rate of return) does not exceed 1.25% of the assets in the division of the Account.

4. If the charges are insufficient to cover the actual cost of the mortality and expense risk and guaranteed death benefit costs, the loss will fall on Golden American; conversely, if the deduction proves more than sufficient, the excess will be a profit to Golden American. Any profits resulting to Golden American from the mortality and expense risk and guaranteed death benefit charges can be used by Golden American, at its discretion, for any business purpose, including distribution expenses relating to the Contracts.

5. Applicants represent that they have reviewed publicly available information regarding the level of the mortality and expense risk charge under comparable variably annuity contracts currently being offered in the industry, taking into consideration such factors as current charge levels or annuity rate guarantees and the markets in which the Contracts will be offered. Based upon the foregoing, Applicants further represent that the maximum charges under the Contracts are within the range of industry practice for comparable contracts. Applicants will maintain and make available to the Commission, upon request, a memorandum outlining the methodology underlying this representation.

6. Applicants do not believe that the sales loads imposed under the Contracts will necessarily cover the expected costs of distributing Contracts. Any "shortfall" will be made up from the general account assets which will include amounts derived from risk charges. Golden American has concluded that there is a reasonable likelihood that the distribution financing arrangement that will be used in connection with the Contracts will benefit the Account and the Contract Owners. Golden American will keep and make available to the Commission, upon request, a memorandum setting forth the basis for this representation.

7. Applicants further represent that the Account will have a Board of Governors, a majority of whom are not interested persons of the Account, formulate and approve any plan under Rule 12b–1 under the 1940 Act to finance distribution expenses.

8. As described above, the Contracts may in the future provide for the deduction from accumulation value of an amount equal, on an annual basis, to a maximum of 7.50% of each premium payment as a premium-based sales load. In no event will the sum of any premium-based sales load and any contingent deferred sales load assessed under a Contract exceed 9.00% of each premium payment. Applicants request an exemption from sections 2(a)(35), 26(a)(2)(C) and 27(c)(2) of the 1940 Act to the extent necessary to permit this deduction from accumulation value in installments.

9. Section 2(a)(35) of the 1940 Act defines sales load as the difference between the price of a security to the public and that portion of the proceeds from its sale which is received and invested, less any portion of such difference deducted for trustee's or custodian's fees, insurance premiums, issue taxes, or administrative expenses or fees which are not properly chargeable to sales or promotional activities.

10. The literal language of section 2(a)(35) contemplates that any sales load imposed on a security of a registered

investment company be a front-end load. Rule 6c–8 specifically allows the deduction of contingent deferred sales loads with respect to a variable annuity contract, if certain conditions are fulfilled, all of which are met with the Contracts. Applicants argue that the deduction of the premium-based sales load from accumulation value could be viewed as an impermissible deduction from the accumulation value in the Account. Accordingly, Applicants request relief from sections 2(a)(35), 26(a)(2)(C) and 27(c)(2) to the extent necessary to permit the deduction of the premium-based sales load.

11. Applicants submit that imposition of a sales charge in the form of a premium-based charge to be deducted from accumulation value is more favorable to a Contract Owner than the deduction of this charge from premiums paid. Specifically, the amount of the Contract Owner's investment in the Account is not reduced as it would be if these charges were taken in full directly from premiums paid. Second, the total amount charged to any Contract Owner is no greater than it would be if these charges were taken from premiums paid. Finally, the fact that the entire amount of the charge has not been deducted will favorably affect the amount of the Guaranteed Death Benefit.

Conclusion

In light of the foregoing facts and representations, Applicants believe that the requested exemptions to deduct the mortality and expense risk, guaranteed death benefit charges and premium-based sales charge under the Contracts is necessary and appropriate in the public interest and consistent with the protection of investors and the policies and provisions of the 1940 Act.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Margaret H. McFarland,

Deputy Secretary.

Applications for Certificates of Public Convenience and Necessity and Foreign Air Carrier Permits Filed Under Subpart Q During the Week Ended December 4, 1992

The following Applications for Certificates of Public Convenience and Necessity and Foreign Air Carrier Permits were filed under subpart Q of the Department of Transportation's Procedural Regulations (See 14 CFR 302.1701 et seq.). The due date for Answers, Conforming Applications, or Motions to Modify Scope are set forth below for each application. Following the Answer period DOT may process the application by expedited procedures. Such procedures may consist of the adoption of a show-cause order, a tentative order, or in appropriate cases a final order without further proceedings.

Docket Number: 48514

Date filed: December 1, 1992
Due Date for Answers, Conforming Applications, or Motion to Modify Scope: December 29, 1992
Desciption: Application of Promech, Inc., pursuant to section 402 of the Act and subpart Q of the Regulations, applies for a certificate of public convenience and necessity for an indefine term to perform scheduled, interstate air transportation of persons, property and mail between the terminal points of Ketchikan and Metlakatla, Alaska.

Docket Number: 48525
Date filed: December 4, 1992
Due Date for Answers, Conforming Applications, or Motion to Modify Scope: January 4, 1993
Descriptions: Application of Lines Aereas Privadas Argentinas, S.A., pursuant to section 402 of the Act and subpart Q of the Regulations, applies for a foreign air carrier permit to enable it to engage in charter foreign air transportation of passengers, property and mail from a point or points in Argentina to a point in the United States and return.

Docket Number: 45723
Date filed: December 4, 1992
Due Date for Answers, Conforming Applications, or Motion to Modify Scope: January 4, 1993
Description: Application of Transports Aereos Ejecutivos, S.A. de C.V., pursuant to section 402 of the Act and subpart Q of the Regulations, applies for Amendment of its Foreign Air Carrier Permit, to engage in the scheduled air transportation of persons, property and mail on the scheduled combination routes: (1) Mexicali, Mexico, on the one hand, and Los Angeles, CA, on the other hand, and Los Angeles, CA, on the other hand; (2) Ciudad Juarez, Mexico, on the one hand, and Los Angeles, CA, on the other hand; (3) Villahermosa, Mexico, on the one hand, and Houston, TX, on the other hand; (4) Zacatecas, Mexico, on the one hand, and Houston, TX, on the other hand; and (5) Mexico City/ Toluca, Mexico, on the one hand, and Ontario, CA, on the other hand.

Phyllis T. Kaylor,
Chief, Documentary Services Division.

BILLING CODE 4910-62-M

Federal Railroad Administration

Petition for Waiver of Compliance

In accordance with 49 CFR 211.51, notice is hereby given that the Federal Railroad Administration (FRA) has received a request for a waiver of compliance with certain requirements of its safety standards. The individual petition is described below, including the party seeking relief, the regulatory provisions involved, and the nature of the relief being requested.

Union Pacific Railroad Company

Waiver Petition Docket Number H-92-7

The Union Pacific Railroad Company (UP) requests a waiver of compliance with certain provisions of the railroad power brakes regulation (49 CFR part 232). The UP seeks a waiver of compliance with § 232.12(b), which stipulates, "Each carrier shall designate additional inspection points not more than 1,000 miles apart where intermediate inspection will be made to determine that—

(1) Brake pipe leakage does not exceed five pounds per minute;

(2) Brakes apply on each car in response to a 20-pound service brake pipe pressure reduction; and

(3) Brake rigging is properly secured and does not bind or foul.

The UP requests the waiver for a period of six (6) months duration from § 232.12(b) in which to perform a test. The test will include approximately 22 trains per day which presently receive a 1,000 mile intermediate train air brake test at Salt Lake City, Utah. The trains would be operated to either destination or an intermediate train brake testing location, and the distances the trains will travel are between 1,362 miles and 1,648 miles.

Interested parties are invited to participate in these proceedings by submitting written views, data, or comments. FRA does not anticipate scheduling a public hearing in connection with these proceedings since the facts do not appear to warrant a hearing. However, if an opportunity for oral comment is requested, such request must be made in writing within 10 days from the date of publication of this notice. If any interested party desires an opportunity for oral comment, they shall do so in writing and specify the basis for their request.

All communications concerning these proceedings should identify the appropriate docket number (e.g., Waiver Petition Docket Number (H-92-7) and must be submitted in triplicate to the Docket Clerk, Office of Chief Counsel, Federal Railroad Administration, Nassif Building, 400 Seventh Street, SW., Washington, DC 20590.
Communications received within 30 days from the date of publication of this notice will be considered by FRA before final action is taken. Comments received after that date will be considered as far as practicable. All written communications concerning these proceedings are available for examination during regular business hours (9 a.m. to 5 p.m.) in Room 8201 Nassif Building, 400 Seventh Street, SW., Washington, DC 20590.

Issued in Washington, DC, on December 10, 1992.

Phil Olekszyk,
Deputy Associate Administrator for Safety.

Federal Transit Administration

Charter Services Demonstration Program; Advisory Committee Meeting

AGENCY: Federal Transit Administration, DOT.

ACTION: Notice of meeting.

SUMMARY: This notice announces the second meeting of the advisory committee established to assist the Federal Transit Administration (FTA) in developing regulations to implement the charter services demonstration program mandated by the Intermodal Surface Transportation Efficiency Act of 1991 (ISTEA). This statutorily mandated advisory committee, equally representative of public transit agencies and privately owned charter companies, will provide a forum for discussion of key issues relating to the effectiveness and/or need for the modification of the current charter service regulation.

Today's notice announces a meeting of the advisory committee, which is open to the public.

DATES: The second meeting of the advisory committee will take place on January 11, 1993, from 8:30 a.m. to 5 p.m.

ADDRESS: The advisory committee meeting will be held in room 2230 at the Department of Transportation, 400 Seventh Street, SW., Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: Rita Daguillard, Office of the Chief Counsel, Federal Transit Administration (TCC-32), at 202-366-1936.

SUPPLEMENTARY INFORMATION:

Background

On December 18, 1991, the President signed into law the Intermodel Surface Transportation Efficiency Act of 1991 (ISTEA) (Pub. L. 102-240) providing authorization for mass transportation, highways, and highway safety programs for the next six years. The purpose of

this Act is to develop a National Intermodal Transportation System that is economically sound, which provides the foundation for the Nation to complete in the global economy and will move people and goods in an energy efficient manner.

Title III of the Act relates to the mass transit program. Section 3040 of this title requires the FTA to issue regulations implementing a charter services demonstration program in not more than four states, which would allow transit operators to provide charter service to meet the needs of government, civic, charitable, and other community activities which would not otherwise be met in a cost-effective and efficient manner. Section 3040 also provides that in developing such regulations, the FTA shall consult a board that is equally represented by public transit operators and privately owned charter services.

Major Issues

The demonstration regulations and program have been mandated in response to concerns expressed by local transit operators about the existing charter service regulation (49 CFR part 604). It is intended that these new demonstration regulations will grant public transit operators additional flexibility that is not afforded under existing charter regulations, without creating undue competition for privately owned charter operators. The results of the demonstration program will help to determine the most effective method for providing charter services to local communities, and whether the current regulations need to be modified.

To implement this statutory mandate, the FTA established a Federal Advisory Committee, effective March 16, 1992. Appended to this preamble is a list of member organizations. The first meeting of the Advisory Committee took place in Washington, DC on May 4, 1992. With the advice and recommendation of the Advisory Committee, the FTA developed a proposed demonstration program. Under this program, a State Department of Transportation (State DOT) or metropolitan planning organization (MPO) in each of the selected sites would appoint a local advisory panel composed of representatives of the public and private sectors. The advisory panel would recommend to the State DOT or MPO that a public transit agency participating in the program be allowed to provide certain types of charter service. The State DOT or MPO would accept recommendations which received a unanimous vote from the advisory panel, and decide to grant or deny other recommendations, based on certain set criteria. There would be a limited appeal to the FTA of the State DOT's or MPO's decision. The demonstration would take place during a 12 to 18 month period, in six different sites. Data collected during the demonstration would be presented to Congress as directed by section 3040(c) of ISTEA.

On October 28, 1992, the FTA issued a notice of proposed rulemaking (NPRM) describing the demonstration program, and seeking comments and proposals. The period for submittal of comments and proposals ends on December 28, 1992. The FTA intends to pre-select six sites from among the proposals received, and to submit them for discussion and comment to the Advisory Committee at its January 11, 1993, meeting.

Meeting Procedures

The meeting of the Charter Services Demonstration Program Advisory Committee will be held on January 11, 1993, from 8:30 a.m. to 5 p.m. The goal of the committee is to provide advice and comment on the selection of sites for the demonstration program and the establishment of procedures to be followed by localities participating in the program.

Interpreters and assistive listening devices are available for persons with hearing impairments and written materials and hearing transcripts are available in accessible formats, upon request. All meetings of the Charter Services Demonstration Program Federal Advisory Committee are open to the public.

Appendix—Charter Services Demonstration Program Advisory Committee

Membership List—Public Transit Operators and their Representatives

1. Capital Area Transportation Authority, Lansing, Michigan.
2. Metropolitan Transit Authority of Harris County, Houston, Texas.
3. Monterey-Salinas Transit Authority, Monterey, California.
4. Central Oklahoma Transit Authority, Oklahoma City, Oklahoma.
5. Toledo Area Transit Authority, Toledo, Ohio.
6. Mass Transit Administration, Baltimore, Maryland.
7. Metropolitan Atlanta Regional Transit Authority, Atlanta, Georgia.
8. Pinellas-Suncoast Transit Authority, Clearwater, Florida.

BILLING CODE 4910-57-M

Research and Special Programs Administration

[Docket No. P-90-1W; Notice 1]

Transportation of Natural and Other Gas by Pipeline; Petition for Waiver; Panhandle Eastern Corporation

The Panhandle Eastern Corporation (Panhandle) has petitioned the Research and Special Programs Administration (RSPA) for a waiver from compliance with the repair requirements of 49 CFR 192.713(a) to allow the installation of a proprietary composite reinforced (CR) sleeve material (Clock Spring™ manufactured by Clock Spring Company of North America, Long Beach, CA) as a full encirclement wrapped sleeve for the repair of imperfections and damages in steel pipe at six locations on its Line #2 in Fayette County, Ohio. Currently under § 192.713(a), the repair permitted to each imperfection or damage that impairs the serviceability of a segment of steel transmission line operating at or above 40 percent of specified minimum yield strength (SMYS) must be either by cutting out the segment and replacing a cylindrical piece of pipe or by installing over the segment a full encirclement welded split sleeve.

Proposal and Rationale Submitted by Panhandle

The proprietary repair method proposed consists of installing a CR sleeve material in coil form held in place by an adhesive. The adhesive adheres both to the pipe surface and to

the adjacent layers of the coiled composite reinforcement. The composite reinforcement is an isophthalic polyester resin reinforced with fiberglass. The adhesive is a methacrylate. Both the composite reinforcement and the adhesive have histories of suitable performance in other applications described in documents in the docket.

The suitability of a standard CR sleeve for repair of a measured defect is determined using a computer program developed by the Gas Research Institute (GRI). Panhandle reports that destructive tests of pipe with standard CR sleeves installed over manufactured defects repeatedly burst in the non-reinforced steel pipe, demonstrating the validity of the computer program. The CR sleeve does not require pretesting nor are there any welds to be nondestructively tested.

Panhandle describes the following advantages of using CR sleeves:

(1) The CR sleeve material is relatively easy to install.

(2) The CR sleeve material is furnished in standard widths and thicknesses. The length of the repair to be made determines the number of sleeve units to be used. Multiple units can be brought to the job site at the time of excavation. Therefore, there is no delay between determining the extent of the repair and procuring materials for repair.

(3) The crew performing the investigation can make the repair without calling for pipe handling equipment or welders.

(4) In most circumstances, there will be no need to take the line out of service, eliminating interruptions or curtailments to customer service. The CR sleeve repairs can be made while the line is operated at full or reduced pressure.

(5) There is a substantial reduction in cost compared with the repair methods currently acceptable under § 192.713(a).

Panhandle estimates that the average cost of repair will be reduced from $26,000 for a pipe cutout or $16,000 for a welded split sleeve to $9,000 for a CR sleeve. The result would be a maximum savings of $17,000 per replacement repair, or $102,000 for 6 repairs or a minimum of $7,000 per welded split sleeve repair, or $42,000 for 6 repairs. Panhandle claims to make approximately 300 repairs per year. On the Panhandle system alone, annual savings could range between $5,000,000 and $2,000,000 per year.

The subject segment of Line #2 was installed in 1943. The pipe is 20 inch diameter, 0.3125 inch wall, API 5L Grade B. The line was designed and constructed in accordance with the American Society of Mechanical Engineers, ASA B31.1 Code for Pressure Piping. The line was hydrostatically tested in 1943 to a pressure of 985 p.s.i.g. or 90 percent of SNYS. The maximum allowable operating pressure (MAOP) of the line is 750 p.s.i.g. The line operates at 68.6 percent of SMYS. The line segment is in a Class Location 1 area for the entire 19 miles of its length. It is coated with standard grade coal tar enamel. The line has been operated and maintained in accordance with company operation and maintenance procedures which have met, at a minimum, the requirements of appropriate industry codes and standards and since 1970 the requirements of the pipeline safety regulations. The line segment was hydrostatically tested again in 1990 to a minimum of 90 percent of SMYS plus 25 p.s.i. as part of a scheduled pipeline integrity verification program that was initiated in 1987.

In February 1989, an instrumented internal inspection device was used to evaluate the condition of Panhandle's Line #2. The inspection indicated potential anomalies in the pipe which were classified using Panhandle's classification criteria. Type A and B are the most severe anomalies among the Panhandle classification criteria. Panhandle has disposed of the Type A and B anomalies using the conventional techniques currently permitted by § 192.713(a). The anomalies in question are classified as Type C. Type C anomalies are clusters of pits of 25–50 percent of wall thickness and massive, concentrated pitting less than 25 percent of wall thickness.

There are 12 anomaly sites on this segment of Line #2 proposed to be investigated for possible use of a CR sleeve. All 12 sites are at least 1000 feet from the nearest house or other building. The area is rural and the land use is predominantly agricultural. The integrity of all sites was validated by the hydrostatic test performed in June 1990. These 12 sites have been selected as possible candidates for repair using the alternate repair method discussed in this request for waiver. The analysis of the pig run indicates that six of the twelve anomalies will require repair. The need for repair cannot be verified without on-site visual inspection. Therefore, Panhandle intends to investigate and inspect these 12 locations in order to determine whether repair is required. If repair is required, this alternate repair method would be used on up to 6 of these sites.

The investigation of an anomaly site is to be conducted in accordance with a standard Panhandle procedure. Once the pipe is excavated and the coating is removed, the pipe will be examined, corrosion will be measured, and an analysis for serviceability will be performed using ANSI/ASME B31G "Manual for Determining the Remaining Strength of Corroded Pipelines." The manual is applicable to corroded areas with pit depths between 10 percent and 80 percent of the wall thickness of the pipe. By using the B31G manual, Panhandle can make a determination whether a pipeline can continue to operate at its established MAOP. If the corrosion is superficial and the pipeline can continue to operate at its MAOP, the pipeline will be re-coated, backfilled, and placed back in service. If the corrosion is significant, and the pipeline cannot continue to operate at the established MAOP, as determined by B31G, the MAOP will be reduced or the pipe will be replaced or repaired.

Panhandle believes that this new technology provides an excellent alternative to pipe replacement or the use of a full encirclement welded split sleeve for the repair of imperfections and damage in transmission pipe. The GRI, through various contractors, has conducted extensive analyses and tests on CR sleeves and their component materials. Panhandle reports that the strength of the sleeves has been proven through the GRI development program by laboratory and simulated field tests. Panhandle also reports that, under the GRI program, Clock Spring Company of North America has perfected the installation of the CR sleeves through numerous tests and under actual field conditions. Computerized design criteria have been developed and verified by burst tests in which CR sleeves have been installed over large, deep simulated defects. In all but one atypical sleeve installation, failure occurred in full wall thickness of the unsleeved pipe body. The computer program is designed to verify whether or not the standard CR sleeve will reliably serve as a repair.

Panhandle's waiver request includes a proposal to monitor the condition of the CR sleeves at designated intervals after installation. Panhandle will examine and take measurements of the CR sleeves and separate samples of sleeve materials to be buried adjacent to the sleeves. Two installed sleeves will be evaluated each at 2, 4, and 8 year intervals. Measurements will include strain gage readings of two CR sleeves at 6 month intervals to verify the expected absence of creep of the composite and the adhesive.

RSPA Analysis and Proposed Action

RSPA twice requested additional information to support the Panhandle waiver request. The information included the following topics:

(1) CR sleeve product specifications. The initial information submitted as product specifications was inadequate to define the product.

(2) Design calculations. The initial submission included no basis for selecting the appropriate CR sleeve thickness or verifying that the sleeve selected would perform adequately.

(3) Adhesive curing characteristics and adhesive properties. The initial submission did not include data on adhesive curing characteristics or cured adhesive properties.

(4) Quality assurance and quality control programs applicable to the production of CR sleeves. The initial submission did not include quality control criteria applicable to the CR sleeve product.

(5) Installation procedures. While the initial submission described the application of CR sleeves, it did not describe procedures necessary to ensure adequate application to pipe to the repaired.

(6) Post installation inspections. In the initial submission, the description of post installation inspections was minimal.

(7) Performance in creep of the fiber reinforced resin and the adhesive. The initial submission did not include data assuring that the proposed materials would resist creep in the installed condition.

The accumulated information in the initial waiver application and subsequent submittals represents satisfactory response to the requests by RSPA. The information provided by Panhandle is available in the docket.

In addition to the advantages cited by Panhandle, RSPA considers that the ability to make a repair without welding eliminates the possibility of cracking and pipeline failure attributable to residual stresses from welding and to hydrogen induced cracking associated with welding. Also eliminated is the possibility of burning through the pipe wall while welding. Overall, RSPA considers the CR sleeve repair procedure to be a safe alternative to either the welded split sleeve repair procedure or the pipe replacement procedure, both currently permitted by § 192.713(a).

RSPA believes that 49 CFR 192.713(a) should be waived to permit Panhandle to install CR sleeves as a permanent repair of six of the twelve corrosion anomalies cited in Line #2 in Fayette County, Ohio. RSPA believes that the use of this technology provides at least the same level of integrity as replacement of pipe or installation of a full encirclement welded split sleeve.

Interested persons are invited to comment on the proposed waiver by submitting in duplicate such data, views, or judgments as they may desire. Communications should identify the Docket and Notice numbers in the heading of this document, and be submitted to Dockets Unit, Room 8421, Office of Pipeline Safety, Research and Special Programs Administration, Department of Transportation, Washington, DC 20590.

All comments received before February 12, 1993, will be considered before final action is taken. Late filed comments will be considered so far as practicable. All comments will be available for viewing between the hours of 8:30 a.m. to 5 p.m., before and after the closing date for comments. No public hearing is contemplated, but one may be held at a time and place set in a Notice in the **Federal Register** if requested by an interested person desiring to comment at a public hearing and raising a genuine issue.

Issued in Washington, DC, on December 8, 1992.

George W. Tenley, Jr.,

Associate Administrator for Pipeline Safety, Research and Special Programs Administration.

BILLING CODE 4910-60-M

DEPARTMENT OF THE TREASURY

Public Information Collection Requirements Submitted to OMB for Review

Dated: December 8, 1992.

The Department of the Treasury has submitted the following public information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1980, Public Law 96–511. Copies of the submission(s) may be obtained by calling the Treasury Bureau Clearance Officer listed. Comments regarding this information collection should be addressed to the OMB reviewer listed and to the Treasury Department Clearance Officer, Department of the Treasury, room 3171 Treasury Annex, 1500 Pennsylvania Avenue, NW., Washington, DC 20220.

Internal Revenue Service

OMB Number: New.
Form Number: IRS Form 8833.
Type of Review: New Collection.

Title: Treaty-Based Return Position Disclosure Under section 6114 or 7701(b).

Description: Form 8833 will be used by taxpayers that are required by section 6114 to disclose a treaty-based return position to disclose that position. The form may also be used to make the treaty-based return position disclosure required by Regulations section 301.7701(b)–7(b) for "dual resident" taxpayers.

Respondents: Individuals or households, Businesses or other for-profit, Small businesses or organizations.

Estimated Number of Respondents/Recordkeepers: 6,000.

Estimated Burden Hours Per Respondent/Recordkeeper:

Recordkeeping: 3 hours, 7 minutes.
Learning about the law or the form: 47 minutes.
Preparing and sending the form to the IRS: 53 minutes.

Frequency of Response: Annually.

Estimated Total Reporting/Recordkeeping Burden: 28,680 hours.

Clearance Officer: Garrick Shear, (202) 622–3869, Internal Revenue Service, room 5571, 1111 Constitution Avenue, NW., Washington, DC 20224.

OMB Reviewer: Milo Sunderhauf, (202) 395–6880, Office of Management and Budget, room 3001, New Executive Office Building, Washington, DC 20503.

Lois K. Holland,

Departmental Reports, Management Officer.

BILLING CODE 4830-01-M

Public Information Collection Requirements Submitted to OMB for Review

Dated: December 8, 1992.

The Department of Treasury has submitted the following public information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1980, Public Law 96–511. Copies of the submission(s) may be obtained by calling the Treasury Bureau Clearance Officer listed. Comments regarding this information collection should be addressed to the OMB reviewer listed and to the Treasury Department Clearance Officer, Department of the Treasury, Room 3171 Treasury Annex, 1500 Pennsylvania Avenue, NW., Washington, DC 20220.

Internal Revenue Service

OMB Number: 1545–0915.
Form Number: IRS Form 8332.
Type of Review: Extension.

Title: Release of Claim to Exemption for Child of Divorced or Separated Parents.

Description: This form is used by the custodial parent to release claim to the dependency exemption for a child of divorced or separated parents. The data is used to verify that the noncustodial parent is entitled to claim the exemption.

Respondents: Individuals or households.

Estimated Number of Respondents/Recordkeepers: 150,000.

Estimated Burden Hours Per Respondent/Recordkeeper:

Recordkeeping: 7 minutes.

Learning about the law or the form: 7 minutes.

Preparing the form: 7 minutes.

Copying, assembling, and sending the form to the IRS: 14 minutes.

Frequency of Response: Annually.

Estimated Total Reporting/Recordkeeping Burden: 81,000 hours.

OMB Number: 1545–1013.

Form Number: IRS Form 8612.

Type of Review: Revision.

Title: Return of Excise Tax on Undistributed Income of Real Estate Investment Trusts.

Description: Form 8612 is used by real estate investment trusts to compute and pay the excise tax on undistributed income imposed under section 4981. IRS uses the information to verify that the correct amount of tax has been reported.

Respondents: Businesses or other for-profit.

Estimated Number of Respondents/Recordkeepers: 20.

Estimated Burden Hours Per Respondent/Recordkeeper:

Recordkeeping: 6 hours, 13 minutes.

Learning about the law or the form: 1 hour, 47 minutes.

Preparing and sending the form to the IRS: 1 hour, 58 minutes.

Frequency of Response: Annually.

Estimated Total Reporting/Recordkeeping Burden: 200 hours.

Clearance Officer: Garrick Shear (202) 622–3869, Internal Revenue Service, room 5571, 1111 Constitution Avenue, NW., Washington, DC 20224.

OMB Reviewer: Milo Sunderhauf (202) 395–6880, Office of Management and Budget, room 3001, New Executive Office Building, Washington, DC 20503.

BILLING CODE 4810–35–M

DEPARTMENT OF VETERANS AFFAIRS

Wage Committee; Meetings

The Department of Veterans Affairs (VA), in accordance with Public Law 92–463, gives notice that meetings of the VA Wage Committee will be held on:

Wednesday, January 13, 1993, at 2:30 p.m.
Wednesday, January 27, 1993, at 2:30 p.m.
Wednesday, February 10, 1993, at 2:30 p.m.
Wednesday, February 24, 1993, at 2:30 p.m.
Wednesday, March 10, 1993, at 2:30 p.m.
Wednesday, March 24, 1993, at 2:30 p.m.

The meetings will be held in room 1161, Veterans Affairs Central Office, 810 Vermont Avenue, NW., Washington, DC 20420.

The Committee's purpose is to advise the Chief Medical Director on the development and authorization of wage schedules for Federal Wage System (blue-collar) employees.

At these meetings the Committee will consider wage survey specifications, wage survey data, local committee reports and recommendations, statistical analyses, and proposed wage schedules.

All portions of the meetings will be closed to the public because the matters considered are related solely to the internal personnel rules and practices of the Department of Veterans Affairs and because the wage survey data considered by the Committee have been obtained from officials of private business establishments with a guarantee that the data will be held in confidence. Closure of the meetings is in accordance with subsection 10(d) of Public Law 92–463, as amended by Public Law 94–409, and as cited in 5 U.S.C. 552b(c) (2) and (4).

However, members of the public are invited to submit material in writing to the Chairperson for the Committee's attention.

Additional information concerning these meetings may be obtained from the Chairperson, VA Wage Committee, room 1161, 810 Vermont Avenue, NW., Washington, DC 20420.

Dated: December 3, 1992.

By direction of the Secretary.

Diane H. Landis,

Committee Management Officer.

Sunshine Act Meetings

Federal Register
Vol. 57, No. 240
Monday, December 14, 1992

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

FEDERAL ENERGY REGULATORY COMMISSION

The following notice of meeting is published pursuant to section 3(a) of the Government in the Sunshine Act (Pub. L. No. 94–409), 5 U.S.C. 552b:

DATE AND TIME: December 16, 1992, 10:00 a.m.

PLACE: 825 North Capitol Street, NE., Room 9306, Washington, D.C. 20426.

STATUS: Open.

MATTERS TO BE CONSIDERED: Agenda.

Note.—Items listed on the agenda may be deleted without further notice.

CONTACT PERSON FOR MORE INFORMATION: Lois D. Cashell, Secretary, Telephone (202) 208–0400. For a recording listing items stricken from or added to the meeting, call (202) 208–1627.

This is a list of matters to be considered by the Commission. It does not include a listing of all papers relevant to the items on the agenda; however, all public documents may be examined in the Reference and Information Center.

FEDERAL DEPOSIT INSURANCE CORPORATION

Notice of Agency Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b(e)(2)), notice is hereby given that at 4:05 p.m. on Wednesday, December 9, 1992, the Board of Directors of the Federal Deposit Insurance Corporation met in closed session to consider matters relating to administrative enforcement proceedings and to the probable failure of certain insured banks.

In calling the meeting, the Board determined, on motion of Director C.C. Hope, Jr. (Appointive), seconded by Director Stephen R. Steinbrink (Acting Comptroller of the Currency), concurred in by Acting Chairman Andrew C. Hove, Jr., that Corporation business required its consideration of the matters on less than seven days' notice to the public; that no earlier notice of the meeting was practicable; that the public interest did not require consideration of the matters in a meeting open to public observation; and that the matters could be considered in a closed meeting by authority of subsections (c)(6), (c)(8), (c)(9)(A)(ii), (c)(9)(B), and (c)(10) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(6), (c)(8), (c)(9)(A)(ii), (c)(9)(B) and (c)(10)).

The meeting was held in the Board Room of the FDIC Building located at 550—17th Street, N.W., Washington, DC.

Federal Deposit Insurance Corporation.

Dated: December 10, 1992.

Robert E. Feldman,

Deputy Executive Secretary.

Part II

Pension Benefit Guaranty Corporation

29 CFR Parts 2616 and 2617

Distress Terminations of Single-Employer Plans; Standard Terminations of Single-Employer Plans; Final Rule

PENSION BENEFIT GUARANTY CORPORATION

29 CFR Parts 2616 and 2617

RIN 1212–AA41 and RIN 1212–AA47

Distress Terminations of Single-Employer Plans; Standard Terminations of Single-Employer Plans

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Final rule.

SUMMARY: The regulations in this final rule replace regulations of the Pension Benefit Guaranty Corporation on notices of intent to terminate (29 CFR Part 2616) and determination of plan sufficiency and termination of sufficient plans (29 CFR Part 2617), as modified by a 1986 notice of interim procedures and a 1988 notice of revised termination rules. The regulations being replaced were, to a great extent, rendered obsolete by enactment of the Single-Employer Pension Plan Amendments Act of 1986 and the 1987 Pension Protection Act, which substantially changed the rules governing voluntary terminations of single-employer plans under Title IV of the Employee Retirement Income Security Act of 1974. Although the 1986 and 1988 notices provided interim guidance, more detailed rules and procedures are needed by plan administrators who wish to terminate single-employer pension plans. Part 2616 prescribes the rules and procedures for distress terminations; Part 2617 prescribes the rules and procedures for standard terminations.

EFFECTIVE DATE: January 28, 1993.

FOR FURTHER INFORMATION CONTACT: Harold J. Ashner, Assistant General Counsel, or Renae R. Hubbard, Special Counsel, Office of the General Counsel (Code 22000), Pension Benefit Guaranty Corporation, 2020 K Street, NW., Washington, DC 20006; 202–778–8850 (202–778–1958 for TTY and TDD). (These are not toll-free numbers.)

SUPPLEMENTARY INFORMATION:

Background

On September 2, 1987, the Pension Benefit Guaranty Corporation ("PBGC") published in the **Federal Register** (52 FR 33318) proposed rules governing the voluntary termination of single-employer pension plans covered by Title IV of the Employee Retirement Income Security Act of 1974, as amended ("ERISA"). The PBGC, which administers the pension plan termination insurance program under Title IV of ERISA, published the proposed rules in response to substantial changes made in the insurance program by the Single-Employer Pension Plan Amendments Act of 1986 ("SEPPAA") (Pub. L. 99–272).

Under SEPPAA, single-employer pension plans could be voluntarily terminated only in a "distress" termination or a "standard" termination. Briefly, a distress termination could occur only if specified procedural requirements are met and if the contributing sponsor of the plan and each "substantial" member of its controlled group demonstrate that they are in such poor financial condition that they cannot, realistically, continue to maintain the plan. A standard termination could occur only if specified procedural requirements are met and if plan assets are sufficient to provide all "benefit commitments" (which generally exceed PBGC guaranteed benefits but fall short of all plan benefits).

In order to provide guidance under the new law to plan administrators in terminating single-employer plans pending revisions to the regulations and accompanying forms, the PBGC had published notices of transition rules and interim procedures on April 10, 1986 (51 FR 12489 and 12491, respectively). Those notices summarized SEPPAA's requirements relating to terminations of single-employer plans, and described the specific steps necessary to terminate a plan under SEPPAA. (SEPPAA was enacted on April 7, 1986, and applied to all terminations with respect to which a notice of intent to terminate was filed or issued on or after January 1, 1986.)

To reflect the new statutory rules, the PBGC proposed to revise totally its two principal regulations dealing with the voluntary plan termination process, *i.e.*, Notice of Intent to Terminate for Non-multiemployer Pension Plans, 29 CFR Part 2616, and Determination of Plan Sufficiency and Termination of Sufficient Plans, 29 CFR Part 2617. In keeping with the structure of the SEPPAA amendments, the PBGC proposed the promulgation of two new parts in its regulations: new Part 2616 dealing solely with distress terminations and new Part 2617 dealing solely with standard terminations.

On December 17, 1987, Congress further amended ERISA's voluntary termination requirements by enacting the Pension Protection Act ("PPA") as Title IX, Subtitle D, Part II, of the Omnibus Budget Reconciliation Act of 1987 (Pub. L. 100–203). (Congress subsequently clarified a number of the provisions of both SEPPAA and PPA in the technical corrections portion of the Omnibus Budget Reconciliation Act of 1989 (Title VII, Subtitle H) (Pub. L. 101–239).) PPA was effective December 17, 1987, and the PBGC published a notice of revised termination rules to alert interested persons to the statutory changes (53 FR 1904, January 22, 1988). The notice also stated that the PBGC's final regulations on voluntary terminations would reflect the PPA amendments discussed therein and that the PBGC was in the process of preparing new forms to revise and combine the then-current termination forms, *i.e.*, Forms 444 and 445 and the PBGC portion of IRS/PBGC Form 5310.

On December 22, 1989, the PBGC published a notice of issuance of new termination forms (54 FR 52904), advising pension practitioners that it was issuing new Forms 500 and 501 for standard terminations and Forms 600 and 601 for distress terminations to replace the then-current termination forms. Those new forms, which were issued for use in plan terminations initiated on or after February 1, 1990, reflect the revised rules and procedures for plan terminations under SEPPAA and PPA. To a certain extent, the new forms also reflect the proposed regulations published earlier.

In the notice of issuance, the PBGC advised pension practitioners that provisions in the forms specifying time limits for completing those termination requirements that, under the statute, are to be completed "as soon as practicable" are to be considered as guidelines only until the final regulations are issued. The final regulations incorporate substantially the same time limits as those specified in the forms (although, as discussed below, the final regulations allow more time for filing the standard or distress termination notice with the PBGC). In addition, the forms contain a number of new or revised definitions, many of which are incorporated into this final regulation, as also discussed below.

The PBGC received 57 comments on the proposed regulations. Most of the commenters are professionals whose practice includes the pension benefits area, *i.e.*, attorneys, actuaries, accountants, and benefit consultants or firms; commenters also represent insurance companies, unions, and associations active in the private pension community. The majority of comments focused on the procedures for standard terminations rather than the procedures for distress terminations; as discussed below, the major area of concern, on which 50 comments were received, was the time limits for completing the various steps in the termination process. The PBGC has

reviewed all comments and has decided to make a number of changes, both in response to the comments and as a result of its experience in implementing the new statutory rules.

The discussion that follows deals first with a number of general issues that cut across various provisions of both the standard termination and distress termination regulations. Next is a section-by-section discussion of changes to the standard termination regulation and, then, the distress termination regulation. (The standard termination regulation is dealt with first, both because most terminations are standard terminations and because many of the distress termination rules are merely variants of the standard termination rules.) Many of the provisions in both regulations have been reorganized or rewritten for clarity; this discussion will deal only with significant substantive changes or reasons why requested changes were not made. Unless otherwise indicated, all citations are to sections in the final regulations.

General

PPA Changes

As noted above, after publication of the proposed rules, Congress enacted PPA, making a number of substantive changes in the pension plan termination insurance program. Those changes, insofar as applicable, have been incorporated into these final regulations.

For standard terminations, the major PPA change was to increase the benefits that a plan must be able to satisfy upon termination, i.e., the SEPPAA requirement that a plan be able to provide all "benefit commitments" was replaced by the PPA requirement that a plan be able to provide all "benefit liabilities" under the plan. This PPA change—along with the Retirement Equity Act of 1984 ("REA") (Pub. L. 98–397) and the issuance by the Internal Revenue Service of its final REA regulations (T.D. 8219, 1988–2 C.B. 48; 53 FR 31837, August 22, 1988)—has created a new coordination between Title IV of ERISA and the Internal Revenue Code. In particular, "benefit liabilities" are determined under the Internal Revenue Code, and include certain forms and benefit options that are protected under Code section 411(d)(6). The inclusion of such protected forms and benefit options tends also to deemphasize the importance of the plan termination date to participants' benefit entitlements in a standard termination, since participants may meet the conditions for entitlement after that date.

For distress terminations, PPA made changes in the liquidation and reorganization distress criteria; required that every member of a contributing sponsor's controlled group, rather than only "substantial" members, meet one of the distress criteria; increased termination liability to unfunded benefit liabilities; and eliminated the section 4049 trust, substituting in its place a mechanism (under ERISA section 4022(c)) whereby the PBGC pays participants and beneficiaries a portion of their outstanding benefit liabilities (i.e., unfunded benefit liabilities that are not guaranteed benefits) from the PBGC's employer liability recovery. (A more detailed discussion of the various PPA changes relating to standard and distress terminations appears in the PBGC's Notice of Revised Termination Rules, 53 FR 1904 (January 22, 1988).) The PBGC has revised the proposed regulations throughout to reflect these changes.

Time Limits

As noted above, the vast majority of commenters was concerned with the time limits for various steps in the termination process that were included in the proposed regulations. Those limits in large part implement the "as soon as practicable" standards in ERISA section 4041(b)(2)(A) and (c)(2)(A) (relating to the requirement for filing a termination notice with the PBGC) and ERISA section 4041(b)(2)(D) (relating to the time within which distribution of assets in a standard termination must be completed after the end of the period within which the PBGC may issue a notice of noncompliance ("NONC") pursuant to ERISA section 4041(b)(2)(C)).

One of Congress' goals in revising the termination rules was to simplify and expedite the PBGC's review of terminations under which the PBGC would not be called on to pay guaranteed benefits, thereby permitting faster distribution of plan assets as well as enabling the PBGC to devote more of its resources to those terminations that do impose liabilities on the plan termination insurance program. In furtherance of this Congressional goal, the PBGC attempted in the proposed regulations to keep to a minimum the maximum length of time from the issuance of the notice of intent to terminate ("NOIT") to completion of the distribution of plan assets in a standard termination.

In the case of distress terminations, the PBGC similarly sought to limit the maximum time for various processing steps (in particular, the time for filing the distress termination notice and, in the case of a plan that is sufficient at least for guaranteed benefits and that thus will close out in the private sector, the time for completing the distribution of plan assets). (The overall time for terminating in a distress termination is not subject to precise prescription; among other things, the time needed for the PBGC to make certain required determinations (e.g., as to whether the distress criteria are met and as to the level of plan sufficiency) will vary significantly based on the facts and circumstances of the particular case.) The following discussion will focus, as did the comments, on the standard termination time limits. However, where appropriate, the PBGC has made generally corresponding changes to the distress termination time limits, and has noted those changes below.

While there were two objections to the establishment of any time limits, there was considerably more support for the PBGC's establishment of specific rules. (The PBGC explained the reasons for this approach in the preamble to the proposed regulations, 52 FR at 33322–33323.) However, 49 of the commenters objected that some or all of the time limits set forth in the proposed regulations were too short, and suggested alternatives. For some, the primary concern was the time within which the standard termination notice is to be filed with the PBGC; for most, the primary concern was the time set for distribution of plan assets. The PBGC agrees with these concerns in large part, and has substantially revised the time limits with the comments in mind.

As issued, the proposed standard termination regulation allowed a maximum of 7–11 months from the issuance of the NOIT to completion of distribution. (The 7–11 month period, or 210–330 days, consisted of a period of 60–180 days from issuance of the NOIT to the proposed termination date; 60 days from the proposed termination date to the filing of the standard termination notice; 60 days for the PBGC to review the standard termination notice and to determine whether to issue a notice of noncompliance; and 30 days from the expiration of the PBGC's review period for the plan administrator to complete the distribution of plan assets.) This final regulation increases the overall time period to 14–15 months (with extensions possible); but, more importantly, it reallocates the individual time periods to reflect the public's comments.

Under the final regulations, §§ 2616.22 and 2617.22 (proposed §§ 2616.12 and 2617.12), less time is allowed between the NOIT and the

proposed termination date (decreased from a maximum of 180 days to a maximum of 90 days). This change reflects the PBGC's experience that very few plan administrators propose termination dates in the NOIT (either in a standard or distress termination) that are more than 90 days after the NOIT. (Indeed, one commenter suggested that the minimum 60-day period between the NOIT and the proposed termination date be decreased; however, that is a statutory time period established by ERISA section 4041 (a)(2), (b)(1)(A), and (c)(1)(A), which cannot be decreased by the PBGC.) Moreover, by shortening this time period, the PBGC is better able to lengthen those time periods the commenters expressed concern about without unacceptably lengthening the overall maximum time limit. (The proposed termination date in a distress termination is discussed more fully under "Section 2616.2—Definitions.")

A number of commenters stated that the time period for filing the standard termination notice (120–240 days after the NOIT is issued, but only 60 days after the proposed termination date) was inadequate, noting that the bulk of the processing work necessary to complete notices of plan benefits (which must be issued at or before the time the standard termination notice is filed) and file the standard termination notice with the PBGC is generally not begun until the proposed termination date; before then, the plan's population and participants' and beneficiaries' benefits "as of" the proposed termination date cannot be known with certainty. In response to these comments, the PBGC had lengthened the period for filing the standard termination notice from 60 to 90 days when it established "guidelines" in its 1989 form package. Experience has demonstrated that even more time is needed in many cases, and the PBGC has therefore decided to lengthen this period further, to 120 days after the proposed termination date. (While there is no provision for extension of this 120-day period, the plan administrator may defer its commencement (and thus, in effect, extend the period) if the standard termination notice filed with the PBGC proposes a termination date that is later than the one proposed in the NOIT; in no event, however, may this later proposed termination date be more than 90 days after the date of issuance of the NOIT.) See § 2617.25. The PBGC has made generally corresponding changes (in §§ 2616.2 and 2616.24) to the time limits fof filing the distress termination notice.

A clear majority of commenters objected to the 30-day time limit for completing the distribution of plan assets. (This 30-day time period was measured from the end of the PBGC's review period in a standard termination; in a distress termination sufficient for at least guaranteed benefits, it was measured from the date the plan administrator receives the PBGC's distribution notice.) The reason most cited was the length of time it generally takes to receive a favorable determination letter from the Internal Revenue Service ("IRS"). (In the preamble to the proposed regulation the PBGC suggested that, to alleviate this problem, it would be prudent for plan administrators to file with the IRS early in the procedure (*i.e.*, at or before the time of issuance of the NOIT) (52 FR at 33322). One commenter noted that some IRS districts will not accept early filings; a number of others cited instances in which determination letters were not received until much later than the maximum time allowed in the proposed regulation.) Other reasons given were (1) delays caused by participants' failures to respond to election notices in a timely manner, (2) the time required to complete the purchase of annuity contracts, and (3) the need to liquidate long-term assets (which may have penalties for premature withdrawal) or illiquid assets.

The PBGC is sensitive to these concerns and has therefore decided, as discussed below, to extend significantly the time limits for distribution. Nonetheless, the PBGC reminds plan administrators that the implementation of a decision to terminate a pension plan requires sound and careful planning, and that they should take all appropriate steps to ensure a timely distribution.

Accordingly, the PBGC has increased, from 30 days to 180 days, the time between the date the PBGC's review period ends in a standard termination and the date by which assets must be distributed. See § 2617.28(a); compare proposed § 2617.18(a). This revised time period for asset distribution generally should enable a plan administrator to obtain a determination letter before distribution must be completed.

The final rule for standard terminations also provides that if the plan administrator files a request for a determination letter with the IRS on or before the date that the standard termination notice is filed with the PBGC, but does not receive a determination letter at least 60 days before the expiration of the 180-day distribution period, the time for plan asset distribution will automatically be extended to 60 days after the date of a favorable determination letter provided that the plan administrator notifies the PBGC, prior to expiration of the 180-day distribution period, that the plan is entitled to such an extension. (Because of the similarities between the information needed to issue notices of plan benefits and complete the standard termination notice, and that needed to file a request with the IRS for a determination on the tax qualification of a plan, the PBGC expects that plan administrators will be able to file with the IRS at the same time they file with the PBGC.) In other limited situations, the PBGC may grant a discretionary extension. See § 2617.28(e)-(f).

For distress terminations that are sufficient for at least guaranteed benefits and that thus will close out in the private sector, the PBGC has similarly extended the distribution time limit from 30 days to 180 days. The proposed regulation did not provide for the plan administrator's issuance to participants, prior to distribution, of any notices regarding their plan benefits (except, under proposed § 2616.14(e), in the limited circumstance in which a plan was sufficient for all benefit commitments); this step has been added to the final rule (see "§ 2616.27—Notices of benefit distribution"), and the 180-day distribution time limit is measured from the date the plan administrator completes issuance of the notices of benefit distribution. The regulation also provides for extensions of time similar to those described above for standard terminations. See § 2616.29(a).

The following table illustrates the time line for completing a standard termination under the final rules, assuming that (1) the proposed termination date is the minimum 60 days (rather than, *e.g.*, the maximum 90 days) after the date of issuance of the NOIT, (2) each step is completed on the last day permitted, and (3) there are no extensions.

Standard Termination Time Line 420 Days or Approximately 14 Months

Day 0: Notice of intent to terminate
Day 60: Proposed termination date
Day 180: Notices of plan benefits and standard termination notice
Day 240: Notice of noncompliance period ends
Day 420: Distribution completed

Effects of Failure To Meet Termination Requirements

The proposed regulations noted, in various sections, that if the requirements for a voluntary termination (either standard or distress) are not met, the termination is null and

void. In such circumstances, the plan is ongoing. Several commenters expressed concern about the severity of this sanction for failure to comply with the pertinent requirements.

Two commenters suggested that, rather than nullifying a plan termination, the PBGC permit correction of deficiencies. The PBGC may permit correction of certain minor deficiencies, such as clerical errors, where the rights of the parties involved are not adversely affected. Similarly, where the standard or distress termination notice is incomplete, the PBGC will advise the plan administrator of the missing item(s) of information and permit completion of the notice (see §§ 2616.25(c)(2), 2617.26(c)). Finally, in a distress termination, the PBGC may waive any requirement with respect to notices to be filed with the PBGC if it will be less costly or administratively burdensome to the PBGC to do so (§ 2616.3(c)(2)). In other circumstances, however, the PBGC will not waive or permit "correction" of deficiencies.

The PBGC's discretion in this regard is substantially limited, since many of the pertinent requirements are statutory in nature. Moreover, while some of the requirements represent the PBGC's regulatory implementation of statutory requirements, the PBGC believes that these regulatory requirements should be absolute except where the regulation provides otherwise (*e.g.*, by providing for an extension of a time limit under specified circumstances). The PBGC stresses the importance of planning a termination in advance and carefully following the prescribed procedures.

The changes in the time limits, along with the extension provisions discussed above, should alleviate the commenters' concerns to a great extent. The most commonly missed deadline, other than that for distribution, is the statutory 60-day minimum period between issuance of the NOIT and the proposed termination date, and that normally occurs because the plan administrator miscounted the days. The PBGC has attempted to give greater guidance in the computation of time periods, *e.g.*, in §§ 2616.8 and 2617.9.

Another commenter asked whether a plan termination voided for PBGC purposes is also void for other purposes under ERISA. If a termination is null and void because the requirements in the statute and these regulations are not met, the plan is an ongoing plan under ERISA and the Code. However, the PBGC did not intend to imply, as one commenter suggested, that a proper freezing of accruals before the plan termination date in accordance with ERISA section 204(h) would also be voided.

Conversion of Termination

In the preamble to the proposed regulation, the PBGC stated that, if a proposed termination fails to meet the applicable requirements, that termination cannot be converted into the other type of termination in order to preserve the original proposed termination date (52 FR at 33325). The PBGC has reconsidered its position, and has decided that there is no absolute bar against the conversion of a standard termination to a distress termination, or vice versa. The PBGC expects such conversions to be extremely rare, and will determine whether to permit conversion on a case-by-case basis, taking into account the effect conversion would have on the rights of all parties involved.

Penalty Authority

The PBGC notes that PPA enhanced its enforcement authority by adding section 4071 (29 U.S.C. 1371) to ERISA (OBRA '87 section 9314(c)(1)). Section 4071 (as clarified by OBRA '89 section 7881(i)(3)(B)) authorizes the PBGC to assess a penalty when, among other things, a person fails to provide a notice or other material information required under subtitles A, B, C, or D of Title IV of ERISA, or any regulations prescribed thereunder, within the applicable time limit specified therein. The penalty is payable to the PBGC and may not exceed $1,000 for each day that the failure continues.

Effective Date

One commenter requested an effective date of 90 days after publication to allow "plan administrators and their consultants to adapt to the regulations and to develop the appropriate compliance procedures." Another commenter requested that the effective date of the final regulations be 60 days after publication "to allow those terminations which are essentially in process to be completed in accordance with the prior rules."

The PBGC does not believe that a significant delay in the effective date of these regulations (beyond the usual 30 days from date of publication) is necessary, given that the time limits for various stages in the termination process have been substantially increased; the new forms containing many of the basic procedures included in these regulations have been in use since February 1990; and the pension community has generally been following the other basic provisions in the proposed regulations. The PBGC notes, also, that the regulations apply only to terminations with respect to which the NOIT is issued on or after the effective date; terminations in process thus may be completed in accordance with the prior rules. However, the PBGC has decided to defer the effective date slightly (to January 28, 1993) so as to afford adequate time for OMB extension of approval, under the Paperwork Reduction Act, of the collection of information requirements in this final rule and the implementing forms and instructions. (Elsewhere in today's **Federal Register**, the PBGC is publishing a notice of its request to OMB, along with a copy of the revised version of the forms and instructions.)

Standard Terminations

Section 2617.2—Definitions.

Affected party: One commenter noted that there may be circumstances in which a former employee organization would have sufficient ties to an employee benefit program to be properly included as an affected party. The PBGC agrees and included a modified definition in its old termination regulation, as amended in May 1992 (57 FR 22167, May 27, 1992).

Date of distribution and *Irrevocable commitment:* A number of commenters asked for clarification concerning when *distribution* takes place. Several requested that the regulations explicitly provide that the date of *distribution*, in the case of a purchase of an *irrevocable commitment* (*i.e.*, an annuity contract) from an insurer, is the date the liability is transferred to the insurer rather than the date of issuance to the participant of a certificate or policy of insurance.

The PBGC added definitions of *date of distribution* and *irrevocable commitment* to its old termination regulation in May 1992 (57 FR 22167, May 27, 1992), and has included these definitions in this final regulation. These definitions clarify that, as suggested by the commenters, a distribution of benefits through the purchase of an irrevocable commitment occurs when the obligation to provide a benefit to an individual passes from a pension plan to an insurer.

Existing collective bargaining agreement: The PBGC added this definition to clarify the circumstances in which a collective bargaining agreement is deemed to "exist" for purposes of ERISA section 4041(a)(3) and § 2617.5.

Insurer: One commenter requested that the definition of *insurer* be modified to permit plan administrators to purchase irrevocable commitments only from "those insurance companies doing business in states with guaranty

funds and who have an A+ rating with Best's Reports." The definition in the proposed and final regulations is one that has been used for many years by the PBGC in its regulations, *e.g.*, 29 CFR part 2617. On June 21, 1991, the PBGC issued an Advance Notice of Proposed Rulemaking ("ANPRM") (56 FR 28642, 28643) soliciting public comment on whether additional regulation concerning plan administrators' selections of annuity providers for terminating plans is needed and, if so, what such regulation should include. An extended comment period on the ANPRM ended September 19, 1991, and those comments and possible regulatory action are under active consideration. If the PBGC decides to change the definition of insurer as a result of that consideration, it will do so as part of a separate rulemaking action.

Majority owner: The PBGC has added a definition of "majority owner." (The percentage ownership requirement for "majority owner" status under this definition is "50 percent or more" rather than "more than 50 percent.") As discussed more fully below (see "§ 2617.7—Facilitating plan sufficiency"), majority owners may facilitate a standard termination by electing to forego receipt of all or part of their benefit liabilities until the benefit liabilities of all other participants have been satisfied.

Participant: One commenter suggested that the definition of *participant* exclude non-vested former employees "who clearly are not eligible for benefits as a result of plan termination, absent an IRS finding of a pre-termination 'partial termination.'" Whether and to what extent former employees are entitled to receive benefits upon plan termination depends on the definition of "benefit liabilities"; the IRS, rather than the PBGC, has the authority to define that term.

Nonvested, as well as partially or fully vested, former employees may lose any entitlement they may have to benefit liabilities if they are cashed out under the terms of the plan and in accordance with applicable law and regulations. See section 411(a)(7) of the Internal Revenue Code ("Code"); Treas. Reg. § 1.411(a)-7. Whether and for how long former employees who were not cashed out retain benefit entitlements in the event of plan termination is determined under the Code.

The PBGC's *participant* definition governs only entitlement to the various notices in a termination, not entitlement to benefits. The rules governing entitlement to notice, however, should generally match those governing entitlement to benefits. (In particular, the PBGC does not want to burden plan administrators with a requirement to give notice to large numbers of individuals who are not entitled to benefits.) Pending further guidance from IRS, plan administrators wishing to terminate their plans must determine whether former employees retain benefit entitlements upon plan termination; the final regulation, in effect, requires plan administrators to provide such individuals with notice if they are entitled to benefits. Thus, former employees who are "retaining" credited service under the plan are included within the definition of "participant" and are therefore entitled to notice of the termination. Finally, the PBGC added a number of other definitions to incorporate PPA changes, or for clarity or ease of reference.

Section 2617.4—Administration of plan during pendency of termination proceedings.

Proposed § 2617.4 provided that, during the period between the issuance of the NOIT and the end of the PBGC's review period, the plan administrator may not make any distributions to participants "pursuant to or in furtherance of the plan's termination," but could carry out "the normal operations of the plan." Several commenters requested clarification as to whether particular distributions may be permitted as part of the plan's "normal operations."

The PBGC sought to strike a balance in this provision between the need to permit continued operation of the plan with as little disruption to participants as possible during the termination proceedings, and the need to protect plan assets so as to ensure fair treatment of all participants in accordance with their allocation rights under ERISA section 4044. It is difficult, however (as pointed out by the commenters), to distinguish between "normal course" distributions and those pursuant to or in furtherance of a plan's termination. The PBGC therefore has developed (in § 2617.4) rules that would permit lump sum and irrevocable commitment distributions under specified circumstances, but would limit attempts to circumvent termination and distribution requirements through premature distributions. The PBGC stresses that any distribution in furtherance of a termination (whether before or after issuance of the NOIT) before the PBGC's review period ends is a violation of ERISA section 4041(b)(2)(D).

Section 2617.5—Challenges to plan termination under collective bargaining agreement.

This section prescribes rules that apply when a plan termination is challenged on the grounds that the termination would violate the terms and conditions of an existing collective bargaining agreement. The PBGC received several comments on these provisions.

Three commenters suggested that the PBGC should make at least an initial determination as to whether the termination violates an existing collective bargaining agreement and not automatically suspend the termination until there is a final settlement of the dispute. Alternatives suggested were that PBGC at least "review the complaint to eliminate frivolous claims"; make an interim determination that there is "reasonable cause" for the challenge; or make a determination as to the legitimacy of the challenge on the basis of "an opinion of counsel of the plan administrator." The commenters expressed concern about the delay in the termination proceeding pending resolution of the challenge, and the effect of the delay on participants' benefits under the plan to be terminated and under any replacement plan.

The PBGC believes that it is not the appropriate body to decide whether a termination would violate the terms and conditions of a collective bargaining agreement. Labor-management relations law provides mechanisms for resolving such disputes, as do many collective bargaining agreements. The PBGC lacks the expertise needed to make such decisions and, in any event, cannot limit the authority of the usual labor-management forums to decide the same issues. Moreover, because of the many variables that may affect the resolution of such a challenge (*e.g.*, the bargaining history), the PBGC believes that it should not be making any determinations (even as to a claim of frivolity) regarding the merits of a dispute. Therefore, the PBGC has not changed the regulation in this respect.

In the preamble to the proposed regulation, the PBGC stated that the list of "formal challenges" was "intended to be all inclusive" (52 FR at 33321). One commenter approved of this approach. Another suggested, however, that it is "inappropriate for the PBGC to impose a formalized scheme and determine by regulation what types of actions by the parties to the collective bargaining agreement warrant a suspension of the termination process."

The PBGC sought to limit the types of challenges that would trigger suspension of a termination, in an effort to avoid suspension based on "challenges" that were of an "informal" or "preliminary" nature. This approach

poses the risk, of course, that one or more types of challenges could be overlooked; indeed, three commenters correctly pointed out that the proposed regulations erroneously omitted Railway Labor Act challenges. The PBGC agrees with the commenters that the list should not be all-inclusive, and has revised § 2617.5 accordingly.

Finally, the PBGC has clarified that it has the authority to suspend a termination proceeding under § 2617.5 at any time before the termination process (including distribution of plan assets) is completed. The proposed regulation required that PBGC be notified of a formal challenge by the end of its review period; it did not say that the PBGC was precluded from acting if the notification came later. While the PBGC's authority to suspend a termination under section 4041(a)(3) is not limited to the review period, it nonetheless wishes to encourage early filing with the PBGC of any notice of challenge to the proposed termination. Therefore, paragraph (a) of § 2617.5 provides that the PBGC will suspend a proposed termination if it receives notice before the review period ends, and that it may do so if it receives such notification after the end of the review period but before the termination process has been concluded. (PBGC Opinion Letter 89–1, in dictum, contained language suggesting that the PBGC does not have the authority to suspend a termination once the review period ends; that language is incorrect and is hereby rescinded.)

Section 2617.6—Annuity requirements.

This section sets forth the general requirement that benefits payable as an annuity under a plan be provided in annuity form through the purchase of a single premium, nonparticipating, nonsurrenderable annuity from an insurer. In the proposed regulation, exceptions to the annuity requirement and rules governing the form of annuity were reserved because of the need to determine what changes in the PBGC's previous rules were necessary to conform to the requirements of the Retirement Equity Act of 1984 ("REA"). Those rules, plus rules delineating when participating annuities may be purchased, have been added to the final regulation. The PBGC consulted with the IRS in formulating these rules, and intends that they be consistent with provisions of the Code and IRS regulations thereunder in all respects.

In the preamble to the proposed regulation, the PBGC asked for public comment on the proper interaction of REA with ERISA Title IV (52 FR at 33320). The PBGC received suggestions from three commenters on REA issues. The first related to the interaction of REA section 301 "early retirement" benefits and the proposed definition of "benefit commitments"; this is no longer a concern since "benefit liabilities" clearly includes REA section 301 "early retirement" benefits. A second commenter suggested that, where a plan provides for a lump sum option, there was a conflict between the REA rule prohibiting elimination of optional benefit forms and the PBGC's requirement (proposed § 2617.6(a)) that any benefits payable in annuity form be provided through the purchase of "nonsurrenderable" annuities. The PBGC disagrees; an annuity contract may be "nonsurrenderable" and still provide for all optional benefit forms upon a participant's reaching retirement age. Finally, the third commenter stated that the PBGC should not require annuities when the present value of the benefit is $3,500 or less; the regulation so provides in § 2617.6(b) (as did § 2617.4(b)(2) of the old termination regulations).

The PBGC notes that § 2617.4(b) of the old termination regulations contained language suggesting that a participant who is in pay status may not receive a lump sum distribution. That language, which was intended to prohibit the involuntary cashout of pay status benefits and not to prohibit elective cashouts, has been the source of some confusion; the corresponding provision in the final regulation (§ 2617.6(b)) has been clarified accordingly.

The PBGC is aware that it may be difficult to purchase annuity contracts for small benefits that exceed $3,500 in value. Plans may of course provide for a lump sum cashout in such circumstances, provided that there is participant and spousal consent. Absent such consent, the plan administrator must find an insurer willing to provide the benefit in order to complete the distribution of assets in a standard termination.

Another commenter asked that the PBGC adopt a position on the use of participating annuity contracts consistent with that of the IRS. The PBGC has added a new paragraph (d) to § 2617.6 to define the circumstances in which the plan administrator may satisfy the annuity requirement through the purchase of participating annuities.

Section 2617.7—Facilitating plan sufficiency.

Section 2617.7 of the proposed regulation provided rules whereby a contributing sponsor could make a commitment, at any time prior to the filing of a standard termination notice, to provide sufficient assets to make the plan sufficient for benefit commitments. The final regulation has been modified to provide that the commitment must be for benefit liabilities (pursuant to PPA), and to permit members of the contributing sponsor's controlled group also to make such a commitment.

One commenter suggested that the contributing sponsor be permitted to make a sufficiency commitment at any time. The PBGC has not adopted this suggestion because the value of a sufficiency commitment is to be taken into account by the enrolled actuary in certifying that the plan is sufficient for benefit liabilities. That certification must be made as part of the standard termination notice in order for the termination to proceed; accordingly, the regulation requires that the sufficiency commitment be made by the time the standard termination notice is filed. The commenter was concerned that an already sufficient plan without such a commitment might become insufficient during the distribution period and thus be unable to terminate in a standard termination; in such circumstances, the contributing sponsor or a controlled group member may of course provide the necessary funds without having first provided a commitment.

Another commenter requested that the PBGC relax its absolute rule requiring bankruptcy court approval of the commitment if the person making the commitment is in bankruptcy. The commenter suggested that such approval might be unnecessary if some other person not in bankruptcy (e.g., a principal shareholder) were to guarantee the commitment. The PBGC agrees and has provided in the final regulation (§ 2617.7(a)(2)(iii)) that bankruptcy court approval is not required if a non-bankrupt person unconditionally guarantees that the commitment will be met at or before the time distribution of assets is required in the standard termination.

Another commenter suggested that the PBGC include a provision permitting a principal owner "to waive a part of his benefit in order that all other participants would receive full benefits." The PBGC has decided that, in order to facilitate the termination of the plan and distribution of plan assets in a standard termination, a person who is a majority owner may agree to forego receipt of all or part of his or her benefit until the full plan benefits of all other plan participants have been satisfied. (In accordance with Code provisions and IRS regulations thereunder, if the present value of the benefit is more than $3,500, the spouse of the majority owner must consent to this alternative treatment of the benefit. See Treas. Reg.

§§ 1.411(d)-4 and 1.417(e)-1.) An election to forego payment of benefits is permitted merely to facilitate a standard termination; if assets become available when final distribution occurs, such assets must be used to satisfy the benefit liabilities of the majority owner before any assets may revert to the contributing sponsor.

For purposes of this provision, the definition of "majority owner" tracks that of "substantial owner" in ERISA section 4022(b)(5), except that it requires a different percentage ownership and does not include the 60-month look-back provision. The PBGC has defined "majority" to mean "50 percent or more" rather than "more than 50 percent" in order to permit use of this provision by two-person businesses in which ownership is evenly divided. The PBGC considered whether it should permit participants other than majority owners (in particular, substantial owners who are not majority owners) to elect such an alternative treatment of their benefit, but decided not to out of concern that they might be coerced into so electing. The "50% or more" test for majority owner status should effectively eliminate the risk of such coercion.

Sections 2617.8 and 2617.9—Filing with the PBGC; Computation of time.

Section 2617.8 of the proposed regulations contained rules for filing as well as rules for computing time limits. The PBGC has separated the filing and the time limit computation provisions into two sections (§§ 2617.8 and 2617.9).

The PBGC received six comments objecting to the rule that a document is not "filed" with the PBGC until it is received by the PBGC. Several commenters pointed out that most documents filed with the federal government are deemed filed when mailed, if properly addressed and postmarked by the United States Postal Service. The PBGC is aware of the general rule and has adopted it in a number of its regulations (see, e.g., 29 CFR § 2615.6). However, for purposes of these termination regulations, the PBGC believes the rule must be otherwise. As stated in the preamble to the proposed regulations, the use of the postmark date as the filing date, as in effect under the old termination regulations, proved difficult to administer. Moreover, PBGC's time for reviewing proposed terminations is shorter under the new statutory provisions. For these reasons, the PBGC has decided to define filing as the date of receipt.

Section 2617.10—Maintenance of plan records.

Section 2617.10 (proposed § 2617.9) requires the plan administrator or contributing sponsor to maintain certain plan records for a six-year period following the filing of the post-distribution certification. (The PBGC notes that most or all of the plan records required to be maintained under this provision already must be preserved and maintained for other purposes under section 107 of Title I of ERISA.) The exclusion in the proposed regulation for records with respect to participants in pay status for more than one year as of the termination date has been deleted. The PBGC developed this exclusion in recognition of the fact that many plans do not keep records for pay status participants indefinitely; it did not intend, however, to exclude such records if they were kept and were used in determining the participant's plan benefits as part of the termination process. Finally, the PBGC has added a new paragraph (c) (which retains the requirement in § 2617.23 of the PBGC's old termination regulation), providing that the records to be retained shall be made available (or submitted) to the PBGC upon request.

Section 2617.22 (proposed § 2617.12)—Notice of intent to terminate.

In § 2617.22(b), the PBGC added rules to specify the effect on the termination process if additional affected parties are discovered after issuance of the NOIT, in response to numerous inquiries since the proposed regulations were published. In § 2617.22(d), new paragraph (6) reflects comments that affected parties should be informed of the effect of a standard termination upon their accrual of benefits and service under the plan. Paragraphs (d)(7) and (8), which were not present in the proposed regulation, were added as part of an amendment to the PBGC's old termination regulation issued as an interim rule (56 FR 57980, November 15, 1991). Finally, paragraphs (d)(9) and (e), also not present in the proposed regulation, were the subject of an amendment to the old termination regulation that became final after notice and comment in June 1992 (57 FR 22167, May 27, 1992).

The PBGC has also added a new paragraph (f) providing, in the case of a spin-off/termination transaction, that the plan administrator give participants and beneficiaries in the ongoing portion of the original plan a notice describing the transaction. This notice must be provided no later than the time the plan administrator completes the issuance of the notice of intent to terminate. In order to have a valid termination in a spin-off/termination transaction involving asset reversions to the contributing sponsor, plan administrators must comply with the Implementation Guidelines jointly issued by the Departments of the Treasury and Labor and the PBGC; those guidelines require that benefits of participants be fully vested as of the date of termination, that benefits of participants covered by the ongoing portion of the original plan be annuitized, and that all participants be given advance notice of the transaction in similar time and manner as if the entire original plan were being terminated. Paragraph (f) implements the advance notice requirements of the guidelines.

Section 2617.23 (proposed § 2617.13)—Issuance of notices of plan benefits.

The PBGC added a new paragraph (c), dealing with the effect on the termination process if additional affected parties are discovered after issuance of the notices of plan benefits; these rules are similar to those noted above under § 2617.22.

Section 2717.24 (proposed § 2617.14)—Form and contents of notices of plan benefits.

Six commenters objected to the provision in proposed § 2617.14(c)(4) that, if the amount of benefit given in a notice is an estimate, "benefits paid will in no event be less than the estimate." Reasons given, variously, were that a plan administrator should be allowed to correct mathematical or clerical errors and that a participant should not get a windfall because of such mistake. The PBGC agrees and has revised § 2617.24(c)(4) accordingly.

One commenter suggested that the regulation should clarify that the benefit given in the notice is "the monthly income and not the lump sum value." The PBGC expects the plan administrator to give benefit information in the manner deemed to be most meaningful to participants, i.e., the monthly benefit (if a benefit may or must be paid as an annuity) and the estimated value of a lump sum benefit (if a benefit may or must be paid as a lump sum), and has not changed the regulation in this respect.

A number of comments were received concerning the notices to persons with benefits in pay status, as required under proposed § 2617.14(d). One commenter suggested that paragraph (d)(4), relating to additional information to be given to persons in pay status for one year or less, is burdensome and requested an explanation. Several commenters suggested that the notice to persons in pay status should be deleted as confusing and that persons in pay status less than one year should not be given an opportunity to request a

recalculation of their benefit. The PBGC believes that the statute requires that adequate benefit information be given to all participants and beneficiaries, including those in pay status, in order that errors may be corrected and to reassure them concerning the amount of their benefit. However, because many plan administrators do not keep full underlying data for persons who have been in pay status for some time, the final regulation relieves them (as did the proposed regulation) of the burden of providing such data for persons who have been in pay status for longer than one year.

Several commenters requested clarification of the information concerning lump sum benefits that proposed § 2617.14(e)(5) (§ 2617.24(e)(6) of the final regulation) required be given to persons who will be receiving their benefits in that manner. One suggested that the requirement that plan administrators explain how lump sums are calculated could be burdensome to plan administrators, and may also be excessive information for participants. Another suggested that the requirement (in proposed § 2617.14(e)(5)) for "an explanation of how the interest rate is used to calculate the lump sum" duplicates the requirement (also in proposed § 2617.14(e)(5)) for a statement that "the higher the interest rate, the smaller the lump sum amount." A third commenter suggested that additional information "describing the possible effect of the interest rate on future benefits would be appropriate."

The PBGC has not made any changes in response to these comments. Notice of how a lump sum is calculated is an essential part of the benefit information required under the statute. Further, it is the PBGC's experience that many people do not understand that there is an inverse relationship between the interest rate and the lump sum amount, and it is therefore appropriate to require a statement to that effect in the notices. Finally, the regulation sets minimum requirements for inclusion in the notices of plan benefits; the PBGC did not intend to preclude plan administrators from including any additional explanatory material, and encourages plan administrators to do so where appropriate.

Several commenters objected to the requirement in proposed § 2617.14(f)(1) that benefit information as to amount and form be given in the plan's "normal" form. They were concerned that, while the "normal" form under most plans is a qualified joint and survivor annuity for married participants, the plan administrator often does not know the marital status of a participant or the age of his or her spouse. The PBGC agrees with these comments and has changed § 2617.24(f)(1) to permit information concerning the amount and form of the benefit payable at normal retirement age to be given with respect to "any form permitted under the plan."

With respect to proposed § 2617.14(f)(2), one commenter read the provision to require benefit estimates for all optional forms of benefits and requested clarification as to whether early retirement benefit estimates need be given only with respect to the earliest retirement age. The PBGC did not intend to require that benefit estimates be given for any forms other than (1) the normal form (changed in § 2617.24(f)(1) to any permitted form), and (2) in the case of an early retirement benefit, the form payable at the earliest retirement age. The final regulation has been clarified accordingly.

Proposed § 2617.14(f)(3)–(5) required information concerning lump sum benefits to be given to participants who are not in pay status and for whom either the form or starting date of the benefit is not known. In general, such participants will not be close to retirement. One commenter noted that whether benefit amounts would be small enough to meet the $3,500 test for non-consensual cashout may depend on variables not known at the time the notice is given to these persons. Another suggested that participants should receive essentially the same information whether a lump sum cashout is consensual or nonconsensual. The PBGC agrees with these comments and has revised § 2617.24 (e) and (f) accordingly.

Finally, the PBGC notes that its use of the proposed termination date for certain purposes under this section serves merely to facilitate the preparation of the notices of plan benefits, and is not intended to alter the rules governing the determination of benefit liabilities.

Section 2617.25 (proposed § 2617.15)—Standard termination notice.

This section was revised to provide that the standard termination notice is to be filed on PBGC Form 500 (which includes Schedule EA–S, the enrolled actuary certification of sufficiency). Information similar to that required under proposed § 2617.15 (b) and (c) is now found in the forms, and those provisions are not included in the final regulation. New § 2617.25(b) ("Supplemental notice requirements"), along with certain of the information that is now in PBGC Form 500, was the subject of an amendment to the PBGC's old termination regulation that became final after notice and comment in June 1992 (57 FR 22167, May 27, 1992).

One commenter questioned the PBGC's authority to obtain information regarding reversions of residual assets to the contributing sponsor, arguing that the statute "only allows the PBGC to request such information as is necessary to determine whether adequate notices have been provided [and whether the] plan is sufficient for benefit [liabilities]." The PBGC disagrees; its role in overseeing the termination of sufficient plans extends beyond that suggested by the commenter. Plan terminations involving reversions of residual assets must comply with the PBGC/IRS/DOL Joint Implementation Guidelines as well as ERISA section 4044 and 29 CFR 2618. Thus, PBGC's role in enforcing the requirements of Title IV clearly requires that the PBGC obtain information regarding asset reversions.

Section 2617.26 (proposed § 2617.16)—PBGC action upon filing of standard termination notice.

A new paragraph (e) has been added to clarify that PBGC has continuing authority to suspend or nullify a proposed termination if it finds such action necessary to carry out the purposes of Title IV of ERISA.

One commenter suggested that the PBGC specify a time period within which it will acknowledge receipt of the standard termination notice. It has been the practice of the PBGC to issue an acknowledgement to the plan administrator upon receipt of the standard termination notice stating the date of receipt, and it intends to continue this practice. The PBGC has not experienced a problem in this regard, and does not believe it necessary to include any specific time limit for acknowledgement in the regulation.

Section 2617.27 (proposed § 2617.17)—Notice of noncompliance.

One commenter suggested that, to avoid uncertainty on the part of a plan administrator, a notice of noncompliance should be sent by certified mail and timed to arrive during the PBGC's 60-day review period. As with the preceding discussion, the PBGC is not adopting this suggestion because its experience has not shown a problem in this respect. The PBGC notes, however, that while it may issue a notice of noncompliance at or near the end of its 60-day (or extended) review period, it generally issues such notices early in the review period.

Proposed § 2617.17(c) provided that a plan administrator may appeal a notice of noncompliance under PBGC's regulation governing administrative

appeals (29 CFR part 2606, subpart D) and that filing an appeal stays the termination process until the PBGC issues its decision on the appeal. In the preamble to the proposed regulation, the PBGC asked for public comment on the appropriateness of the proposed automatic stay during the PBGC's administrative review process. The PBGC received only one comment, which noted with approval that the stay "preserves the termination process without adverse impact until the appeal is resolved"; the regulation has not been changed in this respect.

However, upon further consideration, the PBGC has changed § 2617.27(c) of the final regulation to provide that a plan administrator may request reconsideration of the determination, rather than requiring that an appeal be filed. The issues involved in review of a notice of noncompliance will ordinarily not be of sufficient complexity to warrant the need for the appeals procedure. The PBGC believes that the streamlined reconsideration process under Subpart C of Part 2606 will better serve the interests of the plan and affected parties.

Proposed § 2617.17(d) provided that, when a notice of noncompliance has been issued, the plan administrator must notify affected parties that "the plan is not going to terminate." One commenter suggested that this would be confusing if reinitiation of the termination were intended. Another suggested that the regulation clearly state that issuance of a notice of noncompliance will not prevent initiation of a new termination at any time after the notice is issued. The PBGC agrees with these comments, and has changed § 2617.27(d) to provide that the plan administrator may inform participants, when notifying them of a notice of noncompliance, that a new termination is contemplated.

Section 2617.28 (proposed § 2617.18)—Closeout of plan.

Paragraph (b) was revised to make clear that a determination of plan sufficiency for benefit liabilities must take into consideration all other liabilities of the plan. Such liabilities include, for example, actuarial fees, premiums owed to the PBGC, and other administrative expenses for which the plan is liable. The PBGC emphasizes that plans undergoing standard terminations are liable for premiums through and including the plan year in which assets are distributed; failure to pay such premiums constitutes a violation of Title IV of ERISA. Distribution of a plan's benefit liabilities in a standard termination without taking into account the plan's premium obligation may result in the invalidation of the standard termination or a civil action by the PBGC against the plan administrator in his or her personal capacity.

A number of commenters were concerned with the requirement in proposed § 2617.18(c) that the plan administrator give participants and beneficiaries, as part of a distribution through the purchase of annuities, "the annuity contract or a certificate showing the insurer's name and address and clearly reflecting the insurer's obligation to provide the benefits purchased." One commenter suggested that the obligation should be placed on the insurer rather than the plan administrator. Another stated that it is impossible to predict the amount of time necessary for an insurer to issue annuity certificates in any given case and suggested that the regulations permit their issuance in the ordinary course of business.

The PBGC agrees that the plan administrator would have access to a contract or annuity certificate only through the insurer, and recognizes that it often takes a considerable period of time for the insurer to provide such a contract or certificate. Nevertheless, the PBGC is concerned that participants and beneficiaries be given timely information concerning who is obligated to provide their annuity benefits and to whom they may go for answers concerning their benefits. Accordingly, the PBGC has revised § 2617.28 to provide, in paragraph (g), that evidence of the insurance may be provided either by the insurer or by the plan administrator. Further, such evidence may be in the form of a contract or certificate (as described above) or, if neither is available prior to the deadline for filing the post-distribution certification, a written notice from the plan administrator giving the necessary information. If the latter option (a written notice from the plan administrator) is used, each participant or beneficiary must be given the contract or certificate when available.

Paragraph (h) was revised to provide that the post distribution certification is to be filed on PBGC Form 501. Information similar to that required under proposed § 2617.18(f) is now found in the form and these provisions are not included in the final regulation.

The PBGC notes that the requirement of § 2617.28 to provide participants and beneficiaries (in the event of distribution through the purchase of irrevocable commitments) with a copy of the annuity contract or a notice or certificate of annuity contract, and to provide the PBGC (in all cases) with a post-distribution certification, are requirements that relate to, but are not part of, the distribution of all benefit liabilities in a standard termination. As the PBGC stated in its proposal to amend 29 CFR Part 2617, (56 FR 58014, 58015, November 15, 1991): "Although the written notice or certificate must be provided before the [post-distribution certification] can be filed and the termination thus completed, the distribution normally will occur before that notice or certificate is provided." Section 2617.28 (as well as § 2617.3(b)(5)) has accordingly been revised to clarify that the contract, notice, or certificate and the filing of the post-distribution certification are not part of the distribution.

One commenter suggested that the PBGC permit distribution of annuity contracts through the "bulk payment" method. Under this method, while the insurer is irrevocably committed to providing the benefits to participants, the insurer does so each month by sending a single check to the plan trustee who, in turn, makes payments to the individual participants. In the event the plan trustee for any reason does not perform the individual payment function, the insurer is obligated to make the payments itself (or to make arrangements with another person or entity to assume the individual payment function). The bulk payment method is permissible so long as the requisite "irrevocable commitment" exists, i.e., if the obligation has irrevocably passed from the plan to the insurer, and the plan's trustee is thus serving only as an agent of the insurer.

The PBGC has received many inquiries from plan administrators regarding how to complete the distribution of assets if one or more participants cannot be located. If the plan administrator has been unable to locate participants after having made a reasonable effort to do so, the plan administrator must purchase irrevocable commitments for each participant who has not been located. In the alternative, if the participant's benefit is valued at $3,500 or less and would otherwise be distributed in a lump sum, the plan administrator should deposit the monies that would otherwise be distributed into an individual interest-bearing account opened in the participant's name at a federally insured institution.

The PBGC, however, recognizes that plan administrators may confront difficulties in locating financial institutions willing to open individual interest-bearing accounts for missing participants, particularly where the benefit amounts are small. In the limited case where a plan administrator has made every reasonable effort to locate

missing participants and to locate institutions that are willing to open individual interest-bearing accounts for them, but is still unable to complete the distribution in this manner, then the use of a pooled interest-bearing account may be appropriate. If such an account is opened, it must be maintained by a fiduciary designated by the plan administrator who continues to have ongoing fiduciary obligations to those missing plan participants. The fiduciary must keep clear, up-to-date records of each participant's opening balance and earnings throughout the life of the account and must be available to make every reasonable effort to assist those participants who do come forward and claim their benefits. PBGC Opinion Letter 83–24 is modified in this respect.

Finally, the PBGC reminds plan administrators of the need to follow plan terms and all legal requirements in distributing plan assets. For example, each participant must be offered all optional forms of benefit for which he or she is eligible under the terms of the plan, and all required consents must be obtained. Moreover, in valuing benefits to be provided in a lump sum, the plan's actuary must use the interest rate or rate structures required by sections 411(a)(11) and 417(e)(3) of the Internal Revenue Code and the regulations thereunder. Failure to comply with any such requirements may result in invalidation of the standard termination.

Distress Terminations

Section 2616.2 Definitions.

The PBGC has made changes to the definitions of "affected party" and "participant" that parallel the changes discussed under the standard termination regulation.

The PBGC added a definition of "existing collective bargaining agreement" that is identical to the definition added to the standard termination regulation.

The definition of "proposed termination date" has been changed to parallel, generally, that in the standard termination regulation, which permits the plan administrator to propose a termination date in the standard termination notice that is later than the one proposed in the NOIT (but no later than 90 days after the date of issuance of the NOIT). In the preamble to the proposed regulation, the PBGC said that it was not permitting the plan administrator to change the proposed termination date because, in most distress terminations, the contributing sponsor and members of its controlled group are experiencing severe financial hardship and permitting a change in the proposed termination date would pose a significant risk to the PBGC (see 52 FR at 33324). One commenter objected, arguing that there may be circumstances in which the plan administrator may need to choose a later date to facilitate the plan termination, and noting that the PBGC could protect its interests by seeking establishment of a date it deems appropriate under section 4048 of ERISA. Upon reconsideration, and in view of the decreased time period within which a proposed termination date must fall under § 2616.22(a) (decreased from a 120-day period, i.e., 60–180 days after the NOIT, to a 30-day period, i.e., 60–90 days after the NOIT), the PBGC agrees that plan administrators in distress terminations should be given some flexibility, and has modified the regulation to provide that the plan administrator may change the proposed termination date in the distress termination notice to a later date, but no later than 90 days after the notice of intent to terminate except with PBGC's approval. The PBGC expects that it will rarely approve a later proposed termination date.

In the preamble to the proposed regulation, the PBGC solicited public comment on the issue of whether ERISA section 4048 continues to authorize the establishment of retroactive termination dates. Two commenters argued that retroactive termination dates should not be permitted, relying primarily on the increased emphasis, in SEPPAA, on advance notice to participants of a proposed termination date under ERISA section 4041. The PBGC has concluded that nothing in SEPPAA or PPA changed the rules, pursuant to ERISA section 4048, governing the establishment of retroactive termination dates to protect the insurance program. The PBGC intends to continue its long-standing policy (see 45 FR 80941, December 8, 1980) of seeking retroactive dates in appropriate circumstances.

The definitions of "date of distribution" and "insurer" are discussed in the standard termination portion of this preamble. Also, as in the standard termination regulation, the PBGC has added a number of other definitions to incorporate PPA changes, or for clarity or ease of reference.

Section 2616.3 Requirements for distress termination.

Section 2616.3(d)(1) restates the first statutory distress test (ERISA section 4041(c)(2)(B)(i)). That test (often referred to as the "liquidation test"), refers explicitly only to liquidations under federal bankruptcy or state insolvency law, and requires that the liquidation case, as of the proposed termination date, not be "dismissed" (a term of art under federal bankruptcy law, resulting in negation of the bankruptcy filing, and to be distinguished from a "closing" of a bankruptcy case; compare 11 U.S.C. 349 and 11 U.S.C. 350). The PBGC will consider cases under the liquidation test in which the liquidation was achieved through a foreclosure by secured creditors (as a result of which the contributing sponsor or controlled group member ceased operations and all of its assets were seized by such secured creditors) or through an assignment of all of the contributing sponsor's or controlled group member's assets for the benefit of creditors. The PBGC will also consider cases in which the liquidation was completed prior to the proposed termination date. In either case, however, the PBGC will find that the liquidation test is met only if it concludes, based on the circumstances of the specific case, that there is no indication that a principal purpose of the liquidation is to evade liability or otherwise to abuse the termination insurance program.

One commenter requested that the PBGC specify the period of time with respect to which it will determine whether the third distress test (*i.e.*, inability to continue in business; proposed and final § 2616.3(d)(3)) is met, and to develop standards of measurement to be used in making such determinations. The determinations made by the PBGC under the third distress test will necessarily be based on the facts and circumstances of each particular case. The PBGC does not believe it is appropriate, at least at this point, to develop specific time frames or standards of measurement.

Proposed § 2616.3(e) provided that, in determining whether a distress test is met, the PBGC would disregard any act or failure to act for the principal purpose of satisfying a distress test rather than for a reasonable business purpose. Two commenters objected to this provision, arguing generally that the PBGC lacks the statutory authority to make such determinations and that it is very difficult in many circumstances to determine the purpose of an action or failure to act, particularly where there may be legitimate business reasons to reduce labor costs, including pension costs. The PBGC has decided to retain this provision (paragraph (f) of the final regulation). A major purpose of the SEPPAA and PPA changes to Title IV of ERISA was to ensure that sponsors not be able to terminate underfunded pension plans unless they are financially unable to continue them. That purpose would be vitiated if

contributing sponsors and controlled group members were free to create an appearance of financial hardship in order to meet the statutory test; this provision helps to prevent that result.

Finally, a new paragraph (e) contains rules governing the interrelationship between the PBGC and a bankruptcy court in circumstances where both may be called upon to make distress findings regarding a particular plan termination. (The PBGC discussed these rules, and the reasons therefor, at 52 FR 38290, October 15, 1987.)

Section 2616.4 Administration of plan during pendency of termination proceedings.

Proposed § 2616.4(a) set forth certain restrictions that apply during the pendency of a distress termination proceeding. The PBGC has added one more restriction (§ 2616.4(b)(4)), precluding the plan administrator from providing loans to participants, because the benefit that the participant is entitled to receive following a distress termination, *e.g.*, the guaranteed benefit, may be less than the benefit amount serving as security for the loan. To preserve the plan's assets during the pendency of the termination process, the restrictions are generally in effect throughout that process beginning with the issuance of the first notice of intent to terminate; however, in the limited case of a plan sufficient for at least guaranteed benefits, the restrictions prohibiting distributions in furtherance of the termination, purchase of irrevocable commitments, and payment of benefits in lump sum form necessarily cease to be in effect once distribution of the plan's assets is permitted.

Proposed § 2616.4(c) provided that benefits that were not paid because of the cutback to estimated benefit amounts required by paragraph (b) of that section, if later required to be paid, must be paid with interest at the rate prescribed under 29 CFR Part 2610. The interest rate in Part 2610 is a rate established by statute for unpaid premiums; the interest rate more properly used for paying "past-due" benefits is that used by the PBGC for that purpose. Accordingly, § 2616.4(d)(2) provides for use of the interest rate or rates prescribed under § 2623.11(d).

Section 2616.5 Challenges to plan termination under collective bargaining agreement.

Provisions in this section parallel those in § 2617.5, discussed above, except that the time period within which notice must be given to the PBGC in order to require suspension of a distress termination ends upon issuance of a notice of inability to determine sufficiency or a distribution notice (rather than, as in the standard termination regulation, upon expiration of the PBGC's review period).

Section 2616.6 Annuity requirements.

Provisions in this section parallel those in § 2617.6, discussed above.

Proposed Section 2616.7 Contributing sponsor's commitment to make plan sufficient for guaranteed benefits.

Proposed § 2616.7 provided explicitly for a commitment by the contributing sponsor to make a plan sufficient for guaranteed benefits in a distress termination. Such commitments are extremely infrequent, and raise difficult valuation questions. The PBGC has deleted this provision from the final regulation, and will determine whether and when to accept such commitments on a case-by-case basis.

Sections 2616.7 and 2616.8 Filing with the PBGC; Computation of time.

These provisions, which were in § 2616.7 of the proposed regulation, parallel §§ 2617.8 and 2617.9 of the standard termination regulation discussed above. (While the distress termination process does not, in general, have the same kind of specific time limits for PBGC action as does the standard termination process, the PBGC often will need to act quickly to protect participants and premium payers, and thus has decided to define filing as the date of receipt, as under the standard termination regulation.)

Section 2616.9 Maintenance of plan records.

When the administrator of a plan in a distress termination receives a distribution notice from the PBGC because the plan is found to be sufficient for at least guaranteed benefits (§ 2616.26(c)), the plan administrator proceeds to close out the plan in a procedure that essentially parallels that followed in standard terminations. Thus, the PBGC does not routinely receive all plan or benefit records with respect to those plans during the termination proceedings; such records must be maintained in order that they will be available if needed (e.g., because the plan is selected for audit by the PBGC or because participants have questions regarding their benefits). Section 2616.9 (which tracks proposed § 2616.16(f) and final § 2617.10) contains this recordkeeping requirement and provides that the records shall be made available (or submitted) to the PBGC upon request. (The PBGC notes that most or all of the plan records required to be maintained under this provision already must be preserved and maintained for other purposes under section 107 of Title I of ERISA.)

Section 2616.22 (proposed § 2616.12) Notice of intent to terminate.

Paragraph (a)(3) requires that the notice of intent to terminate filed with the PBGC be on PBGC Form 600. Information similar to that required under proposed § 2616.12(e) is now found in the form and is not included in the final regulation.

Rules were added in paragraph (b), similar to those in § 2617.22(b), discussed above, concerning the effect on the termination process when affected parties are discovered after issuance of the NOIT.

A new paragraph (d)(5) (requiring that participants be informed of the effect of the termination on their benefit and service accruals), identical to § 2617.22(d)(6), was added for the same reasons discussed above in connection with that section. In addition, and for similar reasons, a new requirement was added (paragraph (d)(6)) requiring the plan administrator to advise participants of the expected level of plan sufficiency. Finally, proposed paragraph (d)(6) (now paragraph (d)(8)), requiring that retirees be told, where applicable, of the possibility of benefit reduction and recoupment, was revised to make the requirement applicable to non-retirees as well.

One commenter suggested that plan administrators be permitted to notify active employees of an intent to terminate the plan by posting the NOIT at locations usually reserved for employee notices, contending that "hand delivery of the notice is not required by statute and is unnecessary." The PBGC disagrees and has not made this change. ERISA section 4041(a)(2) requires that a written notice be provided "to each affected party." PBGC interprets the language in that section to require individual notice, particularly in view of the importance of plan termination to participants and beneficiaries.

A new paragraph (e), relating to spin-off/terminations, was added for the reasons discussed above under § 2617.22 of the standard termination regulation. (The PBGC recognizes that the rules governing participants in a spin-off/termination transaction are relevant in a distress termination only if the plan is sufficient for all benefit liabilities; while this is unlikely (since such plans would ordinarily terminate in a standard termination), it is not

Section 2616.23 (proposed § 2616.13) PBGC review of notice of intent to terminate.

One commenter suggested that the "tentative" finding of compliance to be issued under paragraph (b) by the PBGC should be final because "there is no need for a reconsideration and possible reversal of a determination with respect to whether a notice of intent to terminate is sufficient." The PBGC has not made this change because making a "tentative" determination permits the PBGC to make earlier (albeit only "tentative") determinations and, thereby, to facilitate faster processing in most cases.

Paragraph (d) of this section was revised by eliminating the list (in proposed § 2616.13(d)(1)–(3)) of specific information that might be requested by the PBGC in connection with possible institution of proceedings under ERISA section 4042. The information that the PBGC may need will vary from case to case, and it is unnecessary to specify the information in advance in the regulation.

In paragraph (e), the right to appeal the PBGC's determination that the notice of intent to terminate was not properly issued has been changed to a right to reconsideration. (As noted below, this same change was made regarding a PBGC determination that other distress termination requirements, such as meeting the distress tests, were not met.) Uncertainty as to whether a plan may terminate in a distress termination may profoundly affect the financing of an ongoing business or impede a plan of reorganization or liquidation. The time needed to complete the more sophisticated review of the appeals procedure, involving review by a three-person board and the opportunity to appear in person and to present witnesses, may be substantial. The streamlined reconsideration process should facilitate prompt resolution of the status of the termination.

One commenter noted that the standard termination regulation (proposed § 2617.17(d); final § 2617.27(d)) required the plan administrator to inform affected parties in the event the PBGC issues a notice of noncompliance in a standard termination, and suggested that a similar notification should be provided if the PBGC finds that the requirements for a distress termination were not met. The PBGC agrees and has added a new paragraph (f) that parallels § 2617.27(d).

Section 2616.24 (proposed § 2616.14) Distress termination notice.

This section was revised to provide that the distress termination notice is to be filed on PBGC Form 601 (including Schedule EA–D, the enrolled actuary certification). Information similar to that required under proposed § 2616.14(b)–(d) is now found in the form package and those provisions are not included in the final regulation.

Section 2616.25 (proposed § 2616.15) PBGC determination of compliance with requirements for distress termination.

One commenter suggested that the regulation should include a "time frame" within which the PBGC must issue its determination that the distress termination requirements are satisfied. The PBGC believes it would be impractical to establish any meaningful time frames because the time that will be needed to make distress determinations will vary widely based on the facts and circumstances of a particular case, particularly given the many variables that must be considered under the different distress criteria. However, the PBGC will attempt to make its distress determinations as expeditiously as circumstances permit.

The same commenter requested that the regulations be expanded to require that PBGC "provide copies of the plan administrator's filings in support of the proposed distress termination." The PBGC has not adopted this suggestion because disclosure of material filed with the PBGC is determined in accordance with the rules in the PBGC's Freedom of Information Act regulation, 29 CFR Part 2603.

Finally, for the reasons discussed above under § 2616.23, the PBGC has changed (in paragraph (d)) the right to appeal its determinations that the requirements for a distress termination were not met to a right to request reconsideration, and has added a new paragraph (e) requiring the plan administrator to provide notice to affected parties if the PBGC determines that the requirements for a distress termination are not met.

Section 2616.26 (proposed § 2616.16) PBGC determination of plan sufficiency/insufficiency.

Proposed paragraph (e) provided a special rule for plans that would be sufficient for guaranteed benefits only if the plan collects all or a portion of a claim for due and unpaid employer contributions. In the proposed regulation, such plans were treated as insufficient for guaranteed benefits (*i.e.*, they would be placed into trusteeship by the PBGC) if the enrolled actuary did not certify that the necessary amount would be collected by the proposed distribution date. The PBGC deleted this special rule from the final regulation. It is the PBGC, rather than the enrolled actuary, that is responsible for determining whether and when to issue a notice of inability to determine sufficiency or a distribution notice. In making this determination, the PBGC will take into account the expected date(s) and amount(s) of any collection of due and unpaid employer contributions (or other plan receivables).

Section 2616.27 Notices of benefit distribution.

This section is new; its provisions parallel, or cross-reference, the rules in §§ 2617.22 (d)(8), (d)(9), and (e), 2617.23, and 2617.24 of the standard termination regulation. As noted above in the discussion of time limits, the proposed regulation did not include this step in all cases in which the plan is sufficient for at least guaranteed benefits (and thus closes out in the same manner as in a standard termination).

Section 2616.29 (proposed § 2617.18) Closeout of plan.

Paragraph (a) of this section cross-references and parallels the provisions of § 2617.28 (c), (e), and (f) of the standard termination regulation, except that the 180-day period for completing the distribution of plan assets is measured from the date issuance of the notices of benefit distribution is completed (rather than, as in the standard termination regulation, from expiration of the PBGC's review period).

Paragraph (b) (proposed § 2616.18(c)) provides for a post-distribution certification (which parallels § 2617.28(h)) to be filed by any plan administrator distributing assets pursuant to a distribution notice issued by the PBGC. The PBGC has developed a new PBGC Form 602 to facilitate plan administrators' certifications in these cases.

E.O. 12291 and Regulatory Flexibility Act

The Pension Benefit Guaranty Corporation ("PBGC") has determined that this final rule is not a "major rule" for the purposes of Executive Order 12291 because it will not have an annual effect on the economy of $100 million or more; create a major increase in costs or prices for consumers, individual industries, or geographic regions; or have significant adverse effects on competition, employment, investment, innovation, or on the ability

of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets. These regulations merely implement the statutory requirements and procedures governing voluntary terminations of pension plans.

Under section 605(b) of the Regulatory Flexibility Act, the PBGC certifies that these regulations will not have a significant economic impact on a substantial number of small entities. Traditionally, pension plans with fewer than 100 participants have been treated as small plans. Seventy-five percent of these plans are defined contribution plans and are not subject to PBGC regulations. Only about 51,000 small plans are covered by the PBGC's single-employer insurance program. Of these, about 15 percent (7750 plans), or about 3.5 percent of all small pension plans, terminate each year and are subject to these regulations.

Paperwork Reduction Act

The collection of information requirements in this final rule have been approved by the Office of Management and Budget under control number 1212–0036 with an expiration date of January 31, 1993. As noted above, elsewhere in today's **Federal Register** the PBGC is publishing a notice of request for extension of OMB approval of the collection of information requirements contained in this rule and in the revised forms and instructions.

List of Subjects in 29 CFR Parts 2616 and 2617

Employee benefit plans, Pension insurance, Pensions, and Reporting requirements.

In consideration of the foregoing, the PBGC is revising 29 CFR parts 2616 and 2617 of subchapter C of chapter XXVI, title 29 of the Code of Federal Regulations as follows:

PART 2616—DISTRESS TERMINATIONS OF SINGLE-EMPLOYER PLANS

Subpart A—General Provisions

Sec.

2616.1 Purpose and scope.
2616.2 Definitions.
2616.3 Requirements for a distress termination.
2616.4 Administration of plan during pendency of termination proceedings.
2616.5 Challenges to plan termination under collective bargaining agreement.
2616.6 Annuity requirements.
2616.7 Filing with the PBGC.
2616.8 Computation of time.
2616.9 Maintenance of plan records.

Subpart B—Distress Termination Process

2616.21 Purpose and scope.
2616.22 Notice of intent to terminate.
2616.23 PBGC review of notice of intent to terminate.
2616.24 Distress termination notice.
2616.25 PBGC determination of compliance with requirements for distress termination.
2616.26 PBGC determination of plan sufficiency/insufficiency.
2616.27 Notices of benefit distribution.
2616.28 Verification of plan sufficiency prior to closeout.
2616.29 Closeout of plan.

Authority: 29 U.S.C. 1302(b)(3), 1341, and 1344.

Subpart A—General Provisions

§ 2616.1 Purpose and scope.

(a) Purpose. This part sets forth the rules and procedures for terminating a single-employer pension plan in a distress termination under the Employee Retirement Income Security Act of 1974, as amended. Under the Act, a single-employer plan may be voluntarily terminated only in a "standard" or a "distress" termination, and then only if the termination satisfies the statutory requirements for the type of termination sought. This part supersedes previous PBGC regulations in 29 CFR Part 2616 and includes rules governing the notice of intent to terminate for distress terminations, as well as other substantive and procedural rules pertaining to those terminations. (The rules for standard terminations are included in Part 2617 of this subchapter.) Subpart A of this part contains general rules relating to distress terminations. Subpart B sets forth the specific steps that a plan administrator must follow in order to terminate a plan in a distress termination.

(b) *Scope.* This part applies to the termination of any single-employer plan covered under section 4021(a) of the Act and not excluded by section 4021(b) for which a notice of intent to terminate in a distress termination is issued on or after January 28, 1992.

§ 2616.2 Definitions.

For purposes of this part:

Act means the Employee Retirement Income Security Act of 1974, as amended.

Affected party means the PBGC and, with respect to a terminating plan—

(1) Each participant;

(2) Each beneficiary of a deceased participant;

(3) Each alternate payee under an applicable qualified domestic relations order, as defined in section 206(d)(3) of the Act;

(4) Each employee organization that currently represents any group of participants; and

(5) For any group of participants not currently represented by an employee organization, the employee organization, if any, that last represented such group of participants within the 5-year period preceding issuance of the notice of intent to terminate.

In connection with any notice required under this part, if an affected party has designated in writing another person to receive the notice, any reference to the affected party shall be deemed to refer to the designated person.

Benefit liabilities means the benefits of participants and their beneficiaries under the plan (within the meaning of section 401(a)(2) of the Code).

Code means the Internal Revenue Code of 1986, as amended.

Contributing sponsor means the person entitled to receive a deduction under section 404(a) of the Code (or that would be entitled to receive a deduction except for the limitations in section 404(a)) for contributions required to be made to the plan under section 302 of the Act and section 412 of the Code.

Controlled group means, in connection with any person, a group consisting of such person and all other persons under common control with such person, determined in accordance with 29 CFR part 2612.

Date of distribution means—(1) For benefits provided through the purchase of irrevocable commitments, the date on which the obligation to provide the benefits passes from the plan to the insurer; and

(2) For benefits provided other than through the purchase of irrevocable commitments, the date on which the benefits are delivered to the participant or beneficiary (or to another plan or benefit arrangement or other recipient authorized by the participant or beneficiary in accordance with applicable law and regulations) personally or by deposit with a mail or courier service (as evidenced by a postmark or written receipt).

Distress termination means the voluntary termination, in accordance with section 4041(c) of the Act and this part, of a single-employer plan.

Distress termination notice means the notice filed with the PBGC pursuant to section 4041(c)(2)(A) of the Act and § 2616.24. PBGC Form 601 (including Schedule EA–D) is the distress termination notice.

Distribution notice means the notice issued to the plan administrator by the PBGC pursuant to § 2616.26(c) of this

part upon the PBGC's determination that the plan has sufficient assets to pay at least guaranteed benefits.

Existing collective bargaining agreement means a collective bargaining agreement that—

(1) By its terms, either has not expired or is extended beyond its stated expiration date because neither of the collective bargaining parties took the required action to terminate it, and

(2) Has not been made inoperative by a judicial ruling.

When a collective bargaining agreement no longer meets these conditions, it ceases to be an "existing collective bargaining agreement," whether or not any or all of its terms may continue to apply by operation of law.

Guaranteed benefit means a benefit that is guaranteed by the PBGC under section 4022 (a) and (b) of the Act and parts 2613 and 2621 of this chapter.

Insurer means a company authorized to do business as an insurance carrier under the laws of a state or the District of Columbia.

Irrevocable commitment means an obligation by an insurer to pay benefits to a named participant or surviving beneficiary, if the obligation cannot be cancelled under the terms of the insurance contract (except for fraud or mistake) without the consent of the participant or beneficiary and is legally enforceable by the participant or beneficiary.

Mandatory employee contributions means amounts contributed to the plan by a participant that are required as a condition of employment, as a condition of participation in the plan, or as a condition of obtaining benefits under the plan attributable to employer contributions.

Notice of benefit distribution means the notice to each participant and beneficiary required by § 2616.27 of this part describing the benefit to be distributed to him or her.

Notice of intent to terminate means the notice to affected parties advising each of a proposed plan termination, as required by section 4041(a)(2) of the Act and § 2616.22 of this part.

Participant means—(1) Any individual who is currently in employment covered by the plan and who is earning or retaining credited service under the plan, including any individual who is considered covered under the plan for purposes of meeting the minimum participation requirements but who, because of offset or similar provisions, does not have any accrued benefits;

(2) Any nonvested individual who is not currently in employment covered by the plan but who is earning or retaining credited service under the plan; and

(3) Any individual who is retired or separated from employment covered by the plan and who is receiving benefits under the plan or is entitled to begin receiving benefits under the plan in the future, excluding any such individual to whom an insurer has made an irrevocable commitment to pay all the benefits to which the individual is entitled under the plan.

PBGC means the Pension Benefit Guaranty Corporation.

Person means an individual, partnership, joint venture, corporation, mutual company, joint-stock company, trust, estate, unincorporated organization, association, or employee organization.

Proposed termination date means the date specified as such by the plan administrator in the notice of intent to terminate or, if later, in the distress termination notice. A proposed termination date specified in the notice of intent to terminate may not be earlier than the 60th day, nor later than the 90th day, after the issuance of the notice of intent to terminate. A proposed termination date specified in the distress termination notice may not be earlier than the proposed termination date specified in the notice of intent to terminate, or (except with PBGC approval) later than the 90th day after the issuance of the notice of intent to terminate.

Residual assets means the plan assets remaining after all benefit liabilities and other liabilities of the plan have been satisfied.

Single-employer plan means any defined benefit plan (as defined in section 3(35) of the Act) that is not a multiemployer plan (as defined in section 4001(a)(3) of the Act).

Spin-off/termination means a splitting of a single defined benefit plan into two or more plans, in conjunction with the termination of one or more of the plans, resulting in a reversion of residual assets to the employer.

Sufficient for benefit liabilities means that there is no amount of unfunded benefit liabilities, as defined in section 4001(a)(18) of the Act.

Sufficient for guaranteed benefits means that there is no amount of unfunded guaranteed benefits, as defined in section 4001(a)(17) of the Act.

Termination date means the date established pursuant to section 4048(a) of the Act. The termination date is the date for determining guaranteed benefits and benefit liabilities.

Title IV benefit means the guaranteed benefit plus any additional benefits to which plan assets are allocated pursuant to section 4044 of the Act and Part 2618 of this subchapter.

§ 2616.3 Requirements for a distress termination.

(a) *Exclusive means of voluntary plan termination.* Unless a plan is able to discharge all of its obligations for benefit liabilities and otherwise satisfy the requirements for a standard termination set forth in part 2617 of this subchapter, it may be voluntarily terminated by the plan administrator only if all of the requirements for a distress termination set forth in paragraph (b) of this section are satisfied.

(b) *Requirements.* A plan may be terminated in a distress termination only if—

(1) The plan administrator issues a notice of intent to terminate to each affected party in accordance with § 2616.22 at least 60 days and not more than 90 days before the proposed termination date;

(2) The plan administrator files a distress termination notice with the PBGC in accordance with § 2616.24 no later than 120 days after the proposed termination date; and

(3) The PBGC determines that the contributing sponsor and each member of its controlled group satisfy one of the distress criteria set forth in paragraph (d) of this section.

(c) *Effect of failure to satisfy requirements.* (1) Except as provided in paragraph (c)(2) of this section, if the plan administrator does not satisfy all of the requirements of paragraph (b) of this section, any action taken to effect the plan termination shall be null and void, and the plan shall be an ongoing plan. A plan administrator who still desires to terminate the plan shall initiate the termination process again, starting with the issuance of a new notice of intent to terminate.

(2) The PBGC may, upon its own motion, waive any requirement with respect to notices to be filed with the PBGC under paragraph (b)(1) or (b)(2) of this section if the PBGC believes that it will be less costly or administratively burdensome to the PBGC to do so. The PBGC will not entertain requests for waivers under this paragraph.

(3) Notwithstanding any other provision of this part, the PBGC retains the authority in any case to initiate a plan termination in accordance with the provisions of section 4042 of the Act.

(d) *Distress criteria.* A contributing sponsor and each member of its controlled group shall satisfy at least one (but not necessarily the same one)

of the following criteria in order for a distress termination to occur:

(1) *Liquidation.* This criterion is met if, as of the proposed termination date—

(i) A person has filed or had filed against it a petition seeking liquidation in a case under title 11, United States Code, or under a similar law of a State or political subdivision of a State, or a case described in paragraph (d)(2) of this section has been converted to such a case; and

(ii) The case has not been dismissed.

(2) *Reorganization.* This criterion is met if—

(i) As of the proposed termination date, a person has filed or had filed against it a petition seeking reorganization in a case under title 11, United States Code, or under a similar law of a state or a political subdivision of a state, or a case described in paragraph (d)(1) of this section has been converted to such a case;

(ii) As of the proposed termination date, the case has not been dismissed;

(iii) The person notifies the PBGC of any request to the bankruptcy court (or other appropriate court in a case under such similar law of a state or a political subdivision of a state) for approval of the plan termination by concurrently filing with the PBGC a copy of the motion requesting court approval, including any documents submitted in support of the request; and

(iv) The bankruptcy court or other appropriate court determines that, unless the plan is terminated, such person will be unable to pay all its debts pursuant to a plan of reorganization and will be unable to continue in business outside the reorganization process and approves the plan termination.

(3) *Inability to continue in business.* This criterion is met if a person demonstrates to the satisfaction of the PBGC that, unless a distress termination occurs, the person will be unable to pay its debts when due and to continue in business.

(4) *Unreasonably burdensome pension costs.* This criterion is met if a person demonstrates to the satisfaction of the PBGC that the person's costs of providing pension coverage have become unreasonably burdensome solely as a result of declining covered employment under all single-employer plans for which that person is a contributing sponsor.

(e) *Non-duplicative efforts.* (1) If a person requests approval of the plan termination by a court, as described in paragraph (d)(2) of this section, the PBGC—

(i) Will normally enter an appearance to request that the court make specific findings as to whether the sponsor or controlled group member meets the distress test in paragraph (d)(3) of this section, or state that it is unable to make such findings;

(ii) Will provide the court with any information it has that may be germane to the court's ruling;

(iii) Will, if the person has requested, or later requests, a determination by the PBGC under paragraph (d)(3) of this section, defer action on the request until the court makes its determination; and

(iv) Will be bound by a final and non-appealable order of the court.

(2) If a person requests a determination by the PBGC under paragraph (d)(3) of this section, the PBGC determines that the distress criterion is not met, and the person thereafter requests approval of the plan termination by a court, as described in paragraph (d)(2) of this section, the PBGC will advise the court of its determination and make its administrative record available to the court.

(f) *Non-recognition of certain actions.* If the PBGC finds that a person undertook any action or failed to act for the principal purpose of satisfying any of the criteria contained in paragraph (d) of this section, rather than for a reasonable business purpose, the PBGC shall disregard such act or failure to act in determining whether the person has satisfied any of those criteria.

§ 2616.4 Administration of plan during pendency of termination proceedings.

(a) *General rule.* Except to the extent specifically prohibited by this section, during the pendency of termination proceedings the plan administrator shall continue to carry out the normal operations of the plan, such as putting participants into pay status, collecting contributions due the plan, and investing plan assets, in accordance with plan provisions and applicable law and regulations.

(b) *Prohibitions after issuing notice of intent to terminate.* The plan administrator shall not make loans to plan participants beginning on the first day he or she issues a notice of intent to terminate, and from that date until a distribution is permitted pursuant to § 2616.29, the plan administrator shall not—

(1) Distribute plan assets pursuant to, or (except as required by this part) take any other actions to implement, the termination of the plan;

(2) Pay benefits attributable to employer contributions, other than death benefits, in any form other than as an annuity; or

(3) Purchase irrevocable commitments to provide benefits from an insurer.

(c) *Limitation on benefit payments on or after proposed termination date.* Beginning on the proposed termination date, the plan administrator shall reduce benefits to the level determined under part 2623 of this subchapter. For purposes of applying part 2623, the term "section 4041(a) date of termination" used therein shall be replaced by the term "proposed termination date."

(d) *Failure to qualify for distress termination.* In any case where the PBGC determines, pursuant to § 2616.23(c) or § 2616.25(c)(1), that the requirements for a distress termination are not satisfied—

(1) The prohibitions described in paragraph (b)(2)–(b)(4) of this section shall cease to apply—

(i) Upon expiration of the period during which reconsideration may be requested under §§ 2616.23(e) and 2616.25(d) or, if earlier, at the time the plan administrator decides not to request reconsideration; or

(ii) If reconsideration is requested, upon PBGC issuance of its decision on reconsideration.

(2) Any benefits that were not paid pursuant to paragraph (c) of this section shall be due and payable as of the effective date of the PBGC's determination, together with interest from the date (or dates) on which the unpaid amounts were originally due until the date on which they are paid in full at the rate or rates prescribed under § 2623.11(d) of this subchapter.

(e) *Effect of subsequent insufficiency.* If the plan administrator makes a finding of subsequent insufficiency pursuant to § 2616.28(b), or the PBGC notifies the plan administrator that it has made a finding of subsequent insufficiency pursuant to § 2616.28(d), the prohibitions in paragraph (b) of this section shall apply in accordance with § 2616.28(e).

§ 2616.5 Challenges to plan termination under collective bargaining agreement.

(a) *Suspension upon formal challenge to termination.* (1) If the PBGC is advised, before issuance of a notice of inability to determine sufficiency or a distribution notice pursuant to § 2616.26(b) or (c), that a formal challenge to the termination (as described in paragraph (b) of this section) has been initiated, the PBGC shall suspend the termination proceeding and shall so advise the plan administrator in writing. If the PBGC is advised of such a challenge after the issuance of such notice but before the termination procedure is concluded pursuant to this part, the PBGC may suspend the termination proceeding

and, if it does, shall so advise the plan administrator in writing.

(2) The following rules shall apply during a period of suspension beginning on the date of the PBGC's written notification to the plan administrator and ending with the final resolution of the challenge to the termination:

(i) The suspension shall stay the issuance by the PBGC of any notice of inability to determine sufficiency or distribution notice or, if any such notice was previously issued, shall stay its effectiveness;

(ii) The plan administrator shall comply with the prohibitions in § 2616.4; and

(iii) The plan administrator shall file a distress termination notice with the PBGC in the manner and within the time specified in § 2616.24.

(b) *Formal challenge to termination.* For purposes of this section, a formal challenge to a plan termination is initiated when any of the following actions is taken, asserting that the termination would violate the terms and conditions of an existing collective bargaining agreement:

(1) The commencement of any procedure specified in the collective bargaining agreement for resolving disputes under the agreement; or

(2) The commencement of any action before an arbitrator, administrative agency or board, or court under applicable labor-management relations law.

(c) *Resolution of challenge.* Immediately upon the final resolution (as described in paragraph (d) of this section) of the formal challenge to the termination, the plan administrator shall notify the PBGC in writing of the outcome of the challenge, and shall provide the PBGC with a copy of the award or order, if any. If the validity of the proposed termination has been upheld, the plan administrator also shall advise the PBGC whether the plan administrator wishes to continue the proposed termination.

(1) *Challenge sustained.* If the arbitrator, agency, board, or court has determined (or the parties have agreed) that the proposed termination violates an existing collective bargaining agreement, the PBGC shall dismiss the termination proceeding, all actions taken to effect the plan termination shall be null and void, and the plan shall be an ongoing plan. In this event, § 2616.4(d) shall apply as of the date of the dismissal by the PBGC.

(2) *Termination sustained.* If the arbitrator, agency, board, or court has determined (or the parties have agreed) that the proposed termination does not violate an existing collective bargaining agreement and the plan administrator wishes to proceed with the termination, the PBGC shall reactivate the termination proceeding by sending a written notice thereof to the plan administrator, and the following rules shall apply:

(i) The termination proceeding shall continue from the point where it was suspended;

(ii) All actions taken to effect the termination before the suspension shall be effective;

(iii) The PBGC shall proceed to issue a notice of inability to determine sufficiency or a distribution notice (or reactivate any such notice stayed under paragraph (a)(2)(i) of this section), either with or without first requesting updated information from the plan administrator pursuant to § 2616.24(c);

(iv) Any time periods that were suspended shall resume running from the date of the PBGC's notice of the reactivation of the proceeding; and

(v) Any time periods that had fewer than 15 days remaining shall be extended to the 15th day after the date of the PBGC's notice, or such later date as the PBGC may specify.

(d) *Final resolution of challenge.* For purposes of this section, a formal challenge to a proposed termination is finally resolved when—

(1) The parties involved in the challenge enter into a settlement that resolves the challenge;

(2) A final award, administrative decision, or court order is issued that is not subject to review or appeal; or

(3) A final award, administrative decision, or court order is issued that is not appealed, or review or enforcement of which is not sought, within the time for filing an appeal or requesting review or enforcement.

(e) *Involuntary termination by the PBGC.* Notwithstanding any other provision of this section, the PBGC retains the authority in any case to initiate a plan termination in accordance with the provisions of section 4042 of the Act.

§ 2616.6 Annuity requirements.

(a) *General rule.* Except as provided in paragraphs (b) and (d) of this section, when a plan is closed out under § 2616.29, any benefit that is payable as an annuity under the provisions of the plan must be provided in annuity form through the purchase from an insurer of a single premium, nonparticipating, nonsurrenderable annuity contract that constitutes an irrevocable commitment by the insurer to provide the benefits purchased.

(b) *Exceptions to annuity requirement.* A benefit that is payable as an annuity under the provisions of a plan need not be provided in annuity form if the plan provides for an alternative form of distribution and either paragraph (b)(1) or (b)(2) of this section applies:

(1) The participant is not in pay status as of the date of distribution, and the present value of the participant's total benefit under the plan, including amounts previously distributed to the participant, is $3,500 or less, determined in accordance with sections 411(a)(11) and 417(e)(3) of the Code and the regulations thereunder. The date used for determining such interest rate or rates shall be—

(i) The date set forth in the plan for such purpose, provided that the plan provision is in accord with section 417(e)(3) of the Code and the regulations thereunder (substituting "date of distribution" for "annuity starting date" wherever used in the plan); or

(ii) If the plan does not provide for such a date, the date of distribution.

(2) The participant elected the alternative form of distribution in writing, with the written consent of his or her spouse, in accordance with the requirements of sections 401(a)(11), 411(a)(11), and 417 of the Code and the regulations thereunder.

(c) *Optional benefit forms.* Except as permitted by sections 401(a)(11), 411(d)(6), and 417 of the Code and the regulations thereunder, an annuity contract purchased to satisfy the annuity requirement shall preserve all applicable benefit options provided under the plan as of the termination date.

(d) *Participating annuities.* (1) *General rule.* Notwithstanding the requirement of paragraph (a) of this section that an annuity contract be nonparticipating, a participating annuity contract may be purchased to satisfy the annuity requirement if the plan is sufficient for all benefit liabilities and—

(i) All benefit liabilities will be guaranteed under the annuity contract as the unconditional, irrevocable, and noncancellable obligation of the insurer;

(ii) In no event, including unfavorable investment or actuarial experience, can the amounts payable to participants under the annuity contract decrease except to correct mistakes; and

(iii) As provided in paragraph (d)(2) of this section, no amount of residual assets to which participants are entitled will be used to pay for the participation feature.

(2) *Plans with residual assets.* If all or a portion of the residual assets of a plan will be distributed to participants—

(i) The additional premium for the participation feature must be paid from

the contributing sponsor's share, if any, of the residual assets or from assets of the contributing sponsor; and

(ii) If the plan provided for mandatory employee contributions, the amount of residual assets must be determined using the price of the annuities for all benefit liabilities without the participation feature.

§ 2616.7 Filing with the PBGC.

(a) *Date of filing.* Any document required or permitted to be filed with the PBGC under this part shall be deemed filed on the date that it is received at the PBGC, providing it is received no later than 4:00 p.m. on a day other than Saturday, Sunday, or a Federal holiday. Documents received after 4:00 p.m. or on Saturday, Sunday, or a Federal holiday shall be deemed filed on the next regular business day.

(b) *How to file.* Any document to be filed under this part may be delivered by mail or by hand to: Pension Benefit Guaranty Corporation, Case Operations and Compliance Department, Code 45000, 2020 K Street, NW., Washington, DC 20006–1806.

§ 2616.8 Computation of time.

In computing any period of time prescribed or allowed by this part, the day of the act or event from which the designated period of time begins to run is not counted. The last day of the period so computed shall be included, unless it is a Saturday, Sunday, or Federal holiday, in which event the period runs until the end of the next day that is not a Saturday, Sunday, or Federal holiday. Notwithstanding the preceding sentence, a proposed termination date may be any day, including a Saturday, Sunday, or Federal holiday.

§ 2616.9 Maintenance of plan records.

Either the contributing sponsor or the plan administrator of a terminating plan that closes out in accordance with § 2616.29 pursuant to a distribution notice issued under § 2616.26(c) shall maintain and preserve all records used to compute benefits with respect to each individual who is a plan participant or a beneficiary of a deceased participant as of the termination date in accordance with the following rules:

(a) The records to be maintained and preserved are those used to compute the benefit for purposes of distribution to each individual in accordance with § 2616.29 and include, but are not limited to, the plan documents and all underlying data, including worksheets prepared by or at the direction of the enrolled actuary, used in determining the amount, form, and value of benefits.

(b) All records subject to this section shall be preserved for six years after the date the post-distribution certification required under § 2616.29(b) is filed with the PBGC.

(c) The contributing sponsor or plan administrator, as appropriate, shall make records subject to this section available to the PBGC upon request for inspection and photocopying, and shall submit such records to the PBGC within 30 days after receipt of the PBGC's written request therefor (or such other period as may be specified in such written request).

Subpart B—Distress Termination Process

§ 2616.21 Purpose and scope.

This subpart describes in detail the distress termination process. Sections 2616.22 and 2616.24 prescribe the rules for the two statutory notices that plan administrators must issue in a distress termination. The first, the "notice of intent to terminate," is issued to all affected parties to begin the termination process. The second, the "distress termination notice," is issued only to the PBGC. Sections 2616.23, 2616.25, and 2616.26 cover the PBGC's review of the proposed termination and the actions that the PBGC may take with respect to it. Sections 2616.27, 2616.28, and 2616.29 apply only to plans that are sufficient for at least guaranteed benefits and describe the actions the plan administrator must take to close out the plan.

§ 2616.22 Notice of intent to terminate.

(a) *General rules.* (1) At least 60 days and no more than 90 days before the proposed termination date, the plan administrator shall issue to each person who is (as of the proposed termination date) an affected party a written notice of intent to terminate.

(2) The plan administrator shall issue the notice of intent to terminate to all affected parties other than the PBGC at or before the time he or she files the notice with the PBGC.

(3) The notice to affected parties other than the PBGC shall contain all of the information specified in paragraph (d) of this section.

(4) The notice to the PBGC shall be filed on PBGC Form 600, Distress Termination, Notice of Intent to Terminate, completed in accordance with the instructions thereto.

(b) *Discovery of other affected parties.* Notwithstanding the provisions of paragraphs (a)(1) and (a)(2) of this section, if the plan administrator discovers additional affected parties after the expiration of the time period specified in paragraphs (a)(1) or (a)(2) of this section, the failure to issue the notice of intent to terminate to such parties within the specified time periods will not cause the notice to be untimely under paragraph (a) of this section if the plan administrator could not reasonably have been expected to know of the additional affected parties and if he or she promptly issues the notice to each additional affected party.

(c) *Issuance.* (1) *Method.* The plan administrator shall issue the notice of intent to terminate individually to each affected party. The notice to the PBGC shall be filed in accordance with § 2616.7. The notice to each of the other affected parties shall be either hand delivered or delivered by first-class mail or courier service directed to the affected party's last known address.

(2) *When issued.* The notice of intent to terminate is deemed issued to the PBGC on the date on which it is filed and to any other affected party on the date on which it is handed to the affected party or deposited with a mail or courier service (as evidenced by a postmark or written receipt).

(d) *Contents of notice to affected parties other than the PBGC.* The plan administrator shall include in the notice of intent to terminate to each affected party other than the PBGC all of the following information:

(1) The name of the plan and of the contributing sponsor;

(2) The employer identification number ("EIN") of the contributing sponsor and the plan number ("PN"); if there is no EIN or PN, the notice shall so state;

(3) The name, address, and telephone number of the person who may be contacted by an affected party with questions concerning the plan's termination;

(4) A statement that the plan administrator expects to terminate the plan in a distress termination on a specified proposed termination date.

(5) A statement that benefit and service accruals will continue until the date of termination or, if applicable, that benefit accruals were or will be frozen as of a specific date in accordance with section 204(h) of the Act;

(6) A statement of whether plan assets are sufficient to pay all guaranteed benefits or all benefit liabilities;

(7) A brief description of what benefits are guaranteed by the PBGC (*e.g.*, if only a portion of the benefits are guaranteed because of the phase-in rule, this should be explained), and a statement that participants and beneficiaries also may receive a portion of the benefits to which each is entitled

under the terms of the plan in excess of guaranteed benefits; and

(8) A statement, if applicable, that benefits may be subject to reduction because of the limitations on the amounts guaranteed by the PBGC or because plan assets are insufficient to pay for full benefits (pursuant to parts 2621 and 2623 of this subchapter) and that payments in excess of the amount guaranteed by the PBGC may be recouped by the PBGC (pursuant to Part 2623 of this subchapter).

(e) *Spin-off/termination transactions.* In the case of a spin-off/termination transaction, the plan administrator shall provide all participants and beneficiaries in the original plan who are also participants or beneficiaries in the ongoing plan (as of the proposed termination date) with a notice describing the transaction no later than the date on which the plan administrator completes the issuance of notices of intent to terminate under this section.

§ 2616.23 PBGC review of notice of intent to terminate.

(a) *General.* When a notice of intent to terminate is filed with it, the PBGC—

(1) Shall determine whether the notice was issued in compliance with § 2616.22; and

(2) Shall advise the plan administrator of its determination, in accordance with paragraph (b) or (c) of this section, no later than the proposed termination date specified in the notice.

(b) *Tentative finding of compliance.* If the PBGC determines that the issuance of the notice of intent to terminate appears to be in compliance with § 2616.22, it shall notify the plan administrator in writing that—

(1) The PBGC has made a tentative determination of compliance;

(2) The distress termination proceeding may continue; and

(3) After reviewing the distress termination notice filed pursuant to § 2616.24, the PBGC will make final, or reverse, this tentative determination.

(c) *Finding of noncompliance.* If the PBGC determines that the issuance of the notice of intent to terminate was not in compliance with § 2616.22 (except for requirements that the PBGC elects to waive under § 2616.3(c)(2) with respect to the notice filed with the PBGC), the PBGC shall notify the plan administrator in writing—

(1) That the PBGC has determined that the notice of intent to terminate was not properly issued; and

(2) That the proposed distress termination is null and void and the plan is an ongoing plan.

(d) *Information on need to institute section 4042 proceedings.* The PBGC may require the plan administrator to submit, within 20 days after the plan administrator's receipt of the PBGC's written request (or such other period as may be specified in such written request), any information that the PBGC determines it needs in order to decide whether to institute termination or trusteeship proceedings pursuant to section 4042 of the Act, whenever—

(1) A notice of intent to terminate indicates that benefits currently in pay status (or that should be in pay status) are not being paid or that this is likely to occur within the 180-day period following the issuance of the notice of intent to terminate;

(2) The PBGC issues a determination under paragraph (c) of this section; or

(3) The PBGC has any reason to believe that it may be necessary or appropriate to institute proceedings under section 4042 of the Act.

(e) *Reconsideration of finding of noncompliance.* A plan administrator may request reconsideration of the PBGC's determination of noncompliance under paragraph (c) of this section in accordance with the rules prescribed in subpart C of part 2606 of this chapter. Any request for reconsideration automatically stays the effectiveness of the determination until the PBGC issues its decision on reconsideration, but does not stay the time period within which information must be submitted to the PBGC in response to a request under paragraph (d) of this section.

(f) *Notice to affected parties.* Upon a decision by the PBGC affirming a finding of noncompliance or upon the expiration of the period within which the plan administrator may request reconsideration of a finding of noncompliance (or, if earlier, upon the plan administrator's decision not to request reconsideration), the plan administrator shall notify the affected parties (and any persons who were provided notice under § 2616.22(e)) in writing that the plan is not going to terminate or, if applicable, that the termination is invalid but that a new notice of intent to terminate is being issued. The notice required by this paragraph shall be provided in the manner described in § 2617.27(d)(2).

§ 2616.24 Distress termination notice.

(a) *General rule.* The plan administrator shall file with the PBGC a PBGC Form 601, Distress Termination Notice, Single-Employer Plan Termination, with Schedule EA–D, Distress Termination Enrolled Actuary Certification, that has been completed in accordance with the instructions thereto, on or before the 120th day after the proposed termination date.

(b) *Participant and benefit information.* (1) *Plan insufficient for guaranteed benefits.* Unless the enrolled actuary certifies, in the Schedule EA–D filed in accordance with paragraph (a) of this section, that the plan is sufficient either for guaranteed benefits or for benefit liabilities, the plan administrator shall file with the PBGC the participant and benefit information described in PBGC Form 601 and the instructions thereto by the later of—

(i) 120 days after the proposed termination date, or

(ii) 30 days after receipt of the PBGC's determination, pursuant to § 2616.25(b), that the requirements for a distress termination have been satisfied.

(2) *Plan sufficient for guaranteed benefits or benefit liabilities.* If the enrolled actuary certifies that the plan is sufficient either for guaranteed benefits or for benefit liabilities, the plan administrator need not submit the participant and benefit information described in PBGC Form 601 and the instructions thereto unless requested to do so pursuant to paragraph (c) of this section.

(3) *Effect of failure to provide information.* The PBGC may void the distress termination if the plan administrator fails to provide complete participant and benefit information in accordance with this section.

(c) *Additional information.* The PBGC may in any case require the submission of any additional information that it needs to make the determinations that it is required to make under this part or to pay benefits pursuant to section 4061 or 4022(c) of the Act. The plan administrator shall submit any information requested under this paragraph within 30 days after receiving the PBGC's written request (or such other period as may be specified in such written request).

§ 2616.25 PBGC determination of compliance with requirements for distress termination.

(a) *General.* Based on the information contained and submitted with the PBGC Form 600 and the PBGC Form 601, with Schedule EA–D, and on any information submitted by an affected party or otherwise obtained by the PBGC, the PBGC shall determine whether the requirements for a distress termination set forth in § 2616.3(b) have been met and shall notify the plan administrator in writing of its determination, in accordance with paragraph (b) or (c) of this section.

(b) *Qualifying termination.* If the PBGC determines that all of the

requirements of § 2616.3(b) have been satisfied, it shall so advise the plan administrator and shall also advise the plan administrator of whether participant and benefit information must be submitted in accordance with § 2616.24(b).

(c) *Non-qualifying termination.* (1) Except as provided in paragraph (c)(2) of this section, if the PBGC determines that any of the requirements of § 2616.3(b) have not been met, it shall notify the plan administrator of its determination, the basis therefor, and the effect thereof (as provided in § 2616.3(c)).

(2) If the only basis for the PBGC's determination described in paragraph (c)(1) of this section is that the distress termination notice is incomplete, the PBGC shall advise the plan administrator of the missing item(s) of information and that the information must be filed with the PBGC no later than the 120th day after the proposed termination date or the 30th day after the date of the PBGC's notice of its determination, whichever is later.

(d) *Reconsideration of determination of non-qualification.* A plan administrator may request reconsideration of the PBGC's determination under paragraph (c)(1) of this section in accordance with the rules prescribed in subpart C of part 2606 of this chapter. The filing of a request for reconsideration automatically stays the effectiveness of the determination until the PBGC issues its decision on reconsideration.

(e) *Notice to affected parties.* Upon a decision by the PBGC affirming a determination of non-qualification or upon the expiration of the period within which the plan administrator may request reconsideration of a determination of non-qualification (or, if earlier, upon the plan administrator's decision not to request reconsideration), the plan administrator shall notify the affected parties (and any persons who were provided notice under § 2616.22(e)) in writing that the plan is not going to terminate or, if applicable, that the termination is invalid but that a new notice of intent to terminate is being issued. The notice required by this paragraph shall be provided in the manner described in § 2617.27(d)(2).

§ 2616.26 PBGC determination of plan sufficiency/insufficiency.

(a) *General.* Upon receipt of participant and benefit information filed pursuant to § 2616.24 (b)(1) or (c), the PBGC shall determine the degree to which the plan is sufficient and notify the plan administrator in writing of its determination in accordance with paragraph (b) or (c) of this section.

(b) *Insufficiency for guaranteed benefits.* If the PBGC finds that it is unable to determine that a plan is sufficient for guaranteed benefits, it shall issue a "notice of inability to determine sufficiency" notifying the plan administrator of this finding and advising the plan administrator that—

(1) The plan administrator shall continue to administer the plan under the restrictions imposed by § 2616.4; and

(2) The termination shall be completed under section 4042 of the Act.

(c) *Sufficiency for guaranteed benefits or benefit liabilities.* If the PBGC determines that a plan is sufficient for guaranteed benefits but not for benefit liabilities or is sufficient for benefit liabilities, the PBGC shall issue to the plan administrator a distribution notice advising the plan administrator—

(1) To issue notices of benefit distribution in accordance with § 2616.27;

(2) To close out the plan in accordance with § 2616.29;

(3) To file a timely post-distribution certification with the PBGC in accordance with § 2616.29(b); and

(4) That either the plan administrator or the contributing sponsor must preserve and maintain plan records in accordance with § 2616.9.

§ 2616.27 Notices of benefit distribution.

(a) *General rules.* When a distribution notice is issued by the PBGC pursuant to § 2616.26(c), the plan administrator shall—

(1) No later than 60 days after receiving the distribution notice, issue a notice of benefit distribution in accordance with the rules described in paragraphs (c) and (d) of this section to each person (other than any employee organization or the PBGC) who is an affected party as of the termination date (and, in the case of a spin-off/termination transaction, each person who is, as of the termination date, a participant in the original plan and covered by the ongoing plan); and

(2) No later than 15 days after the date on which the plan administrator completes the issuance of the notices of benefit distribution, file with the PBGC a certification that the notices were so issued in accordance with the requirements of this section.

(b) *Discovery of other affected parties.* Notwithstanding the provisions of paragraph (a) of this section, if the plan administrator discovers additional persons entitled to a notice of benefit distribution after the expiration of the time period specified in paragraph (a)(1) of this section, the failure to issue the notices of benefit distribution to such persons within the specified time period will not cause such notices to be untimely under paragraph (a) of this section if the plan administrator could not reasonably have been expected to know of the additional persons and if he or she promptly issues, to each such additional person, a notice of benefit distribution in the form and containing the information specified in paragraph (d) of this section.

(c) *Issuance.* (1) *Method.* The plan administrator shall issue a notice of benefit distribution individually to each person, either by hand-delivery or by first-class mail or courier service directed to the person's last known address.

(2) *When issued.* A notice of benefit distribution is deemed issued to each person on the date it is handed to the person or deposited with a mail or courier service (as evidenced by a postmark or written receipt).

(d) *Form and content of notices.* The plan administrator shall provide notices of benefit distribution in the form described in § 2617.24(a) and (b) of this subchapter and shall include in each—

(1) The information described in § 2617.24(c) of this subchapter;

(2) The information described in § 2617.24(d), (e), or (f) of this subchapter, as applicable (replacing the term "plan benefits" with "Title IV benefits" and "proposed termination date" with "termination date".

(3) A statement that, after plan assets have been distributed to provide all of the Title IV benefits payable with respect to a participant or a beneficiary of a deceased participant, either by the purchase of an irrevocable commitment or commitments from an insurer to provide benefits or by an alternative form of distribution provided for under the plan, the PBGC's guarantee with respect to that participant's or beneficiary's benefit ends; and

(4) If distribution of benefits under the plan may be wholly or partially by the purchase of irrevocable commitments from an insurer—

(i) The name and address of the insurer or insurers from whom the plan administrator intends to purchase the irrevocable commitments; or

(ii) If the plan administrator has not identified an insurer or insurers at the time the notice of distribution is issued, a statement that the affected party to whom the notice is directed will be notified of the name and address of the insurer or insurers from whom annuities may be purchased at a later date (but no

later than 45 days before the date of distribution).

(e) *Supplemental notice requirements.* (1) The plan administrator shall issue a supplemental notice (or notices) of distribution to each person in accordance with the rules in paragraph (e)(2) of this section if—

(i) The plan administrator has not yet identified an insurer or insurers at the time the notice of distribution is issued; or

(ii) The plan administrator included in the notice of distribution the name or names of the insurer or insurers from whom he or she intends to purchase the irrevocable commitments, but subsequently decides to select a different insurer.

(2) The plan administrator shall issue each supplemental notice in the manner provided in paragraphs (b) and (c) of this section no later than 45 days before the date of distribution and shall include the name and address of the insurer or insurers from whom, or (if not then known) the insurers from among whom, the plan administrator intends to purchase the irrevocable commitments.

§ 2616.28 Verification of plan sufficiency prior to closeout.

(a) *General rule.* Before distributing plan assets pursuant to a closeout under § 2616.29, the plan administrator shall verify whether the plan's assets are still sufficient to provide for benefits at the level determined by the PBGC, *i.e.*, guaranteed benefits or benefit liabilities. If the plan administrator finds that the plan is no longer able to provide for benefits at the level determined by the PBGC, then paragraph (b) or (c) of this section, as appropriate, shall apply.

(b) *Subsequent insufficiency for guaranteed benefits.* When a plan administrator finds that a plan is no longer sufficient for guaranteed benefits, the plan administrator shall promptly notify the PBGC in writing of that fact and shall take no further action to implement the plan termination, pending the PBGC's determination and notice pursuant to paragraph (b)(1) or (b)(2) of this section.

(1) *PBGC concurrence with finding.* If the PBGC concurs with the plan administrator's finding, the distribution notice shall be void, and the PBGC shall—

(i) Issue the plan administrator a notice of inability to determine sufficiency in accordance with § 2616.26(b); and

(ii) Require the plan administrator to submit a new valuation, certified to by an enrolled actuary, of the benefit liabilities and guaranteed benefits under the plan, valued in accordance with part 2619, subpart C, of this subchapter as of the date of the plan administrator's notice to the PBGC.

(2) *PBGC non-concurrence with finding.* If the PBGC does not concur with the plan administrator's finding, it shall so notify the plan administrator in writing, and the distribution notice shall remain in effect.

(c) *Subsequent insufficiency for benefit liabilities.* When a plan administrator finds that a plan is sufficient for guaranteed benefits but is no longer sufficient for benefit liabilities, the plan administrator shall immediately notify the PBGC in writing of this fact, but shall continue with the distribution of assets in accordance with § 2616.29.

(d) *Finding by PBGC of subsequent insufficiency.* In any case in which the PBGC finds on its own initiative that a subsequent insufficiency for guaranteed benefits has occurred, paragraph (b)(1) of this section shall apply, except that the guaranteed benefits shall be revalued as of the date of the PBGC's finding.

(e) *Restrictions upon finding of subsequent insufficiency.* When the plan administrator makes the finding described in paragraph (b) of this section or receives notice that the PBGC has made the finding described in paragraph (d) of this section, the plan administrator shall (except to the extent the PBGC otherwise directs) be subject to the prohibitions in § 2616.4(b).

§ 2616.29 Closeout of plan.

(a) *General rules.* (1) *Distribution.* If a plan administrator receives a distribution notice from the PBGC pursuant to § 2616.26(c) and neither the plan administrator nor the PBGC makes the finding described in § 2616.28(b) or (d), the plan administrator shall distribute plan assets in accordance with §§ 2616.6 and 2617.28(c), (e) and (f) of this subchapter no earlier than the 61st day and no later than the 180th day following the day on which the plan administrator completes the issuance of the notices of benefit distribution pursuant to § 2616.27(a). For purposes of applying § 2617.28(e)(1)(i), the phrase "the date that the plan administrator files the standard termination notice with the PBGC" shall be replaced by "the date that the plan administrator completes issuance of the notices of benefit distribution."

(2) *Notice of annuity contract.* If any of the plan's benefit liabilities payable to a participant or beneficiary have been distributed through the purchase of irrevocable commitments, the plan administrator shall provide such participant or beneficiary with a notice, contract, or certificate in accordance with § 2617.28(g).

(b) *Post-distribution certification.* Within 30 days after the completion of the distribution of plan assets in accordance with paragraph (a)(1) of this section, the plan administrator shall file with the PBGC a PBGC Form 602, Post-Distribution Certification for Distress Terminations, that has been completed in accordance with the instructions thereto.

PART 2617—STANDARD TERMINATIONS OF SINGLE-EMPLOYER PLANS

Subpart A—General Provisions

Sec.
2617.1 Purpose and scope.
2617.2 Definitions.
2617.3 Requirements for a standard termination.
2617.4 Administration of plan during pendency of termination proceedings.
2617.5 Challenges to plan termination under collective bargaining agreement.
2617.6 Annuity requirements.
2617.7 Facilitating plan sufficiency.
2617.8 Filing with the PBGC.
2617.9 Computation of time.
2617.10 Maintenance of plan records.

Subpart B—Standard Termination Process

2617.21 Purpose and scope.
2617.22 Notice of intent to terminate.
2617.23 Issuance of notices of plan benefits
2617.24 Form and contents of notices of plan benefits.
2617.25 Standard termination notice.
2617.26 PBGC action upon filing of standard termination notice.
2617.27 Notice of noncompliance.
2617.28 Closeout of plan.

Appendix to Part 2617—Agreement for Commitment to Make Plan Sufficient for Benefit Liabilities

Authority: 29 U.S.C. 1302(b)(3), 1341, and 1344.

Subpart A—General Provisions

§ 2617.1 Purpose and scope.

(a) *Purpose.* This part sets forth the rules and procedures for terminating a single-employer pension plan in a standard termination under the Employee Retirement Income Security Act of 1974, as amended. Under the Act, a single-employer plan may be voluntarily terminated only in a "standard" or a "distress" termination, and then only if the termination satisfies the statutory requirements for the type of termination sought. This part combines previous PBGC regulations in 29 CFR Parts 2616 and 2617, with appropriate changes in the rules for standard terminations. (The rules for distress terminations are included in Part 2616 of this subchapter.) Subpart A of this part contains the various general

rules and requirements relating to standard terminations. Subpart B sets forth the specific steps that a plan administrator must follow in order to terminate a plan in a standard termination.

(b) *Scope.* This part applies to the termination of any single-employer plan covered under section 4021(a) of the Act and not excluded by section 4021(b) for which a notice of intent to terminate in a standard termination is issued on or after January 28, 1993.

§ 2617.2 Definitions.

For purposes of this part:

Act means the Employee Retirement Income Security Act of 1974, as amended.

Affected party means, with respect to a terminating plan—

(1) Each participant;

(2) Each beneficiary of a deceased participant;

(3) Each alternate payee under an applicable qualified domestic relations order, as defined in sections 206(d)(3) of the Act;

(4) Each employee organization that currently represents any group of participants; and

(5) For any group of participants not currently represented by an employee organization, the employee organization, if any, that last represented such group of participants within the 5-year period preceding issuance of the notice of intent to terminate.

In connection with any notice required under this part, if an affected party has designated in writing another person to receive the notice, any reference to the affected party shall be deemed to refer to the designated person.

Benefit liabilities means the benefits of participants and their beneficiaries under the plan (within the meaning of section 401(a)(2) of the Code).

Code means the Internal Revenue Code of 1986, as amended.

Contributing sponsor means the person entitled to receive a deduction under section 404(a) of the Code (or that would be entitled to receive a deduction except for the limitations in section 404(a)) for contributions required to be made to a plan under section 302 of the Act and section 412 of the Code.

Controlled group means, in connection with any person, a group consisting of such person and all other persons under common control with such person, determined in accordance with 29 CFR Part 2612.

Date of distribution means—

(1) For benefits provided through the purchase of irrevocable commitments, the date on which the obligation to provide the benefits passes from the plan to the insurer; and

(2) For benefits provided other than through the purchase of irrevocable commitments, the date on which full plan benefits are delivered to the participant or beneficiary (or to another plan or benefit arrangement or other recipient authorized by the participant or beneficiary in accordance with applicable law and regulations) personally or by deposit with a mail or courier service (as evidenced by a postmark or written receipt).

Existing collective bargaining agreement means a collective bargaining agreement that—

(1) By its terms, either has not expired or is extended beyond its stated expiration date because neither of the collective bargaining parties took the required action to terminate it, and

(2) Has not been made inoperative by judicial ruling. When a collective bargaining agreement no longer meets these conditions, it ceases to be an "existing collective bargaining agreement," whether or not any or all of its terms continue to apply by operation of law.

Insurer means a company authorized to do business as an insurance carrier under the laws of a state or the District of Columbia.

Irrevocable commitment means an obligation by an insurer to pay benefits to a named participant or surviving beneficiary, if the obligation cannot be cancelled under the terms of the insurance contract (except for fraud or mistake) without the consent of the participant or beneficiary and is legally enforceable by the participant or beneficiary.

Majority owner means, with respect to a contributing sponsor of a single-employer plan, an individual who owns, directly or indirectly, 50 percent or more of—

(1) An unincorporated trade or business,

(2) The capital interest or the profits interest in a partnership, or

(3) Either the voting stock of a corporation or the value of all of the stock of a corporation. For this purpose, the constructive ownership rules of section 414(b) and (c) of the Code shall apply.

Mandatory employee contributions means amounts contributed to the plan by a participant that are required as a condition of employment, as a condition of participation in the plan, or as a condition of obtaining benefits under the plan attributable to employer contributions.

Notice of intent to terminate means the notice to affected parties advising each of a proposed plan termination, as required by section 4041(a)(2) of the Act and § 2617.22 of this part.

Notice of noncompliance means a notice issued to a plan administrator by the PBGC pursuant to section 4041(b)(2)(C) of the Act and § 2617.27 of this part advising the plan administrator that the requirements for a standard termination have not been satisfied and that the plan is an ongoing plan.

Notice of plan benefits means the notice to each participant and beneficiary required by section 4041(b)(2)(B) of the Act and § 2617.23 and 2617.24 of this part describing his or her plan benefits.

Participant means—

(1) Any individual who is currently in employment covered by the plan and who is earning or retaining credited service under the plan, including any individual who is considered covered under the plan for purposes of meeting the minimum participation requirements but who, because of offset or similar provisions, does not have any accrued benefits;

(2) Any nonvested individual who is not currently in employment covered by the plan but who is earning or retaining credited service under the plan; and

(3) Any individual who is retired or separated from employment covered by the plan and who is receiving benefits under the plan or is entitled to begin receiving benefits under the plan in the future, excluding any such individual to whom an insurer has made an irrevocable commitment to pay all the benefits to which the individual is entitled under the plan.

PBGC means the Pension Benefit Guaranty Corporation.

Person means an individual, partnership, joint venture, corporation, mutual company, joint-stock company, trust, estate, unincorporated organization, association, or employee organization.

Plan benefits means the benefits to which of a participant is, or may become, entitled under the plan's provisions in effect as of the termination date, based on the participant's accrued benefit under the plan as of that date. Each participant's "plan benefits" equals that participant's "benefit liabilities," and the sum of all "plan benefits" equals the plan's "benefit liabilities."

Proposed distribution date means the date chosen by the plan administrator as the tentative date for the distribution of plan assets pursuant to a standard termination. A proposed distribution date may not be earlier than the 61st

day, nor later than the 240th day, following the day on which the plan administrator files a standard termination notice with the PBGC.

Proposed termination date means the date specified as such by the plan administrator in the notice of intent to terminate or, if later, in the standard termination notice. If a plan terminates in a standard termination, this date becomes the "termination date." A proposed termination date may not be earlier than the 60th day, nor later than the 90th day, after the issuance of the notice of intent to terminate.

Residual assets means the plan assets remaining after all benefit liabilities and other liabilities of the plan have been satisfied.

Single-employer plan means any defined benefit plan (as defined in section 3(35) of the Act) that is not a multiemployer plan (as defined in section 4001(a)(3) of the Act).

Spin-off/termination means a splitting of a single defined benefit plan into two or more plans, in conjunction with the termination of one or more of the plans, resulting in a reversion of residual assets to the employer.

Standard termination means the voluntary termination, in accordance with section 4041(b) of the Act and this part, of a single-employer plan that is able to provide for all its benefit liabilities when plan assets are distributed.

Standard termination notice means the notice filed with the PBGC pursuant to section 4041(b)(2)(A) of the Act and § 2617.25 of this part advising the PBGC of a proposed standard termination. PBGC Form 500 (including Schedule EA–S) is the standard termination notice.

§ 2617.3 Requirements for a standard termination.

(a) *Exclusive means of voluntary plan termination.* Unless all the requirements for a distress termination set forth in section 4041(c) of the Act and Part 2616 of this subchapter are satisfied, a plan may be voluntarily terminated by the plan administrator only if all of the requirements for a standard termination set forth in paragraph (b) of this section are satisfied.

(b) *Requirements.* A plan may be terminated in a standard termination only if—

(1) The plan administrator issues a notice of intent to terminate to each affected party in accordance with § 2617.22 at least 60 days and not more than 90 days before the proposed termination date;

(2) The plan administrator files a standard termination notice with the PBGC in accordance with § 2617.25 no later than 120 days after the proposed termination date;

(3) The plan administrator issues notices of plan benefits to plan participants and beneficiaries in accordance with §§ 2617.23 and 2617.24 no later than the date that the standard termination notice is filed with the PBGC;

(4) The PBGC does not issue a notice of noncompliance to the plan administrator pursuant to § 2617.27; and

(5) The plan administrator distributes plan assets in accordance with § 2617.28(c) within the 180-day (or extended) distribution period under § 2617.28 (a), (e), and (f), in satisfaction of all benefit liabilities under the plan.

(c) *Effect of failure to satisfy requirements.* If the plan administrator does not satisfy all of the requirements of paragraph (b) of this section, any action taken to effect the plan termination shall be null and void, and the plan shall be an ongoing plan. A plan administrator who still desires to terminate the plan shall initiate the termination process again, starting with the issuance of a new notice of intent to terminate.

§ 2617.4 Administration of plan during pendency of termination proceedings.

(a) *General rule.* Except to the extent specifically prohibited by this section, during the pendency of termination proceedings the plan administrator shall continue to carry out the normal operations of the plan, such as putting participants into pay status, collecting contributions due the plan, investing plan assets, and making loans to qualified participants, in accordance with plan provisions and applicable law and regulations.

(b) *Prohibitions after issuance of notice of intent to terminate.* Except as provided in paragraph (c) of this section, during the period beginning on the first day the plan administrator issues a notice of intent to terminate and ending on the last day of the PBGC's 60-day (or extended) review period, as described in § 2617.26(a), the plan administrator shall not—

(1) Distribute plan assets pursuant to or in furtherance of the termination of the plan;

(2) Pay benefits attributable to employer contributions, other than death benefits, in any form other than as an annuity; or

(3) Purchase irrevocable commitments to provide benefits from an insurer.

(c) *Exceptions.* During the period set forth in paragraph (b) of this section, the plan administrator may pay benefits attributable to employer contributions either through the purchase of irrevocable commitments from an insurer or in a form other than an annuity if—

(1) The participant has separated from active employment;

(2) The distribution is consistent with prior plan practice; and

(3) The distribution is not reasonably expected to jeopardize the plan's sufficiency for benefit liabilities.

(d) *Effect of notice of noncompliance.* If the PBGC issues a notice of noncompliance pursuant to § 2617.27, the prohibitions described in paragraphs (b)(2) and (b)(3) of this section shall cease to apply—

(1) Upon expiration of the period during which reconsideration may be requested under § 2617.27(c) or, if earlier, at the time the plan administrator decides not to request reconsideration; or

(2) If reconsideration is requested, upon PBGC issuance of its decision on reconsideration.

§ 2617.5 Challenges to plan termination under collective bargaining agreement.

(a) *Suspension upon formal challenge to termination.* (1) If the PBGC is advised, before the 60-day (or extended) period specified in § 2617.26 ends, that a formal challenge to the plan termination (as described in paragraph (b) of this section) has been initiated, the PBGC shall suspend the termination proceeding and shall so advise the plan administrator in writing. If the PBGC is advised of such a challenge after the 60-day (or extended) period specified in § 2617.26 ends but before the termination procedure is concluded pursuant to this part, the PBGC may suspend the termination proceeding and, if it does, shall so advise the plan administrator in writing.

(2) The following rules shall apply during a period of suspension pursuant to paragraph (a) of this section beginning on the date of the PBGC's written notification to the plan administrator and ending with the final resolution of the challenge to the termination:

(i) The running of all time periods specified in the Act or this part relevant to the termination shall be suspended; and

(ii) The plan administrator shall comply with the prohibitions in § 2617.4.

(b) *Formal challenge to termination.* For purposes of this section, a formal challenge to a plan termination is initiated when any of the following actions is taken, asserting that the termination would violate the terms and

conditions of an existing collective bargaining agreement:

(1) The commencement of any procedure specified in the collective bargaining agreement for resolving disputes under the agreement; or

(2) The commencement of any action before an arbitrator, administrative agency or board, or court under applicable labor-management relations law.

(c) *Resolution of challenge.* Immediately upon the final resolution (as described in paragraph (d) of this section) of the formal challenge to the termination, the plan administrator shall notify the PBGC in writing of the outcome of the challenge, and shall provide the PBGC with a copy of the award or order, if any. If the validity of the proposed termination has been upheld, the plan administrator also shall advise the PBGC whether the plan administrator wishes to continue the proposed termination.

(1) *Challenge sustained.* If the arbitrator, agency, board, or court has determined (or the parties have agreed) that the proposed termination violates an existing collective bargaining agreement, the PBGC shall dismiss the termination proceeding, all actions taken to effect the plan termination shall be null and void, and the plan shall be an ongoing plan.

(2) *Termination sustained.* If the arbitrator, agency, board, or court has determined (or the parties have agreed) that the proposed termination does not violate an existing collective bargaining agreement and the plan administrator wishes to proceed with the termination, the PBGC shall reactivate the termination proceeding by sending a written notice thereof to the plan administrator, and the following rules shall apply:

(i) The termination proceeding shall continue from the point where it was suspended;

(ii) All actions taken to effect the termination before the suspension shall be effective;

(iii) Any time periods that were suspended shall resume running from the date of the PBGC's notice of the reactivation of the proceeding; and

(iv) Any time periods that had fewer than 15 days remaining shall be extended to the 15th day after the date of the PBGC's notice, or such later date as the PBGC may specify.

(d) *Final resolution of challenge.* For purposes of this section, a formal challenge to a proposed termination is finally resolved when—

(1) The parties involved in the challenge enter into a settlement that resolves the challenge;

(2) A final award, administrative decision, or court order is issued that is not subject to review or appeal; or

(3) A final award, administrative decision, or court order is issued that is not appealed, or review or enforcement of which is not sought, within the time for filing an appeal or requesting review or enforcement.

(e) *Involuntary termination by the PBGC.* Notwithstanding any other provision of this section, the PBGC retains the authority in any case to initiate a plan termination in accordance with the provisions of section 4042 of the Act.

§ 2617.6 Annuity requirements.

(a) *General rule.* Except as provided in paragraphs (b) and (d) of this section, when a plan is closed out under § 2617.28, any benefit that is payable as an annuity under the provisions of the plan must be provided in annuity form through the purchase from an insurer of a single premium, nonparticipating, nonsurrenderable annuity contract that constitutes an irrevocable commitment by the insurer to provide the benefits purchased.

(b) *Exceptions to annuity requirement.* A benefit that is payable as an annuity under the provisions of a plan need not be provided in annuity form if the plan provides for an alternative form of distribution and either paragraph (b)(1) or (b)(2) of this section applies:

(1) The participant is not in pay status as of the date of distribution, and the present value of the participant's total benefit under the plan, including amounts previously distributed to the participant, is $3,500 or less, determined in accordance with sections 411(a)(11) and 417(e)(3) of the Code and the regulations thereunder. The date used for determining such interest rate or rates shall be—

(i) The date set forth in the plan for such purpose, provided that the plan provision is in accord with section 417(e)(3) of the Code and the regulations thereunder (substituting "date of distribution" for "annuity starting date" wherever used in the plan); or

(ii) If the plan does not provide for such a date, the date of distribution.

(2) The participant elected the alternative form of distribution in writing, with the written consent of his or her spouse, in accordance with the requirements of sections 401(a)(11), 411(a)(11), and 417 of the Code and the regulations thereunder.

(c) *Optional benefit forms.* Except as permitted by sections 401(a)(11), 411(d)(6), and 417 of the Code and the regulations thereunder, an annuity contract purchased to satisfy the annuity requirement shall preserve all applicable benefit options provided under the plan as of the termination date.

(d) *Participating annuities.* (1) *General rule.* Notwithstanding the requirement of paragraph (a) of this section that an annuity contract be nonparticipating, a participating annuity contract may be purchased to satisfy the annuity requirement if—

(i) All benefit liabilities will be guaranteed under the annuity contract as the unconditional, irrevocable, and noncancellable obligation of the insurer;

(ii) In no event, including unfavorable investment or actuarial experience, can the amounts payable to participants under the annuity contract decrease except to correct mistakes; and

(iii) As provided in paragraph (d)(2) of this section, no amount of residual assets to which participants are entitled will be used to pay for the participation feature.

(2) *Plans with residual assets.* If all or a portion of the residual assets of a plan will be distributed to participants—

(i) The additional premium for the participation feature must be paid from the contributing sponsor's share, if any, of the residual assets or from assets of the contributing sponsor; and

(ii) If the plan provided for mandatory employee contributions, the amount of residual assets must be determined using the price of the annuities for all benefit liabilities without the participation feature.

§ 2617.7 Facilitating plan sufficiency.

(a) *Commitment to make plan sufficient.* (1) *General rule.* At any time before a standard termination notice is filed with the PBGC, in order to enable the plan to terminate in that standard termination, a contributing sponsor or a member of a controlled group of a contributing sponsor may make a commitment to contribute any additional sums necessary to make the plan sufficient for all benefit liabilities. Any such commitment shall be treated as a plan asset for all purposes under this part. A sample commitment is included in the appendix to this part.

(2) *Requirements for valid commitment.* A commitment to make a plan sufficient for all benefit liabilities shall be valid for purposes of this part only if the commitment—

(i) Is made to the plan;

(ii) Is in writing, signed by the contributing sponsor and/or controlled group member(s); and

(iii) If the contributing sponsor or controlled group member is the subject of a bankruptcy liquidation or reorganization proceeding, as described

in § 2616.3(d)(1) or (d)(2) of this subchapter, is approved by the court before which the liquidation or reorganization proceeding is pending or is unconditionally guaranteed, by a person not in bankruptcy, to be met at or before the time distribution of assets is required in the standard termination.

(b) *Alternative treatment of majority owner's benefit.* (1) *General rule.* In order to facilitate the termination of the plan and distribution of assets in a standard termination, a majority owner may agree to forego receipt of all or part of his or her benefit until the benefit liabilities of all other plan participants have been satisfied.

(2) *Requirements for valid agreement.* Any agreement by a majority owner to an alternative treatment of his or her benefit is valid only if—

(i) The agreement is in writing;

(ii) In any case in which the total value of the benefit (determined in accordance with § 2617.6(b)) is greater than $3,500, the spouse, if any, of the majority owner consents, in writing, to the alternative treatment of the benefit; and

(iii) The agreement is not inconsistent with a qualified domestic relations order (as defined in section 206(d)(3) of the Act).

§ 2617.8 Filing with the PBGC.

(a) *Date of filing.* Any document required or permitted to be filed with the PBGC under this part shall be deemed filed on the date that it is received at the PBGC, providing it is received no later than 4:00 p.m. on a day other than Saturday, Sunday, or a Federal holiday. Documents received after 4:00 p.m. or on Saturday, Sunday, or a Federal holiday shall be deemed filed on the next regular business day.

(b) *How to file.* Any document to be filed under this part may be delivered by mail or by hand to: Pension Benefit Guaranty Corporation, Case Operations and Compliance Department, Code 45000, 2020 K Street, NW., Washington, DC 20006–1806.

§ 2617.9 Computation of time.

In computing any period of time prescribed or allowed by this part, the day of the act or event from which the designated period of time begins to run is not counted. The last day of the period so computed shall be included, unless it is a Saturday, Sunday, or Federal holiday, in which event the period runs until the end of the next day that is not a Saturday, Sunday, or Federal holiday. Notwithstanding the preceding sentence, a proposed termination date may be any day, including a Saturday, Sunday, or Federal holiday.

§ 2617.10 Maintenance of plan records.

Either the contributing sponsor or the plan administrator of a terminating plan shall maintain and preserve all records used to compute benefit liabilities with respect to each individual who is a plan participant or a beneficiary of a deceased participant as of the termination date, in accordance with the following rules:

(a) The records to be maintained and preserved are those used to compute the benefit for purposes of distribution to each individual in accordance with § 2617.28(c) and include, but are not limited to, the plan documents and all underlying data, including worksheets prepared by or at the direction of the enrolled actuary, used in determining the amount, form, and value of benefits.

(b) All records subject to this section shall be preserved for six years after the date the post-distribution certification required under § 2617.28(h) is filed with the PBGC.

(c) The contributing sponsor or plan administrator, as appropriate, shall make records subject to this section available to the PBGC upon request for inspection and photocopying, and shall submit such records to the PBGC within 30 days after receipt of the PBGC's written request therefor (or such other period as may be specified in such written request).

Subpart B—Standard Termination Process

§ 2617.21 Purpose and scope.

This subpart describes in detail the standard termination process. Sections 2617.22–2617.24 prescribe the rules for the first two statutory notices that plan administrators must issue in a standard termination. The first, the "notice of intent to terminate," is issued to all affected parties to begin the termination process. The second, the "notice of plan benefits," is issued to participants and beneficiaries before the PBGC begins its review of the proposed termination. Section 2617.25 describes the rules for filing with the PBGC the "standard termination notice" and any supplemental notice or notices. Sections 2617.26 and 2617.27 cover the PBGC's review of the proposed termination and the actions that the PBGC may take if it finds noncompliance with the termination procedures. Section 2617.28 prescribes the rules for closing out a plan in the absence of a notice of noncompliance from the PBGC.

§ 2617.22 Notice of intent to terminate.

(a) *General rule.* At least 60 days and no more than 90 days before the proposed termination date, the plan administrator shall issue to each person who is (as of the proposed termination date) an affected party a written notice of intent to terminate containing all of the information specified in paragraph (d) of this section. Failure to comply with the requirements of this section shall nullify the proposed termination.

(b) *Discovery of other affected parties.* Notwithstanding the provisions of paragraph (a) of this section, if the plan administrator discovers additional affected parties after the expiration of the time period specified in paragraph (a)(1) of this section, the failure to issue the notice of intent to terminate to such parties within the specified time period will not cause the notice to be untimely under paragraph (a) of this section if the plan administrator could not reasonably have been expected to know of the additional affected parties and if he or she promptly issues the notice to each additional affected party.

(c) *Issuance.* (1) *Method.* The plan administrator shall issue the notice of intent to terminate to each affected party individually either by hand delivery or by first-class mail or courier service directed to the affected party's last known address.

(2) *When issued.* The notice of intent to terminate is deemed issued to each affected party or deposited with a mail or courier service (as evidenced by a postmark or written receipt).

(d) *Contents of notice.* The plan administrator shall include in the notice of intent to terminate all of the following information:

(1) The name of the plan and of the contributing sponsor;

(2) The employer identification number ("EIN") of the contributing sponsor and the plan number ("PN"); if there is no EIN or PN, the notice shall so state;

(3) The name, address, and telephone number of the person who may be contacted by an affected party with questions concerning the plan's termination;

(4) A statement that the plan administrator expects to terminate the plan in a standard termination on a proposed termination date that is either—

(i) A specific date set forth in the notice, or

(ii) A date to be determined that is dependent on the occurrence of some future event;

(5) If the proposed termination date is dependent on the occurrence of a future event, the nature of the event (such as

the merger of the contributing sponsor with another entity), generally when the event is expected to occur, and when the termination will occur in relation to the other event;

(6) A statement that benefit and service accruals will continue until the date of termination or, if applicable, that benefit accruals were or will be frozen as of a specific date in accordance with section 204(h) of the Act;

(7) A statement that, in order to terminate in a standard termination, plan assets must be sufficient to provide all benefit liabilities under the plan with respect to each participant and each beneficiary of a deceased participant;

(8) A statement that, after plan assets have been distributed to provide all benefit liabilities with respect to a participant or a beneficiary of a deceased participant, either by the purchase of an irrevocable commitment or commitments from an insurer to provide benefits or by an alternative form of distribution provided for under the plan, the PBGC's guarantee with respect to that participant's or beneficiary's benefit ends;

(9) If distribution of benefits under the plan may be wholly or partially by the purchase of irrevocable commitments from an insurer—

(i) The name and address of the insurer or insurers from whom the plan administrator intends to purchase the irrevocable commitments; or

(ii) If the plan administrator has not identified an insurer or insurers at the time the notice of intent to terminate is issued, a statement that—

(A) Irrevocable commitments may be purchased from an insurer to provide some or all of the benefits under the plan,

(B) The insurer or insurers have not yet been identified, and

(C) Affected parties will be notified of the name and address of the insurer or insurers at a later date (but no later than 45 days before the date of distribution, as defined in § 2617.2);

(10) A statement that if the termination does not occur, the plan administrator will notify the affected parties in writing of that fact;

(11) A statement that each affected party, other than any employee organization, will be receiving a written notification of the benefits that the person will receive; and

(12) For retirees only, a statement that their monthly (or other periodic) benefit amounts will not be affected by the plan's termination.

(e) *Supplemental notice requirements.*

(1) The plan administrator shall issue a supplemental notice (or notices) of intent to terminate to each affected party in accordance with the rules in paragraph (e)(2) of this section if—

(i) The plan administrator has not yet identified an insurer or insurers at the time the notice of intent to terminate is issued; or

(ii) The plan administrator notifies affected parties of the insurer or insurers from whom he or she intends to purchase the irrevocable commitments, either in the notice of intent to terminate or in a later notice, but subsequently decides to select a different insurer.

(2) The plan administrator shall issue each supplemental notice in the manner provided in paragraph (b) of this section no later than 45 days before the date of distribution and shall include the name and address of the insurer or insurers from whom, or (if not then known) the insurers from among whom, the plan administrator intends to purchase the irrevocable commitments.

(3) Any supplemental notice or notices meeting the requirements of paragraph (e)(2) of this section shall be deemed a part of the notice of intent to terminate.

(f) *Spin-off/termination transactions.* In the case of a spin-off/termination transaction, the plan administrator shall provide all participants in the original plan who are covered by the ongoing plan (as of the proposed termination date) with a notice describing the transaction no later than the date on which the plan administrator completes the issuance of notices of intent to terminate under this section.

§ 2617.23 Issuance of notices of plan benefits.

(a) *General rule.* No later than the date on which the plan administrator files the standard termination notice with the PBGC, as required by § 2617.25, the plan administrator shall issue to each person described in paragraph (b) of this section a notice of that individual's plan benefits. The notice shall be in the form and contain the information specified in § 2617.24. Failure to comply with the requirements of this section shall nullify the proposed termination.

(b) *Persons entitled to notice.* The plan administrator shall issue a notice of plan benefits to each person (other than any employee organization) who is an affected party as of the proposed termination date (and, in the case of a spin-off/termination transaction, each person who is, as of the proposed termination date, a participant in the original plan who is covered by the ongoing plan).

(c) *Discovery of other affected parties.* Notwithstanding the provisions of paragraph (a) of this section, if the plan administrator discovers additional persons entitled to a notice of plan benefits after the expiration of the time period specified in paragraph (a) of this section, the failure to issue a notice of plan benefits to such persons within the specified time period will not cause such notices to be untimely under paragraph (a) of this section if the plan administrator could not reasonably have been expected to know of the additional persons and if he or she promptly issues, to each such additional person, a notice of plan benefits in the form and containing the information specified in § 2617.24.

(d) *Issuance.* (1) *Method.* The plan administrator shall issue a notice of plan benefits individually to each person described in paragraph (b) of this section, either by hand-delivery or by first-class mail or courier service directed to the person's last known address.

(2) *When issued.* A notice of plan benefits is deemed issued to each person on the date it is handed to the person or deposited with a mail or courier service (as evidenced by a postmark or written receipt).

§ 2617.24 Form and contents of notices of plan benefits.

(a) *Form of notices.* The plan administrator shall provide notices of plan benefits written in plain, non-technical English that is likely to be understood by the average participant or beneficiary. If technical terms must be used, their meaning shall be explained in non-technical language.

(b) *Foreign languages.* If, as of the proposed termination date, a plan either—

(i) covers fewer than 100 participants and at least 25 percent of those participants speak only the same non-English language or

(ii) covers 100 or more participants and the lesser of 500 or 10 percent of those participants speak the same non-English language,

the plan administrator shall comply with paragraph (a) of this section and also shall include in the notices a statement, prominently displayed, in the foreign language (or languages) common to the non-English speaking plan participants advising them of how they may obtain assistance in understanding the notice. The assistance need not involve written materials, but shall be adequate to reasonably ensure that the participants and beneficiaries understand the information contained in their notices and shall be provided through media and at times and places that are

reasonably accessible to the participants and beneficiaries.

(c) *Contents of notice.* In addition to the information described in paragraph (d), (e), or (f) of this section, as applicable, the plan administrator shall include in each notice of plan benefits the following information:

(1) The name of the plan, the employer identification number ("EIN") of the contributing sponsor, and the plan number ("PN"); if there is no EIN or PN, the notice shall so state;

(2) The name, address, and telephone number of the person who may be contacted to answer questions concerning a participant's or beneficiary's benefit;

(3) The proposed termination date and, if applicable, a statement that this date is later than the proposed termination date given in the notice of intent to terminate; and

(4) If the amount of the plan benefits set forth in a notice is an estimate, a statement that the amount is an estimate and that benefits paid may be greater than or less than the estimate.

(d) *Benefits of persons in pay status.* The plan administrator shall include in the notice of plan benefits for a participant or beneficiary in pay status as of the proposed termination date the following information:

(1) The amount and form of the participant's plan benefits payable as of the proposed termination date;

(2) The amount and form of benefit, if any, payable to a beneficiary upon the participant's death and the name of the beneficiary;

(3) The amount and date of any increase or decrease in the benefit scheduled to occur after the proposed termination date (or that has already occurred) and an explanation of the increase or decrease, including, where applicable, a reference to the pertinent plan provision; and

(4) For benefits of participants or beneficiaries in pay status for one year or less as of the proposed termination date, the specific personal data used to calculate the plan benefits described in paragraphs (d)(1) and (d)(2) of this section, e.g., participant's age at retirement, spouse's age, participant's length of service, and including, for Social Security offset benefits, the participant's actual or, if unknown, estimated Social Security benefit and, for an estimated benefit, the assumptions used for the participant's earnings history.

(e) Benefits of participants not in pay status but form and starting date known. The plan administrator shall include in the notice of plan benefits for a participant who is not in pay status as of the proposed termination date, but who has, as of that date, elected to retire and has elected a form and starting date, or with respect to whom the plan administrator has determined a lump sum distribution will be made, the following information:

(1) The amount and form of the participant's plan benefits payable as of the projected benefit starting date, and what that date is;

(2) The amount and form of benefit, if any, payable to a beneficiary upon the participant's death and the name of the beneficiary;

(3) The amount and date of any increase or decrease in the benefit scheduled to occur after the proposed termination date (or that has already occurred) and an explanation of the increase or decrease, including, where applicable, a reference to the pertinent plan provision; and

(4) If the age at which, or form in which, the plan benefits will be paid differs from the age or form in which the participant's accrued benefit at normal retirement age is stated in the plan, the age or form stated in the plan and the age or form adjustment factors, including, in the case of a lump sum benefit, the interest rate used to convert to the lump sum benefit described in paragraph (e)(1) of this section and a reference to the pertinent plan provision;

(5) The specific personal data, as described in paragraph (d)(4) of this section, used to calculate the plan benefits (other than a lump sum benefit) described in paragraphs (e)(1) and (e)(2) of this section and, with respect to a benefit payable as a lump sum, the personal data used to calculate the underlying annuity; and

(6) If the plan benefits will be paid in a lump sum, an explanation of how the interest rate is used to calculate the lump sum; a statement that the higher the interest rate used, the smaller the lump sum amount; and, if applicable, a statement that the lump sum amount given is an estimate because the applicable interest rate may change before the distribution date.

(f) *Benefits of all other participants not in pay status.* The plan administrator shall include in the notice of plan benefits for any participant not described in paragraph (d) or (e) of this section, the following information:

(1) The amount and form of the participant's plan benefits payable at normal retirement age in any form permitted under the plan;

(2) The availability of any alternative benefit forms, including those payable to a beneficiary upon the participant's death either before or after retirement, and, for any benefits to which the participant is or may become entitled that would be payable before normal retirement age, the earliest benefit commencement date, the amount payable on and after such date, and whether the benefit would be subject to future reduction;

(3) The specific personal data, as described in paragraph (d)(4) of this section, used to calculate the plan benefits described in paragraph (f)(1) of this section and, with respect to a benefit that may be paid in a lump sum, the personal data used to calculate the underlying annuity; and

(4) If the plan benefits may be paid in a lump sum, an explanation of when a lump sum may be paid without a participant's consent; an explanation of how the interest rate is used to calculate the lump sum; and a statement that the higher the interest rate used, the smaller the lump sum amount.

§ 2617.25 Standard termination notice.

(a) *Form.* The plan administrator shall file with the PBGC a PBGC Form 500, Standard Termination Notice, Single-Employer Plan Termination, with Schedule EA-S, Standard Termination Certification of Sufficiency, that has been completed in accordance with the instructions thereto, on or before the 120th day after the proposed termination date.

(b) *Supplemental notice requirement.* If any of the benefits of the terminating plan may be provided in annuity form through the purchase of irrevocable commitments from an insurer and either of the conditions in paragraph (b)(1) of this section are met, the plan administrator shall file a supplemental notice (or notices) with the PBGC in accordance with the provisions in paragraph (b)(2) of this section.

(1) The plan administrator shall file with the PBGC a supplemental notice (or notices) if—

(i) The insurer or insurers from whom the plan administrator intends to purchase irrevocable commitments is not identified in the standard termination notice filed with the PBGC, or

(ii) The plan administrator has notified the PBGC of the insurer or insurers from whom he or she intends to purchase irrevocable commitments, either in the standard termination notice or in a later notice pursuant to paragraph (b)(2) of this section, and subsequently decides to select a different insurer.

(2) The supplemental notice (or notices) may be filed at any time after the filing of the standard termination

notice, but no later than 45 days before the date of distribution, and shall—

(i) Be in writing addressed to: Pension Benefit Guaranty Corporation, Case Operations and Compliance Department, Code 45000, 2020 K Street, NW., Washington, DC 20006–1860;

(ii) Give information identifying the contributing sponsor and the plan by name, address, employer identification and plan numbers ("EIN/PN"), and PBGC case number (if applicable); and

(iii) Give the name and address of the insurer or insurers from whom, or (if not then known) the insurers from among whom, the plan administrator intends to purchase the irrevocable commitments.

§ 2617.26 PBGC action upon filing of standard termination notice.

(a) *Review period upon filing of standard termination notice.* (1) *General rule.* After a complete standard determination notice has been filed in accordance with § 2617.8, the PBGC has 60 days to review the notice, determine whether to issue a notice of noncompliance pursuant to § 2617.27, and issue any such notice. The 60-day review period begins on the day following the filing of a complete standard termination notice and includes the 60th day. If the PBGC does not issue a notice of noncompliance by the last day of this 60-day period, the plan administrator shall proceed to close out the plan in accordance with § 2617.28.

(2) *Extension of review period.* The 60-day review period may be extended according to the following rules:

(i) The PBGC and the plan administrator may agree in writing, before the expiration of the 60-day review period, to extend the period for up to an additional 60 days;

(ii) More than one such extension may be made; and

(iii) Any extension may be made upon whatever terms and conditions are agreed to by the PBGC and the plan administrator.

(3) *Suspension of review period.* The 60-day review period shall be suspended in accordance with paragraph (d) of this section if the PBGC requests supplemental information.

(b) *Acknowledgment of complete standard termination notice.* The PBGC shall notify the plan administrator in writing of the date on which a complete standard termination notice was filed, so that the plan administrator may determine when the 60-day review period will expire.

(c) *Return of incomplete standard termination notice.* The PBGC shall return an incomplete standard termination notice and advise the plan administrator in writing of the missing item(s) of information and that the complete standard termination notice must be filed no later than the 120th day after the proposed termination date or the 20th day after the date of the PBGC notice, whichever is later.

(d) *Authority to request supplemental information.* Whenever the PBGC has reason to believe that any of the requirements of §§ 2617.22–2617.25 of this part were not complied with, or in any proposed termination that will result in a reversion of residual assets to the contributing sponsor, the PBGC may require the submission of information supplementing that furnished pursuant to § 2617.25. A request for additional information under this paragraph shall be in writing and shall suspend the running of the 60-day (or extended) review period described in paragraph (a) of this section. That period shall begin running again on the day following the filing of the required information. If a plan administrator or contributing sponsor fails to submit information required under this paragraph within the period specified in the PBGC's request, the PBGC may issue a notice of noncompliance in accordance with § 2617.27 or take other appropriate action to enforce the requirements of Title IV of ERISA.

(e) *Authority to suspend or nullify proposed termination.* Notwithstanding any other provision of this part, the PBGC may, by written notice to the plan administrator, suspend or nullify a proposed termination after expiration of the 60-day (or extended) review period in any case in which it determines that such action is necessary to carry out the purposes of Title IV of ERISA.

§ 2617.27 Notice of noncompliance.

(a) *General.* (1) The PBGC shall issue to the plan administrator a written notice of noncompliance, within the period prescribed by § 2617.26, whenever it makes one of the following determinations:

(i) A determination that the plan administrator failed to issue the notice of intent to terminate in accordance with § 2617.22.

(ii) A determination that the plan administrator failed to issue notices of plan benefits in accordance with §§ 2617.23 and 2617.24.

(iii) A determination that the standard termination notice, or any supplemental notice, was not filed in accordance with § 2617.25.

(iv) A determination that, as of the proposed distribution date, plan assets will not be sufficient to satisfy all benefit liabilities under the plan.

(2) The PBGC shall base any determination described in paragraph (a)(1) of this section on the information contained in the standard termination notice, including any supplemental submission under § 2617.26(d) and any supplemental notice under § 2617.25(b), or on information provided by any affected party or otherwise obtained by the PBGC.

(b) *Effect of notice of noncompliance.* A notice of noncompliance ends the standard termination proceeding, nullifies all actions taken to terminate the plan, and renders the plan an ongoing plan. The notice of noncompliance is effective upon the expiration of the period within which the plan administrator may request reconsideration pursuant to paragraph (c) of this section but, once a notice is issued, the plan administrator shall take no further action to terminate the plan (except by initiation of a new termination) unless and until the notice is revoked pursuant to a decision by the PBGC on reconsideration.

(c) *Reconsideration of notice of noncompliance.* A plan administrator may request reconsideration of a notice of noncompliance in accordance with the rules prescribed in Subpart C of Part 2606 of this chapter. Any request for reconsideration automatically stays the effectiveness of the notice of noncompliance until the PBGC issues its decision on reconsideration.

(d) *Notice to affected parties.* (1) *General rule.* Upon a decision by the PBGC on reconsideration affirming the issuance of a notice of noncompliance (or, if earlier, upon the plan administrator's decision not to request reconsideration), the plan administrator shall notify the affected parties (and any persons who were provided notice under § 2617.22(f)) in writing that the plan is not going to terminate or, if applicable, that the termination was invalid but that a new notice of intent to terminate is being issued.

(2) *Method of issuance.* The notices shall be delivered by first-class mail or by hand to each person described in paragraph (d)(1) who is an employee organization or a participant or beneficiary who is then in pay status. The notices to other participants and beneficiaries shall be provided in any manner reasonably calculated to reach those participants and beneficiaries. Reasonable methods of notification include, but are not limited to, posting the notice at participants' worksites or publishing the notice in an employee organization newsletter or newspaper of general circulation in the area or areas where participants and beneficiaries reside.

§ 2617.28 Closeout of plan.

(a) *General rules.* (1) *Distribution.* Except as provided in paragraphs (b), (e), and (f) of this section, if the PBGC does not issue a notice of noncompliance within the period specified in § 2617.26 or, if a notice of noncompliance is issued and later revoked after reconsideration under § 2617.27(c), the plan administrator shall complete the distribution of plan assets in accordance with paragraph (c) of this section within 180 days after the expiration of the review period specified in § 2617.26 or, if applicable, the date on which the PBGC revokes the notice of noncompliance.

(2) *Post-distribution requirements.* The plan administrator shall file with the PBGC a post-distribution certification in accordance with paragraph (h) of this section and, if any of the plan's benefit liabilities payable to a participant or beneficiary have been distributed through the purchase of irrevocable commitments, the plan administrator also shall provide such participant or beneficiary with a notice, contract, or certificate in accordance with paragraph (g) of this section.

(b) *Assets insufficient to satisfy benefit liabilities.* Before distributing plan assets to close out the plan, the plan administrator shall determine that plan assets are, in fact, sufficient to satisfy all benefit liabilities. In determining if plan assets are sufficient, the plan administrator shall subtract all liabilities (other than the future benefit liabilities that will be provided when assets are distributed), *e.g.*, benefit payments due before the distribution date; PBGC premiums for all plan years through and including the plan year in which assets are distributed; expenses, fees, and other administrative costs. If plan assets are not sufficient to satisfy all benefit liabilities, the plan administrator shall not make any distribution of assets to effect the plan's termination. In the event of an insufficiency, the plan administrator shall promptly notify the PBGC.

(c) *Method of distribution.* The plan administrator shall distribute plan assets in accordance with § 2617.6 by purchasing irrevocable commitments from an insurer in satisfaction of all benefit liabilities that must be provided in annuity form, and by otherwise providing all benefit liabilities that need not be provided in annuity form.

(d) *Failure to distribute within 180-day period.* Except as provided in paragraphs (e) and (f) of this section, failure to distribute assets in accordance with paragraph (c) of this section within the 180-day distribution period set forth in paragraph (a)(1) of this section, because of an insufficiency of plan assets as described in paragraph (b) of this section or for any other reason, shall nullify the termination. All actions taken to effect the plan's termination shall be null and void, and the plan shall be an ongoing plan. In this event, the plan administrator shall notify affected parties in writing, in accordance with § 2617.27(d), that the plan is not going to terminate or, if applicable, that the termination was invalid but that a new notice of intent to terminate is being issued.

(e) *Automatic extension of time for distribution.* (1) *Requirements for automatic extension.* The plan administrator shall be entitled to an automatic extension of the 180-day period in which to complete the distribution of plan assets if the plan administrator—

(i) Submits to the Internal Revenue Service a complete request for a determination with respect to the plan's tax-qualification status upon termination ("determination letter") on or before the date that the plan administrator files the standard termination notice with the PBGC;

(ii) Does not receive a determination letter at least 60 days before the expiration of the 180-day period; and

(iii) On or before the expiration of the 180-day period, notifies the PBGC in writing that an extension of the distribution deadline is required and certifies that the conditions in this paragraph have been met.

(2) *Extension period.* If the requirements in paragraph (e)(1) of this section are met, the time within which the plan administrator shall complete the distribution of plan assets is automatically extended until the 60th day after receipt of a favorable determination letter from the Internal Revenue Service,

(f) *Discretionary extension of time for distribution.* If the plan administrator will be unable to complete the distribution of plan assets within the 180-day (or extended) period for any reason other than an insufficiency described in paragraph (b) of this section, the plan administrator may request, and the PBGC shall grant or deny, in its discretion, an extension of time within which to complete the distribution according to the following rules:

(1) The plan administrator shall file a written request for a discretionary extension with the PBGC at least 30 days before the expiration of the 180-day (or extended) distribution period, explain the reason(s) for the request, and provide a date certain by which the distribution will be made if the extension is granted.

(2) The PBGC will not grant a discretionary extension based on failure to meet the requirements for an automatic extension under paragraph (e) of this section or failure to locate all participants or beneficiaries.

(3) The PBGC will grant a discretionary extension, in whole or in part, only if it is satisfied that the delay in making the distribution is not due to the action or inaction of the plan administrator or the contributing sponsor and that the distribution can in fact be completed by the date requested.

(g) *Notice of annuity contract.* In the case of the distribution of benefit liabilities through the purchase of irrevocable commitments—

(1) Either the plan administrator or the insurer shall, as soon as practicable, provide each participant and beneficiary with a copy of the annuity contract or certificate showing the insurer's name and address and clearly reflecting the insurer's obligation to provide the participant's or beneficiary's benefit;

(2) If such a contract or certificate is not available on or before the date on which the post-distribution certificate is required to be filed pursuant to paragraph (h) of this section, the plan administrator shall, no later than such date, provide each participant and beneficiary with a written notice stating—

(i) That the obligation for providing the participant's or beneficiary's plan benefits has transferred to the insurer;

(ii) The name and address of the insurer;

(iii) The name, address, and telephone number of the person designated by the insurer to answer questions concerning the annuity; and

(iv) That the participant or beneficiary will receive from the plan administrator or insurer a copy of the annuity contract or a certificate showing the insurer's name and address and clearly reflecting the insurer's obligation to provide the participant's or beneficiary's benefit; and

(3) The plan administrator shall certify to the PBGC, as part of the post-distribution certification required under paragraph (h) of this section, that the requirements in paragraph (g)(1) or (g)(2) of this section have been satisfied.

(h) *Post-distribution certification.* Within 30 days after the completion of the distribution of plan assets in accordance with paragraph (c) of this section, the plan administrator shall file with the PBGC a PBGC Form 501, Post-Distribution Certification for Standard Terminations, that has been completed

in accordance with the instructions thereto.

Appendix to Part 2617—Agreement for Commitment to Make Plan Sufficient for Benefit Liabilities

This agreement, by and between [name of company] _____(the "Company") and [name of plan] _____(the "Plan") shall be effective as of the last date executed.

Whereas, the Plan is an employee pension benefit plan as described in section 3(2)(A) of the Employee Retirement Income Security Act of 1974 ("ERISA"), 29 U.S.C. 1001–1461; and

Whereas the Company is [describe entity, *e.g.*, corporation, partnership] _____; and

Whereas, the Company is a contributing sponsor of the Plan, or a member of the contributing sponsor's controlled group, as described in section 4001(a) (13) and (14) of ERISA, 29 U.S.C. 1301(2) (13) and (14); and

Whereas, the Plan is covered by the termination insurance provisions of Title IV of ERISA, 29 U.S.C. 1301–1461; and

Whereas, the Plan administrator has issued or intends to issue to each affected party a notice of intent to terminate the Plan, pursuant to section 4041(a)(2) of ERISA, 29 U.S.C. 1341(a)(2); and

Whereas, the Company wishes the Plan to be sufficient for benefit liabilities, as described in section 4001(a)(16) of ERISA, 29 U.S.C. 1301(a)(16); and

Whereas, the parties understand that if the Plan is not able to satisfy all its obligations for benefit liabilities, it will not be able to terminate in a standard termination under section 4041(b) of ERISA, 29 U.S.C. 1341(b); and

Whereas, the Company is not a debtor in a bankruptcy or other insolvency proceeding.

[Alternative Paragraph]

Whereas, the Company is a debtor in a bankruptcy or other insolvency proceeding and the court before which the proceeding is pending approves this commitment.

Whereas, the Company is a debtor in a bankruptcy or other insolvency proceeding and this commitment is unconditionally guaranteed, by an entity or person not in bankruptcy, to be met at or before the time distribution is required in this standard termination.

Now Therefore, the parties hereto agree as follows:

1. The Company promises to pay to the Plan, on or before the date prescribed for distribution of Plan assets by the plan administrator, the amount necessary, if any, to ensure that, on the date the plan administrator distributes the assets of the Plan, the Plan is able to provide all benefit liabilities.

2. For the sole purpose of determining whether the Plan is sufficient to provide all benefit liabilities, an amount equal to the amount described in paragraph 1 shall be deemed a Plan asset available for allocation among the participants and beneficiaries of the Plan, in accordance with section 4044 of ERISA, 29 U.S.C. 1344.

3. This Agreement shall in no way relieve the Company of its obligations to pay contributions under the Plan.

50 CFR Part 17

Endangered and Threatened Wildlife and Plants; Karner Blue Butterfly and Five Aquatic Snails in South Central Idaho; Final Rules

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 17

RIN 1018–AB75

Endangered and Threatened Wildlife and Plants; Determination of Endangered Status for the Karner Blue Butterfly

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final Rule.

SUMMARY: The U.S. Fish and Wildlife Service determines the Karner blue butterfly (*Lycaeides melissa samuelis*) to be an endangered species pursuant to the Endangered Species Act of 1973 (Act), as amended. Historically, the Karner blue butterfly occurred in a rather narrow band extending from eastern Minnesota, across portions of Wisconsin, Illinois, Indiana, Michigan, Ohio, Canada (Ontario), Pennsylvania, New York, Massachusetts, and New Hampshire. It is now extirpated from Ohio, Pennsylvania, and Massachusetts, and is considered virtually extirpated from Ontario. This action is being taken because of constriction of the species' range and the declining size of remaining populations. The primary cause of past and threatened losses is habitat modification and destruction due to development, succession in the absence of natural disturbances, silviculture, and fragmentation of remaining habitat. This listing extends the Federal protection and recovery provisions afforded by the Act to *Lycaeides melissa samuelis*.

EFFECTIVE DATE: December 14, 1992.

ADDRESSES: The complete file for this rule is available for inspection, by appointment, during normal business hours at the New York Field Office, U.S. Fish and Wildlife Service, 3817 Luker Road, Cortland, New York 13045.

FOR FURTHER INFORMATION CONTACT: Mark W. Clough at the above address, telephone (607) 753–9334.

SUPPLEMENTARY INFORMATION:

Background

The Karner blue butterfly has been known for more than a century. When W.H. Edwards first described this butterfly in 1861 in Karner, New York, it was considered to belong to the same species as the Scudder's blue. In the 1940's, Nabokov revised the taxonomy of the group and renamed the Karner blue as a subspecies of the more common Melissa blue. The current scientific name is *Lycaeides melissa samuelis*, Nabokov. Some lepidopterists consider the Karner blue butterfly to be a separate species (D. Schweitzer, The Nature Conservancy, *in litt.*, 1987). However, this change has not been published and the Karner blue butterfly will be considered a subspecies for the purposes of listing.

Karner blues have a wingspan of 22–32 mm (0.87–1.26 in). The dorsal side of the male is silvery blue or dark blue with narrow black margins. The females are grayish brown dorsally, with irregular bands of orange inside the narrow black border on the upper wings. Both sexes are slate gray on the ventral side with the orange bands showing more regularity, and black spots circled with white (Shull 1987).

The habitat of the Karner blue butterfly is characterized by the presence of wild lupine (*Lupinus perennis*), a member of the pea family. Wild lupine is the only known larval food plant for the Karner blue butterfly and is, therefore, closely tied to the butterfly's ecology and distribution. In eastern New York and New Hampshire, the habitat typically includes sandplain communities, and grassy openings within very dry, sandy pitch pine/scrub oak barrens. In the Midwest, the habitat is also dry and sandy, including oak savanna and jack pine areas, and dune/sandplain communities. It is believed that the Karner blue butterfly originally occurred as shifting clusters of populations, or metapopulations, across a vast fire-swept landscape covering thousands of acres. While the fires resulted in localized extirpation, post-fire vegetational succession promoted colonization and rapid population buildups (Schweitzer 1989). Periodic disturbance is necessary to maintain openings in the canopy for wild lupine to thrive. A variety of other understory plants associated with the habitat serve as nectar sources for the adult butterflies.

The Karner blue butterfly usually has two broods each year. Eggs that have overwintered from the previous year hatch in April. The larvae feed on wild lupine leaves and mature rapidly. Near the end of May, they pupate and adult butterflies emerge very late in May in most years. The adults are typically in flight for the first 10 to 15 days of June, when the wild lupine is in bloom. Females lay eggs on or near the wild lupine plants. The eggs hatch in about one week and the larvae feed for about three weeks. They then pupate and the second brood adults appear in the second or third week of July. This time, the eggs are laid among plant litter or on grass blades at the base of the lupines, or on lupine pods or stems. By early August, no adults remain, and these eggs do not hatch until the following spring (Schweitzer 1989, Dirig 1979).

The distribution of the Karner blue butterfly is very discontinuous and generally follows the northern limits of wild lupine. Eight major population clusters of the Karner blue butterfly were known historically from portions of Wisconsin, Michigan, Minnesota, Indiana, Illinois, Ohio, Massachusetts, New Hampshire, Pennsylvania, New York, and Ontario. Over the past 100 years, Karner blue butterfly numbers have apparently declined rangewide by 99 percent or more. Over 90 percent of the decline occurred in the last 10 to 15 years. It is now extirpated from Massachusetts, Pennsylvania, and Ohio (Schweitzer 1989; *in litt.*, 1990). Unconfirmed reports indicate that one or two Karner blues may have been sighted at an historic Ontario site in 1990 or 1991.

The New York Natural Heritage Program maintains a state list of approximately 50 individual Karner blue butterfly sites, comprising about ten site-clusters, all found in the area known as the Albany Pine Bush and at scattered locations extending about 40 miles to the north. Once the site of a massive Karner blue population, the Albany Pine Bush is the locality from which the Karner blue butterfly was first scientifically described. There are also unverified records of Karner blues in Manhattan and Brooklyn from the mid 1800's. Givnish *et al.* (1988) noted a decline of Karner blue butterflies in the Albany Pine Bush of 85 to 98 percent over the past decade, exclusive of one site that has remained stable. Givnish *et al.* (1988) and Schweitzer (1990) described the decline in the Pine Bush population as dropping from numbers of around 80,000 in 1979, to around 1,000 in 1987, to 100–200 in 1990. North of the Albany Pine Bush, one disturbed site located at an airport has persisted with numbers estimated around 14,000 in 1990. This population is several times larger than all the other New York sites combined (Schweitzer 1990). The majority of extant Karner blue sites in New York are in municipal and private ownership. Other landowners include a State Park, The Nature Conservancy, and Saratoga County.

In New Hampshire, the Concord Pine Barrens along the Merrimack River support the only remaining occurrence of the Karner blue butterfly in New England. The sole population is extremely low in numbers and occurs on a privately owned, two to three acre site within a power line right-of-way bordering an industrial park, and on the grounds of a nearby airport. The results

of 1990 surveys reported by The Nature Conservancy (1990) showed a decline in the population size from an estimated 2,000 to 3,000 individuals in 1983 to an estimated 250 to 400 individuals in 1990. During that survey, Karner blue butterflies were not found at two other sites in the Concord Pine Barrens where the subspecies had been documented in 1983.

In Wisconsin, 33 of 36 historical occurrence sites were surveyed during 1990. Survey results reported by Bleser (1990) revealed that Karner blue butterflies were found at only 11 of the 33 historical sites visited. Although 23 previously unknown populations were discovered, Bleser noted that numbers of Karner blue butterflies observed were very small at most sites. Only three sites had 50 or more individuals observed, with none greater than 100. While these surveys did not provide a basis for statements of actual population size, they all appeared to be small, and many might not be considered viable. Many of the remnant populations in Wisconsin are also widely scattered, occurring in isolated patches of habitat along roadsides, power line clearings, and on abandoned agricultural fields. Additional surveys conducted in 1991 revealed a total of 131 discrete lupine areas that support Karner blue butterflies (Besadny *in litt.*, 1992). During the 1991 surveys, ten or fewer adults were counted at 53 percent of the 131 discrete sites, 11–50 adults were counted at 29 percent of the sites, 51–100 adults were counted at 10 percent of the sites, 101–300 at only seven percent of the sites, and over 300 at just one percent of the sites. It should be noted that actual population sizes may be 3 to 6 times, or higher, than the numbers of butterflies counted on a given site visit. At least half of Wisconsin's remaining Karner blue butterfly populations are small, isolated, and cannot be considered secure or viable in the long term. However, "a very good number of quite sizable populations occur on publicly owned properties offering good opportunities for long-term protection and management" (Besadny *in litt.*, 1992). Over three fourths of the Wisconsin sites are on publicly administered lands, including Necedah National Wildlife Refuge, Department of Defense, Wisconsin Department of Natural Resources, and County Forest. Other sites are owned or partly owned by other state and county governmental agencies, private landowners, and utility companies.

The Karner blue butterfly has declined throughout its range in Michigan. It still occurs in six of seven counties from which it was known historically, but the existing populations are greatly reduced and have become highly fragmented within expanses of unsuitable habitat (Wilsmann 1990). The Michigan Natural Features Inventory includes over two dozen historical locations for the Karner blue butterfly. Five of these no longer support populations of Karner blue butterflies, and many of the remainder are ranked as poor quality sites. Considering the population dynamics of the species, it can be expected that many individual sites which once supported populations of Karner blue butterflies are no longer suitable. Although information on exact historical locations is lacking, many general areas reported to have Karner blue butterflies in the 1950's have become unsuitable due to succession or conversion to plantations (L. Wilsmann, Michigan Department of Natural Resources, pers. comm., 1991). In his critique of 1989 population studies done by W. S. Lawrence and A. C. Cook in the Allegan State Game Area, Michigan's only remaining sizable population, Schweitzer (*in litt.*, 1989) noted that the results indicate a decline to fragmented remnants with dangerously low numbers, which is characteristic of a collapsing Karner blue butterfly population. Other Michigan sites occur on the Manistee National Forest (intermixed with private inholdings), on power company rights-of-way, and on other private lands.

The results of surveys during 1990 in Indiana were summarized by C. Hedge (Indiana Department of Natural Resources, pers. comm., 1991). Karner blue butterflies were reconfirmed at one known site, and they were also rediscovered on three of seven historical sites. Searches at 27 sites identified as potentially suitable for the species yielded six new locations for the species. However, all extant sites in Indiana are in two population clusters within two counties. Six sites are located on Indiana Dunes National Lakeshore, and other landowners include a county park and recreation department, a school district, and The Nature Conservancy. Shull (1987) indicated eight Indiana counties in the historic range of the Karner blue, although some of these records are based on sightings that are not supported with voucher specimens. The species is no longer found at one area where Shull reported observing dozens of individuals in 1980.

Cuthrell (1990) reported the results of 1990 surveys conducted in Minnesota. During the 1990 surveys of 50 potentially suitable sites, two areas with Karner blue butterflies were located. Both sites are on a State Wildlife Management Area, in the vicinity of one of the historical locations. Karner blue butterflies were not found at the other historical site. Studies conducted during 1991 revealed three new sites within one half to three miles of the sites surveyed in 1990 (Lane 1992a). Lane reported low numbers of individuals observed at all five sites, with none greater than 14, indicating extremely small populations.

The Karner blue butterfly was presumed extirpated from Illinois until the species was relocated there in August 1992. A total of seven butterflies, including five males and two females, were reported from a lupine site in the northern part of the State (S. Lauzon, Illinois Endangered Species Protection Board, pers. comm., 1992). The Karner blue was previously known from one collection in Illinois. This record consists of two specimens from the Andreas Bolter collection, labelled "N. I11." (Irwin and Downey 1973), which suggests that they were collected around or before 1900.

Karner blues frequently occur with other rare butterfly species such as the persius duskywing (*Erynnis persius*) and the frosted elfin (*Incisalia irus*), which are being listed by states where they occur (D. Schweitzer, pers. comm., 1991). Wild lupine is also the host plant for these species in parts of their range.

The Karner blue butterfly was first recognized by the Federal government in the **Federal Register** Notice of Review published on May 22, 1984 (49 FR 21664). That notice, which covered invertebrate wildlife under consideration for endangered or threatened status, included the Karner blue butterfly as a Category 2 species. Category 2 includes those taxa for which proposing to list as endangered or threatened is possibly appropriate, but for which substantial data on biological vulnerability and threats are not currently available to support proposed rules. In the **Federal Register** Animal Notice of Review published on January 6, 1989 (54 FR 554), the Karner blue butterfly was retained as a Category 2 species. Although the decline of the Karner blue butterfly in the Northeast was documented during the 1980's, it was believed that populations in the Midwest were relatively secure, particularly in Wisconsin and Michigan. Surveys conducted during 1989 and 1990 in the Midwest revealed that the butterfly is in decline there also. The Animal Notice of Review published in the November 21, 1991 **Federal Register** included the Karner blue butterfly as a Category 1 species, indicating that the

Service possessed sufficient information to support a proposal to list this butterfly. On January 21, 1992 (57 FR 2241), the Service published a proposed rule to list the Karner blue butterfly as an endangered species.

Summary of Comments and Recommendations

In the January 21, 1992, proposed rule and associated notifications, all interested parties were requested to submit factual reports or information that might contribute to the development of a final rule. Appropriate State agencies, county governments, Federal agencies, scientific organizations, major landowners, and other interested parties were contacted and requested to comment. Notices were published in newspapers of general circulation in each area where the Karner blue butterfly is known to occur. On March 4, 1992, the Service received a request for a public hearing from Dr. Wilmer Pautz of the University of Wisconsin-Eau Claire. Accordingly, on June 8, 1992, the Service published a notice in the **Federal Register** extending the comment period to July 6, 1992, and announcing a public hearing to be held in Eau Claire, Wisconsin on June 25, 1992. At the hearing the public was invited to present oral or written information to be entered into the record, on factors pertinent to the proposed listing of the Karner blue butterfly. Mrs. Maud Kelley, a local resident, and Dr. Wilmer Pautz, representing various citizens in Eau Clair County, presented the only oral statements, and no additional written statements were submitted at the public hearing.

A total of 112 written comments on the proposed listing were received by the Service. Comments supporting the listing were received from the Ohio, Indiana, Wisconsin, and Minnesota Departments of Natural Resources, the New Hampshire Fish and Game Department, and the New York State Department of Environmental Conservation. Comments supporting the listing were also received from six professional or amateur lepidopterists and butterfly researchers, and eight private conservation organizations. A total of 91 comment letters were received from private citizens; 87, including 66 from elementary school students, expressed support for listing the Karner blue butterfly. The remaining four comments from private citizens include the comment letter from Dr. Pautz requesting the public hearing and also requesting that listing be delayed for three years, two commenters that did not take a position on the listing, and one commenter who expressed opposition to proposed listing. A comment letter from the Newaygo County, Michigan Board of Commissioners expressed conditional support for the listing, if it would not interfere with the gypsy moth eradication program.

Many of the commenters provided general information or observations about the Karner blue butterfly, and additional scientific or factual information. Several commenters offered suggestions or recommendations for future protection, research, management, and recovery efforts, or offered to assist the Service in these areas. The Service will consider those suggestions and recommendations, and will continue to work with all interested parties in future efforts to protect and recover this species. Comments updating the data presented in the "Background" or "Summary of Factors Affecting the Species" are incorporated in those sections of this final rule. The Service's responses to the comments and issues raised at the public hearing and in the written comments follow.

Issue 1. The one comment received that opposed the listing of the Karner blue butterfly stated that development might be impacted, forests would be destroyed, and questioned the Karner blue butterfly's contribution to society.

The Service responds that under section 4(b)(1)(A) of the Act, a listing determination must be based solely on the best scientific and commercial data available. The first decision to list a species is based on biological criteria defined in five specific factors as discussed in the "Summary of Factors Affecting the Species" section of this rule. As discussed in that section of this rule, development has been a contributing factor in the destruction, modification, and fragmentation of the habitat of the Karner blue butterfly. The Service believes that additional protection and management of habitat for the Karner blue butterfly is essential for its survival. Management of habitat for the Karner blue butterfly requires maintaining openings in pine barrens, oak savanna, and sandplain habitat, particularly where natural processes have been curtailed, in order to allow the growth of the plant species wild lupine, upon which the Karner blue butterfly depends. Broad-scale conversion of forests to create Karner blue butterfly habitat would not be appropriate or necessary for proper management of this species. There may be many opinions as to a particular species' contribution to society including its aesthetic, scientific, ecological, or other significance, however this contribution of a species to society is not among the five factors upon which a listing determination is based.

Issue 2. Both commenters at the public hearing favored protection of the Karner blue butterfly and its habitat, and in particular, a specific area in the city of Altoona, Wisconsin. Mrs. Kelley commented on the potential of this area to provide habitat for the Karner blue butterfly. Dr. Pautz's statement pointed out the existence of suitable habitat in the Altoona area, and provided additional information on other sites in Wisconsin. Dr. Pautz's original comments requesting the hearing and his statement at the hearing contended there was a need for additional studies to determine the extent of Karner blue populations and habitat in the Altoona area prior to listing, and that Karner blue butterflies were found in more abundance in Wisconsin than indicated in the proposed rule.

Karner blue surveys were conducted in 1992 in the Altoona area in conjunction with review of a proposed highway project. Several sites that appeared to furnish suitable habitat were located during first flight period surveys in early June. However, resurvey of these areas during the second flight by a University of Minnesota graduate student who is conducting research on this species failed to locate any Karner blues at four sites and found only seven butterflies at a fifth site (Lane 1992b).

The text of this rule has been updated to reflect the most recent available data on the Karner blue butterfly's status in Wisconsin. As discussed in response to Issue 4, below, the Service believes that this butterfly warrants endangered status due to the danger of extinction in all or a significant portion of its range. The Service is confident that recent surveys have located most large Karner blue populations in Wisconsin. Furthermore, even relatively large extant populations cannot be considered secure unless threats from succession have been alleviated.

Issue 3. Dr. Pautz's statement expressed concern that the Service had proposed a finding that critical habitat determination for the Karner blue butterfly is presently not determinable. He recommended that the Service develop a description of critical habitat elements, and that studies should be conducted in the Altoona area so that critical habitat could be designated at the time of listing. In addition, 17 written comments were received that expressed concern that critical habitat was not being designated at the time of listing, suggested specific locations for

designation provided information on potential areas and habitat characteristics, or offered assistance in critical habitat designation.

The Service responds that the rationale for not designating critical habitat at the time of listing is detailed in the "Critical Habitat" Sections of the proposed rule and this final rule. The Service concluded that designation of critical habitat is not presently determinable as defined under implementing regulations at 50 CFR 424.12(a)(2). As discussed in the "Critical Habitat" section of this document, the Service is working with interested parties throughout the Karner blue butterfly's range to obtain necessary information to define the primary constituent elements of critical habitat, identify and map areas that should be designated, and ascertain the economic impacts of designation. The Service will consider information provided by commenters during formulation of the critical habitat proposal.

When a finding is made that critical habitat is not determinable at the time of listing, the regulations at 50 CFR 424.17(b)(2) provide that the designation of critical habitat be completed to the maximum extent prudent within two years from the date of publication of the proposed rule to list the species. Any proposal to designate critical habitat will be published in the **Federal Register** including maps and legal descriptions of all areas included in the proposal, and public comments will be solicited. The potential economic impacts of the critical habitat designation will be evaluated during the preparation of the required economic analysis.

Issue 4. The Wisconsin Department of Natural Resources noted that Wisconsin still supports a relatively large number of populations of Karner blue butterflies, that some are "quite sizable" with seemingly good potential for long-term viability with favorable management, and recommended that the Karner blue butterfly be designated threatened, rather than endangered. A professional lepidopterist also expressed the opinion that designation as threatened would be appropriate.

The Service responds that endangered status is warranted in situations where the species is in danger of extinction throughout all or a significant portion of its range. The Service recognizes that a few sizable populations with potential for long-term viability, are still extant; however, immediate protection and habitat management are deemed crucial to short- and long-term viability of Karner blue populations, even at these larger sites. The viability of many smaller sites, some of which may be very important to the recovery of the species, is even less certain. As discussed in the "Summary of Factors Affecting the Species" section, the fragility of remaining populations is exemplified by the recent loss of the population in Ontario due to adverse weather conditions. Major habitat restoration efforts were underway, and managers believed that this population of about 1000 second-brood adults was secure for the short- to medium-term. The collapse of the Albany Pine Bush population in New York, from around 80,000 butterflies in 1979 to 100–200 butterflies only eleven years later also illustrates the extreme vulnerability of this species. Considering the severity of decline the Karner blue butterfly has undergone in the past 10 to 15 years, the magnitude and imminence of the threats, and the vulnerability of existing populations, the Service concludes that the Karner blue butterfly is in danger of extinction without immediate and continuing protection and habitat management, and therefore, classification as endangered is warranted.

Issue 5. One commenter pointed out that evaluation of the Karner blue butterfly's relative status among the states must take into account the method of data collection and how the results were calculated. Some of the data were obtained through transect surveys and others from mark-release-recapture (MRR) methods, and the two methods are not directly comparable.

The Service recognizes that direct comparison of data collected using different methods or under different circumstances is inappropriate. The presentation of status information in this document is not intended to provide a direct comparison of population sizes among the states, rather it is presented on a state-by-state basis as an indicator of the decline that the Karner blue butterfly has undergone throughout its range. Recovery planning for this species will involve continued monitoring of its status, and the Service will be working with those involved in monitoring to develop appropriate and consistent survey methods.

Issue 6. Two commenters stated the need to clarify how prohibitions against "take" would be applied, particularly regarding research and management activities. One commenter suggested that taking of one or two voucher specimens be allowed to assure adequate documentation of new sites. Another commenter expressed concern about mark-release-recapture (MRR) work with Karner blue butterflies and its potential to cause injury or mortality.

The Service responds that "take" as defined in Section 3(18) of the Act means to harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, collect, or attempt to engage in any such conduct, and the prohibitions against "take" are applicable to any person subject to the jurisdiction of the United States. Regulations at 50 CFR 17.3 define "harm" as an act which actually kills or injures wildlife. Such act may include significant habitat modification or degradation where it actually kills or injures wildlife by significantly impairing essential behavioral patterns, including breeding, feeding, or sheltering. Since some form of the Karner blue butterfly (eggs, larvae, or adults) is present at all times in habitat where it occurs, prohibitions against "take" would apply to activities involving both the butterflies or the occupied habitat. As discussed in the "Available Conservation Measures" section of this document, permits can be issued for activities to enhance the propagation or survival of listed species. The procedures for obtaining such permits for activities involving endangered species are found in the regulations at 50 CFR 17.22. The Service recognizes the need to conduct various research and management activities for this species that will require permits, and will work closely with those involved to authorize appropriate activities. The potential effects of MRR work on Karner blue butterflies will be carefully considered by the Service in the issuance of any such permits, and during the planning of recovery activities for this species.

Issue 7. One commenter recommended that the Karner blue butterfly be listed as an endangered species, and with it, wild lupine, the only known larval food plant for this species.

The Service responds that although wild lupine has declined within the range of the Karner blue butterfly, this plant species has a wider distribution than the Karner blue butterfly, and lupine is more abundant in other parts of its range. Lupine also persists in some areas within the Karner blue range where the butterflies are no longer found. Information available to the Service does not suggest that lupine warrants consideration for Federal listing.

Issue 8. The Newaygo County Board of Commissioners in Michigan expressed conditional support for listing the Karner blue butterfly, provided the listing does not affect spraying in

connection with the gypsy moth eradication program.

The Service responds that as a result of cooperation between the Service, the Michigan Department of Natural Resources, the Michigan Department of Agriculture, and the U.S. Forest Service (Forest Service) regarding the 1992 Forest Service Gypsy Moth Suppression Program in Michigan, a plan was developed to address protection of natural resources of concern, including the Karner blue butterfly. The plan included establishing no-spray areas and buffer zones around occupied habitat. The Service recognizes there are potential conflicts with protection of the Karner blue butterfly in implementing both Federal and non-Federal spraying programs. The Service will continue working with the Forest Service in reviewing future spraying plans, and will be working with non-Federal programs and examining additional alternatives, such as ground spraying in certain areas and timing of application, in order to allow suppression programs to proceed. Federal listing will extend the protection against taking under Section 9 of the Act, and will require Federal agencies to consult with the Service on activities affecting the Karner blue butterfly under Section 7 of the Act. However, the Karner blue butterfly has been listed as a threatened species by the State of Michigan and, therefore, it presently receives some protection from take under State law. The Service anticipates continuing coordination and cooperation among all those involved regarding this issue.

Summary of Factors Affecting the Species

After a thorough review and consideration of all information available, the Service has determined that the Karner blue butterfly (*Lycaeides melissa samuelis*) should be classified as an endangered species. Procedures found at Section 4(a)(1) of the Endangered Species Act (16 U.S.C. 1531 *et seq.*) and regulations (50 CFR part 424) promulgated to implement the listing provisions of the Act were followed. A species may be determined to be an endangered or threatened species due to one or more of the five factors described in Section 4(a)(1). These factors and their application to the Karner blue butterfly (*Lycaeides melissa samuelis*) are as follows:

A. *The present or threatened destruction, modification, or curtailment of its habitat or range.* Throughout its range, changes in the habitat occupied by the Karner blue butterfly resulting from silviculture, urbanization, and the declining frequency of wildfires are largely the reasons for its decline (D. Schweitzer, *in litt.*, 1991). Modification and destruction of habitat and fragmentation of remaining areas are continuing threats to the survival of this butterfly. In addition to direct destruction of suitable habitat, urbanization has led to fire suppression on interspersed habitat; in the absence of fire, vegetational succession has made this habitat unsuitable. The threats due to fire suppression are discussed in more detail under Factor E.

In New York, the decline of the Karner blue butterfly resulting from loss and alteration of habitat is largely due to industrial, commercial, and residential development; fire suppression; vegetational succession; and habitat fragmentation. Although very little of the species' decline in the Albany Pine Bush since 1979 can be attributed to overt habitat loss from development, prior to then over 90 percent of the Pine Bush was destroyed over a period of perhaps 250 years (Schweitzer, *in litt.*, 1992). The Albany Pine Bush, which once covered at least 25,000 acres, has been reduced to about 2,500 acres (Givnish *et al.*, 1988). The recent decline in the Albany Pine Bush population can be attributed largely to improper or absent habitat management. Zaremba (1991) noted that in addition to habitat loss, dissection of metapopulations by development such as buildings and roads is a major threat to the Karner blue butterfly in New York, along with detrimental management of lupine stands and habitat disturbance due to off-road vehicles and horseback riding.

Habitat fragmentation and loss of habitat through development, combined with the extremely small size of the remaining population (discussed under Factor E), are the greatest threats to the Karner blue butterfly's continued existence in New England. The pine barrens in New Hampshire have largely been destroyed as a result of industrial, commercial, and residential development; road and airport construction; and gravel and sand mining. A major retail mall, recently completed on the outer edges of Concord's pine barrens, will encourage additional commercial development and further encroachments into pine barren habitat. Remaining fragments of this natural community are threatened by continued development pressures, vegetational succession in the absence of periodic fires, airport expansion, and degradation due to off-road vehicular use. Sperduto (New Hampshire Natural Heritage Inventory, pers. comm., 1991) estimated that 90 to 95+ percent of the historic pine barrens in the Merrimack system have disappeared.

Wisconsin's native savanna or pine and oak barrens community, which historically was quite prevalent throughout central and northwestern Wisconsin, and which very likely once supported many large metapopulations of this taxon, has declined severely. The Wisconsin Department of Natural Resources also reports that very few large contiguous barrens tracts remain in Wisconsin and cite the following threats to Karner blue habitat: fire suppression and succession, conversion to agriculture and pine or Christmas tree plantations, and other development. The Department states: "These threats remain paramount, and in fact are intensified, today (Besadny, *in litt.*, 1992)." Wisconsin still harbors some relatively large Karner blue populations and there are opportunities for long-term management and protection, but a significant long-term habitat management effort will be required if this potential is to be realized. Many other remnant populations of the Karner blue butterfly in Wisconsin are small and widely scattered, occurring in isolated patches of habitat along roadsides, power line clearings, and on abandoned agricultural fields (Bleser 1990).

In Michigan, the major cause for the butterfly's decline has been the degradation and loss of habitat as a result of succession and development. The habitat has been affected by fire suppression, agriculture, silviculture, and off-road vehicles. Remaining Karner blue butterfly populations continue to be threatened by the decline and loss of wild lupine populations resulting from these factors (Wilsmann 1990).

The two major threats in Indiana identified by C. Hedge (pers. comm., 1991) are destruction of habitat by development, and succession resulting from fire suppression.

Cuthrell (1990) identified fire suppression, development, and other human disturbance as causes for the loss of Karner blue butterfly habitat in Minnesota. The major threat to the extant sites is succession, but potential logging of the oak savannas also poses a threat (R. Baker, Minnesota Department of Natural Resources, pers. comm., 1991).

Irwin and Downey (1979) discussed the Karner blue butterfly as "another species that may have become extinct in Illinois . . . as a possible result of ecological change."

B. *Overutilization for commercial, recreational, scientific, or educational purposes.* There have been large scientific collections of Karner blues in

the past (R. Zaremba, The Nature Conservancy, pers. comm., 1991), although past collecting is not considered to have been a significant factor in the butterfly's decline to its present condition. However, the Karner blue butterfly's rarity and distinctively beautiful coloration may make it a desirable addition to private collections. Because the Karner blue butterfly's numbers are so low throughout its range, additional taking or collecting for any purpose other than part of a carefully planned recovery action may eliminate some populations and hamper recovery efforts.

C. *Disease or predation.* Disease and predation have not been documented as factors in the decline of this species.

D. *The inadequacy of existing regulatory mechanisms.* The Karner blue butterfly is listed as endangered or threatened by several states:

In New York, the Karner blue butterfly is listed as endangered, and the animals and parts thereof, including eggs and larvae, are protected from unauthorized take, import, transport, possession, or sale.

The State of Minnesota lists the Karner blue butterfly as a threatened species. Minnesota law protects state listed animals from take, import, transport, or sale.

In New Hampshire, the Karner blue butterfly is listed as endangered and is protected from unauthorized taking. While New Hampshire law directs other State agencies to avoid funding, carrying out, or authorizing actions that result in the destruction of essential habitat, it has not prevented the loss of habitat through development of private property. Wild lupine is listed by New Hampshire as an endangered plant species. It is protected by the New Hampshire Native Plant Protection Act of 1987, which is implemented by the New Hampshire Natural Heritage Inventory within the Department of Resources and Economic Development. However, this legislation does not prevent alteration of wild lupine habitat on private land with the landowner's permission.

In Wisconsin, the Karner blue butterfly has been recommended for addition to the State list as threatened, and the Department of Natural Resources reports that it hopes to formally propose the listing during 1992 (Besadny *in litt.*, 1992). In addition to protection from take at occupied sites, Wisconsin law provides for protection and management of habitat of State listed species on public lands, where a significant proportion of Wisconsin Karner blue occurrences are found.

In Michigan, the Karner blue butterfly is listed as a threatened species. Michigan law prevents taking of listed animals and protects occupied habitat, and would thereby afford protection for eggs and larvae at known sites.

The State of Indiana currently does not have an official State list for insects.

The Karner blue butterfly has not been listed by the State of Illinois due to the fact that it was believed extirpated in that State. With the recent rediscovery of a population, Illinois is likely to list the Karner blue as endangered, although Federal listing will automatically place the species on the Illinois endangered species list (S. Lauzon, pers. comm., 1992). Under Illinois State law, all life forms of listed species are protected from take, and therefore, known occupied habitat would also receive some protection. Some additional habitat protection is also provided to listed species through a provision requiring a consultation process to assess the impacts or actions authorized, funded, or carried out by State or local governments (S. Lauzon, *in litt.*, 1992).

While most states with extant Karner blue butterfly populations have legislation which protects the animals, provisions for protection and management of the habitat are incomplete to non-existent. Destruction and alteration of habitat are major reasons for the butterfly's decline.

Some populations of Karner blue butterflies occur on Federal, State, or privately owned parks, wildlife refuges, or preserves and are thereby recognized and protected. However, this protection has not prevented the range-wide declines of the Karner blue and its habitat due to the reasons discussed in Section A above, and Section E below.

The pine barrens and oak savannas where the Karner blue butterfly occurs are uplands underlain by extremely well-drained sandy soils and are thus afforded no protection by Federal or State wetland regulations. Upon Federal listing of the Karner blue butterfly, there will be additional protection provided from take or transport of the species, and from habitat alteration carried out, funded, or authorized by Federal agencies. The Endangered Species Act also provides for needed habitat management through the recovery process.

E. *Other natural or manmade factors affecting its continued existence.* The presence of wild lupine is essential to the occurrence and survival of the Karner blue butterfly. Unaltered by humans, a pine barren ecosystem is likely to be a mosaic of interspersed woody vegetation, such as pitch pine (*Pinus rigida*) and scrub oak (*Quercus ilicifolia*) and more open areas characterized by wild lupine, grasses, and other plants such as spreading dogbane (*Apocynum androsaemifolium*) and New Jersey tea (*Ceanothus americanus*) which serve as nectar sources for adult butterflies (The Nature Conservancy 1990).

Historically, the pine barren and oak savanna communities were maintained by naturally occurring, periodic fires that released nutrients and created openings favorable for wild lupine and other low growing plants. Residential and commercial development in and adjacent to these areas has lead to fire suppression. Without fire, vegetational succession to unsuitable habitat occurs on interspersed undeveloped areas. In the absence of fire, many areas once dotted with openings and wild lupine are now dominated by forest, with little or no understory. Fire suppression has affected habitat throughout the range of the Karner blue butterfly.

Since no life stage of the Karner blue butterfly is completely resistant to fire, recently burned lupine sites must be colonized by Karner blue butterflies from nearby unburned sites (Schweitzer 1989, Givnish *et al.* 1988). Maintenance of the Karner blue butterfly depends on its ability to disperse to newly expanded wild lupine sites (Zaremba 1991, Givnish *et al.* 1988, Schweitzer 1989). Fragmentation of remaining habitat prevents dispersal and results in small isolated populations.

With small, isolated, and declining populations, the subspecies is highly vulnerable to extinction. Extreme isolation, whether by geographic distance, ecological factors, or reproductive strategy, will prevent the influx of new genetic material and can result in a highly inbred population with low viability and/or fecundity (Chesser 1983). Natural fluctuations in rainfall, host plant vigor, or predation may weaken a population to such an extent that recovery to a viable level would be impossible. Isolation prevents recolonization by butterflies from other metapopulations, resulting in extinction.

Small remnant populations are highly vulnerable to a variety of factors. Weather events can eliminate such populations, as exemplified by the failure of the Ontario, Canada remnant to survive the impacts of drought in 1988, followed by unusually cold weather in May and June of 1989 (D. Schweitzer, *in litt.*, 1991). This population was estimated by Schweitzer to be around 1000 adults in July 1984, which is better than all but a few of the populations remaining today. Its demise occurred within five or six years, despite habitat acquisition and protection. Weather events can affect the species and its habitat throughout its range, pointing out the fragility of the many small, and even the larger, remaining remnant populations. Improper management of existing wild lupine habitat, including untimely mowing, the improper use of herbicides along highways and power line rights-of-way, and poorly timed and/or configured burns, also threaten remnant populations (D. Schweitzer, *in litt.*, 1991, Bleser 1990, Zaremba 1991).

Browsing of wild lupine by deer, rabbits, and/or woodchucks also poses a threat (D. Sperduto, pers. comm., 1991; D. Schweitzer and D. Savignano, 1992, in Givnish *et al.* 1988). A relationship between the scarcity of adult nectar sources and Karner blue butterfly abundance has also been observed (Bleser 1990; D. Sperduto, pers. comm., 1991). Flowering of nectar plants like New Jersey tea (*Ceanothus americanus*) can get out of synchrony with the adult butterflies; therefore, lack of diverse nectar plants may contribute to Karner blue population declines, especially in the western part of its range (D. Schweitzer, *in litt.*, 1992).

The Service has carefully assessed the best scientific information available regarding the past, present, and future threats faced by this subspecies in determining to finalize this rule. Based on this evaluation, the preferred action is to list the Karner blue butterfly as endangered. It has been extirpated from three states in the U.S., is virtually extirpated from Canada, and has undergone significant decline in all six states with remaining populations. Due to the magnitude of the range-wide decline of the Karner blue butterfly, particularly within the past decade, and the continuing threats from destruction, succession, and fragmentation of its habitat, this butterfly is in need of Federal protection if it is to survive. These factors support listing the Karner blue butterfly as an endangered species.

Critical Habitat

Section 4(a)(3) of the Act is amended, requires that, to the maximum extent prudent and determinable, the Secretary propose critical habitat at the time the species is proposed for listing as endangered or threatened. Section 3 of the Act defines critical habitat as, "(i) The specific areas within the geographical area occupied by a species, at the time it is listed in accordance with the Act, on which are found those physical or biological features (I) essential to the conservation of the species and (II) that may require special management considerations or protection, and (ii) specific areas outside the geographical area occupied by a species at the time it is listed, upon determination that such areas are essential for the conservation of the species." Designation of critical habitat is prudent unless: (1) the species is threatened by taking or other human activity, and identification of critical habitat can be expected to increase the degree of threat to the species, or (2) such designation of critical habitat would not be beneficial to the species (50 CFR 424.12(a)(1)). Designation of critical habitat is determinable unless: (1) Information sufficient to perform the required analyses of the impacts of the designation is lacking, or (2) the biological needs of the species are not sufficiently well known to permit identification of an area as critical habitat (50 CFR 424.12(a)(2)).

The Service finds that designation of critical habitat for the Karner blue butterfly is not presently determinable. Most existing populations of this butterfly are located on highly fragmented habitat of declining suitability. The size, spatial configuration, and juxtaposition of habitat areas required to provide for the long-term survival of existing populations have not been identified. Range-wide conservation of the Karner blue butterfly may also require protection and/or restoration of habitat in areas where the species is now extirpated. In addition, information needed to analyze the impacts of critical habitat designation is unavailable at this time.

Since publication of the proposed rule, the Service has initiated efforts to obtain the information needed to determine critical habitat for the Karner blue butterfly. A population and habitat viability analysis (PHVA) workshop was conducted by the IUCN/SSC Captive Breeding Specialist Group and a symposium on the Karner blue butterfly was held during April 1992. Researchers, species experts, agency representatives, and interested individuals from across the Karner blue butterfly's range participated in the workshop and symposium. Information from the symposium and the forthcoming report on the results of the PHVA will be used in determining critical habitat for the Karner blue butterfly.

When the Service finds that critical habitat is not determinable at the time of listing, regulations (50 CFR 424.17(b)(2)) provide that the designation of critical habitat be completed within two years of the date of the proposed rule to list the species. A proposed rule for critical habitat designation must be published in the **Federal Register**, and the notification process and public comment provisions parallel those for a species listing. In addition, the Service will evaluate the economic and other relevant impacts of the critical habitat designation, as required under Section 4(b)(2) of the Act.

Available Conservation Measures

Conservation measures provided to species listed as endangered or threatened under the Endangered Species Act include recognition, recovery actions, requirements for Federal protection, and prohibitions against certain practices. Recognition through listing encourages and results in conservation actions by Federal, State, and private agencies, groups, and individuals. The Endangered Species Act provides for possible land acquisition and cooperation with the States and requires that recovery actions be carried out for all species. The protection required of Federal agencies and the prohibitions against taking and harm are discussed, in part, below.

Section 7(a) of the Act, as amended, requires Federal agencies to evaluate their actions with respect to any species that is proposed or listed as endangered or threatened and with respect to critical habitat, if any is being designated. Regulations implementing this interagency cooperation provision of the Act are codified at 50 CFR part 402. Section 7(a)(2) requires Federal agencies to ensure that activities they authorize, fund, or carry out are not likely to jeopardize the continued existence of such a species or to destroy or adversely modify its critical habitat. If a Federal action may affect a listed species or its critical habitat, the responsible Federal agency must enter into formal consultation with the Service. Federal involvement under section 7 is expected for management and other land use activities on Federal lands with Karner blue butterfly populations. The Fish and Wildlife Service and the National Park Service are currently conferring about the effects of proposed prescribed burning of Karner blue habitat at Indiana Dunes National Lakeshore. Other Federally-administered locations include U.S. Forest Service lands in Michigan, lands in New Hampshire for which the U.S. Fish and Wildlife Service holds conservation easements, and U.S. Fish and Wildlife Service National Wildlife Refuge lands and Department of Defense lands in Wisconsin. Activities which are funded, regulated, or carried out by the Federal Aviation Administration involving the airport lands in New York and New Hampshire where Karner blue butterflies occur will require section 7 consultation. Some development projects involving Karner blue butterfly sites could require authorization from the U.S. Army Corps of Engineers (Corps) for certain project related activities in regulated waters or wetlands of the United States. The Corps is reviewing a permit application for a proposed marina that may adversely affect the newly rediscovered Illinois population.

Listing the Karner blue butterfly will encourage additional research and provide for the development of needed habitat protection and management strategies through the recovery process. Additional information is needed on specific habitat characteristics such as plant community species and structure, soil dryness, shading, and other factors that may affect the suitability of the habitat for Karner blue butterflies. Likely recovery activities would also include continued monitoring, evaluation of habitat management techniques, development of site-specific protection and management plans, and investigations into re-establishing populations.

The Act and implementing regulations found at 50 CFR 17.21 set forth a series of general prohibitions and exceptions that apply to all endangered wildlife. These prohibitions, in part, make it illegal for any person subject to the jurisdiction of the United States to take, import or export, ship in interstate commerce in the course of commercial activity, or sell or offer for sale in interstate or foreign commerce any listed species. It also is illegal to possess, sell, deliver, carry, transport, or ship any such wildlife that has been taken illegally. Certain exceptions apply to agents of the Service and State conservation agencies.

Permits may be issued to carry out otherwise prohibited activities involving endangered wildlife species under certain circumstances. Regulations governing permits are at 50 CFR 17.22 and 17.23. Such permits are available for scientific purposes, to enhance the propagation or survival of the species, and/or for incidental take in connection with otherwise lawful activities.

National Environmental Policy Act

The Fish and Wildlife Service has determined that an Environmental Assessment, as defined under the authority of the National Environmental Policy Act of 1969, need not be prepared in connection with regulations adopted pursuant to section 4(a) of the Endangered Species Act of 1973, as amended. A notice outlining the Service's reasons for this determination was published in the Federal Register on October 25, 1983 (48 FR 49244).

Endangered and Threatened Wildlife and Plants; Determination of Endangered or Threatened Status for Five Aquatic Snails in South Central Idaho

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule.

SUMMARY: The U.S Fish and Wildlife Service (Service) determines endangered status pursuant to the Endangered Species Act of 1973, as amended (Act), for four Snake River aquatic snails: The Idaho springsnail or Homedale Creek springsnail (*Pyrgulopsis* (—*Fontelicella*) *idahoensis*), the Utah valvata snail (*Valvata utahensis*), Snake River Physa snail (*Physa natricina*), and the undescribed Banbury Springs lanx or limpet in the genus *Lanx*. The Service also determines threatened status for one aquatic snail species, the Bliss Rapids snail (an undescribed monotypic genus in the family Hydrobiidae). With the exception of *Lanx*, four of the taxa have declined over all but a small fraction of their historical range. Today these five species are currently restricted to a few isolated free-flowing reaches or spring alcove habitats in the middle Snake River characterized by cold, well-oxygenated, unpolluted water. *Lanx* has remained relatively stable at three known locations since its discovery in 1988. However, because, *Lanx* is known only from three sites it is most vulnerable to habitat change. The free-flowing, cool water environments required by these species have been impacted by and are vulnerable to continued adverse habitat modification and deteriorating water quality from one or more of the following: hydroelectric development, peak-loading effects from existing hydroelectric project operations, water withdrawal and diversions, water pollution, and inadequate regulatory mechanisms. This is especially true for those species restricted to mainstem river environments, *Physa natricina* and *Pyrgulopsis idahoensis*, but also mainstem colonies of Bliss Rapids snails and *Valvata utahensis*. These mainstem populations or colonies may also be vulnerable to habitat competition from an exotic snail (*Potamopyrgus antipodarum*). With the exception of several spring habitats at a privately owned preserve in the Thousand Springs area, remaining pristine spring and spring stream complexes in the middle Snake River preferred by *Lanx*, Bliss Rapids snail and Utah valvata are not protected from all potential threats described above. This rule implements the protection and recovery provisions afforded by the Act for these aquatic snails.

EFFECTIVE DATE: January 13, 1993.

ADDRESSES: The complete file for this rule is available for inspection, by appointment, during normal business hours at the Boise Field Office, U.S. Fish & Wildlife Service, 4696, Overland Road, Room 576, Boise, Idaho 83705.

FOR FURTHER INFORMATION CONTACT: Dr. Charles Lobdell at the above address (telephone 208/334–1931).

SUPPLEMENTARY INFORMATION:

Background

The Idaho (Homedale) Springsnail (*Pyrgulopsis-Fontelicella idahoensis*), Bliss Rapids snail (Family Hydrobiidae n. sp.), Banbury Springs lanx or limpet (*Lanx* n. sp.), Snake River Physa (*Physa natricina*), and Utah Valvata snail (*Valvata utahensis*) are part of the native mollusc fauna of the middle Snake River which characteristically require cold, fastwater or lotic habitats. These five species are part of the freshwater mollusc fauna of the middle Snake River comprising 37 native species including 22 taxa of snails in eight families and 15 clam species in three families (Frest *el al.* 1991). Although many of these 37 species display widespread geographic distribution and a greater tolerance for pollution, the five lotic species are limited geographically and generally intolerant of pollution. The "middle" Snake River is defined as extending from C.J. Strike Reservoir (river mile 517.6) upstream to Milner Dam (river mile 639.1). With few exceptions, extant populations of the five taxa are confined to this reach; although prior to river development and impoundment these and other native molluscs "extended beyond these artificial and manmade boundaries" (Frest *et al.* 1991).

The lotic fauna of the middle Snake River have been declining for several years due to fragmentation of remaining free-flowing habitats and deteriorating water quality. Hydroelectric development throughout the Snake River has directly impacted the candidate species through inundation of lotic habitats, isolating segmented populations, and impacting suitable shallow water shoreline habitat from project-caused flow fluctuations. Water quality continues to degrade in the middle Snake River from increased water use and withdrawal, aggravated by recent drought induced low flows. This 121 mile (195 kilometer) stretch of the Snake River is impacted by agricultural return flows; runoff from between 500 and 600 dairies and feedlots; effluent from over 140 private, state, and Federal fish culture facilities; and point source (e.g. municipal sewage) discharge (Idaho Department of Health and Welfare (IDHW) 1991a). These factors contribute to increased nutrient loads and concentrations which in turn adversely impact the lotic species. Nutrient loading contributes to dense blooms of free-living and attached

filamentous algae, which the species cannot utilize. This algae will often cover rock surfaces, effectively displacing suitable snail habitats and food resources. Stream sediments also become anoxic as high biochemical oxygen demand during the aquatic growing season and seasonal algae dieoffs occur.

The Bliss Rapids snail, Idaho springsnail, and Snake River Physa snail are "living fossils," in that they are relicts from ancient lakes. The Bliss Rapids snail and Idaho springsnail are survivors of the late Pliocene (Blancan) Lake Idaho, which covered much of southern Idaho. The Snake River Physa snail is a relict from Pleistocene lakes and rivers in the area (Taylor 1988). The Utah valvata snail survives only in the Snake River, Idaho, a fraction of its former range in Pliocene-Pleistocene lakes and rivers covering parts of California, Nevada, Idaho, Wyoming and Utah (Taylor 1985b). Fossil material of the Pliocene *Lanx* is needed to confirm the identity of the newly discovered species as being conspecific with the Lake Idaho *Lanx*, though this is a new species in any case.

The Bliss Rapids snail (Family Hydrobiidae, n. sp.) was first collected live and recognized as a new taxon in 1959 (Taylor 1982a), but has not yet been described in the literature. This snail is 2.0–2.5mm (0.8–.10 in) long, with three whorls, and is roughly ovoid in shape. There are two color variants or morphs in the Bliss Rapids snail, the colorless or "pale" form and the orange-red or "orange" form. The pale morph is slightly smaller with rounded whorls with more melanin pigment on the body (Frest and Johannes 1992a). This snail occurs on stable, cobble-boulder substratum only in flowing waters in the unimpounded reaches of mainstem Snake River and also in a few spring alcove habitats in the Hagerman Valley. The species does not burrow in sediments and normally avoids surfaces with attached plants. Known river populations (or colonies) of the Bliss Rapids snail occur only in areas associated with spring influences or rapids edge environments and tend to flank shorelines. They are found at varying depths if dissolved oxygen and temperature requirements persist and are found in shallow (<1cm (.4 in)) permanent cold springs (Frest and Johannes 1992a). The species is considered moderately photophobic and resides on the lateral sides and undersides of rocks during daylight (Bowler 1990). The snail will migrate to graze on aufwuchs (or perilithon) on the uppermost surfaces of rocks nocturnally. The species can be locally quite abundant, and it is especially abundant on smooth rock surfaces with common encrusting red algae. The largest known concentration of Bliss Rapids snails occurs at The Nature Conservancy's (Conservancy) Thousand Springs Preserve (Preserve) with an adult population estimated in the "low millions" (Frest and Johannes 1992a). Reproduction in the Bliss Rapids snail varies according to habitat; occurring October–February in mainstem Snake River colonies and February–May in large-spring colonies. Egg laying occurs within two months of reproduction and eggs appear to hatch within one month. Adult snails exhibit a strong seasonal die off after reproduction. Turnover appears more pronounced in mainstem river colonies, possibly due to environmental stress (Frest and Johannes 1992a). Prior to 1987, the Bliss Rapids snail was known primarily from the mainstem Snake River boulder bars above King Hill (approximately river mile 546) to lower Salmon Falls Dam (river mile 573) and upstream in Box Canyon Sprigs (river mile 588). Taylor (1982a) believed that "* * * prior to dam construction there was probably a single population throughout this range, and plausibly upstream as well." Subsequent mollusc surveys by Frest (1991b), Pentec (1991b) and Taylor (1987) found new subpopulations of the Bliss Rapids snail in the mainstem Snake River and adjacent spring habitats. Pentec (1991b) extended the present known range of the species upstream approximately 162 miles when it found specimens in spring habitats above American Falls at river mile 749.8. Based on live collections, the species currently exists as discontinuously distributed populations over 204 river miles within its historic range. These populations are primarily concentrated in the Hagerman reach in tailwaters of Bliss and Lower Salmon Dams and several unpolluted springs (i.e., Thousand Springs, Minnie Miller Springs, Banbury Springs, Niagara Springs, and Box Canyon Springs).

Call (1884) described the Utah valvata snail (*Valvata utahensis*) from Utah Lake, Utah, as *Valvata sincera* var. *utahensis*. Walker (1902) revised the genus *Valvata* and determined *V. utahensis* to be a species. The Utah valvata snail is 4.5mm (.2 in) long, the shell is turbinate (about equally high and wide) with up to four whorls. In the Snake River, *V. utahensis* lives in deep pools adjacent to rapids or in perennial flowing waters associated with large spring complexes. The species avoids areas with heavy currents or rapids. The snail prefers well-oxygenated areas of non-reducing calcareous mud or mud-sand substrate among beds of submergent aquatic vegetation. The species is absent from pure gravel-boulder bottoms. *Chara*, which concentrates both calcium carbonate ($CaCO_3$) and silicon oxide (SiO_2), is a common associate. The Utah valvata snail is primarily a detritivore, grazing along the mud surface ingesting diatoms or powdery plant debris. In habitats with boulders on mud, the snail has been observed grazing diatoms and other perilithon on rocky surfaces and macrophytes. The Utah valvata snail historically occurred from river mile 492 (near Grandview) to river mile 585 just above Thousand Springs with a disjunct population in the American Falls Dam tailwater near Eagle Rock damsite at river mile 709. The taxa was known historically from northern Utah, although recent mollusc surveys throughout the State revealed no live sites and the species is believed extirpated there (Clarke 1991). At present this species occurs in a few springs and mainstem Snake River sites in the Hagerman Valley and at a few sites below American Falls Dam downstream to Burley (Beak 1987; Taylor 1987). Recent surveys at the Conservancy's Preserve revealed declines in numbers and areal extent of Utah valvata over a four year period (Frest and Johannes 1929a). Live colonies of this snail persist in only two areas at the Preserve with a total population at each colony estimated not to exceed 6000 individuals. Density varied but averaged six live individuals counted per quarter meter square within each colony.

The Snake River Physa snail was named *Physa natricina* and described by Taylor in 1988. Fossil records of the species occur in deposits from Pleistocene-Holocene lakes and rivers from southeastern Idaho and northern Utah. The type locality is the Snake River, Gooding County, Idaho. The shells of adult Snake River Physa snails are about 5–7mm (.2–.3 in) long with 3–3.5 whorls. Fresh shells are amber to brown in color. The species occurs on the undersides of gravel to boulder substratum in swift current in the mainstem Snake River. Living specimens have been found on boulders in the deepest accessible part of the river at the margins of rapids. Taylor (1982c) believed much of the habitat for this species was in deep water beyond the range of routine sampling. Taylor (1988) cites collections of this species from 1956 through 1985 and considered its "modern" range in the Snake River to extend from Grandview (based on

empty shells) upstream through the Hagerman Reach (river mile 573).

Taylor also believes that the Grandview subpopulation has become extinct since the early 1980's ". . . as the native bottom fauna has been virtually eliminated in this segment of the Snake River." Live specimens of the Snake River Physa were recorded near river mile 675 in 1987 (Beak 1987). Pentec (1991b) also reported single live animals at river miles 740.2 and 749.1, although Frest (1991d) believes these may be immature *Physella integra* or *Physella gyrina* and identification needs confirmation. Recent comprehensive snail surveys in southeastern Idaho and northern Utah (Frest *et al.* 1991) and in a free-flowing reach near Buel (Frest and Johannes 1992a) failed to find live specimens. At present, *Physa natricina* remains at only a few locations in the Hagerman and King Hill reaches, with a disjunct population near Minidoka Dam (river mile 675). Live Snake River Physa snails are always rare at collection sites; it is believed that fewer than 50 live Snake River Physa have been collected in the middle Snake River (Frest *et al.* 1991).

Using material collected near Homedale, Idaho by H.M. Tucker in 1930, H.A. Pilsbry described the Idaho (Homedale) springsnail as *Amnicola idahoensis* (Pilsbry 1933). Gregg and Taylor (1965) established the new genus *Fontelicella* and placed *F. idahoensis* in the proposed new subgenus *Natricola*. Hershler and Thompson (1987), in a recent re-evaluation of North American hydrobiidae systematics, revised the genus and assigned *Fontelicella* to the genus *Pyrgulopsis*.

The Idaho springsnail has a narrowly elongate shell reaching a length of 5–7mm (.2–.3 in), with up to 5.5–6 whorls. This species is found only in permanent, flowing waters of the mainstem Snake River; the snail is not found in any of the Snake River tributaries or in marginal springs (Taylor 1982d). The species occurs on mud or sand associated with gravel to boulder size substratum. It is often attached to vegetation (e.g. *Potamogeton*) in riffles. Very little is known of the life history. The Idaho springsnail is a Lake Idaho endemic, and in fossil form has the same potential relic range as the Bliss Rapids snail (Frest 1991c). Historically, the Idaho springsnail was found from river mile 415 (Homedale) to river mile 553 and has been collected at 10 locales. It is currently discontinuously distributed in the mainstem Snake River at a few sites from the headwaters of C.J. Strike Reservoir at river mile 518 upstream to approximately river mile 553 (Bancroft Springs), a reduction of nearly 80 percent from its historic range. Based on repetitive visits to previous sampling sites, the species has declined and populations are small.

The Banbury Springs lanx or limpet (*Lanx* n. sp.) is a member of the Lancidae, a small family of pulmonates endemic to western North America. The species was first discovered by Terrence J. Frest in Banbury Springs Creek in 1988 and has not yet been formally described. The species is distinguished with a shell of uniform red cinnamon color, a subcentral apex, with its length and height exceeding its width. The species has been found only in spring run habitats with well oxygenated, clear, cold (15–16°C) waters on boulder or cobble substratum. All known locations have relatively swift currents. They are found most often on smooth basalt and avoid surfaces with large aquatic macrophytes or filamentous green algae. Beak Consultants, Inc. (Beak) (1989) reported the species (specimens originally identified as *Fisherola nuttalli*) at depths ranging from 30 to 75 cm (11.8–29.5 in) on boulder substratum. Frest and Johannes (1992a) found the species in water as shallow as 5 cm (2 in), but depths up to 15 cm (6 in) were more typical. All lancids are susceptible to dissolved oxygen fluctuations since respiration is accomplished only through the mantle; lungs, gills, and other specialized respiratory structures are lacking (Frest and Johannes 1992a). Common mollusc associates of this species include the Bliss Rapids snail and vagrant pebblesnail (*Fluminicola hindsi*).

This limpet was first discovered in 1988 at Banbury Springs (river mile 589) with a second population found in nearby Box Canyon Springs in 1989 (river mile 588). During 1991, a mollusc survey at the TNC's Preserve revealed a third population in the outflows of Minnie Miller Springs (river mile 584.6) (Pentec 1991b). Subsequent to this discovery, a more detailed investigation at the Preserve revealed that the single colony was sporadically distributed within an area of only 12–14 m^2 (Frest and Johannes (1992a). Population density was in the range of 4–48 per m^2. The total adult population at the Preserve was estimated at between 600 to 1,200 individuals. It should be noted that all three populations of *Lanx* were found in alcove spring complexes previously surveyed. These spring complexes contain large areas of adjacent presumably identical habitat not occupied by the species. At present the Banbury Springs lanx is known to occur only in the largest, least disturbed spring habitats at Banbury Springs, Box Canyon Springs, and Thousand Springs between river miles 584.8 and 589.4. Today, these three locations are variously affected by ongoing water withdrawal and agricultural return flows.

Based on the fossil record, the five candidate snails are endemics originating in the area within Pliocene Lake Idaho and its Pleistocene successors (Taylor 1966). In general, the fossil record shows a larger past than current distribution, with past populations considered continuous throughout their range. An exception is the case of obligate spring species such as the Banbury Springs lanx; each geographically isolated spring could be considered a different population (Frest 1991c).

Ecologically, these five species share many habitat characteristics, and in some locations two or more are sympatric. Basically, they require cold, clean, well-oxygenated flowing water of low turbidity. All the species except the Utah valvata, and possibly the Idaho springsnail prefer gravel to boulder size substratum. Despite these affinities, each of the five species have slightly different habitat preferences. The Idaho springsnail and Snake River Physa are found only in the free-flowing mainstem Snake River while the remaining three candidates are usually associated with spring or spring-like river habitats. For example, the Bliss Rapids snail can be found in both small, shallow spring or large, deep spring outflows, while the Banbury Springs lanx is known only in large spring outflows. The Utah valvata snail is able to tolerate slower flowing environments with silty vegetated substrate better than the rest, although it cannot tolerate true impoundment or reservoir conditions (Frest 1989b). In the mainstem river, they are found in areas of the river not subject to daily or seasonal fluctuations. None of the species tolerate whitewater areas with rapid flow. The species also share similar life history characteristics related to longevity. With the possible exception of Snake River Physa and Utah valvata, the species are considered annual species with an average longevity of one year. Bliss Rapids snail and Banbury Springs lanx experience a dieoff of older adults during the late winter-early spring season following reproduction, although for the Bliss Rapids snail the dieoff is less pronounced in large-spring colonies (Frest and Johannes 1992a). Utah valvata are believed to have a maximum longevity of two years, although a majority only survive a single year. Although little is known of general life history for Snake River Physa, longevity

likely coincides with related *Physa* sp. and other pulmonates, averaging two years. Implications to survival of the candidate species is that annual species with localized distribution and small populations become vulnerable to extirpation from stochastic and/or catastrophic changes in environmental events. The remaining free-flowing river and spring/spring outflow habitats for these species has been fragmented between several impounded reaches of the Snake River in southern Idaho. The Swan Falls, C. J. Strike, Bliss, Lower Salmon Falls, and Upper Salmon Falls Dams on the mainstem Snake River inundated free-flowing habitat and have extirpated populations of these species. Past diversion of large spring outflows for hydroelectric and agricultural purposes have destroyed habitat for Bliss Rapids and Utah valvata snails in Box Canyon (Taylor 1985a) and Thousand Springs. Another more recent threat is the discovery of the New Zealand mudsnail (*Potamopyrgus antipodarum*) in the middle Snake River. The eurytopic mudsnail is experiencing explosive growth in the river and shows a wide range of tolerance for water fluctuations, velocity, temperature and turbidity. The species seems to prefer warmer, polluted waters over pristine cold spring environments. At present, it is not abundant in habitats preferred by Banbury Springs lanx, Bliss Rapids snail, or the Utah valvata. However, the species does compete directly for habitats of the Snake River Physa and Idaho springsnail in the mainstem Snake River. Today these endemic species remain only in a few isolated free-flowing segments between the dams and for some species, a few spring tributaries of the Snake River (Taylor 1982a, b, c, and d, Frest 1989a).

The bed of the Snake River is held in Public Trust by the State of Idaho. Snake River water flowing over the bed is subject to State and Federal water law and water can be appropriated for beneficial uses. Water in Box Canyon Springs Creek is also subject to appropriation. Land in the upper half of Box Canyon Springs Creek is privately owned and developed by Earl M. Hardy. Land in the lower end of Box Canyon Springs Creek is managed by the Bureau of Land Management (Taylor 1985a). Much of the remaining free flowing spring habitat at Thousand Springs is owned by The Nature Conservancy; jointly purchased by the Conservancy and Idaho Power Company in 1986.

This purchase provided protection for the nearly four miles of spring outflows and Minnie Miller Lake from further appropriation and development. However, there are indications that water quality in some of the spring outflows is impacted by irrigation and aquaculture return flows initiating outside the Preserve's boundaries (Frest and Johannes 1992a).

Listing the subject species will result in increased protection of remaining free-flowing river and large spring habitat required by these and other sensitive native species such as the shortface lanx or giant Columbia River limpet (*Fisherola nuttalli*) (Taylor 1982a,b,c and d) and the Shoshone sculpin (*Cottus greenei*). These areas contain some of the last mainstem Snake River habitats with the full range of native molluscan species present, and thus represent a unique aquatic community.

Federal action on these five mollusks began in part as a result of several petitions submitted under section 4(b)(3) of the Act. Dr. Peter Bowler submitted a petition to list the Snake River Physa snail and the undescribed Bliss Rapids snail as endangered on February 7, 1980. A finding that this petition presented substantial information that the requested action may be warranted was published on April 23, 1980 (45 FR 27723). The Idaho springsnail was the subject of a petition submitted on November 12, 1987, by Dr. Bowler. The Service published on December 29, 1988, a finding that the petition to list the Idaho springsnail presented substantial information that listing may be warranted for this species. The Service initiated status reviews on these three species.

Section 4(b)(3)(B) of the Act requires the Service to make a finding within 1-year of the date a petition is received as to whether or not the requested action is warranted. If the Service finds that the requested action is warranted, but precluded by other pending proposals of higher priority, the Service must reevaluate the petition annually and make findings on whether or not the requested action is warranted. In the case of the Snake River Physa and Bliss Rapids snails, the first 12-month finding was published in the **Federal Register** on January 20, 1984 (49 FR 2485). Annual warranted, but precluded, findings were in effect from 1984 through publication of the proposed rule on December 18, 1990 (55 FR 51931).

Randall Morgan and others petitioned the Service to list an undescribed species in the genus *Lanx*, the Banbury Springs lanx, as endangered using the emergency provisions of the Act on November 13, 1989. Whereas the Service's status review did not disclose the existence of an emergency within the meaning of section 4(b)(7) of the Act, it did indicate that proposing the *Lanx* for listing under the normal procedures of section 4 is warranted.

All of the subject species except the Banbury Springs lanx have been included as candidate species on the Service's notices of review. The Snake River Physa snail and the Bliss Rapids snail were first included as category 1 candidates in the 1984 Review of Invertebrate Wildlife (49 FR 21664); they retained this status in the January 6, 1989 Animal Notice of Review (54 FR 554). Category 1 candidates are those taxa for which the Service has on file enough substantial information on biological vulnerability and threats to support proposals to list them as endangered or threatened species. The Utah valvata snail appeared on the 1984 Review of Invertebrate Wildlife as a category 2 candidate, and remained as such on the 1989 Animal Notice of Review. The Idaho springsnail was first included as a category 2 candidate on the 1989 Animal Notice of Review. Category 2 candidates are taxa for which information now in possession of the Service indicates that proposing to list as endangered or threatened is possibly appropriate, but for which conclusive date on biological vulnerability and threat are not currently available to support proposed rules. The November 21, 1991 Animal Notice of Review (56 FR 58804), reflecting the proposed status of these taxa, included all five snails as "PE" (proposed for listing as endangered).

Based upon the petitions, status surveys, and other information on file, the Service published a proposed rule on December 18, 1990 (55 FR 51931) to list as endangered five aquatic snails: the Bliss Rapids snail, Snake River Physa snail, Idaho Springsnail, Utah valvata snail and the Banbury Springs lanx or limpet. The proposed rule included information provided by Taylor (1982 a, c, d, and 1988) and Frest (1989b) on the Bliss Rapids, Idaho spring, and Snake River Physa snails, by Taylor (1982b) for the Utah valvata snail, and by Frest (1989a) and the Service for the Banbury Springs lanx.

The Service now determines the Idaho springsnail, the Utah valvata snail, Snake River Physa snail, and Banbury Springs lanx to be endangered species and the Bliss Rapids snail to be a threatened species with publication of this rule.

Summary of Comments and Recommendations

In the December 18, 1990 proposed rule, all interested parties were requested to submit comments or

information that might contribute to the development of a final determination. The public comment period ended on February 19, 1991. On March 18, 1991, the Service published a Federal Register notice announcing public hearings and reopening and extension of the comment period through April 30, 1991 (56 FR 11401). Announcements of the proposed rule and the upcoming hearings were also published in two newspapers on March 18, 1991: the Idaho Statesman and the Twin Falls Times-News. Public hearings were held from 7 to 10 p.m. on April 3, 1991 in Boise, Idaho, and from 2 to 4 p.m. and 7 to 9 p.m. on April 4, 1991 in Hagerman, Idaho. Thirty-two commenters presented oral testimony. On June 4, 1991, the Service requested that C. Michael Falter, University of Idaho, assemble a panel of experts to review and summarize the existing technical knowledge on the status of the five snail species. To accommodate the technical review meeting and receive additional comments, the Service published a third notice, on October 7, 1991, reopening the comment period through October 31, 1991 (56 FR 50550). The technical review meeting was held on October 21–22, 1991, in Boise, Idaho with six participants. Three additional mollusc experts were invited but did not attend. However, these individuals did participate in a later review of the meeting summary and submitted detailed review comments and additional substantive information. The final Summary Report of the Technical Review Meeting was received by the Boise Field Office on March 26, 1992 (Falter 1992).

Ninety-eight written comments were received on the proposed rule. The Service considered all comments received, including oral testimony from two public hearings on the proposal to list the five aquatic snails. A majority of comments (n=60) supported the proposed rule. Opposition to the proposed rule was based on several factors, including the assertion that the proposed rule was based upon incomplete sources of knowledge on the true distribution and abundance of the snails. Five written comments opposed the proposed listing and eight letters requested a public hearing. In addition, three Idaho State agencies provided written comments. The Idaho Department of Parks and Recreation wrote in support of the listing, while the Idaho Department of Water Resources expressed interest in the listing proposal and requested the Service undertake an ". . . analysis of the constraints a listing would have on existing and proposed projects in the designated reach . . ." The Idaho Division of Environmental Quality also submitted water quality study information for the Snake River. Several commenters provided new and substantive biological information applicable to the listing decision. Other comments provided information pertaining to further research needs and recovery planning. Such information will be useful in the development of a recovery plan. Comments of a similar nature or point are grouped for consideration and response. A summary of these issues and the Service's response to each, are discussed below.

Issue 1: One respondent believed that ". . . from taxonomic and morphological perspective, four of the species identified in the proposals are snails while the fifth is a limpet. Therefore the Service should substitute the term mollusks for snails in the title."

Service response: Limpet is the common and standardized term used by malacologists when referring to snails with low conical or cap shaped shells that have lost their coiled character. Specifically, the work was first applied to marine snails (gastropods=molluscs) with a non-coiled shell having an imperforate apex. This shell form is believed to have evolved separately in many different snail lineages to provide a more hydrodynamic contour in heavy currents. The Service considers use of the term "snails" to describe the subject species in the final rule both appropriate and proper.

Issue 2: Several comments addressed the question of the Banbury Springs lanx or limpet (*Lanx sp.*) status as a separate taxon. This species shows gross morphological similarity to another candidate Snake River lancid, the shortface or giant Columbia River limpet (*Fisherola nuttali*). One commenter believed that further taxonomic corroboration is needed for discriminating *Lanx* vs. *Fisherola* ". . . before a "new" genus-species is recommended for endangered status." Some commenters also maintain that there has been some confusion regarding misidentifications of the Banbury Springs and *F. nuttali* from specimens collected in Box Canyon Springs (Beak 1989). Specifically, they refer to differences in species identification by Dwight Taylor and Terrence Frest for several lancid specimens from the same vial provided by Richard Konopacky.

Service response: The Service has considered available scientific evidence and concludes that the Banbury Springs lanx (*Lanx sp.*) and *F. nuttali* are distinct taxa and spatially segregated. Shell features are the primary morphological discriminants distinguishing the Banbury Springs lanx and *F. nuttali*. These features include shell apex location and orientation, shape of the posterior and anterior side, color, maximum dimensions, and ratios of standard shell measurements (Frest 1991d). The two species are also segregated ecologically. The Banbury Springs limpet has been collected only from spring habitats at three locations and there is no evidence of its occurrence in the mainstem Snake River. *Fisherola*, on the other hand, is known to occur only in the mainstem middle Snake River and other mainstem Columbia basin rivers and has not been found in springs. Regarding the conflicting identification by Taylor and Frest of some lancid specimens collected from Box Canyon Springs, the Service notes that the differences were most likely due to confusion from using unlabeled vials. Frest (1991a) recently collected and examined several lancids from Box Canyon and also examined collections by Taylor (dead) and Konopacky (specimens in question); he concludes that only one lancid species is present, the Banbury Springs lanx.

Issue 3: Several commenters contend that the Service failed to evaluate and incorporate information in their possession prior to publication of the proposed rule. They believed that this information indicated the candidate species are more widely distributed and abundant than indicated in the Service's proposed rule and therefore the species should not be listed.

Service response: The information in question was unpublished data on snail range and distributions in the mid-Snake river collected in a study by Beak Consultants, Incorporated during 1987. Snail field data and locations for the species of interest were submitted to the Boise Field Office on February 19, 1990. According to the author of the proposed rule (Jay Gore, U.S. Forest Service, formerly Fish and Wildlife Service, pers. comm.), the information was in draft or field note form and was not easily interpretable. The Service is requested that the information be resubmitted in a form that was more easily interpretable during the open comment period following publication of the proposed rule. This information has been evaluated and incorporated into the final rulemaking process.

Issue 4: Several commenters requested that the Service delay or preclude listing the five aquatic snails because too little is known regarding their present status. They believed there was inadequate and insufficient sampling in past mollusc surveys to

describe overall distribution and abundance. For example, statements to the effect that: (1) Less than 1 percent of the middle Snake River has been sampled; (2) the proposed rule is based on earlier surveys that failed to adequately sample deepwater and other "hard to sample" habitats; and (3) recent limited surveys have located new populations, which greatly expand the "present range" of some of these species; these facts ". . . suggest that even very limited additional efforts will uncover new populations and that all representative habitat has not been examined." Several commenters argued against the listing asserting that sampling for molluscs exhibiting localized and discontinuous distribution using non-randomized, biased sampling (or sampling "where their previous experience and prior knowledge dictate"—Steinhorst 1992) will likely miss existing populations; therefore conclusions regarding current distribution in previous studies were not statistically valid. They also contend that failure to locate populations of molluscs exhibiting discontinuous distribution should be expected when using this type of "flawed" sampling. Several respondents also suggested that the Service initiate a comprehensive, statistically-based studies program for these species to develop additional data on spatial distribution and habitat requirements prior to any final listing decision.

Service response: The listing process includes an opportunity for the public to provide input and new information is evaluated and considered before a final determination is made. Aside from previously cited studies and reports in the proposed rule, the Service has reviewed and considered new information regarding distribution and general life history for the five candidate species for eight recent mollusc surveys in the Snake River basin. The Service used information only from sites where "live" specimens were found to evaluate and establish current geographic range. The use of dead specimens or shells to establish current range can be misleading since identification for some species may be difficult and shells are easily transported downstream. Because dead shells may persist for several years and for some taxa it is difficult to distinguish recently dead versus fossilized shells, conclusions regarding recent habitation are purely speculative. Four of the surveys examined a larger geographical area than previous studies cited in the proposed rule and only in a few instances were additional new "live sites" found. The study by Beak (1987; referred to in Issue #3) reported a single live Snake River Physa below Minidoka dam at river mile 675 and two new live sites for the Idaho springsnail (within the historic range cited in the proposed rule). Frest (1991b) surveyed nearly 500 sites for candidate molluscs from 1988–91 throughout the Snake River and Columbia River basins, including 51 sites in the middle Snake River. Although Frest collected Bliss rapids snail, Idaho springsnail and Utah valvata snails, none of the collections were considered new live sites and none of the candidates were reported outside the middle Snake River drainage. Frest (1991d) reported evidence of recent range reduction for the candidate species based on failure to find live specimens during surveys by Beak (1987) at some of Taylor's earlier sites. Pentec (1991b) reported a new "live" population of Bliss rapids snail in the Snake River associated with spring outflows above American Falls reservoir at river mile 749.8. The report states that this ". . . collection of live animals (Bliss Rapids snails) increased the present range of the species upstream by 162 miles or by 486 percent relative to the present range stated in the USFWS proposal . . ." These types of range descriptions and comparisons are valid only when species distribution is 'continuous' and not fragmented or discontinuously distributed as is the situation for these species. In any event, new live sites reported for the Bliss Rapids snail are within the historic range cited in the proposed rule, and are subject to similar habitat threats as the previously cited sites. Pentec also reported the third "new" population of Banbury Springs lanx discovered in a large spring-run at the Preserve (river mile 584.6). More recently, a limited study on the effects of reservoir drawdown on molluscs in the lower Snake River below Hells Canyon reported the absence of the five candidate species in this reach (Frest and Johannes 1992b). The authors of this study also noted the absence of other expected mollusc endemics, even the eurytopic and widespread species, from exposed shorelines in deepwater habitats in impounded reaches. In summary, no new significant distributional information affecting the status of the five taxa were reported by any respondent, and in most instances the candidate species were not collected at most sites sampled in each survey. Moreover, with the exception of *Lanx*, the surveys substantiate conclusions in the proposed rule that the candidate species are found only in the Snake River and have declined to the point where they are now absent from vast reaches of the Snake River. Regarding the argument that the proposed listing is based on inadequate and biased sampling, the Service concurs with Palter's (1992) following summary and analysis:

"• • • non-randomized, purposeful sampling may well miss existing populations", therefore ". . . given suitable habitat, additional populations of these taxa might be found with more orderly, non-purposeful sampling. Statistical considerations alone do not fully answer that possibility. The sampling issue is but part of the question of whether one would expect to find additional populations of any one of these taxa. The suitability of the habitat to support the species must also be considered, *i.e.*, unacceptable habitat renders moot the question of whether non-sampling of river habitats judged to be ecologically unacceptable for a species indicates possibility of additional habitat where the taxa might be found. The stenotopic environmental requirements of all of these taxa first delimits possible habitat for a species. Secondly, one addresses the question of adequate sampling of the potential habitat, not of all the water environment in the river, irregardless (*sic*) of the degree of matching organism requirements with the environment. Ecological judgement sets the bounds; statistical judgement then considers adequacy of sampling that potential habitat. The panel had no deepwater sampling data to review but the findings of recent water quality studies of absolute environmental unsuitability offered by these habitats justifies the conclusion that Gastropods, especially taxa only found in habitats very different than those presently offered by the deepwater habitats are unlikely to be found . . ." Palter goes on to state ". . . The bulk of the remaining, poorly sampled Snake River does not now offer those habitat conditions" (needed by the taxa), ". . . so it is not potential habitat. Reasonable ecological inference correctly stratifies those latter areas out of consideration as potential habitat."

These considerations also rule out deepwater habitat by these taxa since water quality declines with depth in the middle Snake River. The Service does believe that future mollusc surveys and studies may reveal a few additional locations with live populations or colonies of the candidate species, especially in shallow, littoral areas influenced by springflows. However, it is likely that these newly discovered populations will be threatened by the same activities affecting the existing populations. The Service maintains that this final rule is based on the best information available. The Service also believes that sufficient information is provided on these five species to warrant making a determination on their status at this time.

Issue 5: Many comment letters expressed concerns with the potential economic impacts to agriculture and community development along the Snake River plain in south central Idaho from listing the five snails under the Act. For example, several commenters were concerned with the potential impacts to future hydroelectric development along the middle Snake River and constraints to existing project operations. Another respondent requested that the Service designate ". . . mitigation measures that would permit normal agricultural practices while still protecting the species . . .".

Service response: Under section 4(b)(1)(A) of the Act, listing determinations are based solely on the best scientific and commercial information available and economic considerations are not applicable. The legislative history of the provisions clearly states the intent of Congress to "ensure" that listing decisions are "based solely on biological criteria and to prevent non-biological considerations from affecting such decisions." H.R. Rep. No. 97–835, 97th Congress 2nd Session 19 (1982). Because the Service is specifically precluded from considering economic impacts in the final rulemaking process, the Service has not addressed such impacts in this final rule.

Issue 6: One commenter was concerned with the impacts to agriculture from designating critical habitat. They requested the Service designate critical habitat during the final rulemaking process ". . . to avoid too large an area being designated."

Service response: Under section 4(a)(3)(A) of the Act, the Secretary must designate critical habitat to the maximum extent prudent and determinable at the time a species is determined to be threatened or endangered. In the proposed rule, the Service found that determination of critical habitat was not prudent for these species. As discussed under the "Critical Habitat" section below, the Service continues to find that designation of critical habitat for these aquatic snails is not prudent at this time. Because many of the remaining populations for these species are in localized springs, the Service believes such designation might increase the degree of collecting, vandalism, and other human activities, thus further threatening these five snails. Protection of these species' habitats will be addressed through the recovery process, and through the section 7 consultation process.

Issue 7: One respondent maintained that this issue should be decided by the State of Idaho and not through the Federal listing process. The Service should delay listing at this time "* * * because the legislature and Water Resources Board have extended protection to the Middle Snake for a number of years and there is no reason that this water quality and everything can't be taken care of on a state level."

Service response: In recent years, several programs to address deteriorating water quality in the Snake River have been initiated by various State of Idaho regulatory agencies with permitting and enforcement authority (IDHW 1991 a and b). One of the first of these programs was a water quality monitoring study launched in 1990 by the Division of Environmental Quality (DEQ). That same year the Snake River from Shoshone Falls downstream to Lower Salmon Falls Reservoir was listed as "water quality limited." This determination requires that DEQ develop a Total Maximum Daily Load (TMDL) for the river which quantifies pollutant sources and allocates nutrient loads. In a related matter, the DEQ recently denied certification for a National Pollution Discharge Elimination System (NPDES) permit for a new fish rearing facility in the middle Snake River area. The decision was based on DEQ's interim policy of no net increase in total nutrients discharged into the Snake River prior to development of the TMDL. Passage of the Nutrient Management Act passed by the Idaho Legislature in 1989 requires the DEQ to complete a nutrient management plan for the Snake River by 1993. The Idaho Department of Water Resources is involved in planning efforts which could result in State "protected" status for all or portions of this stretch of river. Such designation would protect "outstanding fish and wildlife, recreational, aesthetic, historical, cultural, natural or geological values * * * for the public benefit and enjoyment" from certain activities and could preclude further hydro development. At present, the stretch from below Milner Dam downstream to King Hill is under interim protected status through 1993. Despite these and other programs initiated to halt the deterioration of the middle Snake River, most are in the early stages, and it is unlikely these programs will reverse the trend any time soon. In any event, regulations that provide protection for invertebrate species equivalent to provisions of the Federal Endangered Species Act do not currently exist in Idaho. The Idaho Department of Fish and Game does maintain a list of wildlife classified as Threatened and Endangered and/or Protected Nongame species that prohibits take or possession. However this protection does not extend to any non-vertebrate species. See the discussion under Factor D in "Summary of Factors Affecting the Species" for a complete discussion on the inadequacy of existing regulatory mechanisms for the Idaho springsnail, Utah valvata snail, Snake River Physa, Banbury Springs lanx and Bliss rapids snail.

Issue 8: One commenter requested that the Service prepare as part of the final rule a Takings Implications Assessment under Executive Order 12630 to evaluate the risk and strategies for the avoidance of the taking of private property.

Service response: Concerning Executive Order 12630, "Governmental Actions and Interference with Constitutionally Protected Property Rights" (March 15, 1988), the Attorney General has issued guidelines on implementation of the Executive Order. Under the supplemental guidelines for the Department of the Interior, a "special situations" rule applies when an agency is expressly required to take an action, making a finding, or give consultation based solely upon specified criteria that leave the agency no discretion; such as the criteria outlined in the Endangered Species Act (Act) for the listing of species. The Attorney General's supplemental guidelines state that Taking Implication Assessments (TIA) shall be prepared after, rather than before, the agency makes the decision upon which its discretion is restricted. The purpose of TIAs in these special circumstances is to inform policymakers of areas where unavoidable taking exposures exist. Such TIAs shall not be considered in the making of administrative decisions that must, by law, be made without regard to their economic impact. Provisions of the Act require the Service to list species based solely on the best scientific and commercial information indicating whether or not they are in danger of extinction. The Service may not consider economic impacts in making a listing decision. The listing process is also subject to strict timetables and failure to comply may subject the agency to legal action. The provisions of the supplemental guidelines relating to non-discretionary actions are applicable to the determination of threatened and endangered status for the five snail species that are subject of this final rule.

Issue 9: Two respondents claim that the Service has "overstated" the threats to the species from various activities. Specifically, assertions in the proposed

rule that describe adverse impacts to the subject species such as "The species are threatened by proposed large hydroelectric dam developments, current peak-loading operations of existing hydroelectric water projects, water pollution, reduction in oxygen concentration, and possibly competition from a recently introduced hydrobiid snail" are ". . . conclusory, giving no evidence or analysis or citation for support."

Service response: Despite the above claims, no new information was provided to contradict the Service's contention that the five species are threatened by deteriorating water quality and other threats present in the middle Snake River (see Factor A in "Summary of Factors Affecting the Species"). New information submitted during the comment period reaffirmed that the snails are coldwater stenotopic species restricted to the middle Snake River with localized distribution, and absent from impounded reaches. Most of this information was found in eight mollusc surveys undertaken from 1987–1992 at various locations throughout the Snake River Basin (Beak 1987, Beak 1989, Frest 1991b, Frest and Johannes 1991, Frest and Johannes 1992a, Frest and Johannes 1992b, Pentec 1991b, and Taylor 1987). Although range extensions were noted for Utah valvata and Bliss Rapids snails in some of the surveys, sites where these and the remaining three species were collected occurred only in 'preferred or usable' habitat types. In fact, snails were absent from most sites and locations sampled in each survey. Frest and Johannes (1992a) noted declines in abundance and distribution of Utah valvata in the Conservancy's Preserve, a "protected area", due to water quality problems attributed to agricultural and aquaculture return flows initiated outside the Preserve's boundaries. Taylor (1985a) stated that diversion of a portion of Box Canyon Creek to the Clear Springs Trout Hatchery in the fall of 1973 "substantially impacted populations of Bliss Rapids snails" downstream in the Bureau of Land Management's Box Canyon Area of Critical Environmental Concern. He also noted that the diversion possibly enhanced habitat for Utah valvata snails through flow velocity reduction. Since the stenotopic environmental requirements of these species defines suitable habitat, most malacologists agree that impounding remaining free-flowing reaches would be devastating to four of the five species. Impoundment would inundate existing habitat, reduce vital shallow shoreline habitats in tailwater areas due to operating flow fluctuations, elevate water temperatures, reduce dissolved oxygen levels in sediments, modify the rivers ability to assimulate point and non-point source pollution, and further fragment remaining populations. Frest and Johannes (1991) acknowledged that proposed construction of diversion dams for power production at Kanaka, Empire, and Boulder Rapids, river miles 592.2, 594.5, and 597.5, respectively, would not impact Utah valvata or any other candidate species because the taxa no longer occur in that river reach. The authors attributed the snails absence to deteriorating water quality and emphasized that this stretch of the river was becoming marginal mollusc habitat for the remaining native species. In addition, the recent low flows associated with the prolonged drought in southeast Idaho have contributed to continuing water quality problems throughout the Snake River basin. The Service, however, does believe that *Physa* and Bliss Rapids snail would benefit from stabilized, non-fluctuating water levels in the Lower Salmon Falls and Bliss Dam tailwater reaches. As discussed in detail in the "Summary of Factors Affecting the Species" section, the Service concludes that nearly all of the remaining populations of the five snails are at risk.

Summary of Factors Affecting the Species

After a thorough review and consideration of all information available, the Service has determined that the Idaho springsnail (*Pyrgulopsis idahoensis*), Utah valvata snail (*Valvata utahensis*), Snake River Physa snail (*Physa natricina*), and Banbury Springs lanx (*Lanx* n. sp.) should be classified as endangered species and the Bliss Rapids snail (Family Hydrobiidae, n. sp.) should be listed as a threatened species. Procedures required by section 4 of the Act and regulations (50 CFR part 424) promulgated to implement the listing provisions of the Act were followed. Under the Act, a species may be determined to be an endangered or threatened species due to one or more of the five factors described in section 4(a)(1). These factors and their application to the Idaho springsnail, Utah valvata snail, Snake River Physa snail, Bliss Rapids snail, and the Banbury Springs lanx are as follows:

A. *The present or threatened destruction, modification, or curtailment of its habitat or range.* Activities that could further threaten the continued existence of the Bliss Rapids snail, Utah valvata snail, Idaho springsnail, Banbury Springs lanx, or Snake River Physa snail include proposed large hydroelectric dam developments, peak-loading operations of existing hydroelectric water projects, water pollution, diversion of water for irrigation and aquaculture and small hydroelectric development.

Six proposed hydroelectric projects, including two high dam facilities, would alter free flowing river reaches within the existing range of these snails. Dam construction threatens the five taxa through direct habitat modification and moderates the Snake River's ability to assimilate point and non-point pollution. Further hydroelectric development along the Snake River would inundate existing mollusc habitats through impoundment, reduce critical shallow, littoral shoreline habitats in tailwater areas due to operating water fluctuations, elevate water temperatures, reduce dessolved oxygen levels in impounded sediments, and further fragment remaining mainstem populations or colonies of these snails.

The Idaho Power Company studied the feasibility of additional hydro development in the area during the early 1980's, and the Federal Energy Regulatory Commission (Commission) denied the Company's license requests when a mid-1980's power supply needs analysis revealed that the Northwest United States would have a power surplus into the early 1990's. However, the rapidly growing Northwest region is forecasting power shortages by the late 1990's and interest in developing potential hydro sites on the Snake River is on the rise.

Currently, Idaho Power Company has received a preliminary permit to evaluate the development and operation of the A.J. Wiley hydropower project (Federal Energy Regulatory Commission No. 11020) at river mile 565 on the lower Salmon Falls Dam tailwater. The reservoir created by this project would extend approximately six river miles to the tailwaters of the existing lower Salmon hydroproject and impound approximately 625 surface acres. This impoundment would inundate and destroy mainstem river habitats for existing populations of Snake River Physa and Bliss Rapids snail. Dike Hydroelectric Partners, (Federal Energy Regulatory Commission No. 10891) is currently evaluating another location, the Bliss Dam tailwaters at river mile 552, for hydropower development. This project would include construction of a large compacted concrete dam creating a 560-acre reservoir. This development would inundate existing habitat and populations of the Idaho springsnail, the Bliss Rapids snail, and the Snake River

Physa snail that occur near Bancroft Springs. Construction of these two proposed dams would inundate four mainstem sites that are currently supporting populations of the Bliss Rapid snail; both of the two known sites that are currently supporting populations of the Snake River Physa snail, and at least one known population of the Idaho springsnail. These two proposed dams would not inundate habitat for the Utah valvata snail since this snail is well upstream. The Banbury Springs lanx occurs in three tributary springs that flow into the Snake River and these would likely not be impacted by the two dams. The remaining four proposed hydro projects are diversion or run-of-river developments (without reservoirs) that would alter the flow regime and minimize annual flows in the bypass reaches at the four Snake River sites. Frest and Johannes (1991) believe that proposed construction and operation of three of these projects for power production, Kanaka, Empire and Boulder Rapids would not adversely impact the Utah valvata or any other candidate, so long as efforts to control sedimentation during construction are implemented. Deteriorating water quality is most likely the primary factor limiting the native molluscs in this reach. Even with improvements in water quality in this reach of the Snake River, construction of these projects would affect recovery efforts since otherwise suitable free-flowing habitats would be impacted.

Peak-loading, the practice of artificially raising and lowering river levels to meet short-term electrical needs by local run-of-the-river hydroelectric projects also threatens these species. Peak-loading is a frequent and sporadic practice that results in dewatering mollusc habitats in shallow, littoral shoreline areas. With the exception of the Banbury Springs lanx and possibly Snake River physa, these diurnal water fluctuations prevent the candidate species from occupying the most favorable habitats. The Bliss Dam is approximately six miles above Bancroft Springs and may adversely affect three known populations of the Idaho springsnail, two populations of the Bliss Rapids snail, and a population of the Snake River Physa snail, by restricting littoral habitat during the late summer peak-loading operation. Peak-loading operation of the lower Salmon Falls Power Plant may harm three mainstem Snake River populations of the Bliss Rapids snail, and a population of the Snake River Physa snail. The combined peak-loading effects from proposed A.J. Wiley and Dike hydroelectric projects would also impact known populations of the Idaho springsnail, most of the extant colonies of the Bliss Rapids snail, and both of the Snake River Physa snail populations in the Hagerman and King Hill reaches. The recently discovered population of Bliss Rapids snail above American Falls (river mile 749.8) is also subject to the effects of water fluctuations from operation of the Shelley hydroelectric project at river mile 783.

Based on limited sampling, these snails have not been found between Milner Dam (river mile 639.1) and Shoshone Falls (river mile 614.8). This reach of the Snake River is essentially dewatered during the irrigation season and remaining low flows have poor water quality. It is unlikely that these species could exist in this river stretch. During the irrigation season water quality and quantity below Shoshone Falls is poor, though both are gradually improved by inflow from Snake River Plain Spring tributaries through the Hagerman Reach.

The quality of water in these habitats has a direct effect on the species survival. The species require cold, well-oxygenated unpolluted water for survival. Any factor that leads to a deterioration in water quality would likely extirpate these taxa. For example, the Banbury Springs lanx lacks either lungs or gills and respires through unusually heavy vascularized mantles. This species cannot withstand temporary episodes of poor water quality conditions. Because of its stringent oxygen requirements, any factor that reduces dissolved oxygen contact for even a few days would very likely prove fatal to most or all of the populations. Factors that would degrade water quality include reduction in flow rate, warming, and increases in the concentration of fertilizers, herbicides or pesticides from irrigation waste water return. The middle Snake River is impacted by return flows from irrigated agriculture, runoff from feedlots and dairies, hatchery effluent, municipal sewage effluent, and other point and non-point discharges. During the irrigation season, 13 perennial streams and more than 50 agricultural drains contribute irrigation tailwater to the Snake River (IDHW, 1991b). In addition, more than 140 commercial, State and Federal fish culture facilities discharge wastewater into the Snake River and its tributaries. These factors, coupled with drought-induced low flows, contribute to the increased eutrophication and general decline of the coldwater lotic molluscs of the middle Snake River. Water quality in the alcove springs and tributary spring streams in the Hagerman Reach have also been somewhat impacted, though not as severely as the mainstem river has. The Hagerman Reach receives massive cold water recharge from the Snake River Plain Aquifer. Several of these springs and spring tributaries have been diverted for hatchery water supplies with return flows to the Snake River enriched with nutrients. At the Conservancy's Preserve at Thousand Springs, there is evidence that colonies of Utah valvata and Bliss Rapids snail have recently declined or been eliminated at several sites from changes in water quality due to agricultural and aquaculture wastewater originating outside the area (Frest and Johannes 1992a).

Four tributary springs or spring streams of the Hagerman area of the Snake River—Banbury Springs, Box Canyon Springs, Thousand Springs and Sand Springs Creek—contain populations of two or more of the taxa described in this rule. The Banbury Springs lanx is found in only three of these tributary springs: Banbury, Box Canyon and Thousand Springs. The Utah valvata and Bliss Rapids snail occur in Box Canyon, Thousand Springs and the mainstem Snake River. Banbury Springs has no known threats, but Box Canyon Springs is threatened by a small hydroelectric project at the upper end of Box Canyon and a water diversion dam at the lower end of Box Canyon. The upper two-thirds of Box Canyon, including the water diversion is privately owned. The stream and associated area below the diversion is owned by the Bureau of Land Management (BLM) and was designated an Area of Critical Environmental Concern (ACEC) in 1986. The ACEC was established to manage habitats for three candidate molluscs, the Bliss Rapids snail, Utah valvata, and *Fisherola nuttalli*, and the Shoshone sculpin (*Cottus greenei*). *Lanx* (Banbury Springs lanx) was added to the list of sensitive species under ACEC management with the discovery of the second of three populations of this species in the Sculpin Pool at Box Canyon in 1989 (Beak 1989). Construction of a diversion dam for a trout culture facility in upper Box Canyon in 1973 eliminated habitat of the Bliss Rapids snail, though Taylor (1985a) reported that sediment produced as a result of constructions enhanced habitat for Utah valvata downstream in the natural pool on BLM lands. Ground water mining or withdrawal may also impact spring stream habitats of the "new" Bliss Rapids snail population above

American Falls Reservoir at river mile 749.8. Biologists of the Shoshone Bannock Tribal Reservation have observed water fluctuations and seasonal declines in spring flows along this stretch of the Snake River concurrent with the irrigation season (Doug Takai, biologist, Shoshone Bannock Tribal Reservation, pers. comm.). Though not fully documented, these seasonal declines in spring flows seem more pronounced in recent years due to ongoing drought conditions.

Winter cattle grazing and recreational access may also be impacting spring habitats of the Bliss Rapids snail on the Shoshone Bannock Reservation. Although access is controlled, waterfowl hunters, and to some extent fishermen, utilize these spring areas throughout the Fall and early Winter. The Service believes trampling by cattle and people will likely produce minimal impacts to spring habitats.

In summary, the cumulative effects of these factors combined with extreme low flows throughout much of the Snake River from over five years of drought, continue to threaten the remaining habitats and increasingly fragmented populations of these five species. This is especially true for habitats and extant populations in the mainstem Snake River.

B. *Overutilization for commercial, recreational, scientific, or educational purposes.* Not known to be applicable. However, due to their rarity, some of these taxa may have been subject to past overutilization for scientific purposes. For example, of the less than fifty live Snake River Physa snails collected in the middle Snake River, nearly all were preserved or killed for scientific purposes. In other instances, some molluscs have become vulnerable to illegal collection for scientific purposes following listing under the Act.

C. *Disease or predation.* Changes in the fish fauna of the middle Snake River have been suggested as potentially threatening to some or all of the candidate taxa. However, no data to support this suggestion exists. Fish predation was not considered a "major problem" for these taxa in a recent mollusc survey at The Nature Conservancy's Preserve (Frest and Johannes 1992a).

D. *The inadequacy of existing regulatory mechanisms.* The Idaho Department of Water Resources regulates water development in the Snake River basin. At present, there is no specific allocation of water on the mainstem middle Snake River for fish and wildlife, although maintenance flows for fish and wildlife on several tributary streams to the Snake River have been established. Without Federal protection under the Act, present management regulations are inadequate to curb further water withdrawal from groundwater spring outflows or tributary spring streams.

Changes in the use of stored water in the Snake River basin to assist recovery efforts for other threatened and endangered species may also impact these species and their habitats. For example, the Bonneville Power Administration, State of Idaho, and Idaho Power Company are exploring alternatives to assist outmigrating endangered Snake River sockeye salmon (*Oncorhynchus nerka*) and threatened spring and summer chinook (*Oncorhynchus tshawytscha*) from utilizing water from the upper Snake River basin.

The Idaho Department of Health and Welfare, Division of Environmental Quality, under authority of the State Nutrient Management Act, is coordinating efforts to identify and implement preventative actions which will reduce nutrient loading to the middle Snake River below Milner Dam (IDHW 1991b). These efforts will address pollution control strategies for this stretch of river through several of the following program areas: State Agricultural Water Quality Program, NPDES permits, 401 Certification, Bureau of Land Management land management plans, the State Water Plan and local ordinances. Despite these efforts to better comprehend and halt the deterioration of the middle Snake River, it is unlikely these programs will reverse the trend any time soon, since it will be several years before any recommendations to improve water quality outlined in comprehensive resource management plans for the Snake River are fully implemented.

There are at least two State agencies that have as part of their goals and objectives the identification and protection of rare taxa and their habitats. The Idaho Parks and Recreation has authority under *Idaho Code* section 18–3913, 1967, to protect only plants, with animals not given special protection on Idaho lands. The Department of Fish and Game, under *Idaho Code* section 36–103, is mandated to preserve, protect, perpetuate, and manage all wildlife. However, these mandates do not extend protection to invertebrate species.

The Federal Energy Regulatory Commission (Commission) is the agency responsible for issuing licenses for hydroelectric projects. The Commission solicits input from the Service regarding environmental impacts that may result from proposed projects. The Service's comments regarding impacts to "candidate" only species, such as the five aquatic snails, are advisory in nature. The Commission relies upon the developer and the Service to resolve issues with respect to candidate species. Without listing, it is unlikely that the Commission would require a project proponent to mitigate for impacts to these species unless the developer did so voluntarily. Consequently, the Commission's review of projects does not provide protection to the five taxa covered in this rule.

The U.S. Army Corps of Engineers (Corps) is also involved in the permitting of projects on the Snake River through their authority under section 404 of the Clean Water Act. The Corps issues individual and nationwide permits for projects that would result in the fill of waters of the United States. Nationwide permits are often issued for relatively small projects (hydroelectric projects producing less than 5 megawatts and some bridge crossings) that presumably have minimal environmental impacts. Projects requiring individual permits undergo more extensive environmental review and the permits often include conditions that require avoidance or mitigation for environmental impacts. Virtually any project within the range of these molluscs would require an individual permit as described in section 404 of the Clean Water Act. The Corps does solicit input from the Service regarding impacts to wildlife resources. The Corps gives full consideration to the Service's comments on permits. However, the Service's comments regarding candidate species are advisory. In practice, the Corps does not give any special consideration to the five invertebrates considered herein.

With the listing of these species as threatened or endangered, the Corps and the Commission will be required to initiate formal consultation pursuant to section 7 of the Act on any project that may affect one or more of these species. Such consultation would result in a Biological Opinion on whether or not the project proposed to be authorized is likely to jeopardize the continued existence of the species. With listing, both the Commission and Corps will be required to insure that any project they authorize will not be likely to jeopardize the continued existence of these species. Conditions that would provide protection to the species could be incorporated into permits or licenses issued. The provisions of section 7 of the Act are more fully discussed later in this proposed rule.

E. *Other natural or manmade factors affecting their continued existence.*

Although not fully understood, an introduced hydrobiid snail, the New Zealand mudsnail (*Potamopyrgus antipodarum* (=*P. jenkinsi*)) may complicate survival for these native species. This non-native species occurs throughout the range of the five species included in this rule (Bowler 1989a, 1989b, 1990). This hydrobiid snail is native to New Zealand and has also spread to Europe and Australia. *Potamopyrgus antipodarum* was first reported in the middle Snake River in 1987, when Taylor found the species had invaded several alcove spring habitats at The Nature Conservancy's Preserve. This exotic taxa may have been inadvertently introduced by the private aquaculture industry in this area. By December, 1988, *P. antipodarum* was the dominant taxa in the free-flowing habitats of the Hagerman Reach below Bliss Dam (Bowler 1990). It formed dark mats of individuals in habitat formerly preferred by native species including the Bliss Rapids snails and Snake River Physa. The species has been observed at densities of nearly 400 individuals per square inch. *Potamopyrgus* is parthenogenic and ovoviparous, which contributes to the ability to build large populations rapidly and recover from population crashes. The species is eurytopic and shows very little preference for substrate type or size. The mudsnail is much more abundant in the mainstem Snake River than in cold spring environments; it is uncommon or absent in both unimpacted, pristine or stagnent, highly polluted environments (Frest and Johannes 1992a). At present, *Potamopyrgus* is not abundant in large springs inhabited by *Lanx n. sp.* and in cold springflows with colonies of Bliss Rapids snail and Utah valvata. The species does, however, compete for habitat with Snake River Physa and Idaho springsnail and mainstem colonies of Bliss Rapids snail and Utah valvata. *Potamopyrgus* is abundant in the Snake River below Bliss Dam to C.J. Strike Reservoir and inhabits the same littoral sand/silt substrate as the Idaho springsnail (Bowler 1990). In addition, the species forms "thick mats" of individuals at mainstem locations with Snake River Physa and Bliss Rapids snails. Potential threats to the subject species and other native molluscs include crowding and competition for preferred habitat for mainstem populations, and possible attraction and support of molluscivorous fish and avian predators (Bowler 1990). Although no information exists regarding foraging, it is possible that competition for forage may occur in areas where preferred habitats are limiting *i.e.*, boulder substrate is limited. In summary, *Potamopyrgus* appears to impact most directly mainstem populations of the candidate taxa. At present, it does not appear to threaten spring populations of *Lanx n. sp.*, Bliss Rapids snail and Utah valvata. The New Zealand mudsnail is still expanding its range and population in the Snake River. Further research on *Potamopyrgus* is required to monitor its expansion and to fully comprehend its full impact to the native molluscs and the overall ecology of the Snake River.

Determination

The Service has carefully assessed the best scientific and commercial information available regarding the past, present, and future threats faced by these species in determining to issue this rule. Based on this evaluation, the preferred action is to list the Idaho springsnail (*Pyrgulopsis idahoensis*), Utah valvata snail (*Valvata utahensis*), Snake River Physa snail (*Physa natricina*), and the Banbury Springs lanx (*Lanx* n. sp.) as endangered and the Bliss Rapids snail as threatened. With the exception of *Lanx*, four of the taxa have declined over all but a small fraction of their historical range. Today these species generally persist in a few isolated free-flowing reaches or spring alcove habitats in the middle Snake River characterized by cold well-oxygenated unpolluted water. *Lanx* has remained relatively stable within its three known locations since its discovery in 1988. However, because *Lanx* is known only from three locations it is most vulnerable to habitat change. The free-flowing, cool water environments required by these species have been impacted by and are vulnerable to continued adverse habitat modification and deteriorating water quality. This is especially true for those species restricted to mainstem river environments, the Snake River Physa and Idaho springsnail, but also mainstem colonies of Bliss Rapid snails and Utah valvata. These mainstem species may also be vulnerable to habitat competition from an exotic snail. With the exception of spring habitats at The Nature Conservancy's Preserve, remaining pristine spring and spring stream complexes preferred by *Lanx*, Bliss Rapids snail and Utah valvata are not protected from all threats previously discussed. Existing regulations do not provide adequate protection to prevent further direct and indirect habitat losses. Because the Idaho springsnail, Utah valvata, Snake River Physa, and Banbury Springs lanx are in danger of extinction throughout all or a significant portion of their ranges, they fit the definition of endangered as defined in the Act.

The Bliss Rapids snail is the most widespread of the five taxa, with new live populations recently reported above American Falls reservoir in springflow habitats. It is most abundant in several cold springs in the Hagerman Reach, and enjoys some degree of protection in several unpolluted springs on The Nature Conservancy's Preserve at Thousand Springs. The number of extant populations, including those on the Preserve, provides greater flexibility in recovery and reduces the likelihood that the Bliss Rapids snail will go extinct in the immediate future. However, remaining mainstem populations are variously threatened. Because of the limited threats facing the Preserve colonies of Bliss Rapids snails and the likelihood that limited additional populations may be found in spring habitats, this species is not now in immediate danger of extinction throughout all or a significant portion of its range. However, the Bliss Rapids snail is likely to become in danger of extinction in the near future. As a result, the Bliss Rapids snail fits the definition of threatened species as defined in the Act.

For reasons discussed below, critical habitat is not being proposed at this time.

Critical Habitat

Section 4(a)(3) of the Act requires, to the maximum extent prudent and determinable, that the Secretary designate critical habitat at the time a species is determined to be endangered or threatened. The Service has determined that critical habitat designation for these species is not presently prudent. Some populations are in localized springs and over-collecting by malacologists or vandalism could occur if their whereabouts were widely known. Regulations implementing section 4 of the Act provide that a designation of critical habitat is not prudent when a species is threatened by taking or other human activity and identification of critical habitat can be expected to increase the degree of such threat (50 CFR 424.12). Protection of these species' habitat will be addressed through the recovery process and through the section 7 consultation process. The Service believes that Federal involvement in the areas where these snails persist can be identified without the designation of critical habitat. Therefore, it would not now be prudent to determine critical habitat for these species.

Available Conservation Measures

Conservation measures provided to species listed as endangered or threatened under the Act include recognition, recovery actions, requirements for Federal protection, and prohibitions against certain activities. Recognition through listing encourages and results in conservation actions by Federal, State, and private agencies, groups and individuals. The Act provides for possible land acquisition and cooperation with the States and requires that recovery actions be carried out for all listed species. The protections required of Federal agencies and the prohibitions against taking and harm are discussed, in part, below.

Section 7(a) of the Act, as amended, requires Federal agencies to evaluate their actions with respect to any species listed as endangered or threatened and with respect to its critical habitat, if any is being designated. Regulations implementing this interagency cooperation provision of the Act are codified at 50 CFR Part 402. Section 7(a)(4) of the Act requires Federal agencies to confer with the Service on any action that is likely to jeopardize the continued existence of a threatened or endangered species or result in destruction or adverse modification of proposed critical habitat. If a species is listed subsequently, section 7(a)(2) requires Federal agencies to insure that activities they authorize, fund, or carry out are not likely to jeopardize the continued existence of such a species or to destroy or adversely modify its critical habitat. If a Federal action may affect a listed species or its critical habitat, the responsible Federal agency must enter into formal consultation with the Service.

Federal actions that may be affected by this final rule include the granting of licenses by the Commission for hydroelectric/power dam development and the issuing of permits under section 404 of the Clean Water Act by the Corps. The Commission will likely be required to consult with the Service on the previously mentioned hydroelectric/power dam proposals (A.J. Wiley, Idaho Power Company and Dike Hydroelectric Company). The Corps and Bureau of Land Management will likely be required to consult with the Service on the Box Canyon water diversion dam. In addition, joint consultation by the Corps and the Commission with the Service may be necessary if any of the projects under licensing consideration by the Commission include plans for filling. Federal or federally assisted programs affecting potential Snake River Plain Aquifer recharge programs and the Environmental Protection Agency's NPDES program would also be subject to consultation under section 7(a)(2).

The Act and implementing regulations found at 50 CFR 17.21 and 17.31 set forth a series of general prohibitions and exceptions that apply to all endangered wildlife, and to all threatened wildlife not covered by a special rule. These prohibitions, in part, make it illegal for any person subject to the jurisdiction of the United States to take (including harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, collect or attempt any such conduct), import or export, transport in interstate or foreign commerce in the course of commercial activity, or sell or offer for sale in interstate or foreign commerce any endangered species, or any threatened species not covered by a special rule. It also is illegal to possess, sell, deliver, carry, transport, or ship any such wildlife that has been taken illegally. Certain exceptions apply to agents of the Service and State conservation agencies.

Permits may be issued to carry out otherwise prohibited activities involving endangered or threatened wildlife species under certain circumstances. Regulations governing endangered species permits are at 50 CFR 17.22 and 17.23. Such permits are available for scientific purposes, to enhance the propagation or survival of the species, and/or for incidental take in connection with otherwise lawful activities. Regulations governing permits for threatened species are at 50 CFR 17.32. Unless otherwise provided by a special rule, such permits are available for scientific purposes, to enhance the propagation or survival of the species, for economic hardship, zoological exhibition, educational purposes, special purposes consistent with the Act, and/or for incidental take in connection with otherwise lawful activities.

National Environmental Policy Act

The Service has determined that an Environmental Assessment, as defined under the authority of the National Environmental Policy Act of 1969, need not be prepared in connection with regulations adopted pursuant to section 4(a) of the Endangered Species Act of 1973, as amended. A notice outlining the Service's reasons for this determination was published in the **Federal Register** on October 25, 1983 (48 FR 49244).

Endangered and threatened species, Exports, Imports, Reporting and recordkeeping requirements, and Transportation.

Regulation(s) Promulgation

PART 17—[AMENDED]

Accordingly, part 17, subchapter B of chapter I, title 50 of the Code of Federal Regulations, is amended as set forth below:

1. The authority citation for part 17 continues to read as follows:

Authority: 16 U.S.C. 1361–1407; 16 U.S.C. 1531–1544; 16 U.S.C. 4201–4245; Public Law 99–625, 100 Stat. 3500; unless otherwise noted.

2. Amend § 17.11(h) by adding the following, in alphabetical order under Snails to the List of Endangered and Threatened Wildlife:

§ 17.11 Endangered and threatened wildlife.

* * * * *

(h) * * *

Species		Historic range	Vertebrate population where endangered or threatened	Status	When listed	Critical habitat	Special rules

Part IV

Department of Health and Human Services

Administration for Children and Families

45 CFR Part 1303
Head Start Program; Final Rule

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

45 CFR Part 1303

RIN 0970–AB00

Head Start Program

AGENCY: Administration on Children, Youth and Families (ACYF), Administration for Children and Families (ACF), HHS.

ACTION: Final rule.

SUMMARY: The Administration on Children, Youth and Families is issuing this final rule to revise and clarify for Head Start grantees and delegate agencies the requirements concerning appeals by grantees from termination and denial of refunding actions. This final rule also includes provisions on appeals by current or prospective delegate agencies of grantees' rejections of, or failures to act on, applications, or grantees' terminations of grants or contracts.

The new procedures will reduce reporting and paperwork requirements. The changes also remove unnecessary and duplicative provisions and revise the language of the current regulation for clarity.

The most significant change is an improvement to the show cause and hearings process for Head Start grantees by abolishing the current complex and costly procedures and utilizing instead the Departmental Appeals Board.

DATES: This rule is effective January 13, 1993, with the exception of sections 1303.10 through 1303.23 which will become effective upon assignment of an OMB approval number.

FOR FURTHER INFORMATION CONTACT: Wade F. Horn, Ph.D., Commissioner, Administration on Children, Youth and Families, P.O. Box 1182, Washington, DC 20013, (202) 205–8347.

SUPPLEMENTARY INFORMATION:

I. Program Purpose

Head Start is authorized under the Head Start Act (the Act), section 635 of Public Law 97–35, the Omnibus Budget Reconciliation Act of 1981 (42 U.S.C. 9831 *et seq.*). It is a national program providing comprehensive developmental services primarily to low-income preschool children, age three to the age of compulsory school attendance, and their families. To help enrolled children achieve their full potential, Head Start programs provide comprehensive health, nutritional, educational, social and other services. In addition, Head Start programs are required to provide for the direct participation of the parents of enrolled children in the development, conduct, and direction of local programs. In FY 1991, Head Start served 583,471 children through a network of 1,346 grantees and 575 delegate agencies which have approved written agreements with grantees to operate Head Start programs.

II. Purpose of the Rule

The Administration for Children and Families (ACF) is amending the current rule governing Head Start grantee and delegate agency appeals at 45 CFR part 1303. The purpose of this revision is to eliminate duplication and increase efficiency in governmental operations by reducing the time expended in preparing and holding an appeal, and conducting a hearing and reaching a final decision. We believe this revision will reduce the cost of an appeal and the total time required for an appeal from the initial request for a review or a hearing on the proposed action to a final decision.

III. Summary of the Major Provisions of the Rule

The new regulations significantly revises, clarifies, and simplifies the appeals process for Head Start grantees and current and prospective delegate agencies. The changes are in response to a review and analysis of data on actual appeals filed by Head Start grantees and delegate agencies.

The following is a summary of the major provisions of the final rule:

(1) Currently, grantees may appeal three types of actions by the Administration for Children and Families (ACF): A termination of financial assistance; a denial of refunding, including certain reductions in funding; and a suspension. This rule requires that all allowable grantee appeals will be heard by the Departmental Appeals Board rather than by ACF staff.

(2) The rule continues to permit current and prospective delegate agencies to appeal to the grantee agency the rejection of an application and the failure of a grantee to act on an application within a timely period. In addition, the rule permits delegate agencies, for the first time, to appeal the termination of a grant or contract.

(3) The rule raises attorney fees from $100.00 per day to the usual and customary fees for the locality in which the grantee or delegate agency is located, but no higher than $500.00 per day. This figure will be adjusted to reflect annual increase in the Consumer Price Index.

(4) If a current or prospective delegate agency is dissatisfied with the grantee's decision, it may appeal that decision to ACF. The rule applies the "arbitrary and capricious" standard of review for appeals to ACF by current or prospective delegate agencies.

(5) Finally, the rule allows the ACF reviewing official to direct a remedy where a specific resolution of the dispute is appropriate.

IV. Rulemaking History

On January 29, 1992, the Department published a Notice of Proposed Rulemaking in the **Federal Register** (57 FR 3394), proposing to amend 45 CFR part 1303. Interested persons were given 60 days in which to comment on the proposed rule. During the 60 day comment period the Department received 11 letters containing 38 comments pertaining to one or more sections of the proposed regulation. There were two general comments, 13 comments on Subpart A, 17 comments on Subpart B, and six comments on Subpart C.

Section-by-Section Discussion of the NPRM

Two of the comments received were general expressions of support for the proposed changes.

Subpart A

Section 1303.1

Purpose and Application. No comments were received on this section.

Section 1303.2

Definitions. No comments were received on this section.

Section 1303.3

Right to an attorney, attorney fees, and travel costs. We received nine comments on paragraph 1303.3(a)(1), which concerns the right to an attorney and attorney fees. Six of these comments were addressed to the NPRM provision which allows attorney fees to be charged to the program grant in an amount equal to the usual and customary fees charged in the locality, up to $250 per day. Most commenters approved the increase in allowable attorney fees from $100 per day in the current regulation and the provision for automatic increases for inflation in the maximum allowable fee. Several commenters opposed the maximum as too low, stating that $250 per day is less than the usual rate for an attorney's services, and that, because of the limitation, it would be difficult for Head Start grantees to find attorneys.

While we appreciate that a maximum allowance of $250 per day may not meet the prevailing market rate for attorney fees in all places, we have kept this rate in the final rule. We have several reasons for doing so. The increase to $250 more than doubles the current maximum. The maximum fee will now be indexed for inflation and so will not remain static, as it has in the past. Finally, we have no convincing evidence that a maximum allowance of $250 per day will seriously disadvantage grantees. The community support that Head Start enjoys should provide any assistance grantees might need to secure effective representation.

In addition, we have clarified this paragraph by changing the reference to "adjusted for inflation" to "adjusted annually to reflect the percentage change in the Consumer Price Index for all Urban Consumers".

We received one comment in support of the provision in the regulation that attorney fees may be charged to the program grant. Two commenters opposed the restriction in paragraph 1303.3(a)(1) that the fees of only one attorney may be charged to the program grant with respect to a particular dispute. We have not changed this provision, which we believe is a legitimate and necessary way to avoid excessive costs being charged to the program. We do not believe that the bringing of appeals by grantees will be unduly hampered as a result of this restriction.

In the NPRM we solicited comments on the advisability of allowing payment of attorney fees (and attorney's travel and per diem costs) only in cases in which the grantee is successful in the final outcome of its appeal. Three comments were received in response to this request, all of them in opposition to the idea. We propose no change to our current policy.

Section 1303.4

Remedies. No comments were received on this section.

Section 1303.5

Service of process. No comments were received on this section.

Section 1303.6

Successor agencies and officials. No comments were received on this section.

Section 1303.7

Effect of failure to file or serve documents in a timely manner. One comment was received on this section, to the effect that the requirements of the NPRM are too restrictive. We have not changed this section, which, while requiring strict adherence to filing deadlines, is made more flexible by the waiver provisions of section 1303.8.

Section 1303.8

Waiver of requirements. No comments were received on this section. However, we deleted the last sentence of paragraph (b), which states that the requirements of the paragraph may not be waived, and added a new paragraph (g), which prohibits waiver of any of the requirements of section 1303.8. This is more consistent with our intent that waivers be granted only in accordance with the requirements of this section. In addition, we made technical edits to paragraph (e).

Supbart B

Section 1303.10

Purpose. No comments were received on this section.

Section 1303.11

Suspension on notice and opportunity to show cause. We received four comments on this section. One commenter opposed the provision in section 1303.11(f) which states that any delegate agency that wishes to participate in an informal meeting regarding an intended suspension of the grantee may request permission to do so from the responsible Department of Health and Human Services' (HHS) official. We have not changed this provision, which states that the HHS official, in acting on any such request from a delegate agency, must take into account the effect of the proposed suspension on the particular delegate agency, the extent to which the meeting would become unduly complicated as a result of granting such permission, and the extent to which the interests of the delegate agency appear to be adequately represented by other participants. Two commenters objected to section 1303.11(j), which states that an interim grantee may be named during a non-summary suspension. (One of these commenters objected to the interim grantee provisions of sections 1303.13 and 1303.14 as well.) We have not changed the interim grantee provision of this section, which is necessary to insure that services to children and families continue during the suspension of the grant. Another commenter noted that section 1303.11(g) does not make clear when the responsible official has to make a decision if no informal meeting is held. We have corrected this omission by adding, at the end of the second sentence, the words "or, if no informal meeting is held, within five days of receipt by the responsible HHS official of written material from all concerned parties."

Section 1303.12

Summary suspension and opportunity to show cause. One commenter objected to section 1303.12(1), which states that the responsible HHS official may appoint an agency to serve as interim grantee for a grantee which has been summarily suspended. This same commenter, and a different commenter, objected to the interim grantee provision of section 1303.13(e). We have not changed the interim grantee provisions of these sections, which, like that in section 1303, is necessary to insure that services to children and families continue during the suspension of the grant.

Section 1303.13

Appeal by a grantee of a suspension continuing for more than 30 days. Two comments were received opposing the interim grantee provision of section 1303.13(e). As noted above in the discussion of section 1303.12, we have not changed this provision. One commenter to sections 1303.13(f), 1303.14(c)(2), and 1303.15(d)(3) stated that, in order to speed up the appeals process, the notice of adverse action should specify that any appeal should be sent directly to the Departmental Appeals Board (DAB) and that the appellant must send a copy of the appeal to the responsible HHS official and the Commissioner, ACYF. We concur with this suggestion and have changed the final rule accordingly. A comment was received which noted that, unlike section 1303.21(a), neither section 1303.13, 1303.14 nor section 1303.15 contains any instructions about the contents of an appeal. We agree that sections 1303.13, 1303.14 and 1303.15 would be more clear and complete with instructions on the contents of an appeal. Instructions have been added to paragraphs 1303.13(f), 1303.14(c)(2) and 1303.15(d)(3).

Section 1303.14

Appeal by a grantee from a Termination of Financial Assistance. One commenter found section 1303.14 confusing in that it refers both to a right to an appeal and a right to a hearing, but only specifies that requests for hearings be transmitted to the DAB. This commenter suggests that, as in section 1303.15, this section use the word "appeal" throughout. We have changed this section by replacing the words "responsible HHS official" in paragraph 1303.14(c)(2) with the words "Departmental Appeals Board," and by deleting paragraph 1303.14(d).

(Paragraphs (e) through (k) of the NPRM have been redesignated accordingly.) This change both addresses the commenter's concern and eliminates the need for the transmission of the grantee's appeal request from the responsible HHS official to the Commissioner, ACYF, and from the Commissioner, ACYF, to the Departmental Appeals Board. In paragraph 1303.14(c)(5), we deleted the phrase "* * * the matter has been set down for hearing at a stated time and place or that * * *", which was inadvertently included in the NPRM. Only the Departmental Appeals Board should set the date and time for any hearing. This change is in accord with 45 CFR 1303.16(g).

We received one comment on this section objecting to the absence of a statement in the NPRM as to which party in an appeal under this section and section 1303.15 (dealing with appeals from denials of refunding) has the burden of proof. The current regulation provides that "ACYF will have the burden of justifying the proposed termination action." We have removed this sentence from the final rule because appeals will be heard by the Departmental Appeals Board. A comment was received on paragraph 1303.14(j) stating that it is highly undesirable to allow the responsible HHS official to set the deadline for the filing of a brief by an appellant who has waived its right to a hearing, since the official is a party in interest. It was suggested that the DAB set the deadline. We agree with this comment and have changed the final rule accordingly.

Finally, one commenter opposed the interim grantee provision of paragraph 1303.14(e)(1), stating that the naming of an interim grantee, except in cases of alleged criminal activity or apparent danger to children or staff, constitutes an assumption that the appeal will not be decided in the grantee's favor. In response to this comment, we have modified the interim grantee provision of this section to make clear what happens when a grantee appeals an administrative decision to court. We have added paragraph 1303.14(d)(3), which provides that if a grantee does not appeal the administrative decision to court within 30 days of its receipt of it, a replacement grantee will be immediately sought, and an interim grantee named, if needed, pending that selection. This modification reflects the fact that a replacement grantee may not be sought when a grantee appeals an administrative decision to court. However, we have specified at paragraph (d)(4) that an interim grantee may be sought even though the grantee has appealed within 30 days, if the responsible HHS official determines it necessary to do so. Examples of circumstances that warrant an interim grantee are to protect children and families from harm, and Federal funds from misuse or dissipation, or both. An interim grantee might be needed to keep the program viable in the community until the permanent successor is selected. We believe that 30 days is adequate for a grantee to decide to appeal since the matter would already have been considered in administrative proceedings and a record developed. Further, we do not believe that the process of selecting a permanent grantee should be delayed unreasonably. ACYF believes that it is important for the program's children and their families that stability be provided to the program as soon as possible, consistent with fairness to grantees. We believe the new regulation accomplishes that goal. Paragraph (d)(2) with regard to suspension of funding has been modified to clarify that an interim grantee will be appointed during the appeal period.

We have made some changes to paragraph 1303.14(i) to clarify the regulation. Grantee appeals of termination actions are to the Department Appeals Board. Therefore, all of their submissions must be to the Board, with copies as required by Board procedures. The Board, consistent with its current practices, will decide the appeal based on the written information and argument submitted to it. What is properly submitted will be determined by the Board, except as may otherwise be required by these regulations.

Section 1303.15

Appeal by a grantee from a denial of refunding. We received one comment in opposition to the last sentence of paragraph 1303.15(c), which permits refunding to be denied if it is concluded that continuing a particular program is no longer in the public interest. We have deleted this provision, since the grounds upon which the Department may seek to deny refunding are sufficiently broad to meet the Department's concerns.

Section 1303.16

Conduct of hearing. One commenter stated that paragraph 1303.16(b) should be deleted because DAB regulations already have a rule against communications outside the record. Since the DAB's usual procedure is for the presiding officer to set up the hearing, it was suggested that paragraph 1303.16(b) be changed to provide that the notice of hearing and issues be filed by (instead of with) the presiding officer. The same commenter stated that it is inappropriate to provide for the assistance of an attorney from the Department's General Counsel's office since the Board has its own staff attorneys. We concur with these comments and have made the following changes to paragraph 1303.16(b). The first sentence has been changed and now refers only to the prohibition on communications outside the record as provided by 45 CFR 16.17. The second sentence of paragraph 1303.16(b) has been deleted. One comment was received on paragraph 1303.16(e), which allows any person or organization that wishes to participate in a proceeding to apply for permission to do so from the presiding officer. The commenter stated that the provision is too broadly worded. We do not agree, and, therefore, have not changed this paragraph, which requires the person or organization which wishes to participate to state their interest in the proceeding, the evidence or arguments they intend to contribute, and the necessity for the introduction of such evidence or arguments.

Subpart C

Section 1303.20

Appeals to grantees by current or prospective delegate agencies on rejection of an application, failure to act on an application, or termination of a grant or contract. We received three comments on this section. One of the comments was on the right of a delegate agency to appeal a grantee's decision to terminate an agreement with it. This commenter strongly opposed this new right, saying that when relations between a grantee and delegate have worsened to the point where the grantee is moving to terminate the agreement between the parties, the only possible solution is intervention by the appropriate HHS official. While we are cognizant of the fact that grantee-delegate agency relations in cases in which the grantee is moving to terminate the contract which binds them may be quite strained, we think this step is very important for two reasons. First, the delegate's appeal to the grantee will create a record which the HHS official will have to review if that official is called upon to make a decision in the matter. Second, a thorough review of the situation by the parties will result in the resolution of more grantee-delegate agency disputes before they reach the HHS official. Two comments were received on the provision of this section which allows a delegate agency to have a responsible

HHS official review a grantee's rejection or failure to act on an application, or termination of a grant or contract. One commenter supported this provision, while the second opposed it, apparently on the ground that "review" by the official is not the same as an appeal. We have not changed the provision, and note that the "review" by an HHS official referred to in the NPRM's discussion of this section is in fact an appeal to the official (see paragraphs 1303.20(d) and 1303.21).

Section 1303.21

Procedures for appeal by current or prospective delegate agencies to the responsible HHS official from denials by grantees of an application or failure to act on an application. Two comments were received in opposition to the right of prospective delegate agencies, under paragraph 1303.21(a), to appeal from a grantee's denial of, or failure to act on, an application. The right of prospective delegate agencies to bring such appeals is found in section 646 of the Head Start Act (42 U.S.C. 9841). We have not made any changes to this section, which we believe simplifies and makes consistent the current regulatory provisions. One comment was received on paragraph 1303.21(e)(1), which states that a responsible HHS official may meet informally with a current or prospective delegate agency if the official determines that such a meeting would be beneficial to the resolution of the appeal. The commenter believes that no meeting should be held with the delegate agency without the grantee present, and that the provision that the meetings can be conducted by conference call should be deleted. Paragraph 1303.21(e)(2) states that "Both the grantee and the current or prospective delegate agency may attend any informal meeting concerning the appeal." We do not believe the comment is well founded and have therefore left this paragraph as it was in the NPRM.

Section 1303.22

Decision on appeal in favor of grantee. No comments were received on this section.

Section 1303.23

Decision on appeal in favor of current or prospective delegate agency. No comments were received on this section.

V. Impact Analysis

Executive Order 12291

Executive Order 12291 requires that a regulatory impact analysis be prepared for major rules, which are defined in the Order as any rule that has an annual effect on the national economy of $100 million or more, or certain other specified effects. The Department has determined that this rule is not a major rule within the Executive Order because it will not have an annual effect on the economy of $100 million or more; nor result in a major increase in costs or prices for consumers, any industries, any governmental agencies, or any geographic region; and, it will not have an adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or import markets.

This rule revises and clarifies the existing regulatory provisions regarding Head Start grantee and delegate agency appeals. It eliminates duplication and increases efficiency in governmental operations by reducing the time necessary to prepare an appeal, conduct a hearing, and reach a final decision. The final rule also revises, clarifies and simplifies the appeals process for Head Start grantees and current and prospective delegate agencies. The final rule requires that all allowable grantee appeals will be heard by the Departmental Appeals Board; permits a delegate agency to appeal the termination of a grant or contract; and allows the ACF reviewing official to direct a remedy where a specific resolution of the dispute is appropriate.

Our estimate of resource needs indicates that, while this final rule would affect some grantees and delegates who exercise their right to an appeal, it will not have a significant impact on the economy or result in a major increase in costs or prices for a substantial number of entities. We based this estimate on previous Head Start grantee and delegate agency appeals and the additional resources in some instances needed to implement the requirements. However, we estimate that this revision of the appeals process will be a direct benefit to the Government, grantees and the public since appeals procedures are simplified and one level of review is eliminated, thereby reducing some costs and speeding up the entire process. Thus, the Department concluded that this rule is not a major rule within the meaning of the Executive Order because it does not meet the threshold criteria.

Regulatory Flexibility Act of 1980

Consistent with the Regulatory Flexibility Act of 1980 (5 U.S.C. chapter 6) we have tried to anticipate and reduce the impact of rules and paperwork requirements on small businesses. The public burden is estimated to be 45 hours of work load per response. This is a reduction in the paperwork burden placed on grantees because there will be less duplication of documents given the reduction in appeal levels. For each rule with a "significant economic impact on a substantial number of small entities" we must analyze the rule's impact on small entities. Small entities are defined by the Act to include small businesses, small non-profit organizations, and small governmental entities. While this final rule would affect small entities, it will not have a significant economic impact on a substantial number of small entities. For these reasons, the Secretary certifies that this rule will not have a significant impact on a substantial number of small entities.

Paperwork Reduction Act

Under the Paperwork Reduction Act of 1980, Public Law 96–511, all Departments are required to submit to the Office of Management and Budget (OMB) for review and approval any reporting or record keeping requirement in a proposed and final rule. This final rule contains information collection requirements in § 1303.10 through § 1303.23 which will be submitted to OMB for review and approval in accordance with § 3504(h). Organizations and individuals desiring to submit comments on the information collection requirements should direct them to the agency official designated for this purpose, whose name appears in

this preamble, and to the Office of Information and Regulatory Affairs, OMB, New Executive Office Building (room 3002), Washington, DC 20503, Attention: Desk Officer for HHS/ACF.

List of Subjects in 45 CFR Part 1303

Administrative practice and procedures, Appeal procedures for Head Start grantees and current or prospective delegate agencies, Education of disadvantaged, Grant programs-social programs.

(Catalog of Federal Domestic Assistance Program Number 93.600, Project Head Start)

Dated: July 1, 1992.

Jo Anne B. Barnhart,

Assistant Secretary for Children and Families.

Approved: August 18, 1992.

Louis W. Sullivan,

Secretary.

For the reasons set forth in the Preamble, chapter XIII, subchapter B, part 1303, of title 45 of the Code of Federal Regulations is revised to read as follows:

PART 1303—APPEAL PROCEDURES FOR HEAD START GRANTEES AND CURRENT OR PROSPECTIVE DELEGATE AGENCIES

Subpart A—General

Sec.

1303.1 Purpose and application.
1303.2 Definitions.
1303.3 Right to attorney, attorney fees, and travel costs.
1303.4 Remedies.
1303.5 Service of process.
1303.6 Successor agencies and officials.
1303.7 Effect of failure to file or serve documents in a timely manner.
1303.8 Waiver of requirements.

Subpart B—Appeals by Grantees

1303.10 Purpose.
1303.11 Suspension on notice and opportunity to show cause.
1303.12 Summary suspension and opportunity to show cause.
1303.13 Appeal by a grantee of a suspension continuing for more than 30 days.
1303.14 Appeal by a grantee from a termination of financial assistance.
1303.15 Appeal by a grantee from a denial of refunding.
1303.16 Conduct of hearing.

Subpart C—Appeals by Current or Prospective Delegate Agencies

1303.20 Appeals to grantees by current or prospective delegate agencies of rejection of an application, failure to act on an application, or termination of a grant or contract.
1303.21 Procedures for appeal by current or prospective delegate agencies to the responsible HHS official from denials by grantees of an application or failure to act on an application.
1303.22 Decision on appeal in favor of grantee.
1303.23 Decision on appeal in favor of the current or prospective delegate agency.

Authority: 42 U.S.C. 9801 *et seq.*

Subpart A—General

§ 1303.1 Purpose and application.

This part prescribes regulations based on section 646 of the Head Start Act, 42 U.S.C. 9841, as it applies to grantees and current or prospective delegate agencies engaged in or wanting to engage in the operation of Head Start programs under the Act. It prescribes the procedures for appeals by current and prospective delegate agencies from specified actions or inaction by grantees. It also provides procedures for reasonable notice and opportunity to show cause in cases of suspension of financial assistance by the responsible HHS official and for an appeal to the Departmental Appeals Board by grantees in cases of denial of refunding, termination of financial assistance, and suspension of financial assistance.

§ 1303.2 Definitions.

As used in this part:

Act means the Head Start Act, 42 U.S.C. section 9831, *et seq.*

ACYF means the Administration on Children, Youth and Families in the Department of Health and Human Services, and includes Regional staff.

Agreement means either a grant or a contract between a grantee and a delegate agency for the conduct of all or part of the grantee's Head Start program.

Day means the 24 hour period beginning at 12 a.m. local time and continuing for the next 24 hour period. It includes all calendar days unless otherwise expressly noted.

Delegate Agency means a public or private non-profit organization or agency to which a grantee has delegated by written agreement the carrying out of all or part of its Head Start program.

Denial of Refunding means the refusal of a funding agency to fund an application for a continuation of a Head Start program for a subsequent program year when the decision is based on a determination that the grantee has improperly conducted its program, or is incapable of doing so properly in the future, or otherwise is in violation of applicable law, regulations, or other policies.

Funding Agency means the agency that provides funds directly to either a grantee or a delegate agency. ACYF is the funding agency for a grantee, and a grantee is the funding agency for a delegate agency.

Grantee means the local public or private non-profit agency which has been designated as a Head Start agency under 42 U.S.C. 9836 and which has been granted financial assistance by the responsible HHS official to operate a Head Start program.

Interim Grantee means an agency which has been appointed to operate a Head Start program for a period of time not to exceed one year while an appeal of a denial of refunding, termination or suspension action is pending.

Prospective Delegate Agency means a public or private non-profit agency or organization which has applied to a grantee to serve as a delegate agency.

Responsible HHS Official means the official who is authorized to make the grant of financial assistance to operate a Head Start program or his or her designee.

Submittal means the date of actual receipt or the date the material was served in accordance with § 1303.5 of this part for providing documents or notices of appeals, and similar matters, to either grantees, delegate agencies, prospective delegate agencies, or ACYF.

Substantial Rejection means that a funding agency requires that the funding of a current delegate agency be reduced to 80 percent or less of the current level of operations for any reason other than a determination that the delegate agency does not need the funds to serve all the eligible persons it proposes to serve.

Suspension of a grant means temporary withdrawal of the grantee's authority to obligate grant funds pending corrective action by the grantee.

Termination of a grant or delegate agency agreement means permanent withdrawal of the grantee's or delegate agency's authority to obligate previously awarded grant funds before that authority would otherwise expire. It also means the voluntary relinquishment of that authority by the grantee or delegate agency. Termination does not include:

(1) Withdrawal of funds awarded on the basis of the grantee's or delegate agency's underestimate of the unobligated balance in a prior period;

(2) Refusal by the funding agency to extend a grant or award additional funds (such as refusal to make a competing or noncompeting continuation renewal, extension or supplemental award);

(3) Withdrawal of the unobligated balance as of the expiration of a grant;

(4) Annulment, i.e., voiding of a grant upon determination that the award was obtained fraudulently or was otherwise illegal or invalid from its inception.

Work day means any 24 hour period beginning at 12 a.m. local time and

continuing for 24 hours. It excludes Saturdays, Sundays, and legal holidays. Any time ending on one of the excluded days shall extend to 5 p.m. of the next full work day.

§ 1303.3 Right to attorney, attorney fees, and travel costs.

(a) All parties to proceedings under this part, including informal proceedings, have the right to be represented by an attorney.

(1) Attorney fees may be charged to the program grant in an amount equal to the usual and customary fees charged in the locality. However, such fees may not exceed $250.00 per day, adjusted annually to reflect the percentage change in the Consumer Price Index for All Urban Consumers (issued by the Bureau of Labor Statistics) beginning one year after the effective date of these regulations. The grantee or delegate agency may use current operating funds to pay these costs. The fees of only one attorney may be charged to the program grant with respect to a particular dispute. Such fees may not be charged if the grantee or delegate agency has an attorney on its staff, or if it has a retainer agreement with an attorney which fully covers fees connected with litigation. The grantee or delegate agency shall have the burden of establishing the usual and customary fees and shall furnish documentation to support that determination that is satisfactory to the responsible HHS official.

(2) A grantee or delegate agency may designate up to two persons to attend and participate in proceedings held under this Part. Travel and per diem costs of such persons, and of an attorney representing the grantee or delegate agency, shall not exceed those allowable under Standard Governmental Travel Regulations in effect at the time of the travel.

(b) In the event that use of program funds under this section would result in curtailment of program operations or inability to liquidate prior obligations, the party so affected may apply to the responsible HHS official for payment of these expenses.

(c) The responsible HHS official, upon being satisfied that these expenditures would result in curtailment of program operations or inability to liquidate prior obligations, must make payment therefor to the affected party by way of reimbursement from currently available funds.

§ 1303.4 Remedies.

The procedures established by subparts B and C of this Part shall not be construed as precluding ACYF from pursuing any other remedies authorized by law.

§ 1303.5 Service of process.

Whenever documents are required to be filed or served under this part, or notice provided under this part, certified mail shall be used with a return receipt requested. Alternatively, any other system may be used that provides proof of the date of receipt of the documents by the addressee. If this regulation is not complied with, and if a party alleges that it failed to receive documents allegedly sent to it, there will be a rebuttable presumption that the documents or notices were not sent as required by this part, or as alleged by the party that failed to use the required mode of service. The presumption may be rebutted only by a showing supported by a preponderance of evidence that the material was in fact submitted in a timely manner.

§ 1303.6 Successor agencies and officials.

Wherever reference is made to a particular Federal agency, office, or official it shall be deemed to apply to any other agency, office, or official which subsequently becomes responsible for administration of the program or any portion of it.

§ 1303.7 Effect of failure to file or serve documents in a timely manner.

(a) Whenever an appeal is not filed within the time specified in these or related regulations, the potential appellant shall be deemed to have consented to the proposed action and to have waived all rights of appeal.

(b) Whenever a party has failed to file a response or other submission within the time required in these regulations, or by order of an appropriate HHS responsible official, the party shall be deemed to have waived the right to file such response or submission.

(c) A party fails to comply with the requisite deadlines or time frames if it exceeds them by any amount.

(d) The time to file an appeal, response, or other submission may be waived in accordance with § 1303.8 of this part.

§ 1303.8 Waiver of requirements.

(a) Any procedural requirements required by these regulations may be waived by the responsible HHS official or such waiver requests may be granted by the Departmental Appeals Board in those cases where the Board has jurisdiction. Requests for waivers must be in writing and based on good cause.

(b) Approvals of waivers must be in writing and signed by the responsible HHS official or by the Departmental Appeals Board when it has jurisdiction.

(c) "Good cause" consists of the following:

(1) Litigation dates cannot be changed;

(2) Personal emergencies pertaining to the health of a person involved in and essential to the proceeding or to a member of that person's immediate family, spouse, parents, or siblings;

(3) The complexity of the case is such that preparation of the necessary documents cannot reasonably be expected to be completed within the standard time frames;

(4) Other matters beyond the control of the party requesting the waiver, such as strikes and natural disasters.

(d) Under no circumstances may "good cause" consist of a failure to meet a deadline due to the oversight of either a party or its representative.

(e) Waivers of timely filing or service shall be granted only when necessary in the interest of fairness to all parties, including the Federal agency. They will be granted sparingly as prompt resolution of disputes is a major goal of these regulations. The responsible HHS official or the Departmental Appeals Board shall have the right, on own motion or on motion of a party, to require such documentation as deemed necessary in support of a request for a waiver.

(f) A request for an informal meeting by a delegate agency, including a prospective delegate agency, may be denied by the responsible HHS official, on motion of the grantee or on his or her own motion, if the official concludes that the written appeal fails to state plausible grounds for reversing the grantee's decision or the grantee's failure to act on an application.

(g) The requirements of this section may not be waived.

Subpart B—Appeals by Grantees

§ 1303.10 Purpose.

(a) This subpart establishes rules and procedures for the suspension of a grantee, denial of a grantee's application for refunding, or termination of assistance under the Act for circumstances related to the particular grant, such as ineffective or improper use of Federal funds or for failure to comply with applicable laws, regulations, policies, instructions, assurances, terms and conditions or, in accordance with part 1302 of this chapter, upon loss by the grantee of legal status or financial viability.

(b) This subpart does not apply to any administrative action based upon any violation, or alleged violation, of title VI of the Civil Rights Act of 1964.

§ 1303.11 Suspension on notice and opportunity to show cause.

(a) After receiving concurrence from the Commissioner, ACYF, the responsible HHS official may suspend financial assistance to a grantee in whole or in part for breach or threatened breach of any requirement stated in § 1303.10 pursuant to notice and opportunity to show cause why assistance should not be suspended.

(b) The responsible HHS official will notify the grantee as required by § 1303.5 or by telegram that ACYF intends to suspend financial assistance, in whole or in part, unless good cause is shown why such action should not be taken. The notice will include:

(1) The grounds for the proposed suspension;

(2) The effective date of the proposed suspension;

(3) Information that the grantee has the opportunity to submit written material in opposition to the intended suspension and to meet informally with the responsible HHS official regarding the intended suspension;

(4) Information that the written material must be submitted to the responsible HHS official at least seven days prior to the effective date of the proposed suspension and that a request for an informal meeting must be made in writing to the responsible HHS official no later than seven days after the day the notice of intention to suspend was mailed to the grantee;

(5) Invitation to correct the deficiency by voluntary action; and

(6) A copy of this subpart.

(c) If the grantee requests an informal meeting, the responsible HHS official will fix a time and place for the meeting. In no event will such meeting be scheduled less than seven days after the notice of intention to suspend was sent to the grantee.

(d) The responsible HHS official may at his or her discretion extend the period of time or date for making requests or submitting material by the grantee and will notify the grantee of any such extension.

(e) At the time the responsible HHS official sends the notice of intention to suspend financial assistance to the grantee, the official will send a copy of it to any delegate agency whose activities or failures to act are a substantial cause of the proposed suspension, and will inform such delegate agency that it is entitled to submit written material in opposition and to participate in the informal meeting with the responsible HHS official if one is held. In addition, the responsible HHS official may give such notice to any other Head Start delegate agency of the grantee.

(f) Within three days of receipt of the notice of intention to suspend financial assistance, the grantee shall send a copy of such notice and a copy of this subpart to all delegate agencies which would be financially affected by the proposed suspension action. Any delegate agency that wishes to submit written material may do so within the time stated in the notice. Any delegate agency that wishes to participate in the informal meeting regarding the intended suspension, if not otherwise afforded a right to participate, may request permission to do so from the responsible HHS official, who may grant or deny such permission. In acting upon any such request from a delegate agency, the responsible HHS official will take into account the effect of the proposed suspension on the particular delegate agency, the extent to which the meeting would become unduly complicated as a result of granting such permission, and the extent to which the interests of the delegate agency requesting such permission appear to be adequately represented by other participants.

(g) The responsible HHS official will consider any timely material presented in writing, any material presented during the course of the informal meeting as well as any showing that the grantee has adequately corrected the deficiency which led to the suspension proceedings. The decision of the responsible HHS official will be made within five days after the conclusion of the informal meeting, or, if no informal meeting is held, within five days of receipt by the responsible HHS official of written material from all concerned parties. If the responsible HHS official concludes that the grantee has failed to show cause why financial assistance should not be suspended, the official may suspend financial assistance in whole or in part and under such terms and conditions as he or she specifies.

(h) Notice of such suspension will be promptly transmitted to the grantee as required in § 1303.5 of this part or by some other means showing the date of receipt, and shall become effective upon delivery or on the date delivery is refused or the material is returned. Suspension shall not exceed 30 days unless the responsible HHS official and the grantee agree to a continuation of the suspension for an additional period of time. If termination proceedings are initiated in accordance with § 1303.14, the suspension of financial assistance will be rescinded.

(i) New obligations incurred by the grantee during the suspension period will be not be allowed unless the granting agency expressly authorizes them in the notice of suspension or an amendment to it. Necessary and otherwise allowable costs which the grantee could not reasonably avoid during the suspension period will be allowed if they result from obligations properly incurred by the grantee before the effective date of the suspension and not in anticipation of suspension or termination. At the discretion of the granting agency, third-party in-kind contributions applicable to the suspension period may be allowed in satisfaction of cost sharing or matching requirements.

(j) The responsible HHS official may appoint an agency to serve as an interim grantee to operate the program until the grantee's suspension is lifted.

(k) The responsible HHS official may modify the terms, conditions and nature of the suspension or rescind the suspension action at any time on his or her own initiative or upon a satisfactory showing that the grantee has adequately corrected the deficiency which led to the suspension and that repetition is not threatened. Suspension partly or fully rescinded may, at the discretion of the responsible HHS official, be reimposed with or without further proceedings, except that the total time of suspension may not exceed 30 days unless termination proceedings are initiated in accordance with § 1303.14 or unless the responsible HHS official and the grantee agree to continuation of the suspension for an additional period of time. If termination proceedings are initiated, the suspension of financial assistance will be rescinded.

§ 1303.12 Summary suspension and opportunity to show cause.

(a) After receiving concurrence from the Commissioner, ACYF, the responsible HHS official may suspend financial assistance in whole or in part without prior notice and an opportunity to show cause if it is determined that immediate suspension is necessary because of a serious risk of:

(1) Substantial injury to property or loss of project funds; or

(2) Violation of a Federal, State, or local criminal statute; or

(3) If staff or participants' health and safety are at risk.

(b) The notice of summary suspension will be given to the grantee as required by § 1303.5 of this part, or by some other means showing the date of receipt, and shall become effective on delivery or on the date delivery is refused or the material is returned unclaimed.

(c) The notice must include the following items:

(1) The effective date of the suspension;

(2) The grounds for the suspension;

(3) The extent of the terms and conditions of any full or partial suspension;

(4) A statement prohibiting the grantee from making any new expenditures or incurring any new obligations in connection with the suspended portion of the program; and

(5) A statement advising the grantee that it has an opportunity to show cause at an informal meeting why the suspension should be rescinded. The request for an informal meeting must be made by the grantee in writing to the responsible HHS official no later than five workdays after the effective date of the notice of summary suspension as described in paragraph (b) of this section.

(d) If the grantee requests in writing the opportunity to show cause why the suspension should be rescinded, the responsible HHS official will fix a time and place for an informal meeting for this purpose. This meeting will be held within five workdays after the grantee's request is received by the responsible HHS official. Notwithstanding the provisions of this paragraph, the responsible HHS official may proceed to deny refunding or initiate termination proceedings at any time even though financial assistance of the grantee has been suspended in whole or in part.

(e) Notice of summary suspension must also be furnished by the grantee to its delegate agencies within two workdays of its receipt of the notice from ACYF by certified mail, return receipt requested, or by any other means showing dates of transmittal and receipt or return as undeliverable or unclaimed. Delegate agencies affected by the summary suspension have the right to participate in the informal meeting as set forth in paragraph (d) of this section.

(f) The effective period of a summary suspension of financial assistance may not exceed 30 days unless:

(1) The conditions creating the summary suspension have not been corrected; or

(2) The parties agree to a continuation of the summary suspension for an additional period of time; or

(3) The grantee, in accordance with paragraph (d) of this section, requests an opportunity to show cause why the summary suspension should be rescinded, in which case it may remain in effect in accordance with paragraph (h) of this section; or

(4) Termination or denial of refunding proceedings are initiated in accordance with § 1303.14 or § 1303.15.

(g) Any summary suspension that remains in effect for more than 30 days is subject to the requirements of § 1303.13 of this part. The only exceptions are where there is an agreement under paragraph (f)(2) of this section, or the circumstances described in paragraph (f)(4) or (h)(1) of this section exist.

(h)(1) If the grantee requests an opportunity to show cause why a summary suspension should be rescinded, the suspension of financial assistance will continue in effect until the grantee has been afforded such opportunity and a decision has been made by the responsible HHS official.

(2) If the suspension continues for more than 30 days, the suspension remains in effect even if it is appealed to the Departmental Appeals Board.

(3) Notwithstanding any other provisions of these or other regulations, if a denial of refunding occurs or a termination action is instituted while the summary suspension is in effect, the suspension shall merge into the later action and funding shall not be available until the action is rescinded or a decision favorable to the grantee is rendered.

(i) The responsible HHS official must consider any timely material presented in writing, any material presented during the course of the informal meeting, as well as any other evidence that the grantee has adequately corrected the deficiency which led to the summary suspension.

(j) A decision must be made within five work days after the conclusion of the informal meeting with the responsible HHS official. If the responsible HHS official concludes, after considering the information provided at the informal meeting, that the grantee has failed to show cause why the suspension should be rescinded, the responsible HHS official may continue the suspension, in whole or in part and under the terms and conditions specified in the notice of suspension.

(k) New obligations incurred by the grantee during the suspension period will not be allowed unless the granting agency expressly authorizes them in the notice of suspension or by an amendment to the notice. Necessary and otherwise allowable costs which the grantee could not reasonably avoid during the suspension period will be allowed if they result from obligations properly incurred by the grantee before the effective date of the suspension and not in anticipation of suspension, denial of refunding or termination.

(l) The responsible HHS official may appoint an agency to serve as an interim grantee to operate the program until either the grantee's summary suspension is lifted or a new grantee is selected in accordance with subpart B of this part.

(m) At the discretion of the funding agency, third-party in-kind contributions applicable to the suspension period may be allowed in satisfaction of cost sharing or matching requirements.

(n) The responsible HHS official may modify the terms, conditions and nature of the summary suspension or rescind the suspension action at any time upon receiving satisfactory evidence that the grantee has adequately corrected the deficiency which led to the suspension and that the deficiency will not occur again. Suspension partly or fully rescinded may, at the discretion of the responsible HHS official, be reimposed with or without further proceedings.

§ 1303.13 Appeal by a grantee of a suspension continuing for more than 30 days.

(a) This section applies to summary suspensions that are initially issued for more than 30 days and summary suspensions continued for more than 30 days except those identified in paragraph § 1303.12(g) of this part.

(b) After receiving concurrence from the Commissioner, ACYF, the responsible HHS official may suspend a grant for more than 30 days. A suspension may, among other bases, be imposed for the same reasons that justify termination of financial assistance or which justify a denial of refunding of a grant.

(c) A notice of a suspension under this section shall set forth:

(1) The reasons for the action;

(2) The duration of the suspension, which may be indefinite;

(3) The fact that the action may be appealed to the Departmental Appeals Board and the time within which it must be appealed.

(d) During the period of suspension a grantee may not incur any valid obligations against Federal Head Start grant funds, nor may any grantee expenditure or provision of in-kind services or items of value made during the period be counted as applying toward any required matching contribution required of a grantee, except as otherwise provided in this part.

(e) The responsible HHS official may appoint an agency to serve as an interim grantee to operate the program until either the grantee's suspension is lifted or a new grantee is selected in accordance with subparts B and C of 45 CFR part 1302.

(f) Any appeal to the Departmental Appeals Board must be made within five days of the grantee's receipt of notice of suspension or return of the notice as undeliverable, refused, or unclaimed. Such an appeal must be in writing and it must fully set forth the grounds for the appeal and be accompanied by all documentation that the grantee believes is relevant and supportive of its position.

All such appeals shall be addressed to the Departmental Appeals Board, and the appellant will send a copy of the appeal to the Commissioner, ACYF, and the responsible HHS official. Appeals will be governed by the Departmental Appeals Board's regulations at 45 CFR part 16, except as otherwise provided in the Head Start appeals regulations. Any grantee requesting a hearing as part of its appeal shall be afforded one by the Departmental Appeals Board.

(g) If a grantee is successful on its appeal any costs incurred during the period of suspension that are otherwise allowable may be paid with Federal grant funds. Moreover, any cash or in-kind contributions of the grantee during the suspension period that are otherwise allowable may be counted toward meeting the grantee's non-Federal share requirement.

(h) If a grantee's appeal is denied by the Departmental Appeals Board, but the grantee is subsequently restored to the program because it has corrected those conditions which warranted the suspension, its activities during the period of the suspension remain outside the scope of the program.

Federal funds may not be used to offset any costs during the period, nor may any cash or in-kind contributions received during the period be used to meet non-Federal share requirements.

(i) If the Federal agency institutes termination proceedings during a suspension, or denies refunding, the two actions shall merge and the grantee need not file a new appeal. Rather, the Departmental Appeals Board will be notified by the Federal agency and will automatically be vested with jurisdiction over the termnation action or the denial of refunding and will, pursuant to its rules and procedures, permit the grantee to respond to the notice of termination. In a situation where a suspension action is merged into a termination action in accordance with this section, the suspension continues until there is an administrative decision by the Departmental Appeals Board on the grantee's appeal.

§ 1303.14 Appeal by a grantee from a termination of financial assistance.

(a) After receiving concurrence from the Commissioner, ACYF, the responsible HHS official may terminate financial assistance to a grantee. Financial assistance may be terminated in whole or in part.

(b) Financial assistance may be terminated for any or all of the following reasons:

(1) The grantee is no longer financially viable;

(2) The grantee has lost the requisite legal status or permits;

(3) The grantee has failed to comply with the required fiscal or program reporting requirements applicable to grantees in the Head Start program;

(4) The grantee has failed to meet the performance standards for operation of Head Start programs that are applicable to grantees;

(5) The grantee has failed to comply with the eligibility requirements and limitations on enrollment in the Head Start program, or both;

(6) The grantee has failed to comply with the Head Start grants administration requirements set forth in 45 CFR part 1301;

(7) The grantee has failed to comply with the requirements of the Head Start Act;

(8) The grantee is debarred from receiving Federal grants or contracts;

(9) The grantee fails to abide by any other terms and conditions of its award of financial assistance, or any other applicable laws, regulations, or other applicable Federal or State requirements or policies.

(c) A notice of termination shall set forth:

(1) The violations or actions justifying the termination.

(2) The fact that the termination may be appealed within 10 days to the Departmental Appeals Board (with a copy of the appeal sent to the responsible HHS official and the Commissioner, ACYF) and that such appeals shall be governed by 45 CFR part 16, except as otherwise provided in the Head Start appeals regulations, and that any grantee which requests a hearing shall be afforded one, as mandated by 42 U.S.C. 9841. Such an appeal must be in writing and must fully set forth the grounds for the appeal and be accompanied by all of the documentation that the grantee believes is relevant and supportive of its position.

(3) That the appeal may be made only by the Board of Directors of the grantee or an official acting on behalf of such Board.

(4) That, if the activities of a delegate agency are the basis, in whole or in part, for the proposed termination, the identity of the delegate agency.

(5) Information that the grantee has a right to request a hearing in writing within a period of time specified in the notice which is not later than 10 days from the date of sending the notice.

(d) (1) During a grantee's appeal of a termination decision, funding will continue until an adverse decision is rendered or until expiration of the then current budget period. At the end of the current budget period, if a decision has not been rendered, the responsible HHS official shall award an interim grant to the grantee until a decision is made.

(2) If a grantee's funding has been suspended, no funding shall be available during the termination proceedings, or at any other time, unless the action is rescinded or the grantee's appeal is successful. An interim grantee will be appointed during the appeal period.

(3) If a grantee does not appeal an administrative decision to court within 30 days of its receipt of the decision, a replacement grantee will be immediately sought. An interim grantee may be named, if needed, pending the selection of a replacement grantee.

(4) An interim grantee may be sought even though the grantee has appealed an administrative decision to court within 30 days, if the responsible HHS official determines it necessary to do so. Examples of circumstances that warrant an interim grantee are to protect children and families from harm and Federal funds from misuse or dissipation or both.

(e) If a grantee requests a hearing, it shall send a copy of its request to all delegate agencies which would be financially affected by the termination of assistance and to each delegate agency identified in the notice. The copies of the request shall be sent to these delegate agencies at the same time the grantee's request is made of ACYF. The grantee shall promptly send ACYF a list of the delegate agencies to which it has sent the copies and the date on which they were sent.

(f) If the Departmental Appeals Board informs a grantee that a proposed termination action has been set down for hearing, the grantee shall, within five days of its receipt of this notice, send a copy of it to all delegate agencies which would be financially affected by the termination and to each delegate agency identified in the notice. The grantee shall send the Departmental Appeals Board and the responsible HHS official a list of all delegate agencies notified and the dates of notification.

(g) If the responsible HHS official has initiated termination proceedings

because of the activities of a delegate agency, that delegate agency may participate in the hearing as a matter of right. Any other delegate agency, person, agency or organization that wishes to participate in the hearing may request permission to do so from the presiding officer of the hearing. Such participation shall not, without the consent of ACYF and the grantee, alter the time limitations for the delivery of papers or other procedures set forth in this section.

(h) The results of the proceeding and any measure taken thereafter by ACYF pursuant to this part shall be fully binding upon the grantee and all its delegate agencies, whether or not they actually participated in the hearing.

(i) A grantee may waive a hearing and submit written information and argument for the record. Such material shall be submitted within a reasonable period of time to be fixed by the Departmental Appeals Board upon the request of the grantee. The failure of a grantee to request a hearing, or to appear at a hearing for which a date had been set, unless excused for good cause, shall be deemed a waiver of the right to a hearing and consent to the making of a decision on the basis of written information and argument submitted by the parties to the Departmental Appeals Board.

(j) The responsible HHS official may attempt, either personally or through a representative, to resolve the issues in dispute by informal means prior to the hearing.

§ 1303.15 Appeal by a grantee from a denial of refunding.

(a) After receiving concurrence from the Commissioner, ACYF, a grantee's application for refunding may be denied by the responsible HHS official for circumstances described in paragraph (c) of this section.

(b) When an intention to deny a grantee's application for refunding is arrived at on a basis to which this subpart applies, the responsible HHS official will provide the grantee as much advance notice thereof as is reasonably possible, in no event later than 30 days after the receipt by ACYF of the application. The notice will inform the grantee that it has the opportunity for a full and fair hearing on whether refunding should be denied.

(1) Such appeals shall be governed by 45 CFR part 16, except as otherwise provided in the Head Start appeals regulations. Any grantee which requests a hearing shall be afforded one, as mandated by 42 U.S.C. 9841.

(2) Any such appeals must be filed within ten work days after the grantee receives notice of the decision to deny refunding.

(c) Refunding of a grant may be denied for any or all of the reasons for which a grant may be terminated, as set forth in § 1303.14(b) of this part.

(d) Decisions to deny refunding shall be in writing, signed by the responsible HHS official, dated, and sent in compliance with § 1303.5 of this part or by telegram, or by any other mode establishing the date sent and received by the addressee, or the date it was determined delivery could not be made, or the date delivery was refused. A Notice of Decision shall contain:

(1) A statement that indicates the grounds which justify the proposed denial of refunding;

(2) The identity of the delegate agency, if the activities of that delegate agency are the basis, in whole or in part, for the proposed denial of refunding; and

(3) A statement that, if the grantee wishes to appeal the denial of refunding of financial assistance, it must appeal directly to the Departmental Appeals Board, and send a copy of the appeal to the responsible HHS official and the Commissioner, ACYF. Such an appeal must be in writing and it must fully set forth the grounds for the appeal and be accompanied by all documentation that the grantee believes is relevant and supportive of its position. Appeals will be governed by the Departmental Appeals Board's regulations at 45 CFR part 16, except as otherwise provided in the Head Start appeals regulations.

(e) The appeal may be made only by the Board of Directors of the grantee or by an official acting on behalf of such Board.

§ 1303.16 Conduct of hearing.

(a) The presiding officer shall conduct a full and fair hearing, avoid delay, maintain order, and make a sufficient record of the facts and issues. To accomplish these ends, the presiding officer shall have all powers authorized by law, and may make all procedural and evidentiary rulings necessary for the conduct of the hearing. The hearing shall be open to the public unless the presiding officer for good cause shown otherwise determines.

(b) Communications outside the record are prohibited as provided by 45 CFR 16.17.

(c) Both ACYF and the grantee are entitled to present their case by oral or documentary evidence, to submit rebuttal evidence and to conduct such examination and cross-examination as may be required for a full and true disclosure of all facts bearing on the issues. The issues shall be those stated in the notice required to be filed by paragraph (g) of this section, those stipulated in a prehearing conference or those agreed to by the parties.

(d) In addition to ACYF, the grantee, and any delegate agencies which have a right to appear, the presiding officer may permit the participation in the proceedings of such persons or organizations as deemed necessary for a proper determination of the issues involved. Such participation may be limited to those issues or activities which the presiding officer believes will meet the needs of the proceeding, and may be limited to the filing of written material.

(e) Any person or organization that wishes to participate in a proceeding may apply for permission to do so from the presiding officer. This application, which shall be made as soon as possible after the notice of termination, denial of refunding or suspension has been received by the grantee, shall state the applicant's interest in the proceeding, the evidence or arguments the applicant intends to contribute, and the necessity for the introduction of such evidence or arguments.

(f) The presiding officer shall permit or deny such participation and shall give notice of his or her decision to the applicant, the grantee, and ACYF, and, in the case of denial, a brief statement of the reasons therefor. Even if previously denied, the presiding officer may subsequently permit such participation if, in his or her opinion, it is warranted by subsequent circumstances. If participation is granted, the presiding officer shall notify all parties of that fact and may, in appropriate cases, include in the notification a brief statement of the issues as to which participation is permitted.

(g) The Departmental Appeals Board will send the responsible HHS official, the grantee and any other party a notice which states the time, place, nature of the hearing, and the legal authority and jurisdiction under which the hearing is to be held. The notice will also identify with reasonable specificity and ACYF requirements which the grantee is alleged to have violated. The notice will be served and filed not later than ten work days prior to the hearing.

Subpart C—Appeals by Current or Prospective Delegate Agencies

§ 1303.20 Appeals to grantees by current or prospective delegate agencies of rejection of an application, failure to act on an application or termination of a grant or contract.

(a) A grantee must give prompt, fair and adequate consideration to

applications submitted by current or prospective delegate agencies to operate Head Start programs. The failure of the grantee to act within 30 days after receiving the application is deemed to be a rejection of the application.

(b) A grantee must notify an applicant in writing within 30 days after receiving the application of its decision to either accept or to wholly or substantially reject it. If the decision is to wholly or substantially reject the application, the notice shall contain a statement of the reasons for the decision and a statement that the applicant has a right to appeal the decision within ten work days after receipt of the notice. If a grantee fails to act on the application by the end of the 30 day period which grantees have to review applications, the current or prospective delegate agency may appeal to the grantee, in writing, within 15 work days of the end of the 30 day grantee review period.

(c) A grantee must notify a delegate agency in writing of its decision to terminate its agreement with the delegate agency, explaining the reasons for its decision and that the delegate agency has the right to appeal the decision to the grantee within ten work days after receipt of the notice.

(d) The grantee has 20 days to review the written appeal and issue its decision. If the grantee sustains its earlier termination of an award or its rejection of an application, the current or prospective delegate agency then may appeal, in writing, to the responsible HHS official. The appeal must be submitted to the responsible HHS official within ten work days after the receipt of the grantee's final decision. The appeal must fully set forth the grounds for the appeal.

(e) A grantee may not reject the application or terminate the operations of a delegate agency on the basis of defects or deficiencies in the application or in the operation of the program without first:

(1) Notifying the delegate agency of the defects and deficiencies;

(2) Providing, or providing for, technical assistance so that defects and deficiencies can be corrected by the delegate agency; and

(3) Giving the delegate agency the opportunity to make appropriate corrections.

(f) An appeal filed pursuant to a grantee failing to act on a current or prospective delegate agency's application within a 30 day period need only contain a copy of the application, the date filed, and any proof of the date the grantee received the application. The grantee shall have five days in which to respond to the appeal.

(g) Failure to appeal to the grantee regarding its decision to reject an application, terminate an agreement, or failure to act on an application shall bar any appeal to the responsible HHS official.

§ 1303.21 Procedures for appeal by current or prospective delegate agencies to the responsible HHS official from denials by grantees of an application or failure to act on an application.

(a) Any current or prospective delegate agency that is dissatisfied with the decision of a grantee rendered under § 1303.20 may appeal to the responsible HHS official whose decision is final and not appealable to the Commissioner, ACYF. Such an appeal must be in writing and it must fully set forth the grounds for the appeal and be accompanied by all documentation that the current or prospective delegate agency believes is relevant and supportive of this position, including all written material or documentation submitted to the grantee under the procedures set forth in § 1303.20, as well as a copy of any decision rendered by the grantee. A copy of the appeal and all material filed with the responsible HHS official must be simultaneously served on the grantee.

(b) In providing the information required by paragraph (a) of this section, delegate agencies must set forth:

(1) Whether, when and how the grantee advised the delegate agency of alleged defects and deficiencies in the delegate agency's application or in the operation of its program prior to the grantee's rejection or termination notice;

(2) Whether the grantee provided the delegate agency reasonable opportunity to correct the defects and deficiencies, the details of the opportunity that was given and whether or not the grantee provided or provided for technical advice, consultation, or assistance to the current delegate agency concerning the correction of the defects and deficiencies;

(3) What steps or measures, if any, were undertaken by the delegate agency to correct any defects or deficiencies;

(4) When and how the grantee notified the delegate agency of its decision;

(5) Whether the grantee told the delegate agency the reasons for its decision and, if so, how such reasons were communicated to the delegate agency and what they were;

(6) If it is the delegate agency's position that the grantee acted arbitrarily or capriciously, the reasons why the delegate agency takes this position; and

(7) Any other facts and circumstances which the delegate agency believes supports its appeal.

(c) The grantee may submit a written response to the appeal of a prospective delegate agency. It may also submit additional information which it believes is relevant and supportive of its position.

(d) In the case of an appeal by a delegate agency, the grantee must submit a written statement to the responsible HHS official responding to the items specified in paragraph (b) of this section. The grantee must include information that explains why it acted properly in arriving at its decision or in failing to act, and any other facts and circumstances which the grantee believes supports its position.

(e)(1) The responsible HHS official may meet informally with the current or prospective delegate agency if such official determines that such a meeting would be beneficial to the proper resolution of the appeal. Such meetings may be conducted by conference call.

(2) An informal meeting must be requested by the current or prospective delegate agency at the time of the appeal. In addition, the grantee may request an informal meeting with the responsible HHS official. If none of the parties requests an informal meeting, the responsible HHS official may hold such a meeting if he or she believes it would be beneficial for a proper resolution of the dispute. Both the grantee and the current or prospective delegate agency may attend any informal meeting concerning the appeal. If a party wishes to oppose a request for a meeting it must serve its opposition on the responsible HHS official and any other party within five work days of its receipt of the request.

(f) A grantee's response to appeals by current or prospective delegate agencies must be submitted to the responsible HHS official within ten work days of receipt of the materials served on it by the current or prospective delegate agency in accordance with paragraph (a) of this section. The grantee must serve a copy of its response on the current or prospective delegate agency.

(g) The responsible HHS official shall notify the current or prospective delegate agency and the grantee whether or not an informal meeting will be held. If an informal meeting is held, it must be held within ten work days after the notice by the responsible HHS official is mailed. The responsible HHS official must designate either the Regional Office or the place where the current or prospective delegate agency or grantee is located for holding the informal meeting.

(h) If an informal meeting is not held, each party shall have an opportunity to reply in writing to the written statement submitted by the other party. The written reply must be submitted to the responsible HHS official within five work days after the notification required by paragraph (g) of this section. If a meeting is not to be held, notice of that fact shall be served on the parties within five work days of the receipt of a timely response to such a request or the expiration of the time for submitting a response to such a request.

(i) In deciding an appeal under this section, the responsible HHS official will arrive at his or her decision by considering:

(1) The material submitted in writing and the information presented at any informal meeting;

(2) The application of the current or prospective delegate agency;

(3) His or her knowledge of the grantee's program as well as any evaluations of his or her staff about the grantee's program and current or prospective delegate agency's application and prior performance; and

(4) Any other evidence deemed relevant by the responsible HHS official.

§ 1303.22 Decision on appeal in favor of grantee.

(a) If the responsible HHS official finds in favor of the grantee, the appeal will be dismissed unless there is cause to remand the matter back to the grantee.

(b) The grantee's decision will be sustained unless it is determined by the responsible HHS official that the grantee acted arbitrarily, capriciously, or otherwise contrary to law, regulation, or other applicable requirements.

(c) The decision will be made within ten workdays after the informal meeting. The decision, including a statement of the reasons therefor, will be in writing, and will be served on the parties within five workdays from the date of the decision by the responsible HHS official.

(d) If the decision is made on the basis of written materials only, the decision will be made within five workdays of the receipt of the materials. The decision will be served on the parties no more than five days after it is made.

§ 1303.23 Decision on appeal in favor of the current or prospective delegate agency.

(a) The responsible HHS official will remand the rejection of an application or termination of an agreement to the grantee for prompt reconsideration and decision if the responsible HHS official's decision does not sustain the grantee's decision, and if there are issues which require further development before a final decision can be made. The grantee's reconsideration and decision must be made in accordance with all applicable requirements of this part as well as other relevant regulations, statutory provisions, and program issuances. The grantee must issue its decision on remand in writing to both the current or prospective delegate agency and the responsible HHS official within 15 workdays after the date of receipt of the remand.

(b) If the current or prospective delegate agency is dissatisfied with the grantee's decision on remand, it may appeal to the responsible HHS official within five workdays of its receipt of that decision. Any such appeal must comply with the requirements of § 1303.21 of this part.

(c) If the responsible HHS official finds that the grantee's decision on remand is incorrect or if the grantee fails to issue its decision within 15 work days, the responsible HHS official will entertain an application by the current or prospective delegate agency for a direct grant.

(1) If such an application is approved, there will be a commensurate reduction in the level of funding of the grantee and whatever other action is deemed appropriate in the circumstances. Such reduction in funding shall not be considered a termination or denial of refunding and may not be appealed under this part.

(2) If such an application is not approved, the responsible HHS official will take whatever action he or she deems appropriate under the circumstances.

(d) If, without fault on the part of a delegate agency, its operating funds are exhausted before its appeal has been decided, the grantee will furnish sufficient funds for the maintenance of the delegate agency's current level of operations until a final administrative decision has been reached.

(e) If the responsible HHS official sustains the decision of the grantee following remand, he or she shall notify the parties of the fact within 15 work days of the receipt of final submittal of documents, or of the conclusion of any meeting between the official and the parties, whichever is later.

Part V

Department of Defense

General Services Administration

National Aeronautics and Space Administration

48 CFR Part 48
Federal Acquisition Regulation (FAR): Value Engineering Costs Allowability; Proposed Rules

DEPARTMENT OF DEFENSE

GENERAL SERVICES ADMINISTRATION

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

48 CFR Part 48

RIN 9000–AD71

[FAR Case 89–88]

Federal Acquisition Regulation; Allowability of Value Engineering Costs

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Proposed rule.

SUMMARY: The Civilian Agency Acquisition Council and the Defense Acquisition Regulations Council have agreed to republish the proposal to revise paragraph (b)(1) of FAR 48.101, General, to provide that under the incentive approach, the contractor develops and submits value engineering change proposals (VECP's) and shares in the savings of any that are accepted. The contract provides for payment of implementation costs if a VECP is accepted. The development costs for accepted and unaccepted VECP's shall be accumulated by VE project and charged indirectly if otherwise allowable in accordance with part 31.

DATES: Comments should be submitted to the FAR Secretariat at the address shown below on or before February 12, 1993, to be considered in the formulation of a final rule.

ADDRESSES: Interested parties should submit written comments to: General Services Administration, FAR Secretariat (VRS), ATTN: Deloris Baker, 18th & F Streets, NW., room 4041, Washington, DC 20405. Please cite FAR case 89–88 in all correspondence related to this case.

FOR FURTHER INFORMATION CONTACT: Ms. Linda Klein at (202) 501–3775 in reference to this FAR case. For general information, contact the FAR Secretariat, room 4041, GS Building, Washington, DC 20405, (202) 501–4755. Please cite FAR case 89–88.

SUPPLEMENTARY INFORMATION:

A. Background

This DARC-initiated revision was published as a proposed rule with a request for comments at 55 FR part 417, January 4, 1990. Thirty-three responses were received consisting of concurrences and no comments and 15 comments. Because of the complexity of the issues and questions that surfaced during the evaluation of the comments, revisions to the coverage were considered necessary. Since these changes may affect the public, it is considered necessary to republish the coverage as a proposed rule.

B. Regulatory Flexibility Act

The proposed rule is not expected to have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*, because it is understood that most contractors already accumulate costs by value engineering project because they need this cost information to compute the projected savings and sharing arrangement on the VECP's submitted for approval. An Initial Regulatory Flexibility Analysis has, therefore, not been performed. Comments from small entities concerning the affected FAR subpart will also be considered in accordance with section 610 of the Act. Such comments must be submitted separately and cite 5 U.S.C. 601, *et seq.* (FAR case 89–88), in correspondence.

C. Paperwork Reduction Act

The Paperwork Reduction Act does not apply because the proposed changes to the FAR do not impose recordkeeping information collection requirements, or collections of information from offerors, contractors, or members of the public which require the approval of the Office of Management and Budget under 44 U.S.C. 3501, *et seq.*

List of Subjects in 48 CFR Part 48

Government procurement.

Dated: December 4, 1992.

Harry S. Rosinski,

Acting Director, Office of Federal Acquisition Policy.

Therefore, it is proposed that 48 CFR part 48 be amended as set forth below:

PART 48—VALUE ENGINEERING

1. The authority citation for 48 CFR part 48 continues to read as follows:

Authority: 40 U.S.C. 486(c); 10 U.S.C. chapter 137; and 42 U.S.C. 2473(c).

2. Section 48.101 is amended by revising paragraph (b) introductory text and (b)(1) to read as follows:

48.101 General.

* * * * *

(b) There are two value engineering approaches, as follows:

(1) The first is an incentive approach in which contractor participation is voluntary. The contractor develops and submits value engineering change proposals (VECP's) and shares in the savings of any that are accepted. The contract provides for payment of implementation costs if a VECP is accepted. The development costs for accepted and unaccepted VECP's shall be accumulated by value engineering (VE) project and charged indirectly if otherwise allowable in accordance with part 31.

CFR CHECKLIST

This checklist, prepared by the Office of the Federal Register, is published weekly. It is arranged in the order of CFR titles, stock numbers, prices, and revision dates.

An asterisk (*) precedes each entry that has been issued since last week and which is now available for sale at the Government Printing Office.

A checklist of current CFR volumes comprising a complete CFR set, also appears in the latest issue of the LSA (List of CFR Sections Affected), which is revised monthly.

The annual rate for subscription to all revised volumes is $620.00 domestic, $155.00 additional for foreign mailing.

Mail orders to the Superintendent of Documents, Attn: New Orders, P.O. Box 371954, Pittsburgh, PA 15250-7954. All orders must be accompanied by remittance (check, money order, GPO Deposit Account, VISA, or Master Card). Charge orders may be telephoned to the GPO Order Desk, Monday through Friday, at **(202) 783-3238** from 8:00 a.m. to 4:00 p.m. eastern time, or FAX your charge orders to **(202) 512-2233**.

[1] Because Title 3 is an annual compilation, this volume and all previous volumes should be retained as a permanent reference source.

[2] The July 1, 1985 edition of 32 CFR Parts 1–189 contains a note only for Parts 1–39 inclusive. For the full text of the Defense Acquisition Regulations in Parts 1–39, consult the three CFR volumes issued as of July 1, 1984, containing these parts.

[3] The July 1, 1985 edition of 41 CFR Chapters 1–100 contains a note only for Chapters 1 to 49 inclusive. For the full text of procurement regulations in Chapters 1 to 49, consult the eleven CFR volumes issued as of July 1, 1984 containing those chapters.

[4] No amendments to this volume were promulgated during the period Jan. 1, 1987 to Dec. 31, 1991. The CFR volume issued January 1, 1987, should be retained.

[5] No amendments to this volume were promulgated during the period Apr. 1, 1990 to Mar 31, 1991. The CFR volume issued April 1, 1990, should be retained.

[6] No amendments to this volume were promulgated during the period Apr. 1, 1991 to Mar 30, 1992. The CFR volume issued April 1, 1991, should be retained.

[7] No amendments to this volume were promulgated during the period July 1, 1989 to June 30, 1992. The CFR volume issued July 1, 1989, should be retained.

[8] No amendments to this volume were promulgated during the period July 1, 1991 to June 30, 1992. The CFR volume issued July 1, 1991, should be retained.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The seal of the National Archives and Records Administration authenticates this issue of the **Federal Register** as the official serial publication established under the Federal Register Act. 44 U.S.C. 1507 provides that the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper, 24x microfiche format and magnetic tape. The annual subscription price for the **Federal Register** paper edition is $375, or $415 for a combined **Federal Register**, Federal Register Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the Federal Register Index and LSA is $353; and magnetic tape is $37,500. Six month subscriptions are available for one-half the annual rate. The charge for individual copies in paper form is $4.50 for each issue, or $4.50 for each group of pages as actually bound; or $1.50 for each issue in microfiche form; or $175.00 per magnetic tape. All prices include regular domestic postage and handling. International customers please add 25% for foreign handling. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA or MasterCard. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250–7954.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 57 FR 12345.

Rules and Regulations

Federal Register
Vol. 57, No. 241
Tuesday, December 15, 1992

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

OFFICE OF PERSONNEL MANAGEMENT

5 CFR Part 530

RIN 3206–AE22

Pay Rates and Systems (General); Special Salary Rate Schedules for Recruitment and Retention

AGENCY: Office of Personnel Management.

ACTION: Final rule.

SUMMARY: The Office of Personnel Management (OPM) is issuing final regulations to implement provisions of the Federal Employees Pay Comparability Act of 1990 (FEPCA) related to the Government's special pay authority. Section 5305 of title 5, United States Code, as amended by FEPCA, substantially increases the Government's flexibility to authorize special salary rates, as compared with the statutory authority formerly contained in 5 U.S.C. 5303. These flexibilities became effective on February 3, 1991, under Executive Order 12748 of February 1, 1991. The final regulations allow OPM to approve special salary rates when the Government is experiencing, or is likely to experience, recruitment or retention problems caused by higher non-Federal sector pay, as well as by a number of other circumstances; and allow those rates to be established at higher pay levels than previously permitted.

OPM is also issuing final rules to implement the decision of the U.S. District Court for the District of Columbia (*National Treasury Employees Union* v. *Newman*, Number 83–0279 (D.D.C. June 28, 1991)), in which the court ordered OPM to promulgate a conversion rule for adjusting the pay schedules of employees paid special salary rates as required by 5 U.S.C. 5305(f) and consistent with the guidelines set forth in the decision.

EFFECTIVE DATE: January 14, 1992.

FOR FURTHER INFORMATION CONTACT: William M. Gualtieri, (202) 606–1413.

SUPPLEMENTARY INFORMATION: OPM published interim regulations at 56 FR 20334 on May 3, 1991, to implement provisions of FEPCA related to the Government's special salary rates program. The Federal Employees Pay Comparability Act of 1990 (Pub. L. 101–509, November 5, 1990) gives the Government authority to establish special salary rates under a wider variety of circumstances than was previously allowed. The following are the significantly expanded flexibilities permitted under FEPCA:

- Special salary rates may be established based on actual or anticipated staffing problems for any civilian position under any pay system established by or under Federal statute within the executive branch.
- Special salary rates may be established when the staffing problem is caused by higher non-Federal pay rates, remote location or area, undesirable working conditions, or any other circumstances. The final regulations also allow for consideration of higher Federal pay rates established under independent statutory authority.
- The highest rate at which the minimum rate of a special rate schedule may be set has been increased to 30 percent above the maximum rate of a grade. Previously, the limit was the maximum rate of a grade.
- The GS–10, step 1, limitation on the computation of overtime pay now includes all special rates of pay established for that grade. The final regulations set forth the criteria OPM will use for establishing a GS–10 special salary rate for overtime pay computation and certain other non-staffing purposes when one would otherwise not have been established to alleviate staffing problems.

The requirement to change the existing special salary rate regulations to conform with FEPCA has given OPM an opportunity to update other provisions of the prior regulations.

The first provision appears in the final regulations exactly as it appeared in the interim regulations. It changes agency certification levels for approving special salary rate requests. Individuals designated to act on behalf of the agency head may now approve special salary rate requests covering fewer than 1,000 positions or costing less than $4 million. This change means that involvement of an agency head will be required only in the highest impact special rate requests. This should reduce the time needed to process such requests.

The second provision was published by OPM on June 15, 1992 (57 FR 26619), as a set of proposed rules with a request for comments. The proposed rules were designed to implement a court decision (cited in the "Summary") for adjusting the pay schedules of employees paid special salary rates when the underlying statutory pay schedules are adjusted. The proposed rules replaced interim regulations 5 CFR 530.307(a) because it contained an automatic adjustment mechanism that the court concluded would not be proper. In addition, OPM proposed to amend interim regulation 5 CFR 530.304, providing for an annual review of special salary rate schedules, in order to have it conform with the court's criteria.

Comments on the Interim Regulations

We received four comments on the interim regulations, three from Federal agencies and one from a union. The union's comment and the comment of one of the agencies concern the provision described above dealing with the conversion rule for adjusting the pay schedules of employees paid special salary rates. The agency was concerned with the mechanics of the rule, while the union expressed concern that the interim rule does not "prescribe methods for adjusting special salary schedules to guarantee that special rate employees keep pace with regular rate employees, but that they do not receive duplicative increases." Both of these comments deal with the automatic schedule alignment rule, which has since been rescinded.

One agency commented that OPM should in certain limited situations delegate to agency heads the authority to approve special salary rates. While we have considered this issue, we believe it would not be in the best interest of the Government to delegate special salary rates authority to agencies. We believe OPM plays an important role in assuring that covered Federal agencies are paying uniform rates to Federal employees performing identical work in specified grades and locations.

Another agency provided comments on three issues. The first two suggested

that (1) OPM should provide examples of the documentation we would expect to see before approving special rates based on likely staffing problems, and (2) OPM should clarify how it will consider many of FEPCA's new pay flexibilities, such as above-minimum entry rates, recruitment and relocation bonuses, and retention allowances, before approving special rates. We agree that OPM should provide additional information regarding these issues, but we believe this information can be most effectively communicated by interagency memoranda rather than by regulation. For example, we issued an Interagency Advisory Group memorandum on October 24, 1991, that dealt specifically with the relationship between special salary rates and the FEPCA flexibilities. We expect there will be other formal and informal communications between OPM and agencies in the future as OPM and agencies again experience operating in the new environment.

The last issue this agency was concerned with had to do with the criteria OPM would use to establish GS–10 special rates for overtime and certain other non-staffing purposes. The agency envisioned only two situations in which the criteria could be applied—where special rates are authorized only for grades below GS–10 and where they are authorized for grades GS–9 and GS–11, but not GS–10. In these situations the agency did not see the need for the criterion we established dealing with the need to avoid pay alignment problems that would result from applying the two-step promotion rule in 5 U.S.C. 5334(b). However, we believe the provision in question is needed for us to be prepared to deal with any situation requiring establishing a GS–10 special rate for non-staffing purposes. If either of the two provisions does not apply in one instance, it may be completely appropriate in other unforeseen instances. Further, the interim regulations recognized that there may be instances in which one of the provisions might not apply by stating that OPM will consider the provisions "as appropriate in each situation."

Comments on the Proposed Regulations

We received one telephone comment on the proposed regulations from a Federal agency (later followed by a written comment that was received after the end of the comment period), one comment from another Federal agency, and two comments from individuals. One Federal agency and both individuals were concerned about applying 5 CFR 530.307 in cases in which a special salary rate schedule that is well above the underlying statutory schedule is terminated. In such cases, the proposed regulation makes it appear that an employee's pay could be reduced, except that the pay retention regulations in part 536 would bar such actions. It is not our intention to reduce employees' pay in such situations, and we have revised 5 CFR 530.307 to make this clear.

One of the agencies suggested language to simplify 5 CFR 530.304. While we agree that the suggested language does simplify the regulation, we feel that it does so at the expense of being less precise. Therefore, we have not adopted the suggested changes. Both agencies asked us to clarify the meaning of "numerical rank" as used in 5 CFR 530.307. Within the General Schedule pay system, "numerical rank" means "step." "Step" is not used in place of "numerical rank" in the regulation because we concluded it would be more appropriate to use a more generic term, since it is possible for OPM to establish special salary rates for (1) any statutory pay system, or (2) any other pay system established by or under Federal statute for civilian positions within the executive branch.

One of the individuals who commented identified himself as an employee who is also a member of the class in the lawsuit *NTEU* v. *Newman*. The employee contends that it was premature for OPM to issue the proposed regulations prior to the final decision of the court. We disagree, since the U.S. district court's June 28, 1991, decision requires OPM to issue such regulations. In other comments, the employee and another individual indicated their support for NTEU's position in the lawsuit and contended that OPM's proposed regulations run counter to the appeals and district courts' interpretation of the statute. NTEU has argued that the review of special salary rates that OPM conducts annually does not conform with legal requirements (now contained in 5 U.S.C. 5305(f)) that require that there be rules for converting special rates to the rates on new statutory pay schedules. We believe the rules we have proposed do indeed conform with the statutory requirements as interpreted by the appeals and district courts, and this conclusion has been affirmed by a recent decision of the district court (*NTEU* v. *Newman*, C.A. No. 83–0279 (D.D.C. Sept. 14, 1992)).

Finally, a conforming editorial change has been made in §§ 530.303(a) and 530.305 to clarify that special salary rates are established and adjusted to overcome existing or likely significant handicaps in the "recruitment or retention" of well-qualified personnel.

E.O. 12291, Federal Regulation

I have determined that this is not a major rule as defined under section 1(b) of E.O. 12291, Federal Regulation.

Regulatory Flexibility Act

I certify that these regulations will not have a significant economic impact on a substantial number of small entities because they apply only to Federal agencies and employees.

List of Subjects in 5 CFR Part 530

Government employees, Reporting and recordkeeping requirements, Wages.

U.S. Office of Personnel Management.

Douglas A. Brook,

Acting Director.

Accordingly, the interim rule amending 5 CFR part 530, published at 56 FR 20334 on May 3, 1991, is adopted as final with the following changes.

PART 530—PAY RATES AND SYSTEMS (GENERAL)

1. The authority citation for 5 CFR part 530 continues to read as follows:

Authority: 5 U.S.C. 5305; E.O. 12748, 56 FR 4521.

§ 530.303 [Amended]

2. In § 530.303(a), remove the words "recruitment and retention" and insert the words "recruitment or retention" in their place.

3. Section 530.304 is revised to read as follows:

§ 530.304 Annual review.

(a) Prior to an adjustment in the scheduled rates of pay for one or more grades or levels for which special rates have been authorized under 5 U.S.C. 5305, but at least annually, OPM shall review special salary rate schedules to determine whether the factors in § 530.303 of this part and paragraph (b) of this section require those schedules to continue, and, if they are to continue, the extent to which they are to be adjusted, if at all.

(b) In addition to the factors in § 530.303 of this part, OPM shall consider, for the purpose of making the determination required by paragraph (a) of this section—

(1) The former non-special pay rates of the special rate employees to ensure that any adjustment in the special rates of pay would not cause those rates to fall below the non-special rates of pay to which the special rate employees would otherwise have been entitled;

(2) The likelihood that the factors leading to a statutory adjustment in pay will affect special rate employees as well; and

(3) Other special rate pay adjustments that occurred prior to the date of the anticipated statutory pay adjustment.

(c) Any adjustment in the special rates of pay shall be based on the factors in paragraphs (a) and (b) of this section and shall not be made solely for mechanical reasons or for the purposes of providing automatic adjustments. Any adjustment must be based on the pay OPM determines is necessary in a given occupation and area to recruit or retain the special rate employees.

(d) In conducting the annual review, OPM shall designate lead agencies for assistance in coordinating the collection of relevant data. All agencies are responsible for submitting complete supporting data upon request to OPM or the lead agency, as appropriate.

(e) When special rates are adjusted as a result of this review, an employee's pay shall be fixed in the same manner as provided in § 530.307 of this part.

§ 530.305 [Amended]

4. Remove the words "recruitment and retention" and insert the words "recruitment or retention" in their place.

5. Section 530.307 is revised to read as follows:

§ 530.307 Effect of an adjustment in scheduled rates of pay.

(a) Except as provided in paragraphs (b) and (c) of this section, when an employee was receiving a special rate immediately before the effective date of an adjustment in scheduled rates of pay, the employee shall receive on that effective date the rate of basic pay for the numerical rank in the new special rate range established under § 530.304 of this part for the employee's grade or level that corresponds to the numerical rank of the special rate the employee was receiving immediately before that effective date. However, in the case of an employee who becomes eligible for pay retention because a special rate schedule has been reduced under § 530.304 of this part, the employee shall receive a rate of basic pay determined under § 536.205(b) of this chapter.

(b) If a special rate range is terminated under § 530.304 of this part, an employee who was receiving a special rate immediately before the effective date of an adjustment in scheduled rates of pay shall receive on that effective date the numerical rank in the new statutory pay schedule for the employee's grade or level that corresponds to the numerical rank of the special rate the employee was receiving immediately before that effective date. However, in the case of an employee who becomes eligible for pay retention because the employee's pay would otherwise be reduced under § 530.304 of this part, the employee shall receive a rate of basic pay determined under § 536.205(b) of this chapter.

(c) In the case of an employee in a position under the Performance Management and Recognition System who was receiving a special pay rate immediately before the effective date of an adjustment in scheduled rates of pay, the employee shall receive on that effective date a rate of basic pay determined under § 540.106 of this chapter. However, in the case of an employee who becomes eligible for pay retention because the employee's pay would otherwise be reduced under § 530.304 of this part, the employee shall receive a rate of basic pay determined under § 536.205(b) of this chapter.

RIN 3206-AE32

Pay Administration Under the Fair Labor Standards Act; Overtime Pay Provisions

AGENCY: Office of Personnel Management.

ACTION: Final rule.

SUMMARY: The Office of Personnel Management (OPM) is issuing final regulations to implement section 210 of the Federal Employees Pay Comparability Act of 1990 (FEPCA). The amendments made by section 210 eliminate the requirement to perform dual overtime pay computations for employees covered by the overtime pay provisions of the Fair Labor Standards Act of 1938 (FLSA) and title 5, United States Code. Section 210 of FEPCA provides that, for the purpose of calculating overtime pay under the FLSA, hours in a paid nonwork status shall be deemed to be hours of work. Thus, overtime pay for nonexempt employees is computed and paid only under the FLSA.

EFFECTIVE DATE: The first day of the first pay period beginning on or after January 14, 1993.

FOR FURTHER INFORMATION CONTACT: James R. Weddel, (202) 606-2858.

SUPPLEMENTARY INFORMATION: Section 210 of the Federal Employees Pay Comparability Act of 1990 (FEPCA) eliminates the need to calculate and compare an FLSA nonexempt employee's overtime pay entitlement under two laws in order to pay the greater overtime benefit. Instead, employees who are nonexempt under the Fair Labor Standards Act of 1938, as amended, always receive overtime pay under the FLSA, as provided in part 551 of title 5, Code of Federal Regulations.

Interim regulations to implement section 210 of FEPCA were published in the **Federal Register** on May 3, 1991 (56 FR 20339). The amendments made by section 210 and the interim regulations were effective on May 4, 1991. Comments were received from five Federal agencies and two labor organizations. These comments, as well as certain changes and clarifications of the regulations, are summarized below.

The interim regulations are adopted as final with the changes shown below, except for 5 CFR 550.103(j), 550.111(d)(2), and 550.113(a), which were revised and adopted as final when final regulations on special pay adjustments for law enforcement officers became effective, on the first day of the first pay period beginning on or after January 1, 1992 (57 FR 2431).

Federal employees who are exempt from the FLSA, but covered by the overtime pay provisions of title 5, United States Code, continue to have their overtime pay benefit calculated and paid under the title 5 provisions, as provided in part 532 (for prevailing rate employees) or part 550 (for General Schedule employees) of title 5, Code of Federal Regulations, as applicable.

Employee Coverage Under Part 550

Three agencies commented that the interim regulations improperly applied the changes in section 210 of FEPCA to some employees who are not covered by sections 5542 through 5544 of title 5, United States Code. The commenters stated that the regulatory changes implementing section 210 should not apply to members of the United States Secret Service Uniformed Division or the United States Park Police or to employees paid from nonappropriated funds in instrumentalities under the jurisidiction of the armed forces. (See 5 U.S.C. 2105(c) and 5541(2)(iv).)

OPM agrees with these observations. Section 210 of FEPCA applies only to employees who are covered by sections 5542 through 5544 of title 5, United States Code. Therefore, we have amended the regulations to clarify that the changes required by section 210 do not apply to employees who are not covered by sections 5542 through 5544 of title 5. (See revised § 551.401(b) and new § 551.501(a)(4).)

Overtime Pay Under Other Statutes

One agency commented that while comparison of overtime pay entitlements under title 5 and the FLSA is no longer required, it continues to be necessary to make a comparison for those Federal employees who are covered by the overtime pay provisions of both the FLSA and another non-title 5 statute. Those employees will continue to be paid under the authority that provides the greater overtime pay benefit. Therefore, OPM has revised 5 CFR 551.513 to clarify this point.

Employees Covered by 7(k) Overtime Standards

One agency commented that an unintended consequence of the interim regulations was to reduce overtime pay for fire inspectors who are covered by the 53-hour overtime standard established under section 7(k) of the FLSA for employees engaged in fire protection activities. The agency noted that prior to implementation of FEPCA, fire inspectors on a 40-hour per week tour of duty earned overtime pay under title 5, United States Code, for hours of work in excess of 40 hours per week, provided they were not being paid annual premium pay. However, the interim regulations do not permit payment of overtime pay under title 5 for nonexempt employees and preclude payment of overtime pay under the FLSA on the basis of hours or work in excess of 40 hours in a workweek for an employee engaged in fire protection or law enforcement activities.

Section 7(k) of the FLSA establishes special overtime standards for employees engaged in fire protection and law enforcement activities. Nevertheless, it is within the administrative authority of OPM to determine that section 7(k) need not be applied to a specific category of employees is (1) the application of the special provision would result in inequitable pay treatment for some employees in comparison with other employees performing similar duties, and (2) the administrative costs involved in complying with the special provision would exceed the difference in the overtime costs involved. Since the groups of employees affected by this circumstance were covered by the 40-hour per week overtime standard that applied under title 5 prior to the effective date of section 210 of FEPCA, we believe both of the above criteria are satisfied in comparison to the situation that existed at that time. Therefore, to avoid a reduction in overtime pay entitlements as a result of the implementation of FEPCA, OPM has revised the regulations to provide that employees engaged in fire protection and law enforcement activities must receive overtime pay for work in excess of 40 hours in a workweek, provided they do not receive annual premium pay under section 5545(c)(1) or (2) of title 5, United States Code. (See §§ 551.501(a)(5) and 551.541(a).)

However, if employees engaged in fire protection or law enforcement activities had received overtime pay under title 5 prior to FEPCA, their meal periods would not have been included as hours of work. Therefore, OPM has also revised the regulations to clarify that if employees engaged in fire protection or law enforcement activities are not receiving annual premium pay and are being paid overtime pay for hours of work in excess of 40 hours in a workweek, meal periods may not be included in determining their hours of work. In addition, the regulations have been amended to indicate that Federal agencies may deduct up to 8 hours out of each 24-hour shift for sleep and meal periods under the two-thirds rule for firefighters who are performing standby duty but are not receiving annual premium pay for that duty. (See §§ 551.411(c), 551.432(b), and 551.541(b).)

One labor organization commented that the interim regulations did not include the 7(k) FLSA hours of work overtime standards and that a literal reading of the regulations could lead to the conclusion that employees engaged in fire protection and law enforcement activities may not receive overtime pay at all. Since the overtime standards may be revised from time to time, we have not included them in the final regulations. However, it is not OPM's intent to deny overtime pay to these employees under the FLSA. The overtime standards for 7(k) employees are referenced in § 551.541(a) and included in Federal Personnel Manual guidance.

"Suffered and Permitted" Work

One labor organization commented that under the FLSA and 5 U.S.C. 5542(c), overtime work includes work which is "suffered and permitted" and that the interim regulations did not permit overtime compensation for work in excess of 8 hours in a day that is suffered and permitted. However, 5 U.S.C. 5542(c) does not provide that overtime work includes work which is "suffered and permitted." The commenter noted that under the interim regulations employees may not receive overtime compensation on the basis of hours of work in excess of 8 hours in a day that are not overtime hours of work under title 5, Code of Federal Regulations.

While title 5, United States Code, has been amended by FEPCA to require overtime compensation for hours of work in excess of 8 hours in a day for nonexempt employees, the FLSA concept of "suffered and permitted" hours of work has not been applied by FEPCA to hours of work under title 5. The 8-hour daily standard is included under title 5, not under the FLSA, and therefore hours of work that are "suffered and permitted," but not ordered and approved, cannot be applied towards the 8-hour daily overtime standard. In all cases, however, those hours of work which are "suffered and permitted" will be creditable against the applicable weekly overtime standard under the FLSA for nonexempt employees. Therefore, OPM has not amended the regulations. (See also FPM Letter 551–24, January 14, 1992.)

Miscellaneous

An employee commented that § 550.112(i) of the interim regulations properly belongs in part 532 because it deals with hours of work for prevailing rate (wage) employees. OPM has removed this provision from part 550 and added it to part 532. (See § 532.503(f).)

OPM has also amended the definition of "rate of basic pay" in the severance pay regulations to include special pay adjustments for law enforcement officers. This conforming amendment was inadvertently omitted when final regulations on special pay adjustments for law enforcement officers were published in the **Federal Register** on January 22, 1992. (See § 550.703 and 57 FR 2431.)

Implementation of the Interim Regulations

One agency commented that it had difficulty issuing implementing instructions by the effective date of the interim regulations—May 4, 1991. However, by statute this date was the last possible effective date for section 210.

FPM Guidance

One agency commented that "information on these subjects is presented in very difficult phraseology" and recommended that "the text include practical examples which would crystalize the concepts for application to field activity problems." OPM has issued detailed FPM guidance explaining these regulations and providing specific examples. (See FPM Letter 551–24, January 14 1992.)

E.O. 12291, Federal Regulation

I have determined that this is not a major rule as defined under section 1(b) of E.O. 12291, Federal Regulation.

Regulatory Flexibility Act

I certify that these regulations will not have a significant economic impact on a substantial number of small entities because they apply only to Federal agencies and employees.

List of Subjects

5 CFR Part 532

Administrative practice and procedure, Freedom of information, Government employees, Reporting and recordkeeping requirements, Wages.

5 CFR Part 550

Administrative practice and procedure, Claims, Government employees, Wages.

5 CFR Part 551

Government employees, Wages.

U.S. Office of Personnel Management.

Douglas A. Brook,

Acting Director.

Accordingly, the interim rule amending 5 CFR parts 532, 550, and 551, which was published at 56 FR 20339 on May 3, 1991, is adopted as final with the following changes:

PART 532—PREVAILING RATE SYSTEMS

1. The authority citation for part 532 continues to read as follows:

Authority: 5 U.S.C. 5343, 5346; § 532.707 also issued under 5 U.S.C. 552, Freedom of Information Act, Public Law 92–502.

2. In § 532.503, paragraph (f) is added to read as follows:

§ 532.503 Overtime pay.

* * * * *

(f) For an employee covered by 5 U.S.C. 5544, hours in a standby or on-call status or while sleeping or eating shall not be credited for the purpose of determining hours of work in excess of 8 hours in a day.

PART 550—PAY ADMINISTRATION (GENERAL)

3. The authority citation for subpart A of part 550 is revised to read as follows:

Authority: 5 U.S.C. 5304 note, 5305 note, 5541(2)(iv), 5548 and 6101(c); E.O. 12748, 3 CFR 1991 Comp., p. 316.

§ 550.112 [Amended]

4. In § 550.112, paragraph (i) is removed, and paragraph (j) is redesignated as paragraph (i).

5. The authority citation for subpart G of part 550 is revised to read as follows:

Authority: 5 U.S.C. 5595; E.O. 11257, 3 CFR 1964–1965 Comp., p. 357.

6. In § 550.703, the definition of "rate of basic pay" is revised to read as follows:

§ 550.703 Definitions.

* * * * *

Rate of basic pay means the rate of pay fixed by law or administrative action for the position held by an employee, including, as applicable, annual premium pay for standby duty under 5 U.S.C. 5545(c)(1), night differential for prevailing rate employees under 5 U.S.C. 5343(f), and any interim geographic adjustment or special pay adjustment for law enforcement officers under section 302 or 404 of the Federal Employees Pay Comparability Act of 1990 (Pub. L. 101–509), respectively, or locality-based comparability payment under 5 U.S.C. 5304, but not including additional pay of any kind.

* * * * *

PART 551—PAY ADMINISTRATION UNDER THE FAIR LABOR STANDARDS ACT

7. The authority citation for part 551 is revised to read as follows:

Authority: 5 U.S.C. 5542(c); Sec. 4(f) of the Fair Labor Standards Act of 1938, as amended by Public Law 93–259, 88 Stat. 55 (29 U.S.C. 204f).

8. In § 551.401, paragraph (b) is revised to read as follows:

§ 551.401 Basic principles.

* * * * *

(b) For an employee, as defined in 5 U.S.C. 5541(2), hours in a paid nonwork status (e.g., paid leave, holidays, compensatory time off, or excused absences) are "hours of work" under this part.

* * * * *

9. In § 551.411, paragraph (c) is revised to read as follows:

§ 551.411 Workday.

* * * * *

(c) *Bona fide* meal periods shall not be considered hours of work, except for employees engaged in fire protection or law enforcement activities who receive compensation for overtime hours of work under 5 U.S.C. 5545(c) (1) or (2). However, for employees engaged in fire protection or law enforcement activities who have periods of duty of more than 24 hours, meal periods may be excluded from hours of work by agreement between the employer and the employee.

10. In § 551.432, paragraph (b) is revised to read as follows:

§ 551.432 Sleep time.

* * * * *

(b) For employees engaged in law enforcement activities, as well as employees engaged in fire protection activities who receive annual premium pay under 5 U.S.C. 5545(c)(1), the exclusion of sleep time is appropriate for tours of duty of more than 24 hours only. For employees engaged in fire protection activities who perform standby duty and do not receive annual premium pay, Federal agencies may deduct up to 8 hours out of each 24-hour shift for sleep and meal periods. However, paragraphs (a)(2) and (a)(3) of this section still apply to employees engaged in law enforcement or fire protection activities.

* * * * *

11. In § 551.501, paragraph (a) is revised to read as follows:

§ 551.501 Overtime pay.

(a) An agency shall compensate an employee who is not exempt under subpart B of this part for all hours of work in excess of 8 in a day or 40 in a workweek at a rate equal to one and one-half times the employee's hourly regular rate of pay, except that an employee shall not receive overtime compensation under this part—

(1) On the basis of periods of duty in excess of 8 hours in a day when the employee receives compensation for that duty under 5 U.S.C. 5545(c) (1) or (2);

(2) On the basis of hours of work in excess of 8 hours in a day that are not overtime hours of work under § 410.602 of this chapter, part 532 of this chapter and 5 U.S.C. 5544, or part 550 of this chapter;

(3) On the basis of hours of work in excess of 8 hours in a day for an employee covered by 5 U.S.C. 5544 for any hours in a standby or on-call status or while sleeping or eating;

(4) On the basis of hours of work in excess of 8 hours in a day for an individual who is not an employee, as defined in 5 U.S.C. 5541(2), for purposes of 5 U.S.C. 5542, 5543, and 5544.

(5) On the basis of hours of work in excess of 40 hours in a workweek for an employee engaged in fire protection or law enforcement activities when the employee receives compensation for those hours of work under 5 U.S.C. 5545(c) (1) or (2);

(6) For hours of work that are not "overtime hours," as defined in 5 U.S.C. 6121, for employees under flexible or compressed work schedules;

(7) For hours of work compensated by compensatory time off under § 551.531 of this part; and

(8) For fractional hours of work, except as provided in § 551.521 of this part.

* * * * *

12. Section 551.513 is revised to read as follows:

§ 551.513 Entitlement to other forms of pay.

Overtime pay under this subpart shall be paid in addition to all pay, other than overtime pay, to which the employee is entitled under title 5, United States Code, or any other authority. An employee entitled to overtime pay under this subpart and overtime pay under any authority outside of title 5, United States Code, shall be paid under whichever authority provides the greater overtime pay entitlement in the workweek.

13. In § 551.541, paragraphs (a) and (b) are revised to read as follows:

§ 551.541 Employees engaged in fire protection activities or law enforcement activities.

(a) An employee engaged in fire protection activities or law enforcement activities shall be paid at a rate equal to one and one-half times the employee's hourly regular rate of pay for those hours in a tour of duty which exceed the overtime standard for a work period specified in section 7(k) of the Act or which are in excess of 40 hours in a workweek for such an employee who does not receive compensation for those hours of work under 5 U.S.C. 5545 (c)(1) or (c)(2).

(b) The "tour of duty" of an employee engaged in these activities shall include all time the employee is on duty. Meal periods and sleep periods are included in the tour of duty except as otherwise provided in §§ 511.411(c) and 551.432(b) of this part.

BILLING CODE 6325–01–M

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 907

[Navel Orange Regulation 740]

Navel Oranges Grown in Arizona and Designated Part of California

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This regulation establishes the quantity of California-Arizona navel oranges that may be shipped to domestic markets during the period from December 11 through December 17, 1992. Consistent with program objectives, such action is needed to establish and maintain orderly marketing conditions for fresh California-Arizona navel oranges for the specified week. Regulation was recommended by the Navel Orange Administrative Committee (Committee), which is responsible for local administration of the navel orange marketing order.

EFFECTIVE DATE: Regulation 740 (7 CFR 907.1040) is effective for the period from December 11 through December 17, 1992.

FOR FURTHER INFORMATION CONTACT: Christian D. Nissen, Marketing Specialist, Marketing Order Administration Branch, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, room 2523–S, P.O. Box 96456, Washington, DC 20090–6456; telephone: (202) 720–5127; or Robert Curry, California Marketing Field Office, Marketing Order Administration Branch, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, 2202 Monterey Street, suite 102B, Fresno, California 93721; telephone: (209) 487–5901.

SUPPLEMENTARY INFORMATION: This final rule is issued under Marketing Order No. 907 (7 CFR Part 907), as amended, regulating the handling of navel oranges grown in Arizona and designated part of California. This order is effective under the Agricultural Marketing Agreement Act of 1937, as amended, hereinafter referred to as the "Act."

This final rule has been reviewed by the Department of Agriculture (Department) in accordance with Departmental Regulation 1512–1 and the criteria contained in Executive Order 12291 and has been determined to be a "non-major" rule.

This final rule has been reviewed under Executive Order 12778, Civil Justice Reform. This action is not intended to have retroactive effect. This final rule will not preempt any state or local laws, regulations, or policies, unless they present an irreconcilable conflict with this rule.

The Act provides that administrative proceedings must be exhausted before parties may file suit in court. Under section 608c(15)(A) of the Act, any handler subject to an order may file with the Secretary a petition stating that the order, any provision of the order, or any obligation imposed in connection with the order is not in accordance with law and request a modification of the order or to be exempted therefrom. A handler is afforded the opportunity for a hearing on the petition. After the hearing the Secretary would rule on the petition. The Act provides that the district court of the United States in any district in which the handler is an inhabitant, or has his or her principal place of business, has jurisdiction in equity to review the Secretary's ruling on the petition, provided a bill in equity is filed not later than 20 days after the date of the entry of the ruling.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of the use of volume regulations on small entities as well as larger ones.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 130 handlers of California-Arizona navel oranges subject to regulation under the navel orange marketing order and approximately 4,000 navel orange producers in California and Arizona. Small agricultural producers have been defined by the Small Business Administration (13 CFR 121.601) as those having annual receipts of less than $500,000, and small agricultural service firms are defined as those whose annual receipts are less than $3,500,000. The majority of handlers and producers of California-Arizona navel oranges may be classified as small entities.

The California-Arizona navel orange industry is characterized by a large number of growers located over a wide area. The production area is divided into four districts which span Arizona and part of California. The largest proportion of navel orange production is located in District 1, Central California, which represented about 85 percent of the total production in 1991–92. District 2 is located in the southern coastal area of California and represented about 13 percent of 1991–92 production; District 3 is the desert area of California and Arizona, and it represented slightly less than 2 percent; and District 4, which represented less than 1 percent, is northern California.

The Committee adopted its marketing policy for the 1992–93 season on July 28, 1992. The Committee reviewed its marketing policy at district meetings as follows: Districts 1 and 4 on September 22, 1992, in Visalia, California; and Districts 2 and 3 on September 29, 1992, in Ontario, California. The Committee revised its crop estimate, utilization, and shipping schedule at its September 22 meeting and revised them again at its November 17 meeting. At its November 24 and December 1 meetings, and again at its December 8 meeting, the Committee adopted another revised shipping schedule. The marketing policy discussed, among other things, the potential use of volume regulations for the ensuing season. The marketing policy and the revised shipping schedule are available from the Committee or Mr. Nissen.

The Committee's revised estimate of 1992–93 production is 85,500 cars (one car equals 1,000 cartons at 37.5 pounds net weight each), as compared with 72,644 cars during the 1991–92 season. The Committee has estimated that about 61 percent of the 1992–93 crop of 85,500 cars will be utilized in fresh domestic channels (52,200 cars), with the remainder being exported fresh (12 percent), processed (25 percent), or designated for other uses (2 percent). This compares with the 1991–92 total of 44,875 cars shipped to fresh domestic markets, about 62 percent of that year's crop.

Based on the Committee's marketing policy, the crop and market information provided by the Committee, and other information available to the Department, the costs of implementing this regulation are expected to be more than offset by the potential benefits of regulation.

A proposed rule, based on the Committee's 1992–93 marketing policy, was published on October 23, 1992, in the **Federal Register** (57 FR 48340) inviting comments on the quantities of fresh California-Arizona navel oranges that may be shipped weekly to domestic markets for the 10-week period from the week ending November 5 through the week ending January 7, 1993. That rule provided interested persons the opportunity to comment on a proposed weekly volume regulation shipping level of 1,800,000 cartons for the week ending December 17.

Five comments have been received, one from Sequoia Orange Company, Inc. (Sequoia), one from Foothill Farms, two from Bee Sweet Citrus, Inc. (Bee Sweet), and one from the Small Business Administration's Office of Advocacy (SBA). The comments addressed all ten weeks of the proposed rule. The Sequoia and Foothill Farms comments were addressed in the final rule published on November 17, 1992, in the **Federal Register** (57 FR 54169), the initial comment by Bee Sweet was addressed in the final rule published in the **Federal Register** on November 23, 1992 (57 FR 54898), the comment by the SBA was addressed in the final rule published in the **Federal Register** on December 1, 1992, (57 FR 56803), and the second comment by Bee Sweet was addressed in the final rule published in the **Federal Register** on December 9, 1992 (57 FR 58125). The above comments in opposition to the proposed rule, as well as the alternatives presented, were previously denied. These comments warrant no further discussion. No additional comments were received.

The Committee met publicly on December 8, 1992, in Newhall, California, to consider the current and prospective conditions of supply and demand and recommended, with eight members voting in favor, two opposing, and one abstaining, that 1,900,000 cartons is the quantity of navel oranges deemed advisable to be shipped to fresh domestic markets during the specified week. The marketing information and data provided to the Committee and used in its deliberations was compiled by the Committee's staff or presented by Committee members at the meeting. This information included, but was not limited to, price data for the previous week from Department market news reports and other sources, preceding week's shipments and shipments to date, crop conditions and weather and transportation conditions.

The Department reviewed the Committee's recommendation in light of the Committee's projections as set forth in its 1992–93, marketing policy, and December 8 revised shipping schedule. The recommended amount of 1,900,000 cartons is 100,000 cartons above the amount specified in the proposed rule, and is consistent with the Committee's revised shipping schedule. Of the 1,000,000 cartons, 94.7 percent or 1,799,000 cartons are allotted for District 1, and 5.3 percent or 101,000 cartons are allotted for District 3. Handlers in Districts 2 and 4 will not be regulated as they are not shipping a sufficient quantity of navel oranges to warrant volume regulation at this time.

During the week ending on December 3, 1992, shipments of navel oranges to fresh domestic markets, including Canada, totaled 1,547,000 cartons, compared with 1,595,000 cartons shipped during the week ending on December 5, 1991. Export shipments totaled 154,000 cartons, compared with 183,000 cartons shipped during the week ending on December 5, 1991. Processing and other uses accounted for 391,000 cartons, compared with 263,000 cartons shipped during the week ending on December 5, 1991.

Fresh domestic shipments to date this season total 7,932,000 cartons, compared with 4,333,000 cartons shipped by this time last season. Export shipments total 540,000 cartons, compared with 682,000 cartons shipped by this time last season. Processing and other use shipments total 2,542,000 cartons, compared with 909,000 cartons shipped by this time last season.

For the week ending December 3, regulated shipments of navel oranges to the fresh domestic market were 1,509,000 cartons on an adjusted allotment of 1,453,000 cartons, which resulted in net overshipments of about 56,000 cartons. Regulated general maturity shipments for the current week (December 4 through December 10, 1992) are estimated at 1,800,000 cartons on an adjusted allotment of 1,671,000 cartons. Thus, overshipments of about 129,000 cartons could be carried forward into the week ending on December 17, 1992.

The average f.o.b. shipping point price for the week ending on December 3, 1992, was $7.42 per carton based on a reported sales volume of 1,099,000 cartons. The season average f.o.b. shipping point price for the week ending on December 5, 1991, was $9.85 per carton; the season average f.o.b. shipping point price at this time last year was $10.70.

The Department's Market News Service reported that, as of December 8, demand for California-Arizona navel oranges sizes 48–56 is "very good", and "good" for all other sizes. It was reported that many present shipments are for prior bookings. The market was reported as "about steady." It was also reported that harvesting has been curtailed in most areas on account of rain and wet fields.

At the meeting, Committee members discussed implementing volume regulation at this time, as well as different levels of allotment. Two members expressed concern about the quality of the oranges being shipped. A Committee staff member reported that rainfall has curtailed harvesting, however, the industry expects to harvest enough to meet current demand. Several members commented that the market has firmed, and demand has improved significantly. The majority of Committee members favored the issuance of general maturity allotment for Districts 1 and 3 at 1,900,000 cartons, while two

Committee members favored open movement at this time.

According to the National Agricultural Statistics Service, the 1991–92 season average fresh equivalent on-tree price for California-Arizona navel oranges was $5.29 per carton, 71 percent of the season average parity equivalent price of $7.43 per carton. Based upon fresh utilization levels indicated by the Committee and an econometric model developed by the Department, the 1992–93 season average fresh on-tree price is estimated at $3.49 per carton, about 45 percent of the estimated fresh on-tree parity equivalent price of $7.83 per carton.

Limiting the quantity of navel oranges that may be shipped during the period from December 11 through December 17, 1992, would be consistent with the provisions of the marketing order tending to establish and maintain, in the interest of producers and consumers, an orderly flow of navel oranges to market.

Based on considerations of supply and market conditions, and the evaluation of alternatives to the implementation of this volume regulation, the Administrator of the AMS has determined that this final rule will not have a significant economic impact on a substantial number of small entities and that this action will tend to effectuate the declared policy of the Act.

Pursuant to 5 U.S.C. 553, it is further found and determined that good cause exists for not postponing the effective date of this action until 30 days after publication in the **Federal Register**. This is because there is insufficient time between the date of the final recommendation of the Committee based on the latest marketing information, and the effective date necessary to effectuate the declared policy of the Act.

This action needs to be effective for the regulatory week which begins on December 11, 1992. Interested persons were given the opportunity to comment on a proposed rule published on October 23, 1992, in the **Federal Register** (57 FR 48340). Further, interested persons were given an opportunity to submit information and views on the regulation prior to and at an open meeting, and handlers were apprised of its provisions and effective time. It is necessary, therefore, in order to effectuate the declared purposes of the Act, to make this regulatory provision effective as specified.

List of Subjects in 7 CFR Part 907

Marketing agreements, Oranges, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, 7 CFR part 907 is amended as follows:

PART 907—NAVEL ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA

1. The authority citation for 7 CFR part 907 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

2. Section 907.1040 is added to read as follows:

Note: This section will not appear in the Code of Federal Regulations.

§ 907.1040 Navel Orange Regulation 740.

The quantity of navel oranges grown in California and Arizona which may be handled during the period from December 11 through December 17, 1992, is established as follows:

District 1	District 2	District 3	District 4	Total
cartons/ %	cartons/ %	cartons/ %	cartons/ %	cartons
(000) 1,799/94.7	(000) open	(000) 101/5.3	(000) open	(000) 1,900

Dated: December 9, 1992.

Robert C. Keeney,

Deputy Director, Fruit and Vegetable Division.

BILLING CODE 3410–02–M

7 CFR Part 910

[Lemon Regulation 765]

Lemons Grown in California and Arizona; Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This regulation establishes the quantity of California-Arizona lemons that may be shipped to fresh domestic markets during the period from December 13 through December 19, 1992. Consistent with program objectives, such action is needed to balance the supplies of fresh lemons with the demand for such lemons during the period specified. This action was recommended by the Lemon Administrative Committee (Committee), which is responsible for local administration of the lemon marketing order.

EFFECTIVE DATE: Regulation 765 (7 CFR 910.1065) is effective for the period from December 13 through December 19, 1992.

FOR FURTHER INFORMATION CONTACT: Kenneth G. Johnson, Marketing Order Administration Branch, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, room 2523–S, P.O. Box 96456, Washington, DC 20090–6456; telephone: (202) 690–3670; or Martin Engeler, California Marketing Field Office, Marketing Order Administration Branch, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, 2202 Monterey Street, suite 102B, Fresno, California 93721; telephone: (209) 487–5901.

SUPPLEMENTARY INFORMATION: This final rule is issued under Marketing Order No. 910 (7 CFR part 910), as amended, regulating the handling of lemons grown in California and Arizona. This order is effective under the Agricultural Marketing Agreement Act of 1937, as amended, hereinafter referred to as the Act.

This final rule has been reviewed by the Department of Agriculture (Department) in accordance with Departmental Regulation 1512–1 and the criteria contained in Executive Order 12291 and has been determined to be a "non-major" rule.

This final rule has been reviewed under Executive Order 12778, Civil Justice Reform. This action is not intended to have retroactive effect. This final rule will not preempt any state or local laws, regulations, or policies, unless they present an irreconcilable conflict with this rule.

The Act provides that administrative proceedings must be exhausted before parties may file suit in court. Under section 608c(15)(A) of the Act, any handler subject to an order may file with the Secretary a petition stating that the order, any provision of the order, or any obligation imposed in connection with the order is not in accordance with law and requesting a modification of the

order or to be exempted therefrom. A handler is afforded the opportunity for a hearing on the petition. After the hearing the Secretary would rule on the petition. The Act provides that the district court of the United States in any district in which the handler is an inhabitant, or has his principal place of business, has jurisdiction in equity to review the Secretary's ruling on the petition, provided a bill in equity is filed not later than 20 days after date of the entry of the ruling.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this action on small entities as well as larger ones.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 70 handlers of lemons grown in California and Arizona subject to regulation under the lemon marketing order and approximately 2,000 lemon producers in the regulated area. Small agricultural producers have been defined by the Small Business Administration [13 CFR 121.601] as those having annual receipts of less than $500,000, and small agricultural service firms are defined as those whose annual receipts are less than $3,500,000. The majority of handlers and producers of California-Arizona lemons may be classified as small entities.

The Committee adopted its marketing policy for the 1992–93 season on May 5, 1992. The marketing policy discussed, among other things, the potential use of volume and size regulations for the ensuing season. This marketing policy is available from the Committee or Mr. Johnson.

Based on its revised crop estimate of 44,170 cars, the Committee estimates that about 40 percent of the 1992–93 crop will be utilized in fresh domestic channels (17,750 cars), compared with the 1991–92 total of approximately 17,000 cars. Fresh exports are projected at 16 percent of the total 1992–93 crop utilization, the same percentage for 1991–92. Processed and other uses would account for the residual 44 percent, again the same percentage for the 1991–92 crop.

Based on the Committee's marketing policy, the crop and market information provided by the Committee, and other information available to the Department, the costs of implementing this regulation are expected to be more than offset by the potential benefits of regulation.

A proposed rule, based on the Committee's 1992–93 marketing policy, was published October 29, 1992, in the **Federal Register** [57 FR 49023] inviting comments on the quantities of fresh California-Arizona lemons that may be shipped weekly to domestic markets for the 10-week period from the week ending November 14, 1992, through the week ending January 16, 1993. That rule provided interested persons the opportunity to comment on a proposed weekly volume regulation shipping level of 355,000 cartons for the week ending December 19, 1992.

Two comments were received, one from Associated Citrus Packers, Inc., and one from Sequoia Orange Company, Inc. The comments addressed all 10 weeks of the proposed rule. Both comments were addressed in the final rule published on November 23, 1992, in the **Federal Register** [57 FR 54900]. These comments warrant no further discussion. No additional comments were received.

The Committee met publicly on December 8, 1992, in Newhall, California, to consider the current and prospective conditions of supply and demand and, by a 10 to 2 vote, with 1 abstention, recommended that 325,000 cartons is the quantity of lemons deemed advisable to be shipped to fresh domestic markets during the specified week. This amount is below the level indicated in the proposed rule, and reflects inclement weather conditions affecting harvesting in the growing region and weakening market conditions. The marketing information and data provided to the Committee and used in its deliberations were compiled by the Committee's staff or presented by Committee members at the meeting. This information included, but was not limited to, price data for the previous week from Department market news reports and other sources, the preceding week's shipments and shipments to date, crop conditions, and weather and transportation conditions.

The Department reviewed the Committee's recommendation in light of the Committee's projections as set forth in its 1992–93 marketing policy. The recommended amount is below the amount specified in the proposed rule.

During the week ending on December 5, 1992, shipments of lemons to fresh domestic markets, including Canada, totaled 324,000 cartons compared with 299,000 cartons shipped during the week ending on December 7, 1991. Export shipments totaled 123,000 cartons compared with 120,000 cartons shipped during the week ending on December 7, 1991. Processing and other uses accounted for 535,000 cartons compared with 336,000 cartons shipped during the week ending on December 7, 1991. Regulated shipments for the current week (December 6, 1992, through December 12, 1992) are estimated at 360,000 cartons.

Fresh domestic shipments to date for the 1992–93 season total 5,992,000 cartons compared with 5,073,000 cartons shipped by this time during the 1991–92 season. Export shipments total 2,221,000 cartons compared with 2,214,000 cartons shipped by this time during 1991–92. Processing and other use shipments total 5,572,000 cartons compared with 2,966,000 cartons shipped by this time during 1991–92. The average f.o.b. shipping point price for the week ending on December 5, 1992, was $9.43 per carton based on a reported sales volume of 324,000 cartons compared with the previous week's average of $9.21 per carton on a reported sales volume of 248,000 cartons. The 1992–93 season average f.o.b. shipping point price to date is $11.94 per carton. The average f.o.b. shipping point price for the week ending on December 7, 1991, was $12.93 per carton; the season average f.o.b. shipping point price at this time during 1991–92 was $17.03 per carton.

The Department's Market News Service reported that, as of December 7, demand for lemons size 165 is very good, and for other lemon sizes the demand is "about unchanged".

At the meeting, Committee members discussed different levels of shipments, as well as crop and field conditions. The majority of Committee members stated that due to volume regulations being implemented in previous weeks, the lemon market has stabilized. Members supporting volume regulation cited the need for continued market stability and good returns to growers. Two Committee members supported a higher level of volume regulation to increase returns and one member abstained. Thus, the Committee, by a 10 to 2 vote with 1 abstention, recommended volume regulation be established at 325,000 cartons for the week ending on December 19, 1992.

According to the National Agricultural Statistics Service, the season-to-date on-tree price for California-Arizona fresh lemons is $7.29 per carton, 72 percent of the season-to-date parity equivalent price. The season

average fresh on-tree price is projected at $9.12 per carton, 83 percent of the preliminary season average parity equivalent price of $10.96 per carton.

Limiting the quantity of lemons that may be shipped during the period from December 13 through December 19, 1992, would be consistent with the provisions of the marketing order by tending to establish and maintain, in the interest of producers and consumers, an orderly flow of lemons to market.

Based on considerations of supply and market conditions, and the evaluation of alternatives to the implementation of this volume regulation, the Administrator of the AMS has determined that this rule will not have a significant economic impact on a substantial number of small entities and that this action will tend to effectuate the declared policy of the Act.

Pursuant to 5 U.S.C. 553, it is further found and determined that good cause exists for not postponing the effective date of this action until 30 days after publication in the **Federal Register.** This is because there is insufficient time between the date of the final recommendation of the Committee, based on the latest marketing information, and the effective date necessary to effectuate the declared policy of the Act.

This action needs to be effective for the regulatory week which begins on December 13, 1992. Interested persons were given the opportunity to comment on a proposed rule published on October 29, 1992, in the **Federal Register** [57 FR 49023]. Further, interested persons were given an opportunity to submit information and views on the regulation prior to and at an open meeting, and handlers were apprised of its provisions and effective time. It is necessary, therefore, in order to effectuate the declared purposes of the Act, to make this regulatory provision effective as specified.

List of Subjects in 7 CFR Part 910

Lemons, Marketing agreements, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, 7 CFR part 910 is amended as follows:

PART 910—LEMONS GROWN IN CALIFORNIA AND ARIZONA

1. The authority citation for 7 CFR part 910 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

2. Section 910.1065 is added to read as follows:

Note: This section will not appear in the Code of Federal Regulations.

§ 910.1065 Lemon Regulation 765.

The quantity of lemons grown in California and Arizona which may be handled during the period from December 13 through December 19, 1992, is established at 325,000 cartons.

Dated: December 9, 1992.

Robert C. Keeney,

Deputy Director, Fruit and Vegetable Division.

BILLING CODE 3410–02–M

FEDERAL DEPOSIT INSURANCE CORPORATION

12 CFR Part 303

Waiver of Publication Requirements in Major Disaster Areas

AGENCY: Federal Deposit Insurance Corporation.

ACTION: Statement and order; temporary exceptions.

SUMMARY: Section 5 of the Depository Institutions Disaster Relief Act of 1992 (DIDRA), signed by the President on October 23, 1992, authorizes the FDIC, during the 180-day period beginning on the date of enactment of the DIDRA, to make exceptions, with respect to institutions for which the FDIC is the primary federal regulator, to any publication requirement with respect to establishing branches or other deposit-taking facilities or any similar publication requirement. The exceptions are available for transactions or activities in major disaster areas declared by the President, or as to regulated institutions headquartered in such areas, when the exceptions would facilitate recovery from the disaster.

DATES: This order is effective on December 15, 1992, and expires April 21, 1993.

FOR FURTHER INFORMATION CONTACT: Robert F. Miailovich, Associate Director, Division of Supervision, (202) 898–6918, Curtis L. Vaughn, Examination Specialist, (202) 898–6759, or Joseph A. DiNuzzo, Senior Attorney, (202) 898–7349, Legal Division.

SUPPLEMENTARY INFORMATION:

Statement

Section 5 of DIDRA (Pub. L. 102–485, 106 Stat. 2773) authorizes the FDIC, during the period ending 180 days after October 23, 1992, to make exceptions to any publication requirement with respect to establishing branch or other deposit-taking facilities or any similar publication requirement to facilitate recovery in designated major disaster areas.

The FDIC has determined that recovery from Hurricanes Andrew and Iniki and from the Los Angeles civil unrest in May 1992 would be facilitated by exempting from publication requirements certain transactions involving establishing a branch or relocating a branch or main office in the areas directly affected by those disasters. Destruction of banking facilities in the affected areas interferes with the ability to deliver financial services. The order issued with this statement removes one regulatory impediment to the ability of depository institutions to deliver full financial services in such areas.

The FDIC has also determined that the benefit from the waiver of publication outweighs the disadvantages of not receiving public comment before the transaction is consummated. The waiver is not designed to allow an institution to leave an affected area, but is intended to facilitate the return of full financial services to such areas.

Order

In accordance with section 5 of DIDRA, it is hereby ordered that the publication requirements in § 303.6(f)(1)(ii) (A) and (B) of the FDIC's regulations (12 CFR 303.6(f)(1)(ii) (A) and (B)) be suspended for a period of 180 days beginning October 23, 1992 and ending April 21, 1993 with respect to applications filed by FDIC-insured state nonmember banks whose principal place of business is within, or with respect to transactions or activities within, an area designated eligible for federal assistance by the Federal Emergency Management Agency as a result of Hurricanes Andrew [1] or Iniki [2] or of the Los Angeles civil unrest in May 1992 [3];

Provided

The facilities involved were directly affected by the disaster; or

The facilities involved were not directly affected by the disaster but the

[1] Florida counties: Broward, Collier, Dade, Monroe.

BILLING CODE 6714-01-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 92-NM-223-AD; Amendment 39-8435; AD 92-27-02]

Airworthiness Directives; Boeing Model 747-400 and 767 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule; request for comments.

SUMMARY: This amendment adopts a new airworthiness directive (AD) that is applicable to certain Boeing Model 747-400 and 767 series airplanes equipped with Rolls Royce engines. This action requires repetitive visual inspections of the power feeder connector at each engine firewall to detect signs of arcing, deterioration, unusual hardness or softness, and cracking of the elastomer insert; and the replacement of any damaged connectors found. This amendment is prompted by reports of damage to strut firewall power feeder connectors on these airplanes. The actions specified in this AD are intended to prevent undetected fires in the engine strut caused by ignition of fuel or fuel vapors near an overheated connector.

DATES: Effective December 30, 1992.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of December 30, 1992.

Comments for inclusion in the Rules Docket must be received on or before February 16, 1993.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM-103, Attention: Rules Docket No. 92-NM-223-AD, 1601 Lind Avenue, SW., Renton, Washington 98055-4056.

The service information referenced in this AD may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington 98124-2207. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Mr. Stephen S. Oshiro, Aerospace Engineer, Seattle Aircraft Certification Office, Systems and Equipment Branch, ANM-130S, FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington 98055-4056; telephone (206) 227-2793; fax (206) 227-1181.

SUPPLEMENTARY INFORMATION: The FAA has received several reports of damage to strut firewall power feeder connectors on Model 747-400 and 767 series airplanes equipped with Rolls Royce engines. Electrical power from the engine-driven generators was lost due to failures of the power feeder connectors at the engine firewalls. These connectors overheated and failed due to inadequate capacity of the connectors to carry current. The connectors are located in the flammable leakage zone of the engine strut. This condition, if not corrected, could result in undetected fires in the engine strut caused by ignition of fuel or fuel vapors near an overheated connector.

The FAA has reviewed and approved Boeing Alert Service Bulletins 747-24A2190 and 767-24A0088, both dated November 16, 1992, that describe procedures for repetitive visual inspections of the power feeder connector at each engine firewall to detect signs of arcing, deterioration, unusual hardness or softness, and cracking of the elastomer insert. It also describes procedures for the replacement of any damaged connectors found.

Since an unsafe condition has been identified that is likely to exist or develop on other Model 747-400 and 767 series airplanes of the same type design, this AD is being issued to prevent undetected fires in the engine strut caused by ignition of fuel or fuel vapors near an overheated connector. This AD requires repetitive visual inspections of the power feeder connector at each engine firewall to detect signs of arcing, deterioration, unusual hardness or softness, and cracking of the elastomer insert; and the replacement of any damaged connectors found. The actions are required to be accomplished in accordance with the service bulletins described previously.

This is considered to be interim action until final action is identified, at which time the FAA may consider further rulemaking.

Since a situation exists that requires the immediate adoption of this regulation, it is found that notice and opportunity for prior public comment hereon are impracticable, and that good cause exists for making this amendment effective in less than 30 days.

Comments Invited

Although this action is in the form of a final rule that involves requirements affecting flight safety and, thus, was not preceded by notice and an opportunity for public comment, comments are invited on this rule. Interested persons are invited to comment on this rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified under the caption "ADDRESSES." All communications received on or before the closing date for comments will be considered, and this rule may be amended in light of the comments received. Factual information that supports the commenter's ideas and suggestions is extremely helpful in evaluating the effectiveness of the AD action and determining whether additional rulemaking action would be needed.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the rule that might suggest a need to modify the rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report that summarizes each FAA-public contact concerned with the substance of this AD will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 92-NM-223-AD." The postcard will be date stamped and returned to the commenter.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

The FAA has determined that this regulation is an emergency regulation and that it is not considered to be major under Executive Order 12291. It is impracticable for the agency to follow the procedures of Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been determined further that this action involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979). If it is determined that this emergency regulation otherwise would be significant under DOT Regulatory Policies and Procedures, a final regulatory evaluation will be prepared and placed in the Rules Docket. A copy of it, if filed, may be obtained from the Rules Docket at the location provided under the caption "ADDRESSES."

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. App. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

92-27-02. Boeing: Amendment 39-8435. Docket 92-NM-223-AD.

Applicability: Model 747-400 series airplanes having line positions up to and including 958, inclusive, equipped with Rolls Royce engines and electrical power feeder connectors at engine firewalls; and Model 767 series airplanes having variable numbers 111 through 124, inclusive, and variable numbers 120 through 132, inclusive, equipped with Rolls Royce engine and electrical power feeder connectors at engine firewalls; certificated in any category.

Compliance: Required as indicated, unless accomplished previously.

To prevent undetected fires in the engine strut, accomplish the following:

(a) Within 30 days after the effective date of this AD, perform a visual inspection of the power feeder connector at each engine firewall to detect signs of arcing, deterioration, unusual hardness or softness, and cracking of the elastomer insert, in accordance with Boeing Alert Service Bulletin 747-24A2190, dated November 16, 1992 (for Model 747-400 series airplanes); or Boeing Alert Service Bulletin 767-24A0088, dated November 16, 1992 (for Model 767 series airplanes); as applicable.

(1) If any damaged connector is found, prior to further flight, replace it in accordance with the applicable service bulletin. Prior to the accumulation of 1,200 flight hours on the new connector, perform the inspection required by paragraph (a) of this AD. Thereafter, repeat that inspection at intervals not to exceed 800 flight hours until the connector is replaced again.

(2) If no damage is found and no connector is replaced, repeat the inspection required by paragraph (a) of this AD at intervals not to exceed 800 flight hours.

(b) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Seattle Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Seattle ACO.

Note: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Seattle ACO.

(c) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

(d) The inspections and replacement shall be done in accordance with Boeing Alert Service Bulletin 747-24A2190, dated November 16, 1992; or Boeing Alert Service Bulletin 767-24A0088, dated November 16, 1992; as applicable. This incorporation by reference was approved by the Director of the **Federal Register** in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington 98124-2207. Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the Office of the **Federal Register**, 800 North Capitol Street, NW., suite 700, Washington, DC.

(e) This amendment becomes effective on December 30, 1992.

Issued in Renton, Washington, on December 7, 1992.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

14 CFR Part 71

[Airspace Docket No. 92-AWP-14]

Establishment of Two Transition Areas in the Vicinity of the Goffs Very High Frequency Omnidirectional Range/ Tactical Air Navigation (VORTAC), CA

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action establishes two 7,000 foot MSL and above transition areas near the Goffs VORTAC, CA. These transition areas will provide controlled airspace for aircraft proceeding via a Standard Terminal Arrival Route (STAR) into the Las Vegas McCarran International Airport, NV.

EFFECTIVE DATE: 0901 UTC, February 4, 1993.

FOR FURTHER INFORMATION CONTACT: Gene Enstad, Airspace Specialist, System Management Branch, AWP-530, Air Traffic Division, Western-Pacific Region, Federal Aviation Administration, 15000 Aviation Boulevard, Lawndale, California 90261, telephone (310) 297-0010.

SUPPLEMENTARY INFORMATION:

History

On August 20, 1992, the FAA proposed to amend part 71 of the Federal Aviation Regulations (14 CFR part 71) to establish two 7,000 foot MSL and above transition areas near the Goffs VORTAC, CA (57 FR 40148). Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments were received. Transition areas are published in § 71.181 of FAA Order 7400.7A, dated November 2, 1992, and effective November 27, 1992, which is incorporated by reference in 14 CFR 71.1. The transition areas listed in this document will be published subsequently in the Order.

The Rule

This amendment to part 71 of the Federal Aviation Regulations establishes the Goffs North and Goffs South transition areas. The base of controlled airspace in these areas is lowered from the base of the Continental Control Area to 7,000 feet MSL. The first of the two transition areas (Goffs North) is bounded by the southeast edge of Victor Airway 8 (V-8) on the northwest, the western edge of V-237 on the east, and the northern edge of V-210 on the south. The second transition area (Goffs South) is bounded by the southern edge of V-210 on the north, the western edge

of V–237 on the east and the northeast edge of V–135 on the southwest. The Minimum Vectoring Altitude (MVA) is 7,000 feet MSL in that area. These transition areas will provide controlled airspace for aircraft proceeding via a Standard Terminal Arrival Route (STAR) into the Las Vegas McCarran Airport from the vicinity of the Thermal VORTAC, CA.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, Incorporated by reference, Transition areas.

Adoption of the Amendment

In consideration of the foregoing, the Federal Aviation Administration amends 14 CFR part 71 as follows:

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS, JET ROUTES, AND AREA HIGH ROUTES

1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 49 U.S.C. app. 1348(a), 1354(a), 1510; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389; 49 U.S.C. 106(g); 14 CFR 11.69

§ 71.1 [Amended]

2. The incorporation by reference in 14 CFR 71.1 of the Federal Aviation Administration Order 7400.7A, Compilation of Regulations, dated November 2, 1992, and effective November 27, 1992, is amended as follows:

Section 71.181 Designation of Transition Areas

* * * * *

AWP CA TA Goffs North [New]

That airspace extending upward from 7,000 feet MSL and above bounded by the southeast edge of Victor Airway 8 (V–8) on the northwest, the western edge of V–237 on the east, and the northern edge of V–210 on the south.

AWP CA TA Goffs South [New]

That airspace extending upward from 7,000 feet MSL and above bounded by the south edge of V–210 on the north, the western edge of V–237 on the east, and the northeastern edge of V–135 on the southwest.

14 CFR Part 71

[Airspace Docket No. 92–ACE–02]

Designation of Control Zone; Hays, Kansas

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action designates a control zone at Hays, Kansas, to provide additional controlled airspace for aircraft using the Hays, Kansas, Municipal Airport.

EFFECTIVE DATE: 0901 UTC, February 4, 1993.

FOR FURTHER INFORMATION CONTACT: Dale Carnine, Airspace Specialist, System Management Branch, Air Traffic Division, ACE–530, FAA, Central Region, 601 East 12th Street, Kansas City, Missouri 64106, Telephone (816) 426–3408.

SUPPLEMENTARY INFORMATION:

History

On May 29, 1992, the FAA published a notice of proposed rulemaking that proposed to amend part 71 of the Federal Aviation Regulations to designate a control zone at Hays, Kansas (57 FR 22672). Interested persons were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No objections were received as a result of the notice of proposed rulemaking. Except for editorial changes, this amendment is the same as that proposed in the notice.

The coordinates in the proposal were published in North American Datum 27. However, these coordinates have been updated to North American Datum 83 for this final rule. Control zones are published in § 71.171 of FAA Order 7400.7A dated November 2, 1992, and effective November 27, 1992, which is incorporated by reference in 14 CFR 71.1. The control zone listed in this document will be published subsequently in the Order.

The Rule

This amendment to part 71 of the Federal Aviation Regulations designates a control zone at Hays, Kansas. To enhance airport usage, an Automated Weather Observation System (AWOS) has been installed that will provide weather data on a 24 hour basis. Accordingly, the control zone for the Hays Municipal Airport, Hays, Kansas, which was canceled effective June 28, 1990, is being reactivated. The intended effect of this action is to provide segregation of aircraft operating under Instrument Flight Rules (IFR) from other aircraft operating in visual meteorological conditions. The notice of proposed rulemaking was published using statute miles in the legal description. The legal description for this final rule is being published in nautical miles in accordance with the Airspace Reclassification program.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

DEPARTMENT OF COMMERCE

Bureau of Economic Analysis

15 CFR Part 801

[Docket No. 920786-2289]

RIN 0691-AA19

International Services Surveys: BE-22, Annual Survey of Selected Services Transactions With Unaffiliated Foreign Persons

AGENCY: Bureau of Economic Analysis, Commerce.

ACTION: Final rule.

SUMMARY: This final rule amends 15 CFR 801.9 by revising the reporting requirements for the BE-22, Annual Survey of Selected Services Transactions With Unaffiliated Foreign Persons.

The BE-22 survey is conducted by the Bureau of Economic Analysis (BEA), U.S. Department of Commerce, under the International Investment and Trade in Services Survey Act. It is the annual follow-on survey to the quinquennial BE-20, Benchmark Survey of Selected Services Transactions With Unaffiliated Foreign Persons, which was last conducted for 1991. Together, the two surveys produce a continuous annual time series of data on major types of services that are out of scope of other international services surveys. Reporting on the revised BE-22 will begin with the survey covering 1992; forms are scheduled to be mailed out in December 1992, and completed forms will be due to BEA on March 31, 1993.

The data from the BE-22 survey, together with the data from the BE-20 benchmark survey, are used to formulate U.S. international trade policy on services, support bilateral and multilateral trade negotiations, compile the U.S. balance of payments and the national income and product accounts, develop U.S. international price indexes for services, assess U.S. competitiveness in international trade in services, and improve the ability of U.S. businesses to identify and evaluate market opportunities.

EFFECTIVE DATE: These rules will be effective January 14, 1993.

FOR FURTHER INFORMATION CONTACT: Betty L. Barker, Chief, International Investment Division (BE-50), Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230; phone (202) 523-0659.

SUPPLEMENTARY INFORMATION: In the August 26, 1992 **Federal Register**, volume 57, no. 166 (57 FR 38635), BEA published a notice of proposed rulemaking setting forth reporting requirements for the BE-22, Annual Survey of Selected Services Transactions With Unaffiliated Foreign Persons. No comments on the proposed rule were received. As a result, the final rule is the same as the proposed rule.

Three major changes to the BE-22 survey since it was last conducted for 1990 are set forth in this final rule:

(1) The exemption criteria for the survey are changed from a per-transaction to a total transactions basis, as was done for the 1991 BE-20 benchmark survey. Specifically, a U.S. person is required to report sales of a given service if total sales of that service exceed $1 million, and is required to report purchases of the service if total purchases of that service exceed $1 million. (The reporting threshold for the 1991 BE-20 survey was $500,000 of total sales or purchases of the given service.)

(2) Coverage of several small types of services—agricultural services; management of health care facilities; mailing, reproduction, and commercial art; and temporary help supply services—is eliminated. During the review and OMB clearance of the 1991 BE-20 benchmark survey, BEA agreed to drop these types of services from the BE-22 as long as results of the 1991 and subsequent BE-20 surveys show that transactions in them continued to be small. (Accounting services were also considered for elimination, but, because they were relatively large in both 1990 and 1991, and because data users favored their continued inclusion, the proposed and final rules reflect continued coverage.)

(3) Four services not previously included on the survey are now included. Three of these services—losses recovered on purchases of primary insurance; receipts and payments for the purchase, sale, or use of rights to natural resources; and certain "miscellaneous" disbursements, consisting of outlays to fund news-gathering costs of broadcasters and the print media, production costs of motion picture companies and companies engaged in the production of broadcast material other than news, and costs of maintaining tourist, business promotion, sales or representative offices, and for participation in foreign trade shows—were covered for the first time in the 1991 BE-20. In addition, purchases of certain financial services from foreigners will be covered in the BE-22 survey for the first time. These financial services mainly consist of those for which an explicit fee is paid and that are purchased directly by U.S. firms that are not financial services intermediaries or providers.

BEA also has made a minor change in the reporting of lease bonus payments. These transactions must be reported with purchases and sales of rights to natural resources, to conform to the treatment in the U.S. national income and product accounts. Previously, these payments were reported with receipts and payments for the use of rights to natural resources.

The public reporting burden for this collection of information is estimated to vary from 4 to 500 hours per response, with an average of 11.5 hours per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Comments regarding the burden estimate, including suggestions for reducing this burden, may be sent to Director, Bureau of Economic Analysis (BE-1), U.S. Department of Commerce, Washington, DC 20230; and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Paperwork Reduction Project 0608-0060, Washington, DC 20503.

Executive Order 12291

BEA has determined that this final rule is not "major" as defined in

Executive Order 12291 because it is not likely to result in:

(1) An annual effect on the economy of $100 million or more;

(2) A major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or

(3) Significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Executive Order 12612

This final rule does not contain policies with Federalism implications sufficient to warrant preparation of a Federalism assessment under Executive Order 12612.

Paperwork Reduction Act

The collection of information requirement in this final rule has been approved by OMB (OMB No. 0608–0060).

Regulatory Flexibility Act

The General Counsel, Department of Commerce, has certified to the Chief Counsel for Advocacy, Small Business Administration, under provisions of the Regulatory Flexibility Act (5 U.S.C. 605(b)), that this final rule will not have a significant economic impact on a substantial number of small entities. The exemption level for the survey excludes most small businesses from mandatory reporting. Reporting is required only if total sales or total purchases of a given type of service with unaffiliated foreign persons exceed $1,000,000 during the year. In addition, international business, whether in goods or services, tends to be conducted mainly by the larger companies in a given industry. Finally, small businesses tend to have specialized operations and activities, so those that do have reportable transactions will likely have to report only one type of service; therefore, the burden on them should be relatively small.

List of Subjects in 15 CFR Part 801

Economic statistics, Balance of payments, Foreign trade, Reporting and recordkeeping requirements.

Dated: October 30, 1992.

Carol S. Carson,

Director, Bureau of Economic Analysis.

For the reasons set forth in the preamble, BEA amends 15 CFR part 801 as follows:

PART 801—[AMENDED]

1. The authority citation for 15 CFR part 801 continues to read as follows:

Authority: 5 U.S.C. 301, 22 U.S.C. 3101–3108, and E.O. 11961, as amended.

2. Section 801.9(b)(6) is revised to read as follows:

§ 801.9 Reports required.

* * * * *

(b) * * *

(6) BE–22, Annual Survey of Selected Services Transactions With Unaffiliated Foreign Persons:

(i) *Who must report*—(A) *Mandatory reporting.* A BE–22 report is *required* from each U.S. person who had transactions (either sales or purchases) in excess of $1,000,000 with unaffiliated foreign persons in any of the covered services during the U.S. person's fiscal year. The determination of whether a U.S. person is subject to this mandatory reporting requirement may be judgmental, that is, based on the judgment of knowledgeable persons in a company who can identify reportable transactions on a recall basis, with a reasonable degree of certainty without conducting a detailed manual records search.

(B) *Voluntary reporting.* If, during the U.S. person's fiscal year, the U.S. person's total transactions (either sales or purchases) in any of the covered services is $1,000,000 or less, the U.S. person is requested to provide an estimate of the total for each type of service. Provision of this information is voluntary. The estimates may be judgmental, that is, based on recall, without conducting a detailed manual records search.

(C) Any U.S. person receiving a BE–22 survey form from BEA must complete all relevant parts of the form and return the form to BEA. A person that is not subject to the mandatory reporting requirement in paragraph (b)(6)(i)(A) of this section and is not filing information on a voluntary basis must only complete the "Determination of reporting status" and the "Certification" sections of the survey. This requirement is necessary to ensure compliance with the reporting requirements and efficient administration of the survey by eliminating unnecessary followup contact.

(ii) *Covered services.* With the exceptions given below, the services covered by this survey are the same as those covered by the BE–20, Benchmark Survey of Selected Services Transactions With Unaffiliated Foreign Persons—1991, as listed in § 801.10(c) of this part. The exceptions are the elimination of coverage of four small types of services—agricultural services; management of health care facilities; mailing, reproduction, and commercial art; and temporary help supply services—and the addition of coverage of purchases of certain financial services. The financial services covered are those directly purchased from or sold to foreigners by U.S. companies (or by domestic subsidiaries of consolidated U.S. companies) that are not financial services intermediaries or providers. Finally, lease bonus payments are to be reported with purchases or sales of rights to natural resources, rather than with receipts or payments for the use of rights to natural resources.

BILLING CODE 3510–06–M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Parts 2, 35, 50, 131, 141, 292, 300 and 385

[Docket No. RM92–6–001]

Eliminating Unnecessary Regulation; Order No. 541–A

December 9, 1992.

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Final rule; order denying rehearing.

SUMMARY: This order denies a request for rehearing of that portion of a final rule deleting the provision of the Commission's regulations which provided that a Federal Power Marketing Administration must include a chronological discussion of the procedural history of the rate filing, including meetings held with the general public, in the record that it files with the Commission. This order states that, under the current delegation of authority from the Department of Energy, the Commission has no authority to review the procedures by which the Western Area Power Administration develops the record that it submits to the Commission.

EFFECTIVE DATE: December 9, 1992.

FOR FURTHER INFORMATION CONTACT: Joseph C. Lynch, Federal Energy Regulatory Commission, Office of the General Counsel, 825 North Capitol Street, NE., Washington, DC 20426, (202) 208–2128.

SUPPLEMENTARY INFORMATION: In addition to publishing the full text of

this document in the Federal Register, the Commission also provides all interested persons an opportunity to inspect or copy the contents of this document during normal business hours in room 3308, 941 North Capitol Street, NE, Washington, DC 20426. The Commission Issuance Posting System (CIPS), an electronic bulletin board service, provides access to the texts of formal documents issued by the Commission. CIPS is available at no charge to the user and may be accessed using a personal computer with a modem by dialing (202) 208–1397. To access CIPS, set your communications software to use 300, 1200 or 2400 baud, full duplex, no parity, 8 data bits and 1 stop bit. The full text of Order No. 541–A will be available on CIPS for 10 days from the date of issuance. The complete text on diskette in WordPerfect format may also be purchased from the Commission's copy contractor, La Dorn Systems Corporation, also located in room 3308, 941 North Capitol Street, NE., Washington, DC 20426.

Order Denying Rehearing

Deletions of Certain Outdated or Nonessential Regulations Pertaining to the Commission's Jurisdiction Under Parts II and III of the Federal Power Act, the Public Utility Regulatory Policies Act of 1978, the Pacific Northwest Electric Power Planning and Conservation Act and Delegations from the Secretary of Energy.

Background

On June 1, 1992, the Colorado River Energy Distributors Association (CREDA),[1] filed a request for rehearing of Order No. 541.[2]

In Order No. 541, the Commission, *inter alia*, deleted 18 CFR 300.10(f)(2)(i), which provided that a Federal Power Marketing Administration (PMA)[3] must include a chronological discussion of the procedural history of the rate filing, including meetings held with the general public, in the record that it files with the Commission.

CREDA argues that, by no longer requiring that PMAs include a chronological discussion of the procedural history of the filing under review, the Commission has contravened the standards governing Commission review of PMA ratemaking. According to CREDA, until Order No. 541, the Commission has always viewed itself as an appellate court to PMA ratemaking, deciding whether proposed PMA rates have a rational basis and are consistent with statutory requirements. CREDA argues that elimination of the regulation requiring a PMA to submit the procedural history of rate development effectively precludes the Commission from acting in its appellate capacity to determine whether the PMA has met the requirements of due process. CREDA sees the elimination of the previously-required procedural history as a radical departure from past Commission practice.

CREDA also challenges the Commission's citation in Order No. 541 of *Aluminum Company of America* v. *Bonneville Power Administration*, 903 F.2d 585 (9th Cir. 1989), *cert. denied*. _____U.S. _____, 111 S.Ct. 672 (1991) (*Alcoa*). CREDA argues that *Alcoa* involved only Bonneville and that the Commission reviews Western's rates under different authority.

CREDA also argues that, by deleting section 300.10(f)(2)(i) in an immediately-effective final rule, the Commission denied CREDA notice and an opportunity to comment, in violation of section 553 of the Administrative Procedure Act (APA), 5 U.S.C. 553 (1988). CREDA contends that the Commission's deletion of section 300.10(f)(2)(i) in a final rule, with no opportunity for comment, was arbitrary and capricious.

CREDA insists that the Commission must reverse its deletion of the requirement for filing a procedural history. Alternatively, CREDA also requests that the Commission stay the effective date of Order No. 541 and subject the deletion of the regulation in question to notice and comment.[4]

Discussion

CREDA argues that the Commission's elimination of the routine filing of the procedural history of a PMA's rate development represents an unlawful limitation on the scope of Commission review of a PMA's, and, in particular, Western's, rates. CREDA is mistaken.

The Department of Energy Organization Act provides the Secretary of Energy with the authority to approve Western's rates on both an interim and on a final basis.[5] The Secretary has delegated to the Assistant Secretary, Conservation and Renewable Energy, Department of Energy (DOE), the authority to confirm and approve Western's rates on an interim basis, and has delegated to the Commission the authority to confirm and approve Western's rates on a final basis.[6]

That delegation of authority strictly limits the Commission's scope of review. The Commission's review is "limited to":

(a) Whether the rates are the lowest possible to customers consistent with sound business principles;

(b) Whether the revenue levels generated by the rates are sufficient to recover the costs of producing and transmitting electric energy including the repayment, within the period of cost recovery permitted by law, of the capital investment allocated to power and costs assigned by Acts of Congress to power for repayment; and

(c) The assumptions and projections used in developing the rate components that are subject to Commission review.[7]

The Commission's policy in reviewing Western's rates under the delegation of authority, as CREDA notes, has been to perform the function of an

---

[1] CREDA's members consist of 133 electric systems serving customers in the States of Arizona, Colorado, Nevada, New Mexico, Utah and Wyoming, and purchase approximately 85 percent of the power and energy of the Salt Lake City Integrated Projects, which is marketed by the Western Area Power Administration (Western). Many of the members also purchase power and energy from other projects such as Parker-Davis, Boulder Canyon, and Pick-Sloan, whose power and energy is marketed by Western.

[2] Deletions of Certain Outdated or Nonessential Regulations, *et al.*, 57 FR 21730 (May 22, 1992), III FERC Stats. & Regs. ¶ 30,943 (1992).

[3] The PMAs include the Alaska, Southeastern and Southwestern Power Marketing Administrations, as well as Western.

The Bonneville Power Administration (Bonneville) is also a PMA, but its rate filings are also governed by additional Commission regulations. Compare 18 CFR 300.1(a) (making requirements applicable to all PMA's including Bonneville) with 18 CFR 300.10(a)(3)(ii), .10(b)(1), .10(c)(5), .14, .20, .21 (specifying additional requirements applicable only to Bonneville's rate filings).

[4] The request for a stay is premised on the need for notice and comment. As described below, however, there was and is no such need. Accordingly, the request for a stay will be denied.

[5] See 42 U.S.C. 7152 (1988).

[6] See DOE Delegation Order No. 0204–108, 48 FR 55664 (1983), amended, 51 FR 19744 (1986), further amended, 56 FR 41835 (1991). This delegation of authority also grants the Commission authority to review the rates of the Alaska, Southeastern and Southwestern Power Marketing Administrations. The Commission is here focusing on Western's ratemaking because that is the gravamen of CREDA's concern. However, what is stated as to the Commission's review of Western's ratemaking is also true of the Commission's review of Western's ratemaking is also true of the Commission's review of the other PMAs' ratemaking.

[7] 56 FR at 41836. The delegation of authority further provides that, with certain exceptions not here applicable, the Commission:

shall reject [Western's] decisions * * * *only* if the Commission finds them to be arbitrary, capricious, or in violation of the law.

Id. (emphasis added). While CREDA implies that this language provides a separate and independent basis for review of Western's rates, CREDA Request for Rehearing at 9–10, that is not the case. While the Commission is authorized to reject rates that are "arbitrary, capricious, or in violation of the law," the scope of the Commission's review is expressly constrained to the three matters identified in the text above. If the proposed rates are not, for example, the lowest possible to customers consistent with sound business principles, the rates can be rejected.

appellate tribunal.[8] But the delegation of authority limits the Commission's review of Western's rates. The delegation of authority does not provide for Commission review of Western's procedures. Accordingly, given that the Commission cannot exceed the scope of the authority delegated to it, the Commission cannot review the procedures by which Western develops its record.[9]

CREDA cites to *United States* v. *City of Fulton*, 475 U.S. 657, 663 (1986), which, in turn, cites to earlier Commission language stating that the Commission's review function in confirmation and approval cases is to determine from the record before it "that due process requirements have been met and that the Administrator's program of rate schedules and the decision of the [Assistant Secretary] are rational and consistent with the statutory standards."[10]

The Commission notes that when the Commission issued its earlier order containing the language just quoted, its review authority was prescribed by a different delegation order than the current delegation order. The earlier delegation order contained none of the limiting language that the current delegation order contains.[11] As noted above, the current delegation order limits the Commission's review of Western's rates to the criteria listed above. Accordingly, even if the Commission had in the past, under a previous delegation of authority, viewed its role as overseeing Western's hearing requirements, it can no longer do so. The deletion of the regulation in question is thus merely a recognition of the Commission's current, limited review authority.

CREDA also notes that section 553 of the APA, section 501 of the DOE Organization Act, and DOE's regulations require Western to provide notice and opportunity to comment on a proposed rate to ensure public participation in the rate's development. This is true, but irrelevant to our inquiry here. The Commission is not the proper forum in which to enforce either APA or DOE procedural requirements for Western's ratemaking, because, as explained above, the delegation of authority precludes the Commission from considering whether Western has complied with such procedural requirements. The Commission can only determine whether the rates that Western proposes, and the Assistant Secretary confirms on an interim basis, satisfy the criteria for final Commission approval expressly provided in the delegation of authority.[12]

The Commission can probe the assumptions and projections that Western uses in developing the rate components that are subject to Commission review. But the delegation of authority does not authorize the Commission to examine the procedures by which Western developed the record upon which it bases those assumptions and projections.

CREDA also faults the Commission for citing *Alcoa* in support of the removal of the regulation in question. CREDA points out that *Alcoa* involved Bonneville and not Western, and that the Commission reviews the proposed rates of the two PMAs under different authorities.[13] Upon further consideration, we agree with CREDA that *Alcoa* does not apply. But, as we explain above, the Commission's current delegation authority is sufficiently limited that the Commission cannot review Western's procedures.

CREDA next argues that the Commission should have provided notice and an opportunity for comment before deleting the requirement that a PMA must include a procedural history with the record that it files with the Commission. We disagree. CREDA bases its argument on its assertion that "Order No. 541 sharply deviates from existing policy and substantially impacts interested parties."[14] But CREDA is mistaken in its assertion that in Order No. 541 the Commission changed its policy. Far from deviating from existing policy, the deletion of the regulation in question was merely a comparatively minor procedural change implementing existing policy. The Commission has repeatedly observed that it does not review the procedures that a PMA such as Western uses to develop the record that it files with the Commission.[15] The removal of the regulation in question was thus neither "a radical change in [the Commission's] review policy of PMA rates[,]"[16] nor "a significant change in longstanding Commission policy[,]"[17] as CREDA charges. And the Commission has not "suddenly lost the authority to review the procedural history of PMA rate development,"[18] as CREDA surmises. Rather, as discussed above, the Commission does not have the authority to review the procedural history of PMA ratemaking, and does not do so.

Moreover, notice and an opportunity for comments are not required under the APA when an agency for good cause finds that notice and an opportunity for comments are impracticable, unnecessary, or contrary to the public

[8] CREDA Request for Rehearing at 9. See, e.g., United States Department of Energy—Western Area Power Administration (Salt Lake City Area Integrated Projects), 60 FERC ¶ 61,002 at 61,010 (1992) ("The Commission's policy in reviewing PMA rates under the * * * [delegation of authority] has been to perform the function of an appellate tribunal.").

[9] CREDA suggests that the delegation order provides for Commission review of Western's procedures: "[T]here are numerous procedural due process requirements in PMA rate development which, according to the Delegation Order * * *, the Commission must ensure that the PMA has followed prior to approving its rate." CREDA Request for Rehearing at 11. Although CREDA cites to no particular language that expressly provides for such review—because there is none—CREDA's subsequent discussion (referencing section 553 of the APA, *infra*, section 501(b) of the DOE Organization Act, 42 U.S.C. 7191(b) (1988), and DOE's regulations, 10 CFR 903 indicates that CREDA is relying on language in the delegation order that states:

> The Commission may reject decisions that are not in accord with (a) the standards set forth in DOE Order No. RA6120.2, or any revisions or modifications to such standards, adopted pursuant to the Administrative Procedure Act (5 U.S.C. 551 *et seq.*) and the Department of Energy Organization Act (42 U.S.C. 7191), and (b) the standards set forth in any interagency agreement between the Administrator and the power generating agency that is applicable.

57 FR at 41836. However, this language on its face does not provide for Commission review of Western's procedures in developing proposed rates. Rather, the language refers to the standards in DOE Order No. RA6120.2 and to revisions or modifications to such standards adopted pursuant to the APA and the DOE Organization Act. We add that the standards in DOE Order No. RA6120.2, referred to in the delegation order, are accounting, financial reporting, and ratemaking standards applicable to the PMAs.

[10] CREDA Request for Rehearing at 10–11 (citing City of Fulton, *supra*, in turn citing U.S. Secretary of Energy, Bonneville Power Administration, 13 FERC ¶ 61,157 at 61,339 (1981)

[11] Compare DOE Delegation Order No. 0204–33, 43 FR 60636 (1978) (published at 1 FERC Stats. & Regs. ¶ 9907) and 13 FERC at 61,337 with *supra* notes 6–7 and accompanying text. Indeed, the current delegation order was not issued until 1983, while the Commission order referred to by the Supreme Court and thus ultimately relied on by CREDA was issued in 1980.

[12] See *supra* note 7 and accompanying text. CREDA states that deletion of the regulation in question "irrevocably deprives CREDA of its right to review of * * * [procedural] issues under the * * * [delegation of authority]." CREDA Request for Rehearing at 19. The delegation of authority gives the Commission no right to review Western's procedures. However, if Western does not conform to the APA or to DOE's procedural requirements, CREDA would be free to seek review of Western's actions in an appropriate judicial forum.

[13] The Commission reviews Bonneville's proposed rates under the Pacific Northwest Electric Power Planning and Conservation Act, 16 U.S.C. 839, *et seq.* (1988). The Commission reviews Western's proposed rates under DOE Delegation Order No. 0204–108, *supra* note 6.

[14] CREDA Request for Rehearing and at 19; see also id. at 13 ("[Order No. 541] deviates sharply from the Commission's longstanding conception of its review obligations under the * * * [delegation of authority]").

[15] See, e.g., 60 FERC at 61,009–10 & n.16.

[16] CREDA Request for Rehearing at 16.

[17] *Id.* at 16.

[18] *Id.* at 16.

interest.[19] The rule in question, providing for the filing of a procedural history, goes to matters beyond the scope of the Commission's review authority under the current delegation order, and, therefore, there was no necessity for notice and an opportunity for comments under the APA.[20]

The Commission orders:

(A) CREDA's request for rehearing is hereby denied.

(B) CREDA's request that the Commission stay the effectiveness of Order No. 541 and provide for notice and an opportunity for comments is hereby denied.

By the Commission.

Lois D. Cashell,

Secretary.

PENSION BENEFIT GUARANTY CORPORATION

29 CFR Part 2619

Valuation of Plan Benefits in Single-Employer Plans; Amendment Adopting Additional PBGC Rates

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Final rule.

SUMMARY: This amendment to the regulation on Valuation of Plan Benefits in Single-Employer Plans contains the interest rates and factors for the period beginning January 1, 1993. The use of these interest rates and factors to value benefits is mandatory for some terminating single-employer plans and optional for others. The Pension Benefit Guaranty Corporation adjusts the interest rates and factors periodically to reflect changes in financial and annuity markets. This amendment adopts the rates and factors applicable to plans that terminate on or after January 1, 1993, which will remain in effect until the PBGC issues new interest rates and factors.

EFFECTIVE DATE: January 1, 1993.

FOR FURTHER INFORMATION CONTACT: Harold J. Ashner, Assistant General Counsel, Office of the General Counsel, Code 22500, Pension Benefit Guaranty Corporation, 2020 K Street, NW., Washington DC 20006, 202-778-8850 (202-778-8859 for TTY and TDD only). These are not toll-free numbers.

SUPPLEMENTARY INFORMATION: The Pension Benefit Guaranty Corporation's ("PBGC's") regulation on Valuation of Plan Benefits in Single-Employer Plans (29 CFR part 2619) sets forth the methods for valuing plan benefits of terminating single-employer plans covered under Title IV of the Employee Retirement Income Security Act of 1974, as amended ("ERISA"). Under ERISA section 4041(c), all plans wishing to terminate in a distress termination must value guaranteed benefits and "benefit liabilities", i.e., all benefits provided under the plan as of the plan termination date, using the formulas set forth in part 2619, subpart C. (Plans terminating in a standard termination may, for purposes of the Standard Termination Notice filed with PBGC, use these formulas to value benefit liabilities, although this is not required.) In addition, when the PBGC terminates an underfunded plan involuntarily pursuant to ERISA section 4042(a), it uses the subpart C formulas to determine the amount of the plan's underfunding.

Appendix B in part 2619 sets forth the interest rates and factors that are to be used in the formulas contained in the regulation. Because these rates and factors are intended to reflect current conditions in the financial and annuity markets, it is necessary to update the rates and factors periodically.

The rates and factors currently in use have been in effect since December 1, 1992. This amendment adds to Appendix B a new set of interest rates and factors for valuing benefits in plans that terminate on or after January 1, 1993, which set reflects a decrease of ¼ percent in the immediate interest rate from 6 percent to 5¾ percent.

Generally, the interest rates and factors will be in effect for at least one month. However, any published rates and factors will remain in effect until such time as the PBGC publishes another amendment changing them. Any change in the rates normally will be published in the **Federal Register** by the 15th of the month preceding the effective date of the new rates or as close to that date as circumstances permit.

The PBGC has determined that notice and public comment on this amendment are impracticable and contrary to the public interest. This finding is based on the need to determine and issue new interest rates and factors promptly so that the rates can reflect, as accurately as possible, current market conditions.

Because of the need to provide immediate guidance for the valuation of benefits in plans that will terminate on or after January 1, 1993, and because no adjustment by ongoing plans is required by this amendment, the PBGC finds that good cause exists for making the rates set forth in this amendment effective less than 30 days after publication.

The PBGC has determined that this is not a "major rule" under the criteria set forth in Executive Order 12291, because it will not result in an annual effect on the economy of $100 million or more, a major increase in costs for consumers or individual industries, or significant adverse effects on competition, employment, investment, productivity, or innovation.

List of Subjects in 29 CFR Part 2619

Employee benefit plans, Pension insurance, and Pensions.

In consideration of the foregoing, part 2619 of chapter XXVI, title 29, Code of Federal Regulations, is hereby amended as follows:

PART 2619 [AMENDED]

1. The authority citation for part 2619 continues to read as follows:

Authority: 29 U.S.C. 1301(a), 1302(b)(3), 1341, 1344, and 1362 (1988).

2. Rate Set 101 of Appendix B is revised and Rate Set 102 of Appendix B is added to read as follows. The introductory text is republished for the convenience of the reader and remains unchanged.

APPENDIX B—INTEREST RATES AND QUANTITIES USED TO VALUE IMMEDIATE AND DEFERRED ANNUITIES

In the table that follows, the immediate annuity rate is used to value immediate annuities, to compute the quantity "Gy" for deferred annuities and to value both portions of a refund annuity. An interest rate of 5% shall be used to value death benefits other than the decreasing term insurance portion of a refund annuity. For deferred annuities, k_1, k_2, k_3, n_1, and n_2 are defined in § 2619.45.

---

[19] 5 U.S.C. 553(b)(3)(B) (1988).

[20] To the extent that there may be a particular reason in a particular case to know, for example, whether a particular issue had been raised before WAPA, see CREDA Request for Rehearing at 14–15, the Commission still retains the ability to obtain that information. 18 CFR 300.10(h). However, that is a far cry from the routine filing of an extensive procedural history in every case—which is what CREDA seeks, when CREDA argues that the Commission should not delete 18 CFR 300.10(f)(2)(i).

Rate set	For plans with a valuation date		Immediate annuity rate (percent)	Deferred annuities				
	On or after	Before		k_1	k_2	k_3	n_1	n_2
101	12-1-92	1-1-93	6.00	1.0525	1.0400	1.0400	7	8
102	1-1-93		5.75	1.0500	1.0400	1.0400	7	8

Issued in Washington, DC, on this 8th day of December, 1992.

James B. Lockhart III,

Executive Director, Pension Benefit Guaranty Corporation.

BILLING CODE 7708-01-M

29 CFR Part 2619

Valuation of Plan Benefits in Single-Employer Plans; Expected Retirement Age

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Final rule.

SUMMARY: This rule amends the Pension Benefit Guaranty Corporation's regulation on Valuation of Plan Benefits in Single-Employer Plans (29 CFR part 2619) by adding a new Table I–93 to appendix D. Table I–93 applies to any plan being terminated either in a distress termination or involuntarily by the PBGC, with a valuation date falling in 1993, and is used to determine expected retirement ages for plan participants. This Table is needed in order to compute the value of early retirement benefits and, thus, the total value of benefits under the plan.

EFFECTIVE DATE: January 1, 1993.

FOR FURTHER INFORMATION CONTACT: Renae R. Hubbard, Special Counsel, Office of the General Counsel (22500), Pension Benefit Guaranty Corporation, 2020 K Street, NW., Washington, DC 20006; 202–778–8850 (202–778–8859 for TTY and TDD). (These are not toll-free numbers.)

SUPPLEMENTARY INFORMATION: The regulation of the Pension Benefit Guaranty Corporation ("PBGC") on Valuation of Plan Benefits in Single-Employer Plans (29 CFR part 2619) sets forth the methods for valuing plan benefits of terminating single-employer plans covered under Title IV of the Employee Retirement Income Security Act of 1974, as amended ("ERISA"). Under ERISA section 4041(c), plans wishing to terminate in a distress termination generally must value guaranteed benefits and benefit liabilities under the plan using formulas set forth in part 2619, subpart C. (Plans terminating in a standard termination may, for purposes of the Standard Termination Notice filed with PBGC, use these formulas to value benefit liabilities, although this is not required.) In addition, when the PBGC terminates an underfunded plan involuntarily pursuant to ERISA Section 4042(a), it uses the subpart C formulas to determine the amount of the plan's underfunding.

Under § 2619.46, early retirement benefits are valued based on the annuity starting date, if a retirement date has been selected, or the expected retirement age, if the annuity starting date is not known on the valuation date. Subpart D of part 2619 sets forth rules for determining the expected retirement ages for plan participants entitled to early retirement benefits. Appendices D and E of part 2619 contain tables and examples to be used in determining the expected early retirement ages.

There are two sets of tables in appendix D. The first set, Selection of Retirement Rate Category (I–79 through I–92), is used to determine whether a participant has a low, medium, or high probability of retiring early. The second set of tables, Expected Retirement Ages for Individuals in the Low/Medium/High Categories (II–A, II–B, and II–C), is used to determine the expected retirement age after the probability of early retirement has been determined.

The first set of tables determines the probability of early retirement based on the year a participant would reach normal retirement age and the participant's monthly benefit at normal retirement age. The second set of tables establishes, by probability category, the expected retirement age based on both the earliest age a participant could retire under the plan and the normal retirement age under the plan. This expected retirement age is used to compute the value of the early retirement benefit and, thus, the total value of benefits under the plan.

Tables I–79 through I–92 in appendix D establish retirement rate categories for the calendar years 1979 through 1992. The table for each year applies only to plans with valuation dates in that year. This document amends appendix D to add Table I–93 in order to provide an updated correlation, appropriate for calendar year 1993, between the amount of a participant's benefit and the probability that the participant will elect early retirement. Table I–93 will be used to value benefits in plans with valuation dates that occur during calendar year 1993.

The PBGC has determined that notice of and public comment on this rule are impracticable and contrary to the public interest.

Plan administrators need to be able to estimate accurately the value of plan benefits as early as possible before initiating the termination process. For that purpose, if a plan has a valuation date in 1993, the plan administrator needs the updated table being promulgated in this rule. Accordingly, the public interest is best served by issuing this table expeditiously, without an opportunity for notice and comment, to allow as much time as possible to estimate the value of plan benefits with the proper table for plans with valuation dates in early 1993. Moreover, because of the need to provide immediate guidance for the valuation of benefits under such plans, and because no adjustment by ongoing plans is required by this amendment, the PBGC finds that good cause exists for making this amendment to the regulation effective less than 30 days after publication.

The PBGC has determined that this is not a "major rule" under the criteria set forth in Executive Order 12291 because it will not result in an annual effect on the economy of $100 million or more, a major increase in costs for consumers or individual industries, or significant adverse effects on competition, employment, investment, productivity or innovation.

Because no general notice of proposed rulemaking is required for this regulation, the Regulatory Flexibility Act of 1980 does not apply (5 U.S.C. 601(2)).

List of Subjects in 29 CFR Part 2619

Employee benefit plans, Pension insurance, Pensions.

In consideration of the foregoing, appendix D to part 2619 of subchapter C of chapter XXVI of title 29, Code of Federal Regulations, is hereby amended as follows:

PART 2619—[AMENDED]

1. The authority citation for part 2619 continues to read as follows:

Authority: 29 U.S.C. 1301(a), 1302(b)(3), 1341, 1344, and 1362.

2. Appendix D to part 2619 is amended by adding Table I–93 as follows:

Appendix D—Tables Used to Determine Expected Retirement Age

* * * * *

TABLE I–93.—SELECTION OF RETIREMENT RATE CATEGORY

[For plans with valuation dates after December 31, 1992, and before January 1, 1994]

Participant reaches NRA in year—	Participant's retirement rate category is—			
	Low[1] if monthly benefit at NRA is less than—	Medium[2] if monthly benefit at NRA is—		High[3] if monthly benefit at NRA is greater than—

BILLING CODE 7708–01–M

29 CFR Part 2621

Limitation on Guaranteed Benefits in Single-Employer Plans

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Final rule.

SUMMARY: This rule amends appendix A of the Limitation on Guaranteed Benefits regulation of the Pension Benefit Guaranty Corporation ("PBGC") by adding the maximum guaranteeable pension benefit that may be paid by the PBGC with respect to a plan participant in a single-employer pension plan that terminates in 1993. The maximum guaranteeable benefit is computed in accordance with the formula in section 4022(b)(3) of the Employee Retirement Income Security Act of 1974, which provides that the maximum guaranteeable benefit is based on the contribution and benefit base determined under section 230 of the Social Security Act. The latter number is adjusted annually, and that adjustment automatically changes the dollar amount of the maximum guaranteeable benefit paid by PBGC. The effect of this amendment is to advise plan participants and beneficiaries of the increased maximum guaranteeable benefit for 1993.

EFFECTIVE DATE: January 1, 1993.

FOR FURTHER INFORMATION CONTACT: Renae R. Hubbard, Special Counsel, Office of the General Counsel, Code 22500, Pension Benefit Guaranty Corporation, 2020 K Street, NW., Washington, DC 20006, 202–778–8850 (202–778–8859 for TTY and TTD). These are not toll-free numbers.

SUPPLEMENTARY INFORMATION: Section 4022(b) of the Employee Retirement Income Security Act of 1974, *as amended*, ("ERISA") provides for certain limitations on benefits guaranteed by the Pension Benefit Guaranty Corporation ("PBGC") in terminating single-employer pension plans covered under Title IV of ERISA. One of the limitations set forth in section 4022(b)(3) is a dollar ceiling on the amount of the monthly benefit that may be paid to a plan participant by the PBGC. Subparagraph (B) of section 4022(b)(3) provides that the amount of monthly benefit payable in the form of a life annuity beginning at age 65 shall not exceed "$750 multiplied by a fraction, the numerator of which is the contribution and benefit base (determined under section 230 of the Social Security Act) in effect at the time the plan terminates and the denominator of which is such contribution and benefit base in effect in calendar year 1974 ($13,200)". This formula is also set forth in § 2621.3(a)(2) of the PBGC's regulation entitled Limitation on Guaranteed Benefits in Single-Employer Plans (29 CFR part 2621).

The Social Security Amendments of 1977 added special increases to the contribution and benefit base. However, the amended Social Security Act specifically states that, for the purpose of section 4022(b)(3)(B) of ERISA, the contribution and benefit base for each year after 1976 will be the base that would have been determined for each year if the law in effect immediately before the amendment had remained in effect without change (the "old-law contribution and benefit base"). 42 U.S.C. 430(d) (1982). Section 10208 of the Omnibus Budget Reconciliation Act of 1989 (Public Law 101–239, enacted December 19, 1989) ("OBRA '89") amended section 230 of the Social Security Act to provide for the inclusion of certain deferred compensation in the determination of the contribution and benefit base for 1990 and future years. Each year the Social Security Administration determines, and notifies the PBGC of, the old-law contribution and benefit base to be used by the PBGC under these provisions.

The PBGC has been notified by the Social Security Administration that, under section 230 of the Social Security Act as amended by OBRA '89, $42,900 is the old-law contribution and benefit base that is to be used to calculate the PBGC maximum guaranteeable benefit for 1993. Accordingly, the formula under section 4022(b)(3)(B) of ERISA and 29 CFR § 2621.3(a)(2) is: $750 multiplied by $42,900/$13,200. Thus, the maximum monthly benefit guaranteeable by the PBGC in 1993 is $2,437.50 per month in the form of a life annuity beginning at age 65. If a benefit is payable in a different form or begins at a different age, the maximum guaranteeable amount will be the actuarial equivalent of $2,437.50 per month.

Appendix A to part 2621 lists the maximum guaranteeable benefit payable by the PBGC to participants in single-employer plans that have terminated in each year from 1974 through 1992. This amendment updates appendix A for plans that terminate in 1993.

Because the maximum guaranteeable benefit is determined according to the formula in section 4022(b)(3)(B) of ERISA, and this amendment makes no change in its method of calculation but simply lists the 1993 maximum guaranteeable benefit amount for the public's knowledge, general notice of proposed rulemaking is not required. Moreover, because the 1993 maximum guaranteeable benefit is effective, under the statute, at the time that the Social Security contribution and benefit base is effective, *i.e.*, January 1, 1993, and is not dependent on the issuance of this regulation, the PBGC finds that good cause exists for making this amendment effective less than 30 days after publication (5 U.S.C. 553).

The PBGC has determined that this is not a "major rule" under the criteria set forth in Executive Order 12291, because it will not result in an annual effect on the economy of $100 million or more, a major increase in costs for consumers or individual industries, or significant adverse effects on competition, employment, investment, productivity, or innovation.

Because no general notice of proposed rulemaking is required for this regulation, the Regulatory Flexibility Act of 1980 does not apply (5 U.S.C. 601(2)).

List of Subjects in 29 CFR Part 2621

Employee benefit plans, Pension insurance, and Pensions.

In consideration of the foregoing, part 2621 of subchapter C, chapter XXVI, title 29, Code of Federal Regulations, is hereby amended as follows:

PART 2621—LIMITATION ON GUARANTEED BENEFITS IN SINGLE-EMPLOYER PLANS

1. The authority citation for part 2621 continues to read as follows:

Authority: 29 U.S.C. 1302, 1322, 1322b.

2. Appendix A to part 2621 is amended by adding a new entry to read as follows. The introductory text is republished for the convenience of the reader and remains unchanged.

Appendix A to Part 2621—Maximum Guaranteeable Monthly Benefit

The following table lists by year the maximum guaranteeable monthly benefit payable in the form of a life annuity commencing at age 65 as described by § 2621.3(a)(2) to a participant in a plan that terminated in that year:

Year	Maximum guaranteeable monthly benefit
• • • • •	
1993	2,437.50

Issued at Washington, DC this 8th day of December, 1992.

James B. Lockhart III,

Executive Director, Pension Benefit Guaranty Corporation.

BILLING CODE 7708-01-M

29 CFR Part 2676

Valuation of Plan Benefits and Plan Assets Following Mass Withdrawal—Interest Rates

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Final rule.

SUMMARY: This is an amendment to the Pension Benefit Guaranty Corporation's regulation on Valuation of Plan Benefits and Plan Assets Following Mass Withdrawal (29 CFR part 2676). The regulation prescribes rules for valuing benefits and certain assets of multiemployer plans under sections 4219(c)(1)(D) and 4281(b) of the Employee Retirement Income Security Act of 1974. Section 2676.15(c) of the regulation contains a table setting forth, for each calendar month, a series of interest rates to be used in any valuation performed as of a valuation date within that calendar month. On or about the fifteenth of each month, the PBGC publishes a new entry in the table for the following month, whether or not the rates are changing. This amendment adds to the table the rate series for the month of January 1993.

EFFECTIVE DATE: January 1, 1993.

FOR FURTHER INFORMATION CONTACT: Deborah C. Murphy, Attorney, Office of the General Counsel (22500), Pension Benefit Guaranty Corporation, 2020 K Street, NW., Washington, DC 20006; 202-778-8820 (202-778-1958 for TTY and TDD). (These are not toll-free numbers.)

SUPPLEMENTARY INFORMATION: The PBGC finds that notice of and public comment on this amendment would be impracticable and contrary to the public interest, and that there is good cause for making this amendment effective immediately. These findings are based on the need to have the interest rates in this amendment reflect market conditions that are as nearly current as possible and the need to issue the interest rates promptly so that they are available to the public before the beginning of the period to which they apply. (See 5 U.S.C. 553(b) and (d).) Because no general notice of proposed rulemaking is required for this amendment, the Regulatory Flexibility Act of 1980 does not apply (5 U.S.C. 601(2)).

The PBGC has also determined that this amendment is not a "major rule" within the meaning of Executive Order 12291 because it will not have an annual effect on the economy of $100 million or more; or create a major increase in costs or prices for consumers, individual industries, or geographic regions; or have significant adverse effects on competition, employment, investment, or innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

List of Subjects in 29 CFR Part 2676

Employee benefit plans, and Pensions.

In consideration of the foregoing, part 2676 of subchapter H of chapter XXVI of title 29, Code of Federal Regulations, is amended as follows:

PART 2676—VALUATION OF PLAN BENEFITS AND PLAN ASSETS FOLLOWING MASS WITHDRAWAL

1. The authority citation for part 2676 continues to read as follows:

Authority: 29 U.S.C. 1302(b)(3), 1399(c)(1)(D), and 1441(b)(1).

2. In § 2676.15, paragraph (c) is amended by adding to the end of the table of interest rates the new entries to read as follows:

§ 2676.15 Interest.

* * * * *

(c) *Interest Rates.*

For valuation dates occurring in the month:	The values for i_t are:															
	i_1	i_2	i_3	i_4	i_5	i_6	i_7	i_8	i_9	i_{10}	i_{11}	i_{12}	i_{13}	i_{14}	i_{15}	i_n

BILLING CODE 7708-01-M

DEPARTMENT OF VETERANS AFFAIRS

38 CFR Part 3

RIN 2900-AF93

Aggravation of Preservice Disability

AGENCY: Department of Veterans Affairs.

ACTION: Final rule.

SUMMARY: The Department of Veterans Affairs (VA) has amended its adjudication regulations concerning aggravation of preservice disability and the presumption of soundness upon service entry. The intended effect of this amendment is to bring VA regulations into conformance with the statutory provisions pertaining to presumption of soundness.

EFFECTIVE DATE: This amendment is effective May 1, 1974, the date provided by Public Law 93-295.

FOR FURTHER INFORMATION CONTACT: John Bisset, Jr., Consultant, Regulations Staff, Compensation and Pension Service, Veterans Benefits Administration, Department of Veterans Affairs, 810 Vermont Avenue, NW., Washington, DC 20420, (202) 233-3005.

SUPPLEMENTARY INFORMATION: In a memorandum dated May 18, 1992, VA's Office of General Counsel pointed out that parts of 38 CFR 3.306 are outdated since they fail to reflect the changes in law which made the wartime aggravation criteria applicable to peacetime service after December 31, 1946. In 1966, Congress added section 1137 to title 38, United States Code, to apply the wartime presumption of sound condition upon entry onto active duty to all veterans having service after January 31, 1955 (See section 7 of Pub. L. 89-358, 80 Stat. 12, 27). In 1974, section 205 of the Veterans Disability Compensation and Survivor Benefits Act of 1974 (Pub. L. 93-295, 88 Stat. 180, 183), amended 38 U.S.C. 1137 to strike out the date January 31, 1955, and substitute December 31, 1946. As a result of this amendment, the provisions of 38 U.S.C. 1132, which provide a less generous presumption of soundness for veterans with peacetime service, do not apply to veterans with service after December 31, 1946. Rather, the same presumption of soundness for wartime veterans applies to these veterans. No conforming amendments were made to 38 CFR 3.306, however, and we are now correcting that oversight.

VA is issuing a final rule to amend the provisions of 38 CFR 3.306. This amendment is necessary to make the regulatory provisions concerning peacetime service after December 31, 1946, and the presumption of soundness conform with the statute. Because this amendment implements statutory changes, publication as a proposal for public notice and comment is unnecessary.

Since a notice of proposed rulemaking is unnecessary and will not be published, this amendment is not a "rule" as defined in and made subject to the Regulatory Flexibility Act (RFA), 5 U.S.C. 601-602. In any case this regulatory amendment will not have a significant economic impact on a substantial number of small entities as they are defined in the RFA, 5 U.S.C. sections 601-612. This amendment will not directly affect any small entity.

In accordance with Executive Order 12291, Federal Regulation, the Secretary has determined that this regulatory amendment is non-major for the following reasons:

(1) It will not have an annual effect on the economy of $100 million or more.

(2) It will not cause a major increase in costs or prices.

(3) It will not have significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The Catalog of Federal Domestic Assistance program number is 64.109.

List of Subjects in 38 CFR Part 3

Administrative practice and procedure, Claims, Handicapped, Health care, Pensions, Veterans.

Approved October 6, 1992.

Anthony J. Principi,

Acting Secretary of Veterans Affairs.

For the reasons set out in the preamble, 38 CFR part 3 is amended as set forth below:

PART 3—ADJUDICATION

Subpart A—Pension, Compensation, and Dependency and Indemnity Compensation

1. The authority citation for part 3, subpart A, is revised to read as follows:

Authority: 38 U.S.C. 501(a).

§ 3.306 [Amended]

2. In § 3.306, remove the heading for paragraph (b) and insert, in its place, the heading "*Wartime service; peacetime service after December 31, 1946*"; remove the heading for paragraph (c), and insert, in its place the heading "*Peacetime service prior to December 7, 1941*".

BILLING CODE 8320-01-M

38 CFR Part 3

RIN 2900-AD97

Dependency and Income

AGENCY: Department of Veterans Affairs.

ACTION: Final rule.

SUMMARY: The Department of Veterans Affairs (VA) has amended its adjudication regulations regarding dependency, income and estate. The amendments are required to implement both legislation removing certain income sources from consideration in entitlement determinations and opinions of the VA General Counsel dealing with income computations. The intended results are to ensure that the income sources identified by legislation are excluded from income computations and that VA regulations provide adequate guidelines for determining countable income.

EFFECTIVE DATE: These changes are effective January 14, 1993.

FOR FURTHER INFORMATION CONTACT: Steven Thornberry, Consultant, Regulations Staff, Compensation and Pension Service, Veterans Benefits Administration, 810 Vermont Avenue, NW., Washington, DC 20420, telephone (202) 233-3005.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of June 5, 1991, at pages 25645 through 25649, VA published proposed rules specifying sources of income to be excluded from income or net worth computations under VA pension and parents' dependency and indemnity compensation (DIC) programs, and clarifying the guidelines established for certain income computations. The rules were proposed to implement legislation excluding specific income sources from entitlement determinations and opinions of the VA General Counsel dealing with income computations. Interested parties were invited to submit written comments on or before July 5, 1991. One comment was received, from the Paralyzed Veterans of America.

The commenter expressed concern that the amendments to 38 CFR 3.271(a)

and 3.273(d) indicate a change in VA's method of computing income, in that unanticipated "irregular" income would be counted from the beginning of the 12-month annualization period in which it is received rather than from actual date of receipt. He pointed out that this would unreasonably require claimants to project receipt of unanticipated income in order to avoid overpayments. VA does not concur with the commenter's interpretation or conclusions.

A basic concept of improved pension is annualization. VA computes a beneficiary's entitlement on the basis of estimated countable income over a given 12-month annualization period (not necessarily a calendar year), and projects the amount of pension payable for that same period. Each beneficiary is required to report actual income received during the annualization period by yearly submission of an eligibility verification report (EVR). The pension award then will be adjusted, if necessary, on the basis of actual income received during the annualization period.

However, when a claimant receives unanticipated income subsequent to the initial award of pension benefits, VA adjusts payments from the first of the month following the month in which the new income is initially received, not from the beginning of the current annualization period (38 CFR 3.660(a)(2)). This procedure, commonly called the "end-of-the-month (EOM) rule, " represents VA's established policy since the inception of improved pension on January 1, 1979.

These amendments do not affect the EOM rule. The definitions of recurring, irregular, and nonrecurring income in § 3.271(a) provide regulatory guidance for classifying income types, thereby promoting consistency in entitlement determinations. Section 3.273(d) provides a regulatory basis for computing recurring and irregular income to determine countable income for VA purposes. Introductory text added by this change specifically states that changes in benefit payments based on the provisions of that section will be determined under the provisions of § 3.31 or § 3.660, whichever is applicable. In the situation instanced by PVA, § 3.660 would be for application. Nonetheless, we understand the concerns of the commenter and have added language to 3.271(a) and 3.273(d) to clarify our intent.

VA regulations require beneficiaries to report changes in income or other circumstances that could affect benefit entitlement (38 CFR 3.660(a)(1)). VA acts as quickly as possible on evidence indicating entitlement changes, but it is not possible to avoid creation of overpayments altogether. We do not expect beneficiaries to project receipt of income that is truly unanticipated, but it is to their advantage to make reasonable estimates of income from sources that previously have provided irregular income and to furnish timely reports of newly acquired income. Whereas adjustments for unanticipated income are subject to application of the EOM rule, an adjustment to previously underreported income is made from the beginning of the annualization period for which the incorrect income had been reported. The amendments to §§ 3.271 and 3.273 will not have the effect of increasing either the number or amounts of overpayments. We foresee no adverse impact as anticipated by the commenter.

VA appreciates the comment received in response to the proposed regulations, which now are adopted with the following technical corrections, in addition to the changes to § 3.271(a) and § 3.273(d) mentioned above: we are subdividing § 3.261 into paragraphs (a), (b), and (c) and including an omitted item of income to paragraph (a)(14); in item (28) of § 3.261(a) the rows designating inclusion to or exclusion from income have been interchanged; in the first sentence of § 3.262(l)(4), the words "surviving spouse" have been replaced by the word "parent"; references to § 3.263 (m) and (m)(2) have been corrected to § 3.262 (m) and (m)(2); we have rewritten § 3.262 (r) and (s) to clarify the income exclusions there referenced; in the introductory text of § 3.660(b) the words "the following" have been replaced by "a"; the reference to 38 U.S.C. 5110(h) in the introductory text of § 3.660(b) has been moved to its proper place following § 3.660(b)(1).

Title I of Public Law 100–383, the Civil Liberties Act of 1988, provided redress in the amount of $20,000.00 to certain individuals of Japanese ancestry who were interned or relocated by the Federal government during WWII. The bill expressly provided that these payments shall not be included as income or resources for determining eligibility to benefits described in 31 U.S.C. 3803(c)(2)(C). A recent opinion of VA's General Counsel (O.G.C. *Prec. 3–92*) has held that for purposes of improved pension and parents' DIC, which are found in those chapters of title 38 U.S.C. referenced by the cited section of title 31, these payments are not countable as income or for net worth determinations. The opinion further stated that these payments are countable as income and net worth under 306 pension and old law pension. These benefits are no longer in force under title 38, but under the savings provision (section 306) of Public Law 95–588, which introduced improved pension. We are taking this opportunity to amend § 3.261, § 3.263, § 3.262, § 3.272, and § 3.275 to implement the law and the opinion of the General Counsel. Since parents' death compensation also is included within a chapter of title 38 referenced by title 31, our amendment will also reflect that these redress payments are not included for net worth purposes under that program. Since these amendments simply implement the provisions of Public Law 100–383, publication as a proposed rule for comment is not required.

The Secretary hereby certifies that these regulatory amendments will not have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act, 5 U.S.C. 601–612. The reason for this certification is that these amendments would not directly affect any small entities. Only VA beneficiaries could be directly affected. Therefore, pursuant to 5 U.S.C. 605(b), these amendments are exempt from the initial and final regulatory flexibility analysis requirements of sections 603 and 604.

In accordance with Executive Order 12291, Federal Regulation, the Secretary has determined that these regulatory amendments are non-major for the following reasons:

(1) They will not have an annual effect on the economy of $100 million or more.

(2) They will not cause a major increase in costs or prices.

(3) They will not have significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The Catalog of Federal Domestic Assistance program numbers are 64.104, 64.105, and 64.110.

List of Subjects in 38 CFR Part 3

Administrative practice and procedure, Claims, Handicapped, Health care, Pensions, Veterans.

Approved: October 30, 1992.

Anthony J. Principi,

Acting Secretary of Veterans Affairs.

For the reasons set forth in the preamble, 38 CFR Part 3 is amended to read as follows:

PART 3—ADJUDICATION

1. The authority citation for part 3, subpart A continues to read as follows:

Authority: 105 Stat. 386, 38 U.S.C. 501(a), unless otherwise noted.

§ 3.261 [Amended]

2. In § 3.261 remove the words "protected", "widows", and "Pub. L. 86–211" in the columnar headings and add, in their place, the words "old-law", "surviving spouses" and "section 306", respectively.

3. In § 3.261, the heading titled "Income" is designated as paragraph (a), an unnumbered category is added at the end of item (14), item (28) is revised, new items (35) and (36) are added, and new paragraphs (b) and (c) are added to read as follows:

§ 3.261 Character of income; exclusions and estates.

(a) *Income*

* * * * *

(14) * * *

Annuity under § 653, Pub. L. 100–456	Included	Included	Excluded	Excluded	§ 3.262(r)
* * *	*	*	*	*	*
(28) Reimbursement for casualty loss (Pub. L. 100–687).	Included	Excluded	Included	Included	§ 3.262(t)
Other fire insurance	Excluded	Excluded	Excluded	Excluded	§ 3.262(t)
* * *	*	*	*	*	*
(35) Agent Orange settlement payments	Excluded	Excluded	Excluded	Excluded	§ 3.262(s)
(36) Restitution to individuals of Japanese ancestry (Pub. L. 100–383).	Excluded	Excluded	Included	Included	§ 3.262(u)
(b) Deduction of Amounts Paid by Claimant:					
(1) Unusual medical expenses	Not authorized	Authorized	Not authorized	Authorized	§§ 3.262(b)(1), & (1)
(2) Veteran: just debts, expenses of last illness, and burial.	Not authorized	Authorized, except debts.	Not authorized	Authorized	§§ 3.262(m) & (o)
(3) Veteran's spouse or child: expenses of last illness and burial.	Not authorized	Not authorized	Not authorized	Authorized	§ 3.262(n)
(4) Parent's spouse: just	Not authorized	Authorized			§ 3.262(o)
(5) Prepayments on real property mortgages after death of spouse (Pub. L. 91–588).	Not authorized	Not authorized	Not authorized	Authorized	§ 3.262(k)(6)
(c) Corpus of estate	Considered conditionally.	Not considered	Not considered	Considered	§ 3.263

(Authority: Public Law 101–201).

4. In § 3.262 paragraphs (l)(1) through (l)(4) and the authority citation are revised and paragraphs (r), (s), (t), and (u), and their authority citations are added to read as follows:

§ 3.262 Evaluation of income.

* * * * *

(l) * * *

(1) *Veterans.* For the purpose of section 306 pension, there will be excluded unreimbursed amounts paid by the veteran for unusual medical expenses of self, spouse, and other relatives of the veteran in the ascending as well as descending class who are members or constructive members of the veteran's household and whom the veteran has a moral or legal obligation to support.

(2) *Surviving spouses.* For the purpose of section 306 pension, there will be excluded unreimbursed amounts paid by the surviving spouse for the unusual medical expenses of self, the veteran's children, and other relatives of the surviving spouse in the ascending as well as descending class who are members or constructive members of the surviving spouse's household and whom the surviving spouse has a moral or legal obligation to support.

(3) *Children.* For the purpose of section 306 pension, there will be excluded unreimbursed amounts paid by a child for the unusual medical expenses of self, parent, and brothers and sisters of the child.

(4) *Parents.* For dependency and indemnity compensation purposes there will be excluded unreimbursed amounts paid by the parent for the unusual medical expenses of self, spouse, and other relatives of the parent in the ascending as well as descending class who are members or constructive members of the parent's household and whom the parent has a moral or legal obligation to support. If the combined annual income of the parent and the parent's spouse is the basis for dependency and indemnity compensation, the exclusion is applicable to the combined annual income and extends to the unusual unreimbursed medical expenses of the spouse's relatives in the ascending as well as descending class who are members or constructive members of the household and whom the parent's spouse has a moral or legal obligation to support.

(Authority: 38 U.S.C. 1315(f)(3); Sec. 306, Pub. L. 95–588; 92 Stat. 2508)

* * * * *

(r) *Survivor benefit annuity.* For the purposes of old law pension and section 306 pension, there shall be excluded from computation of income annuity paid by the Department of Defense under the authority of section 653, Public Law 100–456 to qualified surviving spouses of veterans who died prior to November 1, 1953. (September 29, 1988)

(Authority: Sec. 653, Pub. L. 100–456; 102 Stat. 1991)

(s) *Agent Orange settlement payments.* In claims for pension and parents' dependency and indemnity income, there shall be excluded from computation of income payments received by any person in the case of In re Agent Orange Product Liability Litigation in the United States District Court for the Eastern District of New York (MDL No. 381). (January 1, 1989)

(Authority: Pub. L. 101–201, 103 Stat. 1795)

(t) *Reimbursement for casualty loss.* The following sources of reimbursements for casualty loss will not be considered as income in determining entitlement to benefits under the programs specified. Amounts to be excluded from computation in parens' dependency and indemnity compensation claims are limited to amounts of reimbursement which do not exceed the greater of the fair market value or the reasonable replacement cost of the property involved at the time immediately preceding the loss.

(1) Reimbursement for casualty loss of any kind in determining entitlement to parents' dependency and indemnity

compensation benefits. For purposes of paragraph (t) of this section, the term "casualty loss" means the complete or partial destruction of property resulting from an identifiable event of a sudden, unexpected or unusual nature.

(2) Proceeds from fire insurance in determining dependency of a parent for compensation purposes or in determining entitlement to old-law and section 306 pension benefits.

(Authority: 38 U.S.C. 1315(f))

(u) *Restitution to individuals of Japanese ancestry.* In claims for parents' death compensation and parents' dependency and indemnity compensation, there shall be excluded from income computation any payment made as restitution under Public Law 100–383 to individuals of Japanese ancestry who were interned, evacuated, or relocated during the period December 7, 1941, through June 30, 1946, pursuant to any law, Executive Order, Presidential proclamation, directive, or other official action respecting these individuals. (August 10, 1988)

(Authority: Sec. 105, Pub. L. 100–383; 102 Stat. 905)

§ 3.262 [Amended]

5. In § 3.262(g)(2), third sentence, remove the words "Where eligibility to pension is subject to determination under Public Law 86–211 (73 Stat. 432)" and add, in their place, the words "For purposes of section 306 pension".

6. In § 3.262(h), introducing text, second sentence, remove the word "widow" and add, in its place, the words "surviving spouse".

7. In § 3.262(j)(2), first and second sentences, remove the words "under Public Law 86–211 (73 Stat. 432)" and "under Public Law 86–211" and add the words "section 306" in front of the word "pension" wherever it appears.

8. In § 3.262(j)(3), remove the word "*protected*" in the paragraph heading and add, in its place, the word "*old-law*".

9. In § 3.262(k)(1), second sentence, remove the words "pension purposes under the provisions of Public Law 86–211 (73 Stat. 432)" and add, in their place, the words "section 306 pension purposes" and revise the authority citation to read "(Authority: Sec. 306, Public Law 95–588; 92 Stat. 2508)".

10. In § 3.262(k)(5) and (k)(6) remove the words "Public Law 86–211" and "Public Law 86–211 (73 Stat. 432)" wherever they appear, and add, in their place, the words "section 306 pension".

11. In § 3.262(m), introductory text, remove the words "Public Law 86–211 (73 Stat. 432)" and add, in their place, the words "section 306"; in paragraph (m)(1) remove the word "widow" and add, in its place, the words "surviving spouse" and remove the words "she, as wife,".

12. In § 3.262(m)(2) remove the word "widow" wherever it appears and add, in its place, the words "surviving spouse"; remove the word "his" where it appears, and add, in its place, the words "the veteran's"; and remove the words "for the expenses of his".

13. In § 3.262(m) the authority citation is revised to read

"(Authority: Sec. 306, Pub. L. 95–588; 92 Stat. 2508)".

14. In § 3.262(n), introductory text, remove the words "Public Law 86–211 (73 Stat. 432)", and add, in their place, the words "section 306"; in paragraph (n)(1) remove the words "him" and "his", and add, in their place, the words "the veteran" and "the veteran's"; in paragraph (n)(2), remove the words "wife or widow" and "her as wife or widow" and add, in their place, the words "spouse or surviving spouse", and "the spouse or surviving spouse", and revise the authority citation to read

"(Authority: Sec. 306, Pub. L. 95–588; 92 Stat. 2508)".

15. In § 3.262(o) the authority citation appearing at the end of the paragraph is revised to read

"(Authority: 38 U.S.C. 1315(f))".

16. In § 3.262(p) remove the words "the wife or husband" and add, in their place, the words "spouse or surviving spouse" and remove the words "widow, widower".

§ 3.263 [Amended]

17. In § 3.263(a) remove the words "widow, widower" wherever they appear and add, in their place, the words "surviving spouse".

18. In § 3.263 add paragraphs (e) and (f) and their authority citations to read as follows:

§ 3.263 Corpus of estate; net worth.

* * * * *

(e) *Agent Orange settlement payments.* There shall be excluded from the corpus of estate or net worth of a claimant any payment made from the Agent Orange Settlement Fund or any other fund established pursuant to the settlement in the In re Agent Orange product liability litigation, M.D.L. No. 381 (E.D.N.Y.). (January 1, 1989).

(Authority: Pub. L. 101–201, 103 Stat. 1795)

(f) *Restitution to individuals of Japanese ancestry.* In claims for parents' death compensation, there shall be excluded from the corpus of estate or net worth of a claimant any payment made as restitution under Public Law 100–383 to individuals of Japanese ancestry who were interned, evacuated, or relocated during the period December 7, 1941, through June 30, 1946, pursuant to any law, Executive order, Presidential proclamation, directive, or other official action respecting these individuals. (August 10, 1988)

(Authority: Sec. 105, Pub. L. 100–383; 102 Stat. 905)

19. In § 3.271 paragraphs (a) (1) through (3) are added, and paragraph (f) is amended by redesignating the introductory text as paragraph (f)(1) and adding paragraph (f)(2) to read as follows:

§ 3.271 Computation of income.

(a) * * *

(1) *Recurring income.* Recurring income means income which is received or anticipated in equal amounts and at regular intervals (e.g., weekly, monthly, quarterly, etc.), and which will continue throughout an entire 12-month annualization period. The amount of recurring income for pension purposes will be the amount received or anticipated during a 12-month annualization period. Recurring income which terminates prior to being counted for at least one full 12-month annualization period will be treated as nonrecurring income for computation purposes.

(2) *Irregular income.* Irregular income means income which is received or anticipated during a 12-month annualization period, but which is received in unequal amounts or at irregular intervals. The amount of irregular income for pension purposes will be the amount received or anticipated during a 12-month annualization period following initial receipt of such income.

(3) *Nonrecurring income.* Nonrecurring income means income received or anticipated on a one-time basis during a 12-month annualization period (e.g., an inheritance). Pension computations of income will include nonrecurring income for a full 12-month annualization period following receipt of the income.

* * * * *

(f) * * *

(2) When a claimed dependent is shown to have income which exceeds the additional amount of benefits payable based on the claimed dependency, but evidence requirements of § 3.204, § 3.205, § 3.209, or § 3.210 have not been met, the maximum annual rate of improved pension shall be determined without consideration of the claimed dependency. This amount

shall be reduced by an amount which includes the income of the unestablished dependent. Adjustments in computation of the maximum annual rate of improved pension shall occur following receipt of evidence necessary to establish the dependency.

(Authority: 38 U.S.C. 501(a))

* * * * *

20. In § 3.272 paragraph (d) and its authority citation are revised and paragraphs (n), (o), and (p), and their authority citations are added to read as follows:

§ 3.272 Exclusions from income.

* * * * *

(d) *Reimbursement for casualty loss.* Reimbursement of any kind for any casualty loss. The amount to be excluded is not to exceed the greater of the fair market value or the reasonable replacement cost of the property involved at the time immediately preceding the loss. For purposes of this paragraph, the term "casualty loss" means the complete or partial destruction of property resulting from an identifiable event of a sudden, unexpected or unusual nature.

(Authority: 38 U.S.C. 1503(a)(5))

* * * * *

(n) *Survivor benefit annuity.* Annuity paid by the Department of Defense under the authority of section 653, Public Law 100–456 to qualified surviving spouses of veterans who died prior to November 1, 1953. (September 29, 1988)

(Authority: Sec. 653, Pub. L. 100–456; 102 Stat. 1991)

(o) *Agent Orange settlement payments.* Payments received by any person in settlement of the case of In re Agent Orange product liability litigation in the United States District Court for the Eastern District of New York (M.D.L. No. 381). (January 1, 1989)

(Authority: Pub. L. 101–201, 103 Stat. 1795)

(p) *Restitution to individuals of Japanese ancestry.* Any payment made as restitution under Public Law 100–383 to individuals of Japanese ancestry who were interned, evacuated, or relocated during the period December 7, 1941, through June 30, 1946, pursuant to any law, Executive order, Presidential proclamation, directive, or other official action respecting these individuals. (August 10, 1988)

(Authority: Sec. 105, Pub. L. 100–383; 102 Stat. 905)

21. In § 3.273 add an introductory text, add a sentence at the end of paragraph (a), and add paragraph (d) to read as follows:

§ 3.273 Rate computation.

The commencement date of change in benefit payments based on rate computations under the provisions of this section will be determined under the provisions of § 3.31 or § 3.660.

(a) * * * Recomputation of rates due to changes in the maximum annual pension rate or rate of income following the initial date of entitlement are subject to the provisions of paragraph (b) of this section.

* * * * *

(d) *Recurring and irregular income.* The amount of recurring and irregular income anticipated or received by a beneficiary shall be added to determine the beneficiary's annual rate of income for a 12-month annualization period commencing at the beginning of the 12-month annualization, subject to the provisions of § 3.660(a)(2) of this chapter.

22. In § 3.273(a) and (b)(1) remove the words "annual rate of".

23. In § 3.273(b)(2) remove the words "annual rate" and add, in their place, the word "amount".

24. In § 3.273(c) remove the words "12-month period" and add, in their place, the words "12-month annualization period".

25. In § 3.275 add paragraphs (f) and (g) and their authority citations to read as follows:

§ 3.275 Criteria for evaluating net worth.

* * * * *

(f) *Agent Orange settlement payments.* There shall be excluded from the corpus of the estate or net worth of a claimant any payment made from the Agent Orange Settlement Fund or any other fund established pursuant to the settlement in the In re Agent Orange product liability litigation, M.D.L. No. 381 (E.D.N.Y.). (January 1, 1989)

(Authority: Pub. L. 101–201, 103 Stat. 1795)

(g) *Restitution to individuals of Japanese ancestry.* There shall be excluded from the corpus of estate or net worth of a claimant any payment made as restitution under Public Law 100–383 to individuals of Japanese ancestry who were interned, evacuated, or relocated during the period December 7, 1941, through June 30, 1946, pursuant to any law, Executive order, Presidential proclamation, directive, or other official action respecting these individuals. (August 10, 1988)

(Authority: Sec. 105, Pub. L. 100–383; 102 Stat. 905)

§ 3.277 [Amended]

26. In § 3.277 the authority citation appearing at the end of the section is revised to read "(Authority: 38 U.S.C. 1506)".

§ 3.660 [Amended]

27. In § 3.660(a)(2) remove the word "Contingency" in the paragraph heading and add, in its place, the words "Effective dates".

28. In § 3.660(b), introductory text, remove the words "year", and "calendar year" and add, in their place, the words "12-month annualization period"; and delete the authority citation "(38 U.S.C. 5110(h).)" following the first sentence.

29. In § 3.660(b)(1) remove the words "January 1 of that year" and add, in their place, the words "the beginning of the appropriate 12-month annualization period"; and add an authority citation at the end of the paragraph to read as follows: "(38 U.S.C. 5110(h))".

30. In § 3.660(b)(2) remove the word "year" the first two times it appears and the words "within that year" and add, in their place, the words "12-month annualization period" and "within that period", respectively.

§ 3.661 [Amended]

31. In § 3.661, remove the words "*Income and net worth questionnaires*" in the section heading and add, in their place, the words "*Eligibility Verification Reports*".

32. In § 3.661, paragraphs (a)(1) and (b), heading, remove the word "questionnaire" wherever it appears and add, in its place, the word "report".

33. In § 3.661(b)(1) add the word "calendar" before the word "year" each time it appears.

34. In § 3.661(b)(2) remove the words "year" and "income questionnaire", wherever they appear, and add, in their place, the words "12-month annualization period" and "Eligibility Verification Report", respectively.

BILLING CODE 6320–01–M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52 and 81

[SC–026–5602; FRL–4537–9]

Approval of Maintenance Plan and Designation of Areas for Air Quality Planning Purposes

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: On July 20, 1992, the State of South Carolina through the Department

of Health and Environmental Control (DHEC) submitted a maintenance plan and a request to redesignate Cherokee County to attainment for ozone. The State has met the requirement for redesignation contained in section 107(d)(3)(E) of the Clean Air Act as amended in 1990 (CAA). EPA approves the maintenance plan and the redesignation of Cherokee County, South Carolina, to attainment for ozone.

DATES: This action will be effective on February 16, 1993 unless notice is received within 30 days that someone wishes to submit adverse or critical comments. If the effective date is delayed, timely notice will be published in the **Federal Register**.

ADDRESSES: Copies of the material submitted by South Carolina may be examined during normal business hours at the following locations:

Region IV Air Programs Branch, Environmental Protection Agency, 345 Courtland Street, Atlanta, Georgia 30365.

Bureau of Air Quality Control, South Carolina Department of Health and Environmental Control, 2600 Bull Street, Columbia, South Carolina 29201.

FOR FURTHER INFORMATION CONTACT: Scott Miller of the Region IV Air Programs Branch at 404–347–2864 and at the above address.

SUPPLEMENTARY INFORMATION: In a **Federal Register** notice published November 6, 1991, Cherokee County was designated as nonattainment for ozone. This designation became effective 60 days later on January 6, 1992. On July 20, 1992, The Bureau of Air Quality Control (BAQC) of the South Carolina Department of Health and Environmental Control (DHEC) submitted a request for Cherokee County to be redesignated to attainment for ozone. This request was based on three years (1989, 1990, and 1991) of quality assured monitoring data which showed that Cherokee County had not violated the National Ambient Air Quality Standard (NAAQS) for ozone. The State of South Carolina has met all of the CAA requirements for redesignation pursuant to section 107(d)(3)(E). The requirements of section 107(d)(3)(E) are as follows:

Section 107(d)(3)(E)(i) The Administrator Has Determined That the Area Has Attained the National Ambient Air Quality Standard

South Carolina submitted air quality data showing that Cherokee County has attained the ozone NAAQS for ozone for the three year period, 1989–1991. During that period, there were no exceedances, and hence, no violations of the ozone standard.

Section 107(d)(3)(E)(ii) The Administrator Has Fully Approved the Applicable Implementation Plan for the Area Under Section 110(k)

Prior to the enactment of the Clean Air Act Amendments of 1990, Public Law 101–549, Cherokee County was a designated attainment area and had a fully approved attainment area SIP. 40 CFR 52.2120. As stated below, by this action today, EPA is approving Cherokee County's maintenance plan and has found that Cherokee County has met all of the applicable requirements under Section 110 and part D. Based on this, EPA believes that Cherokee County has a fully approved SIP under section 110(k) of the Act.

Section 107(d)(3)(iii) The Administrator Determines That the Improvement in Air Quality is Due to Permanent and Enforceable Reductions in Emissions Resulting From Implementation of the Applicable Implementation Plan and Applicable Federal Air Pollutant Control Regulations and Other Permanent and Enforceable Reductions

The Federal Motor Vehicle Control Program (FMVCP) requirements for lower tail pipe standards have reduced emissions in Cherokee County. In addition, the Federal requirements to reduce the Reid Vapor Pressure (RVP) of gasoline to 9.5 psi went into effect in Cherokee County during the Summer of 1989. The air quality data showing attainment of the standard is for the time period, 1989–1991, when this requirement was in effect. As required for nonattainment areas in the Southeast, an RVP of 7.8 psi went into effect on June 1, 1992, in Cherokee County. This is discussed further under the section on maintenance plans. Therefore, permanent enforceable VOC emissions reductions have been obtained through State and Federal control programs.

Section 107(d)(3)(E)(iv) The Administrator Has Fully Approved a Maintenance Plan for the Area as Meeting the Requirements of Section 175A

South Carolina has submitted a maintenance plan as required in section 175A of the Act. The maintenance plan includes a requirement to assess growth factors on a triennial basis with the contingency to assess on a yearly basis if the projection inventory is exceeded by 10% or more. The projection inventory reflects the allowable emission rate and the expected actual production or activity level. The plan contains a contingency to implement additional control measures such as Control Technique Guideline (CTG) categories within nine (9) months should the area violate the ozone NAAQS. The plan also relies on a RVP of 9.0 psi. A RVP of 7.8 psi—a more stringent standard—went into effect for Cherokee County on June 1, 1992. However, since Cherokee has demonstrated that it can maintain the standard using the less stringent RVP of 9.0, EPA believes that the maintenance plan may be approved. Therefore, based on the maintenance demonstration, EPA plans to propose approval of the 9.0 psi RVP in the near future. Until such approval the 7.8 psi RVP will remain in place during the applicable months. In addition, South Carolina has committed to keep it's monitoring efforts in Cherokee County at the Cowpens National Park intact after redesignation. Therefore, EPA is approving the maintenance plan.

Section 107(d)(3)(E)(v) The State Containing Such Area Has Met All Requirements Applicable to the Area Under Section 110 and Part D

Prior to the CAA, all of South Carolina including Cherokee County, was designated as attainment and was not subject to any requirements of the CAA to date. Since its designation as nonattainment under the amended Act, none of the requirements under section 182(a) have become applicable. Also, the State agrees to meet conformity requirements of section 176(c)(4) once EPA guidance is issued. In addition, a PSD program exists and will apply in Cherokee County upon redesignation to attainment. Therefore, the State has complied with all requirements of section 110 and part D of the Act. In addition, South Carolina has taken an extra step beyond section 110 and part D by implementing RACT fixups statewide even though RACT is not required for South Carolina. Therefore, EPA believes that the State has met all applicable requirements of section 110 and Part D of the Act.

Final Action

EPA is today redesignating Cherokee County to attainment for ozone. This action is being taken without prior proposal because the changes are noncontroversial and EPA anticipates no significant comments on them. The public should be advised that this action will be effective 60 days from the date of this **Federal Register** notice. However, if notice is received within 30 days that someone wishes to submit adverse or critical comments, this action will be withdrawn and two subsequent notices will be published before the

effective date. One notice will withdraw the final action and another will begin a new rulemaking by announcing a proposal of the action and establishing a comment period.

For further information, the reader may consult a Technical Support Document which contains a detailed review of the material submitted. This is available at the EPA address given previously. Interested persons are invited to submit comments on this proposed approval. EPA will consider all comments received within thirty days of the publication of this notice.

Under 5 U.S.C. 605(b), the Administrator certifies that SIP approvals under sections 107, 110, 172 of the Clean Air Act will not have a significant economic impact on a substantial number of small entities. Redesignations, therefore, do not add any additional requirements for small entities. Moreover, due to the nature of the Federal-State relationship under the Clean Air Act, preparation of a flexibility analysis for a SIP approval would constitute Federal inquiry into the economic reasonableness of the State actions. The Clean Air Act forbids EPA to base it's actions concerning SIPs on such grounds.

Under section 307(b)(1) of the Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by February 16, 1993. This action shall not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).) The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Nothing in this action shall be construed as permitting or allowing or establishing a precedent for any future request for a redesignation of any nonattainment area. Each request for redesignation of any nonattainment area shall be considered separately in light of specific technical, economic, and environmental factors and in relation to relevant statutory and regulatory requirements.

Under the Regulatory Flexibility Act, 5 U.S.C. 600 *et seq.*, EPA must prepare a regulatory flexibility analysis assessing the impact of any proposed or final rule on small entities. 5 U.S.C. 603 and 604. Alternatively, EPA may certify that the rule will not have a significant impact on a substantial number of small entities. Small entities include small businesses, small not for profit enterprises, and government entities with jurisdiction over populations of less than 50,000.

List of Subjects

40 CFR Part 52

Air pollution control, Carbon monoxide, Intergovernmental relations, Lead, Nitrogen dioxide, Ozone, Particulate matter, Reporting and recordkeeping requirements, Sulfur oxides, Volatile organic compounds.

40 CFR Part 81

Air pollution control, National parks, Wilderness areas.

Dated: October 28, 1992.

Patrick M. Tobin,

Acting Regional Administrator.

Chapter I, Title 40 of the *Code of Federal Regulations* is to be amended as follows:

PART 52—[AMENDED]

1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401–7671q.

Subpart PP—South Carolina

2. Section 52.2120 is amended by adding paragraph (c)(36) to read as follows:

§ 52.2120 Identification of plan.

* * * * *

(c) * * *

(36) The maintenance plan for Cherokee County submitted by the South Carolina Department of Health and Environmental Control on July 20, 1992, as part of the South Carolina SIP.

(i) Incorporation by reference.

(A) Cherokee County Ozone Attainment Demonstration and Ten Year Maintenance Plan effective June 11, 1992.

(B) Emissions Inventory Projections for Cherokee County effective June 11, 1992.

(ii) Other material.

(A) July 20, 1992 letter from the Department of Health and Environmental Control. Ten Year Maintenance Plan effective June 11, 1992.

(B) Emission Inventory Projections for Cherokee County effective June 11, 1992.

(iii) Other material.

(A) July 20, 1992 letter from the Department of Health and Environmental Control.

PART 81—DESIGNATION OF AREAS FOR AIR QUALITY PLANNING PURPOSES

1. The authority citation for part 81 continues to read as follows:

Authority: 42 U.S.C. 7401–7642.

2. Section 81.341 is amended by revising the attainment status designation table for Ozone to read as follows:

§ 81.341 South Carolina.

* * * * *

South Carolina—Ozone (O_3).

BILLING CODE 6560-50-M

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 65

[Docket No. FEMA-7056]

Changes in Flood Elevation Determinations

AGENCY: Federal Insurance Administration, FEMA.

ACTION: Interim rule.

SUMMARY: This interim rule lists communities where modification of the base (100-year) flood elevations is appropriate because of new scientific or technical data. New flood insurance premium rates will be calculated from the modified base (100-year) flood elevations for new buildings and their contents.

DATES: These modified base flood elevations are currently in effect on the dates listed in the table and revise the Flood Insurance Rate Map(s) (FIRMs) in effect prior to this determination for each listed community.

From the date of the second publication of these changes in a newspaper of local circulation, any person has ninety (90) days in which to request through the community that the Administrator reconsider the changes. The modified elevations may be changed during the 90-day period.

ADDRESSES: The modified base flood elevations for each community are available for inspection at the office of the Chief Executive Officer of each community. The respective addresses are listed in the following table.

FOR FURTHER INFORMATION CONTACT: William R. Locke, Chief, Risk Studies Division, Federal Insurance Administration, 500 C Street, SW., Washington, DC 20472, (202) 646-2766.

SUPPLEMENTARY INFORMATION: The modified base (100-year) flood elevations are not listed for each community in this interim rule. However, the address of the Chief Executive Officer of the community where the modified base flood elevation determinations are available for inspection is provided.

Any request for reconsideration must be based upon knowledge of changed conditions, or upon new scientific or technical data.

The modifications are made pursuant to section 201 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4105, and are in accordance with the National Flood Insurance Act of 1968, 42 U.S.C. 4001 *et seq.*, and with 44 CFR part 65.

For rating purposes, the currently effective community number is shown and must be used for all new policies and renewals.

The modified base (100-year) flood elevations are the basis for the floodplain management measures that the community is required to either adopt or to show evidence of being already in effect in order to qualify or to remain qualified for participation in the National Flood Insurance Program.

These modified elevations, together with the floodplain management criteria required by 44 CFR 60.3, are the minimum that are required. They should not be construed to mean that the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements of its own, or pursuant to policies established by other Federal, state or regional entities.

The changes in base flood elevations are in accordance with 44 CFR 65.4.

National Environmental Policy Act

This rule is categorically excluded from the requirements of 44 CFR part 10, Environmental Consideration. No environmental impact assessment has been prepared.

Regulatory Flexibility Act

The Federal Insurance Administrator has determined that this rule is exempt from the requirements of the Regulatory Flexibility Act because modified base flood elevations are required by the Flood Disaster Protection Act of 1973, 42 U.S.C. 4105, and are required to maintain community eligibility in the National Flood Insurance Program. No

regulatory flexibility analysis has been prepared.

Regulatory Impact Analysis

This rule is not a major rule under Executive Order 12291, February 17, 1981. No regulatory impact analysis has been prepared.

Executive Order 12612, Federalism

This rule involves no policies that have federalism implications under Executive Order 12612, Federalism, dated October 26, 1987.

Executive Order 12778, Civil Justice Reform

This rule meets the applicable standards of section 2(b)(2) of Executive Order 12778.

List of Subjects in 44 CFR Part 65

Flood insurance, Floodplains, Reporting and recordkeeping requirements.

Accordingly, 44 CFR part 65 is amended to read as follows:

PART 65—[AMENDED]

1. The authority citation for part 65 continues to read as follows:

Authority: 42 U.S.C. 4001 *et seq.*; Reorganization Plan No. 3 of 1978, 3 CFR, 1978 Comp., p. 329; E.O. 12127, 44 FR 19367, 3 CFR, 1979 Comp., p. 376.

§ 65.4 [Amended]

2. The tables published under the authority of § 65.4 are amended as follows:

State and county	Location	Dates and name of newspaper where notice was published	Chief executive officer of community	Effective date of modification	Community No.
California: San Diego	Unincorporated Areas	Nov. 23, 1992, Nov. 30, 1992, *San Diego Union Tribune.*	The Honorable George F. Bailey, Chairman, San Diego County Board of Supervisors, 1600 Pacific Highway, San Diego, California 92101.	Nov. 16, 1992	060284
Colorado: Boulder	City of Longmont	Dec. 9, 1992, Dec. 16, 1992, *Longmont Daily Times.*	The Honorable Fred Wilson, Mayor, City of Longmont, Civic Center Complex, 408 Third Avenue, Longmont, Colorado 80501.	Nov. 23, 1992	080027
Florida: Sarasota	City of Sarasota	Sept. 15, 1992, Sept. 22, 1992, *Sarasota Herald-Tribune.*	The Honorable Jack Gumey, Mayor of the City of Sarasota, P.O. Box 1058, Sarasota, FL 34230.	Aug. 25, 1992	125150 B
Texas: Tarrant	City of Benbrook	Nov. 19, 1992, Nov. 26, 1992, *The Benbrook News.*	The Honorable Jerry Dunn, Mayor, City of Benbrook, 911 Winscott Road, P.O. Box 26569, Benbrook, Texas 76126.	Oct. 27, 1992	480586

(Catalog of Federal Domestic Assistance No. 83.100, "Flood Insurance")

Issued: December 7, 1992.

C.M. "Bud" Schauerte,

Administrator, Federal Insurance Administration.

[FR Doc. 92-30264 Filed 12-14-92; 8:45 am]

BILLING CODE 6718-03-M

44 CFR Part 65

Changes in Flood Elevation Determinations

AGENCY: Federal Insurance Administration, FEMA.

ACTION: Final rule.

SUMMARY: Modified base (100-year) flood elevations are finalized for the communities listed below. These modified elevations will be used to calculate flood insurance premium rates for new buildings and their contents.

EFFECTIVE DATES: The effective dates for these modified base flood elevations are indicated on the following table and revise the Flood Insurance Rate Map(s) (FIRMs) in effect for each listed community prior to this date.

ADDRESSES: The modified base flood elevations for each community are available for inspection at the office of the Chief Executive Officer of each community. The respective addresses are listed in the following table.

FOR FURTHER INFORMATION CONTACT: William R. Locke, Chief, Risk Studies Division, Federal Insurance Administration, 500 C Street, SW., Washington, DC 20472, (202) 646-2766.

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency gives notice of the final determinations of modified base flood elevations for each community listed. These modified elevations have been published in newspapers of local circulation and ninety (90) days have elapsed since that publication. The Administrator has resolved any appeals resulting from this notification.

The modified base (100-year) flood elevations are not listed for each community in this notice. However, this rule includes the address of the Chief Executive Officer of the community where the modified base flood elevation determinations are available for inspection.

The modifications are made pursuant to section 206 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4105, and are in accordance with the National Flood Insurance Act of 1968, 42 U.S.C. 4001 *et seq.*, and with 44 CFR part 65.

For rating purposes, the currently effective community number is shown and must be used for all new policies and renewals.

The modified base (100-year) flood elevations are the basis for the floodplain management measures that the community is required to either adopt or to show evidence of being already in effect in order to qualify or to remain qualified for participation in the National Flood Insurance Program.

These modified elevations, together with the floodplain management criteria required by 44 CFR 60.3, are the minimum that are required. They should not be construed to mean that the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements of its own, or pursuant to policies established by other Federal, state or regional entities.

These modified elevations are used to meet the floodplain management requirements of the NFIP and are also used to calculate the appropriate flood insurance premium rates for new buildings built after these elevations are made final, and for the contents in these buildings.

The changes in base flood elevations are in accordance with 44 CFR 65.4.

National Environmental Policy Act

This rule is categorically excluded from the requirements of 44 CFR part 10, Environmental Consideration. No environmental impact assessment has been prepared.

Regulatory Flexibility Act

The Federal Insurance Administrator has determined that this rule is exempt from the requirements of the Regulatory Flexibility Act because modified base flood elevations are required by the Flood Disaster Protection Act of 1973, 42 U.S.C. 4105, and are required to maintain community eligibility in the National Flood Insurance Program. No regulatory flexibility analysis has been prepared.

Regulatory Impact Analysis

This rule is not a major rule under Executive Order 12291, February 17, 1981. No regulatory impact analysis has been prepared.

Executive Order 12612, Federalism

This rule involves no policies that have federalism implications under Executive Order 12612, Federalism, dated October 26, 1987.

Executive Order 12778, Civil Justice Reform

This rule meets the applicable standards of section 2(b)(2) of Executive Order 12778.

List of Subjects in 44 CFR Part 65

Flood insurance, Floodplains, Reporting and recordkeeping requirements.

Accordingly, 44 CFR part 65 is amended to read as follows:

PART 65—[AMENDED]

1. The authority citation for part 65 continues to read as follows:

Issued: December 7, 1992.

C. M. "Bud" Schauerte,

Administrator, Federal Insurance Administration.

[FR Doc. 92–30265 Filed 12–14–92; 8:45 am]

BILLING CODE 6718–03–M

44 CFR Part 67

Final Flood Elevation Determinations

AGENCY: Federal Insurance Administration, FEMA.

ACTION: Final rule.

SUMMARY: Base (100-year) flood elevations and modified base (100-year) flood elevations are made final for the communities listed below.

The base (100-year) flood elevations and modified base flood elevations are the basis for the floodplain management measures that each community is required either to adopt or to show evidence of being already in effect in order to qualify or remain qualified for

participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATES: The date of issuance of the Flood Insurance Rate Map (FIRM) showing base flood elevations and modified base flood elevations for each community. This date may be obtained by contacting the office where the maps are available for inspection as indicated on the table below.

ADDRESSES: The final base flood elevations for each community are available for inspection at the office of the Chief Executive Officer of each community. The respective addresses are listed in the following table.

FOR FURTHER INFORMATION CONTACT: William R. Locke, Chief, Risk Studies Division, Federal Insurance Administration, 500 C Street, SW., Washington, DC 20472, (202) 646–2766.

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency (FEMA or Agency) gives notice of the final determinations of base flood elevations and modified base flood elevations for each community listed. The proposed base flood elevations and proposed modified base flood elevations were published in newspapers of local circulation and an opportunity for the community or individuals to appeal the proposed determinations to or through the community was provided for a period of ninety (90) days. The proposed base flood elevations and proposed modified base flood elevations were also published in the **Federal Register**.

This final rule is issued in accordance with section 110 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and 44 CFR part 67.

The Agency has developed criteria for floodplain management in floodprone areas in accordance with 44 CFR part 60.

National Environmental Policy Act

This rule is categorically excluded from the requirements of 44 CFR part 10, Environmental Consideration. No environmental impact assessment has been prepared.

Regulatory Flexibility Act

The Federal Insurance Administrator has determined that this rule is exempt from the requirements of the Regulatory Flexibility Act because final or modified base flood elevations are required by the Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and are required to establish and maintain community eligibility in the National Flood Insurance Program. No regulatory flexibility analysis has been prepared.

Regulatory Impact Analysis

This rule is not a major rule under Executive Order 12291, February 17, 1981. No regulatory impact analysis has been prepared.

Executive Order 12612, Federalism

This rule involves no policies that have federalism implications under Executive Order 12612, Federalism, dated October 26, 1987.

Executive Order 12778, Civil Justice Reform

This rule meets the applicable standards of section 2(b)(2) of Executive Order 12778.

Interested lessees and owners of real property are encouraged to review the proof Flood Insurance Study and Flood Insurance Rate Map available at the address cited below for each community.

The base flood elevations and modified base flood elevations are made final in the communities listed below. Elevations at selected locations in each community are shown.

List of Subjects in 44 CFR Part 67

Administrative practice and procedure, Flood insurance, Reporting and recordkeeping requirements.

Accordingly, 44 CFR part 67 is amended as follows:

PART 67—[AMENDED]

1. The authority citation for part 67 continues to read as follows:

Authority: 42 U.S.C. 4001 *et seq.*; Reorganization Plan No. 3 of 1978, 3 CFR, 1978 Comp., p. 329; E.O. 12127, 44 FR 19367, 3 CFR, 1979 Comp., p. 376.

§ 67.11 [Amended]

2. The tables published under the authority of § 67.11 are amended as follows:

Source of flooding and location	#Depth in feet above ground. *Elevation in feet (NGVD)
ARKANSAS	
Walnut Ridge (city), Lawrence County (FEMA Docket No. 7050)	
Village Creek:	
Approximately 6,250 feet downstream of West Free Street	*262
Approximately 2,400 feet upstream of U.S. Highway 67	*267
Highland Creek North:	
Entire reach between Northwest Front Street and Village Creek	*268
Highland Creek South:	
Approximately 120 feet upstream of U.S. Highway 412	*267
Just downstream of Northeast Front Street	*268
Maps are available for review at City Hall, 105 Southeast Front Street, Walnut Ridge, Arkansas.	
KANSAS	
Shawnee County (Unincorporated Areas) (FEMA Docket No. 7060)	
Slumlo Creek:	
Just upstream of SW 97th Street	*967
Just downstream of Urish Road	*1018
Just upstream of Urish Road	*1024
Just downstream of SW 69th Street	*1041
Just upstream of 69th Street	*1049
Just downstream of SW 61st Street	*1081
Maps available for inspection at the County Engineer's Office, 3137 SE 29th Street, Topeka, Kansas.	
MAINE	
Pittston (Town), Kennebec County (FEMA Docket No. 7040)	
Eastern River:	
At downstream corporate limits	*13
Approximately 80 feet above State Route 194	*103
Maps available for inspection at the Town Office, State Route 126, Gardiner, Maine.	
Robbinston (Town), Washington County (FEMA Docket No. 7045)	
St. Croix River:	
At Bunker Point	*17
Shoreline at southern most corporate limits	*25
Boyden Lake: Entire shoreline within community	*79
Maps available for inspection at the Robbinston Town Hall, Ridge Road, Robbinston, Maine.	
MASSACHUSETTS	
Abington (Town), Plymouth County (FEMA Docket No. 7040)	
Stream River:	
Approximately 140 feet downstream of Walnut Street	*80
Approximately 100 feet upstream of upstream crossing of Ashland Street	*127
Maps available for inspection at the Abington Town Hall, 33 Randolph Street, Abington, Massachusetts.	
Middlefield (Town), Hampshire County (FEMA Docket No. 7040)	
Middle Branch Westfield River:	
At the downstream County boundary	*778
At the upstream corporate limits	*1,010
West Branch Westfield River:	
At the downstream County boundary	*732
Approximately 820 feet upstream of CONRAIL	*746
Maps available for inspection at the Middlefield Town Hall, Skyline Trail, Middlefield, Massachusetts.	
North Andover (Town), Essex County (FEMA Docket No. 7037)	
Mosquito Brook:	
Approximately .6 mile downstream of Boxford Street	*114
Approximately 66 feet upstream of Chestnut Street	*238
Boston Brook:	

Source of flooding and location	#Depth in feet above ground. *Elevation in feet (NGVD)
At downstream corporate limits	*86
Approximately .7 mile upstream of Hawkins Lane	*107
Maps available for inspection at the Town Hall, 120 Main Street, North Andover, Massachusetts.	
Pepperell (Town), Middlesex County (FEMA Docket No. 7040)	
Varnum Brook:	
At confluence with Nashua River	*185
Approximately 65 feet upstream of Hollis Street	*241
Greene Brook:	
At confluence with Varnum Brook	*233
Approximately 140 feet upstream of Elm Street	*255
Maps available for inspection at the Pepperell Town Office, 1 Main Street, Pepperell, Massachusetts.	
MICHIGAN	
Evart (City), Osceola County (FEMA Docket No. 7046)	
Twin Creek:	
At mouth	*992
About 1950 feet upstream of Fifth Street	*1012
Muskegon River:	
At Main Street	*992
About 2000 feet upstream of Main Street	*993
Maps available for inspection at the City Manager's Office, City Hall, 101 North Main Street, Evart, Michigan.	
MISSOURI	
Jennings (City), St. Louis County (FEMA Docket No. 7060)	
Maline Creek:	
About 1,650 feet downstream of Halls Ferry Road	*449
About 1,225 feet downstream of Lucas-Hunt Road	*454
About 740 feet upstream of Lucas-Hunt Road	*456
Maps available for inspection at the City Hall, Building Department, 2120 Hord Avenue, Jennings, Missouri.	
St. Louis County (Unincorporated Areas) (FEMA Docket No. 7053)	
Maline Creek:	
About 0.80 mile downstream of Halls Ferry Road	*448
About 0.40 mile upstream of Glenn Owen Drive	*466
Black Jack Creek:	
At mouth	*446
Just downstream of Pershall Road	*475
Just upstream of Dunn Road	*492
Just downstream of Redman Avenue	*498
Dellwood Creek:	
At mouth	*460
About 1,970 feet upstream of Clairmont Drive	*467
Halls Ferry Creek:	
At mouth	*471
Just downstream of Old Halls Ferry Road	*474
Maps available for inspection at the Department of Planning, 41 South Central Avenue, Clayton, Missouri.	
NEW HAMPSHIRE	
Jaffrey (Town), Cheshire County (FEMA Docket No. 7040)	
Contoocook Lake: Entire shoreline within community	*1,013
Mountain Brook Reservoir: Entire shoreline within community	*1,019
Contoocook River:	
At downstream corporate limits	*852
At Contoocook Lake Dam	*1,013
Mountain Brook:	
At Gilmore Pond Road	*1,022
Approximately 100 feet upstream of State Route 124	*1,063
Mead Brook:	
At confluence with Moutain Brook	*1,039
Approximately 100 feet upstream of State Route 124	*1,090
Black Reservoir Outlet Stream:	
Approximately 50 feet downstream of Contoocook Road Bridge	*1,013
Approximately 35 feet upstream of Black Reservoir Dam	*1,067
Maps available for inspection at the Jaffrey Town Hall, 69 Main Street, Jaffrey, New Hampshire 03452.	
Weare (Town), Hillsborough County (FEMA Docket No. 7050)	
Piscataquog River:	
At downstream corporate limits	*302
Approximately 100 feet upstream of Reservoir Road	*823
Weare Reservoir: Entire shoreline within community	*857
Hopkinton-Everett Reservoir: Entire shoreline within community	*416
Daniels Lake: Entire shoreline within community	*377
Maps available for inspection at the Weare Town Office, 15 Flanders Memorial Drive, Weare, New Hampshire 03281.	
Webster (Town), Merrimack County (FEMA Docket No. 7050)	
Blackwater River:	
At the downstream corporate limits	*360
Approximately 1.7 miles upstream of Clothespin Road	*472
Maps available for inspection at the Town Clerk's Office, R.F.D. #5, Box 325, Webster, New Hampshire.	
NEW YORK	
Bainbridge (Village), Chenango County (FEMA Docket No. 7044)	
Susquehanna River:	
At downstream corporate limits	*96(
At upstream corporate limits	*96(
Maps available for inspection at the Bainbridge Village Offices, 33 West Main Street, Bainbridge, New York.	
Champion (Town), Jefferson County (FEMA Docket No. 7050)	
Black River:	
Approximately 200 feet downstream of Deferiet Dam	*651
At corporate limits with Village of West Carthage	*66(
Maps available for inspection at the Champion Town Clerk's Office, 7 North Main Street, West Carthage, New York 13619.	
Milton (Town), Saratoga County (FEMA Docket No. 7050)	
Glowegee Creek:	
At the confluence with Kayaderosseras Creek (upper reach)	*369
Approximately 0.2 mile upstream of Private Dam	*43(
Kayaderosseras Creek (lower reach):	
Approximately 0.2 mile downstream of Delaware and Hudson Railroad Bridge	*229
Approximately 0.3 mile upstream of Delaware and Hudson Railroad Bridge	*232
Kayaderosseras Creek (upper reach):	
At the downstream corporate limits	*269
Approximately 200 feet upstream of corporate limits	*523
Maps available for inspection at the Milton Town Hall, Building Department, 503 Guyeer Road, Ballston Spa, New York.	
OHIO	
Avon (City), Lorain County (FEMA Docket No. 7042)	
Mills Creek:	
At mouth	*691
Just downstream of Mills Road	*703
Schwartz Ditch:	
At mouth	*689
About 2450 feet upstream of Williams Court	*696
French Creek:	
Just downstream of State Route 83	*686
Just downstream of Mills Road	*695
Maps available for inspection at the City Hall, 36774 Detroit Road, Avon, Ohio.	
OKLAHOMA	
Noble County (Unincorporated Areas) (FEMA Docket No. 7039)	
Dry Creek:	
At county boundary	*815
Approximately 1.3 miles upstream of county boundary	*832
North Stillwater Creek:	
At country boundary	*905
Approximately 500 feet upstream of county boundary	*908
Maps available for inspection at the Noble County Courthouse, Perry, Oklahoma.	
Nowata (City), Nowata County (FEMA Docket No. 7053)	
Western Branch Creek:	
Approximately 1,000 feet downstream of Choctaw Avenue, at the corporate limits	*677
Approximately 300 feet upstream of U.S. Route 169	*683
At Cherokee Avenue	*686
At Elm Street	*689
Just upstream of Maple Street	*693
Golf Course Tributary:	
At the confluence with Western Branch Creek	*691
At Pecan Street	*701
Approximately 250 feet upstream of Hickory Street	*708
Seneca Street Tributary:	
At the confluence with Western Branch Creek	*692
Just upstream of Seneca Street	*694
Southwest Tributary:	
Just downstream of Galer Street	*686
Approximately 2,000 feet upstream of Galer Street	*695
Maps are available for review at City Hall, 701 East Modoc Street, Nowata, Oklahoma.	
PENNSYLVANIA	
Muncy (Borough), Lycoming County (FEMA Docket No. 7044)	
West Branch Susquehanna River:	
Approximately 550 feet upstream of State Route 405	*504
Approximately 100 feet upstream of State Route 405	*504
Glade Run:	

Source of flooding and location	#Depth in feet above ground. *Elevation in feet (NGVD)
At confluence with W. Branch Susquehanna River	*504
At downstream side of Penn Street	*505
Maps available for inspection at the Muncy Town Office, 14 North Washington Street, Muncy, Pennsylvania.	
Springfield (Township), Montgomery County (FEMA Docket No. 7048)	
Sandy Run:	
Approximately 100 feet downstream of Valley Green Road	*178
Approximately 125 feet upstream of the upstream corporate limits	*184
Wissahickon Creek:	
At Wissahickon Avenue	*140
At upstream corporate limits	*141
Maps available for inspection at the Springfield Township Manager's Office, Township Building, 1510 Paper Mill Road, Wyndmoor, Pennsylvania.	
TEXAS	
Buda (City), Hays County (FEMA Docket No. 7049)	
Onion Creek:	
Approximately 350 feet downstream of State Route 967	*688
Approximately 0.59 mile upstream of State Route 967	*695
Maps available for inspection at the Buda City Hall, Main Street, Buda, Texas.	
Grand Prairie (City), Dallas, Tarrant, and Ellis Counties (FEMA Docket No. 7027)	
Lynn Creek:	
At the confluence with Lake Joe Pool	*538
Approximately 1.13 miles upstream of the confluence with Lake Joe Pool	*552
West Fork Trinity River:	
Approximately .9 mile upstream of Tarrant-Dallas County boundary	*458
At the Great Southwest Railroad Spur	*461
Lake Joe Pool: Entire shoreline within the community	*538
Bear Creek:	
Approximately 550 feet upstream of Beltline Road	*448
Upstream corporate limit (at Rock Island Road)	*460
Bowman Branch:	
Approximately 600 feet downstream of Arlington Webb Britton Road	*536
At Arlington Webb Britton Road	*536
Cottonwood Creek:	
Approximately 50 feet upstream of the Dallas-Tarrant County boundary	*509

49 CFR Parts 171, 172, 174 and 177

[Docket Nos. HM-181, and HM-189, Amdt. Nos. 171-111, 172-123, 174-68 and 177-78]

Hazardous Materials Regulations; Editorial Corrections

AGENCY: Research and Special Programs Administration (RSPA), DOT.

ACTION: Final rule; corrections.

SUMMARY: This document makes certain editorial corrections to a final rule which corrected editorial errors and made minor regulatory changes to the Hazardous Materials Regulations (HMR). This action is necessary to reduce misunderstandings of the HMR. The intended effect is to promote accuracy of the HMR. These amendments are minor editorial changes which will not impose any new requirements on persons subject to the HMR.

EFFECTIVE DATE: October 1, 1992.

FOR FURTHER INFORMATION CONTACT: John Gale or Beth Romo, telephone (202) 366-4488, Office of Hazardous Materials Standards, or Charles Hochman, telephone (202) 366-4545, Office of Hazardous Materials Technology, Research and Special Programs Administration, U.S. Department of Transportation, 400 Seventh Street, SW., Washington, DC 20590-0001.

SUPPLEMENTARY INFORMATION:

Background

A final rule was published on October 1, 1992 under Dockets HM-181 and HM-189 [57 FR 45448] which made editorial and technical corrections to 49 CFR parts 107-180. This document corrects editorial errors in the October 1, 1992 final rule.

The definition for "non-bulk packaging" in § 171.8 is corrected by restoring the quantity limits for liquids as "450 L (119 gallons) or less" and for solids "400 kg (882 pounds) or less." The "non-bulk packaging" definition in the October 1, 1992 final rule does not include the actual quantities of "450 L"

or "400 kg"; therefore, those quantities do not fall in either the "bulk" or "non-bulk" packaging definition. Also, in (3), the water capacity of a receptacle for a gas is revised to read "454 kg or less", in place of "greater than 454 kg (1000 pounds) or less", which is contradictory.

The October 1, 1992 final rule amended certain entries in the § 172.101 Hazardous Materials Table. Item "m." of the amendatory language, for the entry "Carbon monoxide", stated that the Column (8C) reference "302" was revised to read "314, 315", when in fact the Column (8C) reference to be revised was "None". However, RSPA subsequently has determined that the pre-October 1, 1992 entry for Carbon monoxide is correct, and the "None" in Column (8C) should not be revised.

In the § 172.101 Table amendments, item "dd." of the amendatory language added Special Provision B47 in Column (7) for two entries, "Nitrating acid mixtures *with not more than 50 percent nitric acid*" and "Nitrating acid mixtures *with 50 percent or more nitric acid*". This was not correct. Special Provision B47 should apply to "Nitric acid *other than red fuming with more than 70 percent nitric acid*" and "Nitric acid *other than red fuming, with not more than 70 percent nitric acid*". This document amends the entries for nitrating acid mixtures by removing Special Provision B47. For the aforementioned nitric acid entries, Special Provision B47 is added in Column (7).

The section-by-section review in the October 1, 1992 final rule stated that a domestic entry for "vinyl chloride" was being added to the § 172.101 Table, but this addition was inadvertently omitted from the amendments to the Table. A domestic entry for "Vinyl chloride" is added to the Table in this document.

An exception to permit the use of hat shaped or open channel stiffening rings on carbon steel cargo tanks used to transport asphalt and liquid tar was inadvertently omitted in Special Provision B13 in § 172.102. This exception from the circumferential reinforcement requirements of § 178.345–7(d)(5) is added in this document.

This document also clarifies a domestic exception provided for Class 9 placards. The October 1, 1992 final rule amended § 172.504 by adding an exception in paragraph (f)(9) for the display of a Class 9 placard in domestic transportation if a bulk package is marked with the appropriate identification number on an orange panel or a white square-on-point display configuration. RSPA has received several inquiries as to whether this provision precludes the use of the identification numbers on a Class 9 placard. RSPA did not intend to preclude use of the Class 9 placard for display of identification numbers as permitted under § 172.332. Therefore, § 172.504(f)(9) is revised to clarify that a Class 9 placard may be used, but is not required.

The Segregation Table, which appears in §§ 174.81 and 177.848, is editorially revised to add an "O" at the intersection of the row entitled "Oxidizers" and the column entitled "3". This revision was discussed in the section review of the October 1, 1992 final rule, but was not included in the regulatory text amendments of §§ 174.81 and 177.848.

List of Subjects

49 CFR Part 171

Exports, Hazardous materials transportation, Hazardous waste, Imports, Incorporation by reference, Reporting and recordkeeping requirements.

49 CFR Part 172

Hazardous materials transportation, Hazardous waste, Labeling, Packaging and containers, Reporting and recordkeeping requirements.

49 CFR Part 174

Hazardous materials transportation, Radioactive materials, Railroad safety.

49 CFR Part 177

Hazardous materials transportation, Motor carriers, Radioactive materials, Reporting and recordkeeping requirements.

In consideration of the foregoing, 49 CFR chapter I is amended as follows:

PART 171—GENERAL INFORMATION, REGULATIONS, AND DEFINITIONS

1. The authority citation for part 171 continues to read as follows:

Authority: 49 App. U.S.C. 1802, 1803, 1804, 1805, 1808, 1815, 1818; 49 CFR Part 1.

§ 171.8 [Amended]

2. In § 171.8, for the definition "Non-bulk packaging", the following changes are made:

a. In paragraphs (1) and (2), the wording "less than 450 L (119 gallons)" is revised to read "of 450 L (119 gallons) or less".

b. In paragraph (2), the wording "less than 400 kg (882 pounds)" is revised to read "of 400 kg (882 pounds) or less".

c. In paragraph (3), the wording "greater than 454 kg (1000 pounds) or less" is revised to read "of 454 kg (1000 pounds) or less".

PART 172—HAZARDOUS MATERIALS TABLE, SPECIAL PROVISIONS, HAZARDOUS MATERIALS COMMUNICATIONS, EMERGENCY RESPONSE INFORMATION, AND TRAINING REQUIREMENTS

3. The authority citation for part 172 continues to read as follows:

Authority: 49 App. U.S.C. 1803, 1804, 1805, and 1808; 49 CFR part 1, unless otherwise noted.

4. In § 172.101, in the Hazardous Materials Table, the following entry is added in appropriate alphabetical sequence:

§ 172.101 HAZARDOUS MATERIALS TABLE

Symbols	Hazardous materials descriptions and proper shipping names	Hazard class or division	Identification No.	Packing group	Label(s) required (if not excepted)	Special provisions	(8) Packaging authorizations (§ 173.* * *) Exceptions	Nonbulk packaging	Bulk packaging	(9) Quantity limitations Passenger aircraft or rail car	Cargo aircraft only	(10) Vessel stowage requirements Vessel stowage	Other stowage provisions
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8A)	(8B)	(8C)	(9A)	(9B)	(10A)	(10B)
	•	•		•		•		•		•		•	
	[Add].												

§ 172.101 HAZARDOUS MATERIALS TABLE—Continued

Symbols	Hazardous materials descriptions and proper shipping names	Hazard class or division	Identification No.	Packing group	Label(s) required (if not excepted)	Special provisions	(8) Packaging authorizations (§ 173.* * *) Exceptions	Nonbulk packaging	Bulk packaging	(9) Quantity limitations Passenger aircraft or rail car	Cargo aircraft only	(10) Vessel stowage requirements Vessel stowage	Other stowage provisions
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8A)	(8B)	(8C)	(9A)	(9B)	(10A)	(10B)
D	Vinyl chloride ..	2.1	NA1086		Flammable gas.	21, B44	306	304	314, 315	Forbidden .	150 kg	B	40

§ 172.101 [Amended]

5. In addition, in the § 172.101 Table, the following changes are made:

a. For the entry "Carbon monoxide", in Column (8B), "314, 315" is revised to read "302" and Column (8C) should continue to read "None".

b. For the entries "Nitrating acid mixtures *with not more than 50 per cent nitric acid*" and "Nitrating acid mixtures *with 50 per cent or more nitric acid*", in Column (7), Special Provision "B47," is removed.

c. For the entries "Nitric acid *other than red fuming with more than 70 percent nitric acid*" and "Nitric acid *other than red fuming, with not more than 70 percent nitric acid*", in Column (7), Special Provision "B47," is added in appropriate alpha-numeric order.

§ 172.102 [Amended]

6. In § 172.102, in paragraph (c)(3), in Special Provision B13, the wording "178.345–7(d)(5), circumferential reinforcements," is added to paragraph b. immediately following "from §§ ".

§ 172.504 [Amended]

7. In § 172.504, in paragraph (f)(9), in the second sentence, the wording "marked on each side and each end with the appropriate identification number displayed on an orange panel or a white-square-on-point display configuration are required by subpart D of this part." is revised to read "marked with the appropriate identification number displayed on a Class 9 placard, an orange panel or a white-square-on-point display configuration as required by subpart D of this part.".

PART 174—CARRIAGE BY RAIL

8. The authority citation for part 174 continues to read as follows:

Authority: 49 App. U.S.C. 1803, 1804, 1808; 49 CFR 1.53(e), 1.53, App. A to part 1.

§ 174.81 [Amended]

9. In § 174.81, in the Segregation Table in paragraph (d), in the entry for "Oxidizers—5.1", the letter "O" is added in the column titled "3".

PART 177—CARRIAGE BY PUBLIC HIGHWAY

10. The authority citation for part 177 continues to read as follows:

Authority: 49 App. U.S.C. 1803, 1804, 1805; 49 CFR part 1.

§ 177.848 [Amended]

11. In § 177.848, in the Segregation Table in paragraph (d), in the entry for "Oxidizers—5.1", the letter "O" is added in the column titled "3".

Issued in Washington, DC, on December 4, 1992, under authority delegated in 49 CFR part 1.

Douglas B. Ham,

Acting Administrator, Research and Special Programs Administration.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 285

[Docket No. 920407–2519]

Atlantic Tuna Fisheries; Bluefin Tuna

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Announcement of an Incidental Catch category quota overage for the 1992 fishing season and adjustment of the 1993 quota.

SUMMARY: NMFS announces that the longline component of the Incidental Catch category fishery for Atlantic bluefin tuna operating south of 36°00′ N. latitude in the Regulatory Area has exceeded its quota for 1992 by 13 metric tons (mt). Therefore, pursuant to Federal regulations for Atlantic tuna fisheries, the 1992 13-mt overage will be subtracted from the 1993 longline Incidental Catch quota of 67 mt. This results in a 1993 longline Incidental Catch category quota for the area south of 36°00′ N. latitude of 54 mt. The intent of this action is to prevent overharvest of the longline Incidental Catch quota established for this fishery for the 1992–93 biennial period.

EFFECTIVE DATES: The quota reduction will be effective from 0001 hours local time January 1, 1993, through December 31, 1993.

FOR FURTHER INFORMATION CONTACT: Richard B. Stone, 301–713–2347.

SUPPLEMENTARY INFORMATION: Regulations promulgated under the authority of the Atlantic Tunas Convention Act (16 U.S.C. 971 *et seq.*) regulating the harvest of Atlantic bluefin tuna by persons and vessels subject to U.S. jurisdiction are found at 50 CFR part 285. Section 285.22(e)(1) provides for a 1992 season quota of 132 mt of Atlantic bluefin tuna to be harvested from the Regulatory Area by longline vessels permitted in the Incidental Catch category, with no more than 104 mt. of that quota harvested in the area south of 36°00′ N. latitude. Section 285.22(e)(2) provides for a 1993 season quota of 85 mt of Atlantic bluefin tuna to be harvested from the Regulatory Area by longline vessels permitted in the Incidental Catch category, with no more than 67 mt of that quota harvested in the area south of 36°00′ N. latitude. If a quota in any category, or as appropriate, subcategory, has been exceeded or has not been reached, the Assistant Administrator for Fisheries, NOAA (Assistant Administrator), is required under § 285.22(h) to subtract the overage from, or add the underage to, that quota for 1993; provided that the total of the 1992 harvest plus the 1993 adjusted quotas and the reserve does not exceed 2,497 mt. The Assistant Administrator is further required to publish any amounts to be subtracted or added and the basis for the quota reductions or increases in the **Federal Register**.

The longline component of the Incidental Catch category fishery for Atlantic bluefin tuna operating south of 36°00′ N. latitude in the Regulatory Area, exceeded its quota for 1992 by 13

mt. Therefore, pursuant to § 285.22(h), the 1992 13-mt overage will be subtracted from the 1993 longline Incidental Catch quota of 67 mt. This action will create a 1993 longline Incidental Catch category quota for the area south of 36°00′ N. latitude of 54 mt. The intent of this action is to prevent overharvest of the longline Incidental Catch quota established for this fishery for the 1992–93 biennial period

Classification

This action is required by 50 CFR 285.22(h) and complies with E.O. 12291.

Proposed Rules

Federal Register
Vol. 57, No. 241
Tuesday, December 15, 1992

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

SMALL BUSINESS ADMINISTRATION

13 CFR Part 121

Small Business Size Standards; Waiver of the Nonmanufacturer Rule

AGENCY: Small Business Administration.

ACTION: Notice of intent to waive the Nonmanufacturer Rule for photographic film and video cassette records.

SUMMARY: The Small Business Administration (SBA) is considering granting a waiver of the Nonmanufacturer Rule for photographic film and for video cassette recorders. The basis for a waiver of the Nonmanufacturer Rule for these products is that there are no small business manufacturers or processors available to supply these products to the Federal government. The effect of a waiver would be to allow otherwise qualified regular dealers to supply the products of any domestic manufacturer on a Federal contract set aside for small businesses or awarded through the SBA 8(a) Program. The purpose of this notice is to solicit comments and potential source information from interested parties.

DATES: Comments and sources must be submitted on or before December 30, 1992.

ADDRESSES: Robert J. Moffitt, Associate Administrator for Procurement Assistance, U.S. Small Business Administration, 409 3rd Street, SW., , Washington, DC 20416, Tel: (202) 205–6460.

SUPPLEMENTARY INFORMATION: Public Law 100–656, enacted on November 15, 1988, incorporated into the Small Business Act the previously existing regulation that recipients of Federal contracts set aside for small businesses or SBA 8(a) Program procurement must provide the product of a small business manufacturer or processor, if the recipient is other than the actual manufacturer or processor. This requirement is commonly referred to as the Nonmanufacturer Rule. The SBA regulations imposing this requirement are found at 13 CFR 121.906(b) and 121.1106(b). Section 303(h) of the law provides for waiver of this requirement by SBA for any "class of products" for which there are no small business manufacturers or processors in the Federal market. To be considered available to participate in the Federal market on these classes of products, a small business manufacturer must have submitted a proposal for a contract solicitation or received a contract from the Federal government within the last 24 months. The SBA defines "class of products" based on two coding systems. The first is the Office of Management and Budget *Standard Industrial Classification Manual*. The second is the Product and Service Code established by the Federal Procurement Data System.

The Small Business Administration (SBA) is currently processing a request for a waiver of the Nonmanufacturer Rule for photographic film (SIC code 3861, PSC code 6770) and video cassette recorders (SIC code 3651, PSC code 5836) and invites the public to comment or provide information on potential small business sources for these products.

In an effort to identify potential small business sources, the SBA has searched the Procurement Automated Source System (PASS) and *Thomas Register*, and published a notice in the *Commerce Business Daily*. The SBA has also been in touch with procurement staff at several major procuring agencies to request information on potential small business sources. None of these efforts have identified such sources for these products.

Dated: December 2, 1992.

Robert J. Moffitt,

Associate Administrator for Procurement Assistance.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Airspace Docket No. 92–AWP–9]

Proposed Amendment to Tucson, AZ Transition Area and Proposed Establishment of Ryan Field, AZ Transition Area

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to amend the 700 foot above ground level (AGL) transition area at Tucson, AZ. This amendment would clarify the Tucson Transition Area by eliminating the Ryan Field, AZ, Transition Area from the Tucson Transition Area description, and listing Ryan Field as a separate entity. Heretofore, the Ryan Field Transition Area had been published as part of the Tucson Transition Area. A new Standard Instrument Approach Procedure (SIAP), the non-directional beacon/distance measuring equipment (NDB/DME) runway (RWY) 6, has been developed for Ryan Field, Tucson, AZ which necessitates the enlargement of the 700 foot transition area to contain holding pattern airspace for the missed approach portion of the new SIAP.

DATES: Comments must be received on or before February 15, 1993.

ADDRESSES: Send comments on the proposal in triplicate to: Federal Aviation Administration, Attn: Manager, System Management Branch, AWP–530, Docket No. 92–AWP–9, Air Traffic Division, P.O. Box 92007, Worldway Postal Center, Los Angeles, California 90009.

The official docket may be examined in the Office of the Regional Counsel, Western-Pacific Region, Federal Aviation Administration, room 6W14, 15000 Aviation Boulevard, Lawndale, CA.

An informal docket may be examined during normal business hours at the Office of the Manager, System Management Branch, Air Traffic Division at the above address.

FOR FURTHER INFORMATION CONTACT: Gene Enstad, Airspace Specialist, System Management Branch, AWP–530, Air Traffic Division, Western-Pacific

Region, Federal Aviation Administration, 15000 Aviation Boulevard, Lawndale, California 90261; telephone (310) 297–0010.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal. Communications should identify the airspace docket number and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with the comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 92–AWP–9." The postcard will be date/time stamped and returned to the commenter. All communications received on or before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in light of comments received. All comments submitted will be available for examination in the System Management Branch, Air Traffic Division, at 15000 Aviation Boulevard, Lawndale, California 90261, both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM's

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, System Management Branch, P.O. Box 92007, Worldway Postal Center, Los Angeles, California 90009. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11–2A which describes the application procedures.

The Proposal

The FAA is considering an amendment to part 71 of the Federal Aviation Regulations (14 CFR part 71) to amend the 700 foot AGL Transition Area at Tucson, AZ. This amendment would clarify the Tucson Transition Area by eliminating the Ryan Field, AZ, Transition Area from the Tucson Transition Area description. Heretofore, the Ryan Field Transition Area had been published as part of the Tucson Transition Area. The FAA proposes to list the airspace designation of the Ryan Field transition area as a separate entity. A new Standard Instrument Approach Procedure (SIAP), the NDB/DME RWY 6, has been developed for Ryan Field, Tucson, AZ which necessitates the enlargement of the 700 foot transition area to contain holding pattern airspace for the missed approach portion of the new SIAP. The coordinates for this Airspace Docket are based on North American Datum 83. Transition areas are published in § 71.181 of FAA Order 7400.7A, dated November 2, 1992, and effective November 27, 1992, which is incorporated by reference in 14 CFR 71.1. The transition areas listed in this document would be published subsequently in the Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 10034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, Incorporation by reference, Transition areas.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend part 71 of the Federal Aviation Regulations (14 CFR part 71) as follows:

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS, JET ROUTES, AND AREA HIGH ROUTES

1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 49 U.S.C. app. 1348(a), 1354(a), 1510; E.O. 10854; 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389; 49 U.S.C. 106(g); 14 CFR 11.69.

§ 71.1 [Amended]

2. The incorporation by reference in 14 CFR 71.1 of the Federal Aviation Administration Order 7400.7A, Compilation of Regulations, dated November 2, 1992, and effective November 27, 1992, is amended as follows:

Section 71.181 Designation of Transition Areas

* * * * *

AWP AZ TA Ryan Field, AZ [NEW] (lat. 32°08'29"N, long. 111°10'26"W)
Ryan NDB, AZ (lat. 32°08'18"N, long. 111°09'41"W)

That airspace extending upward from 700 feet above the surface within a 5-mile radius of the Ryan Field Airport and within 8 miles north and 4.6 miles south of the Ryan NDB 252° bearing extending from the 5-mile radius to 18.4 miles southwest of the Ryan NDB.

* * * * *

AWP AZ TA Tucson, AZ [REVISED]
Tucson International Airport, AZ (lat. 32°06'58"N, long. 110°56'28"W)

That airspace extending upward from 700 feet above the surface within a 10-mile radius of the Tucson International Airport, and within 16 miles NE and 13 miles SW of the 138° bearing from lat. 32°07'21"N., long. 110°49'14"W.; extending from the 10-mile radius area to 16 miles SE of lat. 32°07'21"N., long. 110°49'14"W.; and within 1 mile NE and 9 miles SW of a 318° bearing from lat. 32°07'21"N., long. 110°49'14"W.; extending from the 10-mile radius area to 22 miles NW of lat. 32°07'21"N., long. 110°49'14"W.; and within 16 miles NE of the 318° bearing from lat. 32°07'21"N., long. 110°49'14"W.; extending from lat. 32°07'21"N., long. 110°49'14"W.; to 30 miles NW of lat. 32°07'21"N., long. 110°49'14"W.; and that airspace extending upward from 1200 feet above the surface bounded by a line beginning at lat. 32°33'00"N., long. 111°45'02"W.; to lat. 32°33'00"N., long. 110°52'02"W.; thence N via long. 110°52'02"W., to the S boundary of V–94; thence SE via the S boundary of V–94 to long. 110°00'02"W.; thence S to lat. 31°39'00"N., long. 110°00'02"W.; to lat. 31°39'00"N., long. 111°00'02"W.; to lat. 32°00'00"N., long. 111°45'02"W.; to the point of beginning.

BILLING CODE 4910–13–M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Housing—Federal Housing Commissioner

24 CFR Parts 251, 252 and 255

[Docket No. R-92-1589; FR-2951-P-01]

RIN 2502-AF09

GNMA Requests for Full Insurance on Coinsurance Loans

AGENCY: Office of the Assistant Secretary for Housing—Federal Housing Commissioner, HUD.

ACTION: Proposed rule.

SUMMARY: This rule would revise currently applicable multifamily and health facility coinsurance regulations to eliminate the requirement that the Government National Mortgage Association (GNMA), in every case, first attempt to assign issuer-servicer responsibility on current coinsured mortgages held by a defaulting lender-issuer before requesting full insurance endorsement by the Federal Housing Administration (FHA). The purpose of the rule is to eliminate a current regulatory requirement which has proved to be time-consuming and, in most cases, unnecessary.

DATES: Comments must be submitted on or before February 16, 1993.

ADDRESSES: Interested persons are invited to submit comments regarding this Notice to the Office of General Counsel, Rules Docket Clerk, room 10276, Department of Housing and Urban Development, 451 Seventh Street SW., Washington, DC 20410. Communication should refer to the above docket number and title. Facsimile (FAX) are not acceptable. A copy of each communication submitted will be available for public inspection and copying on weekdays between 7:30 a.m. and 5:30 p.m. at the above address.

FOR FURTHER INFORMATION CONTACT: Donald A. Kaplan, Director, Office of Multifamily Housing Management, room 6160, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, DC 20410, voice (202) 708-3730, TDD (202) 708-4594. (These are not toll-free numbers.)

SUPPLEMENTARY INFORMATION: The Department's former regulations concerning GNMA's right to assignment of coinsured mortgages were found at 24 CFR 251.827 (Multifamily Coinsurance—New Construction and Substantial Rehabilitation), § 252.827 (Coinsurance of Nursing Homes and Related Facilities), and § 255.827 (Coinsurance of Mortgages Covering Existing Multifamily Projects), before their recent removal as part of the termination of the Coinsurance program. These regulations read as follows:

Section 251.827 [252.827 or 255.827] GNMA right to assignment.

If the lender-issuer defaults on its obligations under the GNMA Mortgage-backed Securities Program, GNMA will have the right, notwithstanding the requirements of § 251.106 [252.106 or 255.106], to cause all Coinsured Mortgages held in GNMA pools by the defaulting coinsuring lender-issuer to be assigned to another GNMA-approved coinsuring lender-issuer or to itself.

(a)(1) For any Coinsured Mortgage that is not in default and is held by a defaulting lender-issuer, BNMA will first attempt to have the Mortgage assigned to another eligible coinsuring lender by soliciting offers to assume the defaulting lender-issuer's rights and obligations under the Mortgage from those eligible coinsuring lenders that are indicated on a periodically updated listing furnished to GNMA by the Commissioner and that are also GNMA issuers.

(2) If GNMA rejects all offers or no offers are received, GNMA will have the right to perfect an assignment of the Mortgage to itself.

(b) For any Coinsured Mortgage that is in default and held by a defaulting lender-issuer, GNMA will have the right to perfect an assignment of the Coinsured Mortgage directly to itself before extinguishing the Mortgage by completion of foreclosure action or acquisition of title by deed-in-lieu of foreclosure.

(c) GNMA, as assignee, will give the Commissioner written notice within 30 days after taking a Mortgage by assignment in accordance with this section, in order to allow an appropriate endorsement and necessary changes in the Commissioner's records.

(d) The Commissioner will endorse any Mortgage assigned to GNMA as provided by this section for full insurance effective as of the date of assignment in accordance with the appropriate provisions of 24 CFR part 221 [232 or 207]. Any future claim by GNMA or any assignment of the fully insured Mortgage will be governed by the appropriate provisions of 24 CFR part 221 [232 or 207], except that any payment will be made in cash instead of debentures.

On October 10, 1990, a final rule was published (55 FR 41312) terminating the FHA multifamily coinsurance programs and revising parts 251, 252 and 255. As a result of the final rule, parts 251, 252 and 255 consist of a single provision dealing with the program phase-out process. However, while the former rule's provisions are no longer included in the Code of Federal Regulations, those regulations in effect before November 12, 1990 continue to govern the rights and obligations of mortgagors, coinsuring lenders and HUD in existence before the termination of the coinsurance programs. The effect of this rule would be to revise those regulations as they relate to the handling of mortgage assignments to GNMA.

In lieu of the above-quoted paragraphs (a)(1) and (a)(2), the rule would provide that "For any Coinsured Mortgage that is not in default and is held by a defaulting lender-issuer, GNMA will have the right to perfect an assignment of the mortgage to itself. However, before exercising this right, GNMA will attempt to have the Mortgage assigned to another eligible coinsuring lender (unless it determines, with the agreement of the Commissioner, that the attempt would prove ineffectual because of market or other conditions). The assignment will be attempted by soliciting offers to assume the defaulting lender-issuer's rights and obligations under the Mortgage from those eligible coinsuring lenders that are also GNMA issuers and that are indicated on a periodically updated listing furnished to GNMA by the Commissioner."

Given the facts that (a) the authority to coinsure mortgages has been terminated; (b) for the most part, no market exists for the purchase of coinsurance servicing rights; and (c) none of the few remaining approved coinsuring lenders has shown any interest to date in assuming additional coinsuring risk by assignment of loans from GNMA, implementation of the regulatory requirement earlier set forth in paragraphs (a)(1) and (a)(2) has proved to be a time-consuming, burdensome and fruitless process. Therefore, this rule proposes to amend parts 251, 252 and 255 to eliminate the requirement that GNMA, in every case, first attempt to assign issuer-servicer responsibility on current coinsured mortgages before perfecting assignment of the Coinsured Mortgage to itself and requesting full insurance endorsement by FHA.

Procedural Matters

This rule does not constitute a "major rule" as that term is defined in section 1(d) of the Executive order 12291 on Federal Regulations issued by the President on February 17, 1981. An analysis of the rule indicates that it does not (1) have an annual effect on the economy of $100 million or more; (2)

cause a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or (3) have a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

In accordance with 5 U.S.C. 605(b) (the Regulatory Flexibility Act), the undersigned hereby certifies that this rule does not have a significant economic impact on a substantial number of small entities. This rule is procedural in nature. It effects no substantive changes in HUD programs or policies.

This rule was listed as item number 1407 in the Department's Semiannual Agenda of Regulations published on November 3, 1992 (57 FR 51392, 51415) under Executive order 12291 and the Regulatory Flexibility Act.

Executive Order 12612, Federalism

The General Counsel, as the Designated Official under section 6(a) of Executive order 12612, Federalism, has determined that the policies contained in this rule will not have Federalism implications and, thus, are not subject to review under the Order. No programmatic or policy changes would result from this rule's promulgation which would affect existing relationships between the Federal Government and State and local governments.

Executive Order 12606, The Family

The General Counsel, as the Designated Official under Executive order 12606, The Family, has determined that this rule does not have potential for significant impact on family formation, maintenance, and general well-being, and, thus, is not subject to review under the Order. The rule is procedural in nature and no significant change in existing HUD policies or programs impacting on the family will result from promulgation of this rule.

An environmental assessment is unnecessary, since internal administrative procedures whose content does not constitute a development decision affecting the physical condition of specific project areas or building sites is categorically excluded from the Department's National Environmental Policy Act procedures under 24 CFR 50.20(k).

List of Subjects

24 CFR part 251

Low and moderate income housing, Mortgage insurance, Reporting and recordkeeping requirements.

24 CFR part 252

Health facilities, Loan programs—housing and community development, Loan programs—health, Mortgage insurance, Reporting and recordkeeping requirements, Nursing homes.

24 CFR part 255

Low and moderate income housing, Mortgage insurance, Reporting and recordkeeping requirements.

Accordingly, 24 CFR parts 251, 252 and 255 would be amended to read as follows:

PART 251—COINSURANCE FOR THE CONSTRUCTION OR SUBSTANTIAL REHABILITATION OF MULTIFAMILY HOUSING PROJECTS

1. The authority citation for 24 CFR part 251 would be revised to read as follows:

Authority: 12 U.S.C. 1715b, 1715z–9 (42 U.S.C. 3535(d)).

2. Part 251 would be amended by adding the following new § 251.2, to read as follows:

§ 251.2 GNMA right to assignment.

If the lender-issuer defaults on its obligations under the GNMA Mortgage-Backed Securities Program, GNMA will have the right, notwithstanding the requirements of HUD regulations on the assignment of and participation in coinsured mortgages which were in effect before November 12, 1990, to cause all Coinsured Mortgages held in GNMA pools by the defaulting coinsuring lender-issuer to be assigned to another GNMA-approved coinsuring lender-issuer, or to GNMA itself.

(a) For any Coinsured Mortgage that is not in default and is held by a defaulting lender-issuer, GNMA will have the right to perfect an assignment of the mortgage to itself. However, before exercising this right, GNMA will attempt to have the Mortgage assigned to another eligible coinsuring lender (unless GNMA determines, with the agreement of the Commissioner, that the attempt would prove ineffectual because of market conditions or other factors). This attempt will be undertaken by soliciting offers to assume the defaulting lender-issuer's rights and obligations under the Mortgage from those eligible coinsuring lenders that are also GNMA issuers and that are indicated on a periodically updated listing furnished to GNMA by the Commissioner.

(b) For any Coinsured Mortgage that is in default and held by a defaulting lender-issuer, GNMA will have the right to perfect an assignment of the Coinsured Mortgage directly to itself before extinguishing the Mortgage by completion of foreclosure action or acquisition of title by deed-in-lieu of foreclosure.

(c) GNMA, as assignee, will give the Commissioner written notice, within 30 days after taking a Mortgage by assignment in accordance with this section, in order to allow an appropriate endorsement and necessary changes in the Commissioner's records.

(d) The Commissioner will endorse any Mortgage assigned to GNMA as provided by this section for full insurance, effective as of the date of assignment in accordance with the appropriate provisions of 24 CFR part 221. Any future claim by GNMA, or any assignment of the fully insured Mortgage, will be governed by the appropriate provisions of 24 CFR part 221, except that any payment will be made in cash instead of debentures.

PART 252—COINSURANCE OF MORTGAGES COVERING NURSING HOMES, INTERMEDIATE CARE FACILITIES AND BOARD AND CARE HOMES

3. The authority citation for 24 CFR part 252 would be revised to read as follows:

Authority: 12 U.S.C. 1715b, 1715z–9; 42 U.S.C. 3535(d).

4. Part 252 would be amended by adding the following new § 252.2, to read as follows:

§ 252.2 GNMA right to assignment.

If the lender-issuer defaults on its obligations under the GNMA Mortgage-Backed Securities Program, GNMA will have the right, notwithstanding the requirements of HUD regulations on the assignment of and participation in coinsured mortgage which were in effect before November 12, 1990, to cause all Coinsured Mortgages held in GNMA pools by the defaulting coinsuring lender-issuer to be assigned to another GNMA-approved coinsuring lender-issuer, or to GNMA itself.

(a) For any Coinsured Mortgage that is not in default and is held by a defaulting lender-issuer, GNMA will have the right to perfect an assignment of the mortgage to itself. However, before exercising this right, GNMA will attempt to have the Mortgage assigned to another eligible coinsuring lender (unless GNMA determines, with the

agreement of the Commissioner, that the attempt would prove ineffectual because of market conditions or other factors). This attempt will be undertaken by soliciting offers to assume the defaulting lender-issuer's rights and obligations under the Mortgage from those eligible coinsuring lenders that are also GNMA issuers and that are indicated on a periodically updated listing furnished to GNMA by the Commissioner.

(b) For any Coinsured Mortgage that is in default and held by a defaulting lender-issuer, GNMA will have the right to perfect an assignment of the Coinsured Mortgage directly to itself before extinguishing the Mortgage by completion of foreclosure action or acquisition of title by deed-in-lieu of foreclosure.

(c) GNMA, as assignee, will give the Commissioner written notice, within 30 days after taking a Mortgage by assignment in accordance with this section, in order to allow an appropriate endorsement and necessary changes in the Commissioner's records.

(d) The Commissioner will endorse any Mortgage assigned to GNMA as provided by this section for full insurance, effective as of the date of assignment in accordance with the appropriate provisions of 24 CFR part 232. Any future claim by GNMA, or any assignment of the fully insured Mortgage, will be governed by the appropriate provisions of 24 CFR part 232, except that any payment will be made in cash instead of debentures.

PART 255—COINSURANCE FOR THE PURCHASE OR REFINANCING OF EXISTING MULTIFAMILY HOUSING PROJECTS

5. The authority citation for 24 CFR part 255 would be revised to read as follows:

Authority: 12 U.S.C. 1715b, 1715z–9 (42 U.S.C. 3535(d).

6. Part 255 would be amended by adding the following new § 255.2, to read as follows:

§ 255.2 GNMA right to assignment.

If the lender-issuer defaults on its obligations under the GNMA Mortgage-Backed Securities Program, GNMA will have the right, notwithstanding the requirements of HUD regulations on the assignment of and participation in coinsured mortgages which were in effect before November 12, 1990, to cause all Coinsured Mortgages held in GNMA pools by the defaulting coinsuring lender-issuer to be assigned to another GNMA-approved coinsuring lender-issuer, or to GNMA itself.

(a) For any Coinsured Mortgage that is not in default and is held by a defaulting lender-issuer, GNMA will have the right to perfect an assignment of the mortgage to itself. However, before exercising this right, GNMA will attempt to have the Mortgage assigned to another eligible coinsuring lender (unless GNMA determines, with the agreement of the Commissioner, that the attempt would prove ineffectual because of market conditions or other factors). This attempt will be undertaken by soliciting offers to assume the defaulting lender-issuer's rights and obligations under the Mortgage from those eligible coinsuring lenders that are also GNMA issuers and that are indicated on a periodically updated listing furnished to GNMA by the Commissioner.

(b) For any Coinsured Mortgage that is in default and held by a defaulting lender-issuer, GNMA will have the right to perfect an assignment of the Coinsured Mortgage directly to itself before extinguishing the Mortgage by completion of foreclosure action or acquisition of title by deed-in-lieu of foreclosure.

(c) GNMA, as assignee, will give the Commissioner written notice, within 30 days after taking a Mortgage by assignment in accordance with this section, in order to allow an appropriate endorsement and necessary changes in the Commissioner's records.

(d) The Commissioner will endorse any Mortgage assigned to GNMA as provided by this section for full insurance, effective as of the date of assignment in accordance with the appropriate provisions of 24 CFR part 207. Any future claim by GNMA, or any assignment of the fully insured Mortgage, will be governed by the appropriate provisions of 24 CFR part 207, except that any payment will be made in cash instead of debentures.

Dated: December 9, 1992.

Arthur J. Hill,

Assistant Secretary for Housing—Federal Housing Commissioner.

RIN 2577–AB11

Indian Housing: Revisions to Lease and Grievance Procedures

AGENCY: Office of the Assistant Secretary for Public and Indian Housing, HUD.

ACTION: Proposed rule.

SUMMARY: This rule proposes to revise the Indian housing regulations concerning required lease provisions and grievance procedures for residents of Indian housing. The changes would facilitate eviction of tenants who are involved in criminal activity that threatens the health, safety, or right to peaceful enjoyment of other tenants or who are involved in drug-related criminal activity, be permitting use of an expedited grievance procedure or reliance upon court actions without first conducting a grievance procedure.

DATES: Comments must be submitted by February 16, 1993.

ADDRESSES: Interested persons are invited to submit comments regarding this rule to the Office of the General Counsel, Rules Docket Clerk, room 10276, Department of Housing and Urban Development, 451 Seventh Street SW., Washington, DC 20410–0500. Comment should refer to the above docket number and title. Facsimile (FAX) comments are not acceptable. A copy of each communication submitted will be available for public inspection and copying during regular business hours (7:30 a.m. to 5:30 p.m. Eastern Time) at the above address.

FOR FURTHER INFORMATION CONTACT: Dominic Nessi, Director, Office of Indian Programs, room 4140, Department of Housing and Urban Development, Washington, DC 20410–5000; telephone (202) 708–1015 (voice) or (202) 708–0850 (TDD). (These are not toll-free telephone numbers.)

SUPPLEMENTARY INFORMATION:

I. Paper Reduction Act Statement

The information collection requirements contained in this rule have been submitted to the Office of Management and Budget (OMB) for review under the Paperwork Reduction Act of 1980 (44 U.S.C. 3501–3520).

Public reporting burden for the collection of information requirements

contained in this rule are estimated to include the time for reviewing the instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Information on the estimated public reporting burden is provided in paragraph III. H. of this Preamble. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the Department of Housing and Urban Development, Rules Docket Clerk, at the address stated above; and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Attention: Desk Officer for HUD, Washington, DC 20503.

III. Background

Changes were made to the statutory provisions governing leases and grievance procedures in Indian housing by sections 503, 504 and 505 of the Cranston-Gonzalez National Affordable Housing Act (NAHA), 42 U.S.C. 1437d note, which require notice and comment rulemaking. Proposed and final rules were issued concerning these statutory provisions as they applied to the public housing program (amending 24 CFR part 966), but those rules did not cover the Indian housing program. Consequently, this separate rule is now being published with respect to those statutory changes as they affect the Indian housing program.

Before the enactment of NAHA, section 6(k) of the United States Housing Act of 1937 permitted an Indian Housing Authority (IHA) to exclude from its administrative grievance procedure actions to evict tenants if the jurisdiction required a court hearing that provided the basic elements of due process. The current rule, § 905.340(a)(2), reflects that provision.

However, NAHA places greater emphasis on permitting IHAs to evict tenants quickly and easily if they are involved in criminal activity that is drug-related or threatens the health, safety or peaceful enjoyment of the premises by other tenants or IHA employees. It makes two changes to the IHA's grievance procedures. It revises the provision that has permitted the exclusion from the IHA's grievance procedure of any eviction that would be the subject of a local court proceeding affording due process, as determined by the Secretary. Now only evictions that involve the specified types of criminal activity maybe excluded from the IHA's grievance procedure. NAHA also authorizes, for the first time, an expedited grievance procedure to be established by an IHA, to be used in evictions involving the specified types of criminal activity.

NAHA also revises the provision regarding the leases used in Indian housing, to require that criminal activity as described above engaged in by a tenant, a member of the tenant's household, or a guest of the tenant, is grounds for termination of tenancy. It also requires that the lease provide that any notice of termination of tenancy or notice of eviction must inform the tenant of a right to examine relevant documents, records, or regulations directly related to the termination or eviction before any hearing or trial on the matter.

The rule implementing these changes in the public housing program (published at 56 FR 51560, October 11, 1991) included other changes, as well. This rule simply modifies § 905.340 to add one more provision to the required elements of the lease, to add a provision permitting an expedited grievance procedure, and to modify the situation under which the IHA could omit the grievance procedure and proceed directly to court to terminate tenancy and evict a tenant.

III. Findings and Certifications

A. Impact on the Economy

This rule does not constitute a "major rule" as that term is defined in section 1(b) of the Executive Order on Federal Regulations issued by the President on February 17, 1981. An analysis of the rule indicates that it does not (1) have an annual effect on the economy of $100 million or more; (2) cause a major increase in costs or prices for consumers, individual industries, federal, State, or local government agencies, or geographic regions; or (3) have a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

B. Environmental Review

A Finding of No Significant Impact with respect to the environment has been made in accordance with HUD regulations at 24 CFR part 50 that implement section 102(2)(C) of the National Environmental Policy Act of 1969, 42 U.S.C. 4332. The Finding of No Significant Impact is available for public inspection and copying between 7:30 a.m. and 5:30 p.m. weekdays in the Office of the Rules Docket Clerk, room 10276, 451 Seventh Street, SW., Washington, DC 20410–0500.

C. Federalism Impact

The General Counsel, as the Designated Official under section 6(a) of Executive order 12612, Federalism, has determined that the policies contained in this rule will not have substantial direct effects on States or their political subdivisions, or the relationship between the federal government and the States, or on the distribution of power and responsibilities among the various levels of government. This rule merely conforms the existing rule on the subject of Indian housing leases and grievance procedures to the governing statute, as amended. As a result, the rule is not subject to review under the order.

D. Impact on the Family

The General Counsel, as the Designated Official under Executive order 12606, The Family, has determined that this rule does not have potential for significant impact on family formation, maintenance, and general well-being, and, thus, is not subject to review under the order. The rule will simply buttress the efforts of Indian Housing Authorities to keep their housing free of criminal activity by enforcing provisions of the law making drug-related and other serious criminal activity on or near the premises clearly actionable.

E. Impact on Small Entities

The Secretary, in accordance with the Regulatory Flexibility Act (5 U.S.C. 605(b)), has reviewed this rule before publication and by approving it certifies that this rule does not have a significant economic impact on a substantial number of small entities. The rule is limited to specifying the procedures for enforcing lease provisions concerning criminal activity.

F. "Takings" Assessment

The General Counsel, as the Designated Official under Executive Order 12630, Government Actions and Interference with Constitutionally Protected Property Rights, has determined that this rule does not have "takings implications" as defined in HUD's "Supplemental Guidelines for the Evaluation of Risk and Avoidance of Unanticipated Takings." The Department does not regard the effects of this rule on private property rights as "effectively denying economically viable use of any distinct legally protected property interest of [a property owner], or result in a permanent or temporary physical occupation, invasion, or deprivation."

The proposed rule would merely prescribe, pursuant to statute, the changes in lease provisions and grievance procedures to be used by Indian housing authorities that receive assistance from HUD under the United States Housing Act of 1937.

G. Regulatory Agenda

This rule was listed as item 1497 in the Department's Semiannual Agenda of Regulations published on November 3, 1992 (57 FR 51392, 51435) in accordance with Executive order 12291 and the Regulatory Flexibility Act.

H. Public Reporting Burden

The Department has determined that the following provisions contain information collection requirements and estimates the public reporting burden as follows:

ANNUAL REPORTING BURDEN
[Indian Lease and Grievance Procedure]

Description of information collection	No. of respondents	No. of responses/respondent	Total annual response	Hours per response	Total annual hours
Adoption of expedited grievance procedure	190	1	190	5	950
Development of new lease: 905.340(b)(5)	190	1	190	10	1,900
Obtaining tenant signatures on new lease: 905.340(b)	22,800	1	190	.5	11,400
Recordkeeping	22,800	1	22,800	.5	3,420
Total					17,670

I. Catalog

The Catalog of Domestic Assistance numbers for the programs affected by this rule are 14.850 and 14.851.

List of Subjects in 24 CFR Part 905

Grant programs: Indians, Low and moderate income housing, Homeownership, Public housing.

Accordingly, part 905 of title 24 of the Code of Federal Regulations is proposed to be amended as follows:

PART 905—INDIAN HOUSING PROGRAMS

1. The authority citation for part 905 would continue to read as follows:

Authority: 25 U.S.C. 450e(b); 42 U.S.C. 1437aa, 1437bb, 1437cc, 1437ee and 3535(d).

2. Section 905.340 would be revised to read as follows:

§ 905.340 Grievance procedure and leases.

(a) *Grievance procedures.*

(1) *General.* Each IHA shall adopt and promulgate grievance procedures that are appropriate to local circumstances. These procedures shall comply with the Indian Civil Rights Act, if applicable, and section 6(k) of the Act, as applicable, and shall assure that tenants and homebuyers will:

(i) Be advised of the specific grounds of any proposed adverse action by the IHA;

(ii) Have an opportunity for a hearing before an impartial party upon timely request;

(iii) Have a reasonable opportunity to examine any documents, records, or regulations related to the proposed action before the hearing (or trial in court);

(iv) Be entitled to be represented by another person of their choice at any hearing;

(v) Be entitled to ask questions of witnesses and have others make statements on their behalf; and

(vi) Be entitled to receive a written decision by the IHA on the proposed action.

(2) *Expedited grievance procedure.* An IHA may establish an expedited grievance for any grievance concerning a termination of tenancy or eviction that involves:

(i) Any criminal activity that threatens the health, safety, or right to peaceful enjoyment of the Indian housing development by other residents or employees of the IHA, or

(ii) Any drug-related criminal activity on or near the premises.

(3) *Exclusion of certain grievances.* (i) *General.* An IHA may pursue termination of tenancy or eviction without offering a grievance procedure where the termination or eviction is based on one of the grounds stated in paragraph (a)(2) of this section if applicable Tribal or State law requires that, before eviction, a tenant (including a homebuyer under a homeownership agreement) be given a hearing in court, if HUD has determined that the Tribal or State procedures provide the basic elements of due process.

(ii) *Basic elements of due process.* The elements of due process against which the jurisdiction's procedures are measured by HUD are the following:

(A) Adequate notice to the tenant of the grounds for terminating the tenancy and for eviction;

(B) Right of the tenant to be represented by counsel;

(C) Opportunity for the tenant to refute the evidence presented by the IHA, including the right to confront and cross-examine witnesses and to present any affirmative legal or equitable defense that the tenant might have; and

(D) A decision on the merits.

(4) *Notice to post office of certain evictions.* When an IHA evicts an individual or family from a dwelling unit for engaging in criminal activity, including drug-related criminal activity, the IHA shall notify the local post office serving that dwelling unit that the evicted individual or family is no longer residing in the dwelling unit (so that the post office will terminate delivery of mail for such persons at the unit, and that such persons will not return to the unit to pick up mail).

(5) *Notice of procedures.* A copy of the grievance procedures shall be posted prominently in the IHA office, and shall be provided to any tenant, homebuyer, or applicant upon request.

(b) *Leases.* Each IHA shall use leases that:

(1) Do not contain unreasonable terms and conditions;

(2) Obligate the IHA to maintain the project in a decent, safe, and sanitary condition;

(3) Require the IHA to give adequate written notice of termination of the lease which shall not be less than—

(i) A reasonable time, but not to exceed 30 days, when the health or safety of other tenants or IHA employees is threatened;

(ii) Fourteen days in the case of nonpayment of rent; and

(iii) Thirty days in any other case;

(4) Require that the IHA may not terminate the tenancy except for serious or repeated violation of the terms or conditions of the lease or for other good cause;

(5) Provide that any criminal activity that threatens the health, safety, or right to peaceful enjoyment of the premises by other tenants or any drug-related criminal activity on or near the premises, engaged in by an Indian

housing tenant, any member of the tenant's household, or any guest or other person under the tenant's control, shall be cause for termination of tenancy. For purposes of this section, the term "drug-related criminal activity" means the illegal manufacture, sale, distribution, use, or possession with intent to manufacture, sell, distribute, or use, of a controlled substance (as defined in section 102 of the Controlled Substances Act (21 U.S.C. 802)); and

(6) Specify that with respect to any notice of termination of tenancy or eviction, notwithstanding any applicable Tribal or State law, an Indian housing tenant shall be informed of the opportunity, before any hearing or trial, to examine any relevant documents, records, or regulations directly related to the termination or eviction.

Dated: December 9, 1992.

Joseph G. Schiff,

Assistant Secretary for Public and Indian Housing.

Qualified Accelerated Death Benefits Under Life Insurance Contracts

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: This document provides proposed regulations relating to the definition of a life insurance contract for federal tax purposes and to the federal income tax treatment of amounts received as qualified accelerated death benefits. These proposed regulations are necessary to provide guidance to insurance companies and their policyholders.

DATES: Written comments, requests to speak, and outlines of oral arguments to be presented at the hearing scheduled for March 19, 1993, at 10 a.m. in the Internal Revenue Service Auditorium, must be received by February 26, 1993. See notice of hearing published elsewhere in this issue of the Federal Register.

ADDRESSES: Send submissions to: Internal Revenue Service, P.O. Box 7604, Ben Franklin Station, Attention: CC:CORP:T:R (FI-25-92), room 5228, Washington, DC 20044.

FOR FURTHER INFORMATION CONTACT: Concerning the regulations, Ann H. Logan, 202-622-3970 (not a toll-free number). Concerning the hearing, Mike Slaughter of the Regulations Unit, 202-622-7190 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Background

This document sets forth proposed amendments to the Income Tax Regulations (26 CFR part 1) under sections 101, 7702, and 7702A of the Internal Revenue Code (Code). The proposed rules relate to the definition of a life insurance contract under section 7702 of the Internal Revenue Code, to the treatment of a life insurance contract under section 7702A, and to the federal income tax treatment of amounts received as qualified accelerated death benefits under section 101. The proposed regulations reflect the addition of section 7702 to the Code by section 221(a) of the Tax Reform Act of 1984, Public Law 98-369, and the addition of section 7702A to the Code by section 5012 of the Technical and Miscellaneous Revenue Act of 1988, Public Law 100-647.

Purpose of Regulations

The proposed regulations provide insurers with the standards needed to design and market insurance contracts that provide both death benefits and morbidity benefits without subjecting policyholders to taxation on the inside build-up of the life insurance contracts.

In recognition of the needs of individuals who become terminally ill, the proposed regulations also allow the payment of benefits prior to death without any income tax liability to the recipient if death is expected to occur within 12 months.

For insurance contracts that, prior to July 1, 1993, provide for a benefit or loan for terminally ill individuals or a morbidity benefit, the proposed regulations provide transition rules that prevent the benefit or loan from resulting in adverse federal tax consequences to the policyholders and avoid the reporting and withholding requirements that would be imposed upon the insurers if the contracts were to fail to qualify as life insurance contracts. *See* Rev. Rul. 91-17, 1991-1 C.B. 190.

Summary of Relevant Statutory Provisions

Section 7702 defines a "life insurance contract" as any contract that is a life insurance contract under applicable law, but only if the contract either (1) meets the cash value accumulation test of section 7702(b), or (2) meets the guideline premium requirements of section 7702(c) and falls within the cash value corridor of section 7702(d).

The cash value accumulation test of section 7702(b) requires that, by the terms of the contract, the cash surrender value of the contract may not at any time exceed the net single premium that would have to be paid at that time to fund the future benefits under the contract. "Cash surrender value" for purposes of section 7702 is defined in section 7702(f)(2)(A) as the cash value of the contract determined without regard to any surrender charge, policy loan, or reasonable termination dividends. The "net single premium" must be determined using the assumptions, computational rules, definitions, and special rules contained in section 7702.

The guideline premium limitation of section 7702(c) provides that the premiums paid under the contract at any time must not exceed the greater of the guideline single premium or the sum of the guideline level premiums to that date. Contracts qualifying as life insurance under the guideline premium test also must satisfy the cash value corridor of section 7702(d). The corridor specifies a minimum ratio of death benefits to cash surrender values.

Section 7702(f)(7) provides for adjustments in determinations made under section 7702 if there is a change in the benefits under (or in other terms of) the contract which was not reflected in any previous determination or adjustment. A reduction in death benefits is an adjustment event under section 7702(f)(7). Qualification as a life insurance contract after an adjustment event requires redetermination of values under the contract, including the net single premium, the guideline premium limitation, and the cash value corridor, depending on the test under which the contract qualifies as life insurance.

Section 7702(g) governs the federal income tax treatment of a life insurance contract under applicable law that fails to meet the definition of a life insurance contract under section 7702(a), either at inception or at a later date. In general, under section 7702(g)(1)(A), the "income on the contract" is treated as ordinary income that is received or accrued annually by the policyholder.

Section 7702A(a) defines a modified endowment contract as a life insurance contract meeting the requirements of section 7702 which is entered into on or after June 21, 1988 and which fails to meet the 7-pay test of section 7702A(b) or a life insurance contract which is

received in exchange for a modified endowment contract.

Section 7702A(c)(3)(A)(i) provides that, if there is a "material change" within the meaning of section 7702A(c)(3) to a life insurance contract that is subject to section 7702A, the contract is treated as entered into on the day that the material change takes effect. A material change in the benefits under (or in other terms of) the contract includes any increase in the death benefit under the contract or any increase in, or addition of, a qualified additional benefit under the contract.

Section 101(a) provides in part that gross income does not include amounts received (whether in a single sum or otherwise) under a life insurance contract, if the amounts are paid by reason of the death of the insured.

Section 72(c)(1) defines investment in the contract for purposes of determining the exclusion ratio for amounts received as an annuity under an annuity, endowment, or life insurance contract. Section 72(e)(6) defines investment in the contract for amounts received under an annuity, endowment, or life insurance contract if the amount is not received as an annuity and no other income tax provision applies. *See* Rev. Rul. 55–349, 1955–1 C.B. 232, (premiums for supplementary benefits excluded from the investment in the contract).

New Insurance Contracts

Insurance companies have developed insurance contracts which provide both death benefits and "living benefits" designed to assist policyholders with the rising costs of medical care, particularly medical care in the later years of life. Living benefits generally may be divided into two types of benefits. The first type of living benefit, an "accelerated death benefit," addresses the needs of terminally ill individuals who may incur substantial medical and living expenses prior to death. This benefit allows the policyholder, under a life insurance contract insuring a terminally ill individual, to "accelerate" the death benefit paid under the contract. Generally, the accelerated death benefit is equal to all or a portion of the death benefit discounted for the remaining life expectancy (generally 12 months or less) of the terminally ill individual. The payment of a benefit is conditioned upon the policyholder surrendering all or a portion of the policyholder's rights under the life insurance contract.

A second type of living benefit provides accident and health benefits upon the occurrence of certain morbidity risks, for example, a condition requiring a long-term stay in a nursing home or certain dread diseases. The living benefit is a specified amount which is determined by reference to all or a portion of the death benefit otherwise payable. As with accelerated death benefits, the payment of a benefit is conditioned upon the policyholder surrendering all or a portion of the policyholder's rights under the life insurance contract.

Explanation of Provisions

The proposed regulations are being promulgated to provide guidance concerning the tax treatment to the owners and issuers of insurance contracts that provide living benefits by addressing the application of sections 72, 101, 7702, and 7702A to those insurance contracts.

The proposed regulations allow qualified accelerated death benefits under an insurance contract to be treated as amounts paid by reason of the death of the insured for purposes of sections 101(a) and 7702. This proposed treatment allows an insurance contract including these benefits to continue to meet the definition of a life insurance contract under section 7702. The proposed regulations also permit a person who receives a qualified accelerated death benefit to exclude, under section 101(a), the benefit from gross income.

A qualified accelerated death benefit is defined in the proposed regulations as a benefit payable under a contract on the life of an insured who becomes terminally ill, where the amount of the death benefit made available cannot be discounted by more than 12 months at the rate of interest specified in the regulations. Under the proposed regulations an individual is terminally ill if the individual has an illness or physical condition that, notwithstanding appropriate medical care, is reasonably expected to result in death within 12 months from the date of payment of the accelerated death benefit. As the 12 month determination is necessarily subjective to some extent, it is expected that the insurer will act prudently in its determination of whether the person is terminally ill. The Service is considering whether to develop further guidance that would create a presumption of terminal illness in certain circumstances.

The proposed regulations also address the treatment, under section 7702, of other living benefits that provide payments upon the occurrence of a morbidity risk of an amount determined by reference to all or a portion of the death benefit otherwise payable under an insurance contract. For purposes of section 7702, the benefit could be viewed as an amount paid upon surrender of a contract and accordingly would be included in the cash surrender value of the contract. The impact of this characterization would be to disqualify as life insurance under section 7702 many contracts providing these benefits. Contracts with large cash surrender values would no longer qualify under the cash value accumulation test of section 7702(b) while contracts qualifying under the guideline premium test of section 7702(c) would fail the cash value corridor test of section 7702(d). For example, a policyholder, age 37, might own an insurance contract with a $100,000 face amount, that also provides for a payment of $70,000 upon surrender of the contract if the policyholder is hospitalized for a specified number of days. The $70,000 hospital benefit could result in the failure of the contract to qualify as a life insurance contract under section 7702.

To enable policyholders to avoid this result, the proposed regulations adopt an approach which assumes that a life insurance contract and an accident and health insurance contract which could be sold separately should be allowed to be sold together without endangering the qualification of the contract offering both benefits as a life insurance contract under section 7702. To preserve qualification of the contract offering both benefits as a life insurance contract, the proposed regulations exclude amounts payable as additional benefits (other than qualified additional benefits) from cash value if the following conditions are satisfied: (1) The benefits are paid solely upon the occurrence of a morbidity risk, (2) the charges for the benefits are separately stated and currently imposed by the insurer, and (3) the charges are not included in premiums taken into account in the determination of the investment in the contract under section 72 and are not taken into account in the determination of premiums paid under section 7702(f)(1).

If the three conditions are met, the proposed regulations treat a life insurance contract with an additional accident and health benefit as providing both a potential death benefit and a potential living benefit which is paid upon the occurrence of a morbidity risk. The living benefit is treated as being comprised of two elements: (1) A payment upon the partial or full surrender of the life insurance contract for part or all of the cash value, and (2) a payment upon the occurrence of a morbidity event of an additional accident and health benefit equal to the difference between the total payment

received and the amount received by the policyholder on the full or partial surrender of the contract. If, however, the three conditions are not satisfied, the additional benefit will not be excluded from cash value under section 7702.

The requirement that morbidity risk charges for living benefits be separately stated and currently imposed by the terms of the life insurance contract is necessary if section 7702 is to operate in the manner intended by Congress. Providing for the proper allocation and treatment of charges for these contracts assures the appropriate treatment of amounts paid into the contract and benefits paid.

The approach in the proposed regulations is intended to level the playing field between contracts that provide accident and health benefits in conjunction with life insurance benefits and contracts that provide only accident and health benefits. Thus, the approach of the proposed regulations will allow a contract providing both accident and health and life insurance benefits to continue to qualify as a life insurance contract under section 7702 so long as the contract provides appropriate treatment of the charges for the accident and health benefits.

The proposed regulations also exclude from cash value qualified additional benefits, certain amounts returned upon termination of a credit life insurance contract, and reasonable termination dividend.

The proposed regulations define cash surrender value, net surrender value, and death benefit for purposes of section 7702.

Proposed Effective Dates

The proposed regulations under section 7702, relating to the definition of cash value and the tax treatment of certain benefits, would be effective generally for contracts issued or entered into after June 30, 1993.

Under the proposed regulations, the provision of certain benefits or loans in a life insurance contract before July 1, 1993, does not increase the cash value of the contract. The proposed regulations also provide that the addition to a life insurance contract, before July 1, 1993, of certain benefits or loans has no effect on the date that the contract was issued or entered into for purposes of section 7702 and 7702A, and does not cause a material change in the contract under section 7702A.

The addition of a qualified accelerated death benefit (or an additional benefit satisfying the three conditions specified in proposed § 1.7702–2(f)) to a life insurance contract at any time has no effect on the date that the contract was issued or entered into for purposes of section 7702 and 7702A, and does not cause a material change in the contract under section 7702A.

The section 101 exclusion provided by the proposed regulations for qualified accelerated death benefits would be effective for amounts received on or after the date on which final regulations defining a qualified accelerated death benefit are published in the **Federal Register**.

Special Analyses

It has been determined that these proposed rules are not major rules as defined in Executive Order 12291. Therefore, a Regulatory Impact Analysis is not required. It has also been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) and the Regulatory Flexibility Act (5 U.S.C. chapter 6) do not apply to these regulations, and, therefore, an initial Regulatory Flexibility Analysis is not required. Pursuant to section 7805(f) of the Internal Revenue Code, the proposed regulations will be submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on their impact on small business.

Comments and Request for a Public Hearing

Before the adoption of these proposed regulations, consideration will be given to any written comments that are timely submitted (preferably a signed original and eight copies) to the Internal Revenue Service.

Comments are specifically requested on the need for special rules under section 7702(f)(7) for contracts that do not terminate upon payment of a morbidity benefit or a qualified accelerated death benefit. Comments are also requested on whether the proposed regulations treat additional benefits insuring morbidity risks that are attached to a life insurance contract in the same fashion as contracts which provide similar benefits that are not attached to a life insurance contract. Finally, comments are requested on whether the regulations should specify how premiums and charges should be allocated among the various benefits provided under a life insurance contract.

All comments will be available for public inspection and copying in their entirety. A public hearing has been scheduled for March 19, 1993. See notice of hearing published elsewhere in this issue of the **Federal Register**.

Drafting Information

The principal author of these proposed regulations is Ann H. Logan, Office of the Assistant Chief Counsel (Financial Institutions and Products), Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Service and the Treasury Department participated in developing the regulations, in matters of both substance and style.

List of Subjects

26 CFR 1.101–1 through 1.133–1T

Income taxes, Reporting and recordkeeping requirements.

26 CFR 1.7702–0 through 1.7702A–1

Life insurance contract, Taxes.

Proposed Amendments to the Regulations

Accordingly, 26 CFR part 1 is proposed to be amended as follows:

PART 1—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953

Paragraph 1. The authority citation for part 1 is amended by adding a citation to read as follows:

Authority: 26 U.S.C. 7805 * * * Section 1.7702–2 also issued under 26 U.S.C. 7702(k) * * *

Par. 2 Section 1.101–8 is added to read as follows:

§ 1.101–8 Amounts paid with respect to terminally ill individuals.

For purposes of section 101(a), a qualified accelerated death benefit (as defined in § 1.7702–2(d)), received on or after [*date on which final regulations are published in the* **Federal Register**], is treated as an amount paid by reason of the death of the insured.

Par. 3. Section 1.7702–0 is added to read as follows.

§ 1.7702–0 Table of contents.

This section lists the captions that appear in §§ 1.7702–1 and 1.7702–2.

§ 1.7702–1 Mortality charges.

(a) General rule.
(b) Reasonable mortality charges.
  (1) Actually expected to be imposed.
  (2) Limit on charges.
(c) Safe harbors.
  (1) 1980 C.S.O. Basic Mortality Tables.
  (2) Unisex tables and smoker/nonsmoker tables.
  (3) Certain contracts based on 1958 C.S.O. table.
(d) Definitions.
  (1) Prevailing commissioners' standard tables.
  (2) Substandard risk.
  (3) Nonparticipating contract.

(4) Charge reduction mechanism.
(5) Plan of insurance.
(e) Effective date.

§ 1.7702–2 Definitions.

(a) In general.
(b) Cash value.
(1) In general.
(2) Amounts excluded from cash value.
(c) Death benefit.
(1) In general.
(2) Qualified accelerated death benefit treated as death benefit.
(d) Qualified accelerated death benefit.
(1) In general.
(2) Determination of present value of the reduction in death benefit.
(3) Examples.
(e) Terminally ill defined.
(f) Certain other additional benefits.
(1) In general.
(2) Examples.
(g) Adjustments under section 7702(f)(7).
(h) Cash surrender value.
(1) In general.
(2) For purposes of section 7702(f)(7).
(i) Net surrender value.
(j) Effective date and special rules.
(1) In general.
(2) Provision of certain benefits before July 1, 1993.
(i) Not treated as cash value.
(ii) No effect on date of issuance.
(iii) Special rule for addition of benefit or loan provision after December 15, 1992.
(3) Addition of qualified accelerated death benefit.
(4) Addition of other additional benefits.

Par. 4. Sections 1.7702–2 and 1.7702A–1 are added to read as follows:

§ 1.7702–2 Definitions.

(a) *In general.* Paragraphs (b) through (i) of this section provide definitions and other rules only for purposes of section 7702.

(b) *Cash value*—(1) *In general.* Except as otherwise provided in paragraph (b)(2) of this section, the cash value of a contract is the greater of—

(i) The maximum amount payable under the contract (determined without regard to any surrender charge or policy loan); or

(ii) The maximum amount that the policyholder can borrow under the contract.

(2) *Amounts excluded from cash value.* The cash value of a contract does not include—

(i) The amount of any death benefit (as defined in paragraph (c) of this section);

(ii) The amount of any qualified additional benefit;

(iii) The amount of any other benefit described in paragraph (f) of this section;

(iv) An amount returned to the insured upon termination of a credit life insurance contract due to a full repayment of the debt covered by the contract; or

(v) A reasonable termination dividend not in excess of $35 for each $1,000 of the face amount of the contract.

(c) *Death benefit*—(1) *In general.* A death benefit is the amount payable by reason of the death of the insured (determined without regard to any qualified additional benefits).

(2) *Qualified accelerated death benefit treated as death benefit.* For purposes of paragraph (b)(2)(i) of this section, the amount payable as a qualified accelerated death benefit as defined in paragraph (d) of this section (but determined without regard to any reduction for discounting) is treated as a death benefit.

(d) *Qualified accelerated death benefit*—(1) *In general.* A benefit payable prior to death (accelerated benefit) is a qualified accelerated death benefit if, under the contract, the following conditions are satisfied—

(i) The accelerated benefit is payable only if the insured becomes terminally ill (as defined in paragraph (e) of this section);

(ii) The amount of the accelerated benefit is equal to or more than the present value of the reduction in the death benefit otherwise payable in the event of the death of the insured (without regard to any qualified additional benefits); and

(iii) The ratio of the cash surrender value of the contract immediately after the payment of the accelerated benefit to the cash surrender value of the contract immediately before the payment of the accelerated benefit is equal to or greater than the ratio of the death benefit immediately after the payment of the accelerated benefit to the death benefit immediately before the payment of the accelerated benefit.

(2) *Determination of present value of the reduction in death benefit.* For purposes of paragraph (d)(1)(ii) of this section, the present value of the reduction in death benefit occurring upon payment of a qualified accelerated death benefit must be determined by—

(i) Using as the discount rate the greater of—

(*A*) The applicable federal interest rate determined under section 846(c)(2); or

(*B*) The interest rate applicable to policy loans under the contract; and

(ii) Assuming that the death benefit (or the portion thereof) would have been paid 12 months after the date of the payment of the accelerated benefit.

(3) *Examples.* The following examples illustrate the provisions of this paragraph (d).

Example 1. B owns an insurance contract with a death benefit of $100,000 and a cash value of $30,000. In 1994, the insured becomes terminally ill (as defined in paragraph (e) of this section). In 1994, *B* receives an accelerated benefit equal to forty percent of the death benefit under the contract (discounted in accordance with to the rules of paragraph (d)(2) of this section). As a result of the payment of the accelerated benefit, the amount that *B* is entitled to receive upon the surrender of the contract is reduced by $12,000 (forty percent of $30,000) to $18,000. The ratio of the cash surrender value of the contract immediately after the payment of the accelerated benefit to the cash surrender value of the contract immediately before the payment of the accelerated benefit (18:30) is equal to the ratio of the death benefit immediately after the payment of the accelerated benefit to the death benefit immediately before the payment of the accelerated benefit (60:100). The accelerated benefit constitutes a qualified accelerated death benefit.

Example 2. C owns an insurance contract with a death benefit of $100,000. In 1994, the insured becomes terminally ill (as defined in paragraph (e) of this section). The policy loan rate specified in the contract is 10 percent and exceeds the federal applicable rate determined under section 846(c). In 1994, *C* receives an accelerated benefit equal to the entire death benefit of the policy discounted by 10 percent for 12 months from the date of payment and the contract terminates. The accelerated benefit is not a qualified accelerated death benefit.

Example 3. The facts are the same as in *Example 2* except that *C* receives an accelerated benefit equal to the entire death benefit of the policy discounted by 20 percent for 12 months from the date of payment and the contract terminates. The accelerated benefit is a qualified accelerated death benefit.

(e) *Terminally ill defined.* An individual is terminally ill if the insurer determines that the individual has an illness or physical condition that, notwithstanding appropriate medical care, is reasonably expected to result in death within 12 months from the date of payment of the accelerated death benefit.

(f) *Certain other additional benefits*—(1) *In general.* An additional benefit is described in this paragraph (f) if the following conditions are satisfied—

(i) The benefit is payable solely upon the occurrence of a morbidity risk;

(ii) The charges for the benefit are separately stated and currently imposed by the terms of the contract; and

(iii) The charges for the benefit are not included in premiums taken into account in the determination of the investment in the contract under section 72(c)(1) or 72(e)(6) and are not taken into account in the determination of premiums paid under section 7702(f)(1).

(2) *Examples.* The following examples illustrate the provisions of this paragraph (f):

Example 1. *A* owns an insurance contract with a death benefit of $100,000. The contract contains a provision that upon the occurrence of a morbidity risk, the insurance company will pay to *A* a morbidity benefit equal to 70 percent of the contract's death benefit in complete termination of *A*'s rights under the contract. Upon surrender of the contract prior to the occurrence of the morbidity risk, *A* currently would be entitled to receive $40,000. The morbidity benefit is payable solely upon the occurrence of a morbidity risk. The charges for the morbidity benefit are separately stated and currently imposed under the contract. The charges for the morbidity benefit are not included in premiums taken into account in the determination of the investment in the contract under section 72(c)(1) or 72(e)(6) and are not taken into account in the determination of premiums paid under section 7702(f)(1). The excess of the $70,000 (70 percent of $100,000) payable to *A* upon the occurrence of the morbidity risk over $40,000 is an additional benefit which is not a qualified additional benefit. The additional benefit is described in this paragraph (f). Under paragraph (b)(2)(iii) of this section, the amount of the additional benefit (the $30,000 payable by reason of the occurrence of a morbidity risk) is not included in the contract's cash value. Accordingly, $40,000 is treated as cash value payable upon complete surrender of the contract while the remaining $30,000 is treated as a morbidity benefit under the contract.

Example 2. The facts are the same as in *Example 1* except that the charges for the morbidity benefit are not separately stated and currently imposed. The benefit is not described in this paragraph (f) and consequently the benefit is not excluded from the cash value of the contract. Under paragraph (b)(2)(iii) of this section, the contract's cash value includes the amounts payable by reason of the occurrence of a morbidity risk.

Example 3. The facts are the same as in *Example 1* except that the charges for the morbidity benefit are included in premiums taken into account in the determination of the investment in the contract under section 72(c)(1) or 72(e)(6). The benefit is not described in this paragraph (f) and consequently the benefit is not excluded from the cash value of the contract. Under paragraph (b)(2)(iii) of this section, the contract's cash value includes the amounts payable by reason of the occurrence of a morbidity risk.

(g) *Adjustments under section 7702(f)(7).* If a life insurance contract is not terminated upon the payment of a qualified accelerated death benefit or an additional benefit described in paragraph (f) of this section, any change in the benefits under (or in other terms of) the contract is a change not reflected in any previous determination or adjustment under section 7702 and is an adjustment event under section 7702(f)(7).

(h) *Cash surrender value*—(1) *In general.* Except as provided in paragraph (h)(2) of this section, cash surrender value of a contract is its cash value, as determined under paragraph (b) of this section.

(2) *For purposes of section 7702(f)(7).* For purposes of determining the recapture ceiling under section 7702(f)(7), cash surrender value is the amount that would be payable under the contract (determined without regard to any surrender charge, policy loan, or reasonable termination dividends) if the contract were terminated immediately prior to the change in the benefits under (or in other terms of) the contract.

(i) *Net surrender value.* For purposes of section 7702(g), the net surrender value of a contract at any time is the amount that would be payable under the contract (determined with regard to surrender charges but without regard to any policy loan) if the contract were terminated at that time.

(j) *Effective date and special rules*—(1) *In general.* Except as otherwise provided in this paragraph (j), this section applies only with respect to contracts issued or entered into after June 30, 1993.

(2) *Provision of certain benefits before July 1, 1993*—(i) *Not treated as cash value.* If a benefit or loan payable only in the event the insured becomes terminally ill (as defined in paragraph (e) of this section), or an additional benefit (other than a qualified additional benefit) or loan payable solely upon the occurrence of a morbidity risk, is provided in a life insurance contract before July 1, 1993, the benefit or loan is not treated as cash value under section 7702.

(ii) *No effect on date of issuance.* If a benefit or loan provision described in paragraph (j)(2)(i) of this section is added to a life insurance contract before July 1, 1993, the addition of the benefit or loan has no effect on the date that the contract was issued or entered into for purposes of section 7702.

(iii) *Special rule for addition of benefit or loan provision after December 15, 1992.* This paragraph (j)(2) applies with respect to a benefit or loan provision added to a life insurance contract after December 15, 1992 only if the insurer can demonstrate that the benefit or loan provision was available under a life insurance contract issued in the United States as of December 15, 1992.

(3) *Addition of qualified accelerated death benefit.* If a qualified accelerated death benefit (as defined in paragraph (d) of this section) is added to a life insurance contract at any time—

(i) The addition of the benefit has no effect on the date that the contract was issued or entered into for purposes of section 7702; and

(ii) Paragraph (b)(2)(i) of this section shall apply to the qualified accelerated death benefit.

(4) *Addition of other additional benefits.* If an additional benefit described in paragraph (f) of this section is added to a life insurance contract at any time—

(i) The addition of the benefit has no effect on the date that the contract was issued or entered into for purposes of section 7702; and

(ii) The benefit is not treated as cash value under section 7702.

§ 1.7702A–1 Addition of certain benefits.

(a) *Addition of certain benefits before July 1, 1993*—(1) *No effect on date of issuance.* If a benefit or loan payable only in the event the insured becomes terminally ill (as defined in § 1.7702–2(e)), or an additional benefit (other than a qualified additional benefit) or loan payable solely upon the occurrence of a morbidity risk, is added to a life insurance contract before July 1, 1993, the addition of the benefit or loan provision has no effect on the date that the contract was issued or entered into for purposes of section 7702A.

(2) *No material change.* If a benefit or loan provision described in paragraph (a)(1) of this section is added to a life insurance contract before July 1, 1993, the addition of the benefit is not treated as a material change under section 7702A(c)(3).

(3) *Special rule for addition of benefit or loan provision after December 15, 1992.* This paragraph (a) applies with respect to a benefit or loan provision added to a life insurance contract after December 15, 1992 only if the insurer can demonstrate that the benefit or loan provision was available under a life insurance contract issued within the United States as of December 15, 1992.

(b) *Addition of qualified accelerated death benefit.* If a qualified accelerated death benefit (as defined in § 1.7702–2(d)) is added to a life insurance contract at any time—

(1) The addition of the benefit has no effect on the date that the contract was issued or entered into for purposes of section 7702A; and

(2) The addition of the benefit is not treated as a material change under section 7702A(c)(3).

(c) *Addition of other additional benefits.* If an additional benefit described in § 1.7702–2(f) is added to a life insurance contract at any time—

(1) The addition of the benefit has no effect on the date that the contract was issued or entered into for purposes of section 7702A; and

(2) The addition of the benefit is not treated as a material change under section 7702A(c)(3).

Michael P. Dolan,

Acting Commissioner of Internal Revenue.

[FI-25-92]

RIN 1545-AQ70

Qualified Accelerated Death Benefits Under Life Insurance Contracts; Hearing

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of public hearing on proposed regulations.

SUMMARY: This document provides notice of a public hearing on proposed Income Tax Regulations relating to the definition of a life insurance contract for Federal tax purposes and to the Federal income tax treatment of amounts received as qualified accelerated death benefits.

DATES: The public hearing will be held on Friday, March 19, 1993, beginning at 10 a.m. Requests to speak and outlines of oral comments must be received by Friday, February 26, 1993.

ADDRESSES: The public hearing will be held in the IRS Auditorium, Seventh Floor, 7400 Corridor, Internal Revenue Building, 1111 Constitution Avenue, NW, Washington, DC. Requests to speak and outlines of oral comments should be submitted to the Internal Revenue Service, P.O. Box 7604, Ben Franklin Station, Attn: CC:CORP:T:R [FI-25-92], room 5228, Washington, DC 20044.

FOR FURTHER INFORMATION CONTACT: Mike Slaughter of the Regulations Unit, Assistant Chief Counsel (Corporate), (202) 622-7190 (not a toll-free number).

SUPPLEMENTARY INFORMATION: The subject of the public hearing is proposed regulations to amend the Income Tax Regulations (26 CFR part 1) under sections 101, 7702, and 7702A of the Internal Revenue Code, to the treatment of life insurance contract under section 7702A, and to the Federal income tax treatment of amounts received as qualified accelerated death benefits under section 101. These proposed regulations appear elsewhere in this issue of the **Federal Register**.

The rules of § 601.601(a)(3) of the "Statement of Procedural Rules" (26 CFR part 601) shall apply with respect to the public hearing. Persons who have submitted written comments within the time prescribed in the notice of proposed rulemaking and who also desire to present oral comments at the hearing on the proposed regulations should submit not later than Friday, February 26, 1993, an outline of the oral comments/testimony to be presented at the hearing and the time they wish to devote to each subject.

Each speaker (or group of speakers representing a single entity) will be limited to 10 minutes for an oral presentation exclusive of the time consumed by the questions from the panel for the government and answers to these questions.

Because of controlled access restrictions, attendees cannot be admitted beyond the lobby of the Internal Revenue Building until 9:45 a.m.

An agenda showing the scheduling of the speakers will be made after outlines are received from the persons testifying. Copies of the agenda will be available free of charge at the hearing.

By direction of the Commissioner of Internal Revenue.

Dale D. Goode,

Federal Register Liaison Officer, Assistant Chief Counsel (Corporate).

RIN 1545-AP52

Partnership Transactions Involving Equity Interests of a Partner

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: Section 631 of the Tax Reform Act of 1986 was intended to repeal the *General Utilities* doctrine which, under certain circumstances, permitted a corporation to distribute appreciated assets to its shareholders without recognizing gain. The Service has determined that, in certain circumstances, the acquisition (or mere ownership) by a partnership of stock in one of its corporate partners results in avoidance of the repeal of the *General Utilities* doctrine. This document contains proposed regulations that prevent a corporate partner from avoiding corporate-level gain through transactions with a partnership involving equity interests of the partner. The intended effect of these proposed regulations is to provide for gain recognition in such circumstances.

DATES: Written comments and requests to appear, and outlines of oral comments to be presented, at a public hearing scheduled for February 3, 1993 must be received by January 20, 1993. See notice of public hearing on these proposed regulations published elsewhere in this issue of the **Federal Register**.

ADDRESSES: Send comments, requests to speak at the public hearing, and outlines of oral comments to: Internal Revenue Service, P.O. Box 7604, Ben Franklin Station, Attn: CC:CORP:T:R (PS-91-90), room 5228, Washington, DC 20044.

FOR FURTHER INFORMATION CONTACT: Channing Brackey at (202) 622-3070 or Tom Matragrano at (202) 622-7530 (not toll-free numbers).

SUPPLEMENTARY INFORMATION:

Introduction

This document contains proposed income tax regulations under section 337(d) of the Internal Revenue Code implementing Notice 89-37, 1989-1 C.B. 679. In the notice, the Internal Revenue Service stated that it would publish regulations to prevent the use of a partnership to circumvent the repeal of the *General Utilities* doctrine. Section 337(d) provides the Service authority to issue such regulations as may be necessary and appropriate to carry out the purposes of the repeal, "including regulations to ensure that such purposes may not be circumvented through the use of any provision of the law or regulations."

Prior to the repeal of the *General Utilities* doctrine, a corporation recognized no gain or loss on certain distributions of property to its shareholders. Following the repeal, a corporation generally recognizes gain on the distribution of appreciated property to a shareholder.

In Notice 89-37, the Service clarified that section 311(b), rather than section 731(a), applies when a partner receives a partnership distribution of its own stock (the distribution rule). Further, the Service stated that the partner recognizes gain when a pre-distribution transaction (or series of transactions) has the economic effect of an exchange by the partner of appreciated property for its stock (the deemed redemption rule). Finally, the Notice indicated that some of the transactions subject to these regulations also may be subject to taxation under the "substance over form" principle or section 707(a)(2)((B), and this continues to be true.

Explanation of Provisions

In General

This section sets forth rules that apply when a partnership, either directly or indirectly, owns, acquires, or distributes the stock of a partner. The proposed regulations adopt a deemed redemption rule and a distribution rule.

The Deemed Redemption Rule

Under the deemed redemption rule, a partner recognizes gain at the time of, and to the extent that, any transaction (or series of transactions) has the economic effect of a partner exchanging its interest in appreciated property for an interest in its stock that is owned or acquired by the partnership. The economic effect of an exchange of property for stock may occur when the partner contributes property to the partnership. It may also occur when a partnership acquires stock of a partner, when a partnership makes disproportionate distributions, or when the partnership agreement is amended to provide different sharing ratios.

The Distribution Rule

Under the distribution rule, a partnership distribution to a partner of its stock is treated as a redemption of the partner's stock in exchange for all or a portion of the partner's partnership interest. Therefore, the regulations provide that the general nonrecognition rule of section 731(a) does not apply to the extent a partner receives a distribution of its own stock.

The Service received comments on Notice 89–37 suggesting that a modified distribution rule be adopted. Under the modified distribution rule, the gain recognized on the distribution generally would be limited to the difference between the partnership's basis in the stock of the partner before the distribution and the partner's basis in the stock if determined under section 732(c). Proponents of the modified distribution rule believe that the stock treated as redeemed under the deemed redemption rule should be treated as owned by the redeeming partner for certain purposes and owned by the partnership for other purposes. Otherwise, they argue, the same stock could be treated as redeemed by a partner more than once. An alternative characterization, and the one adopted in the proposed regulations, is that the redeeming partner be treated as contributing the redeemed stock back to the partnership for all purposes. The Service considered the modified distribution rule, but rejected that approach because the distribution rule is more administrable and requires less complex rules.

Affiliate Stock and Other Equity Interests

The proposed regulations also apply to transactions involving stock of an affiliate of the partner or other equity interests in the partner or affiliate, including options, warrants, and similar interests. A corporation is treated as an affiliate of a partner at the time of a deemed redemption or distribution by the partnership if, immediately thereafter, the partner and corporation are members of an affiliated group.

De minimis Rule and Inadvertence Rule

The proposed regulations, under a *de minimis* rule, do not apply to a partner for a taxable year if the partner has never owned more than five percent of the partnership, and as of the close of the taxable year and while the partner is a partner, the partnership has not held in the aggregate (whether or not held at any one time) the lesser of $250,000 of stock of the partner, or two percent of the value of any class of stock of the partner. Further, the rules do not apply to any stock of a partner that is disposed of by the partnership prior to the due date (including extensions) of its federal income tax return for the taxable year during which the stock is acquired (or for the taxable year in which the partner becomes a partner, whichever is applicable) and that is not distributed to the partner or affiliate.

Effective Date

The regulations are proposed to apply to any transaction or distribution occurring after March 9, 1989.

Special Analysis

It has been determined that these rules are not major rules as defined in Executive Order 12291. Therefore, a Regulatory Impact Analysis is not required. It also has been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) and the Regulatory Flexibility Act (5 U.S.C. chapter 6) do not apply to these regulations, and therefore, a Regulatory Flexibility Analysis is not required. Pursuant to section 7805(f) of the Internal Revenue Code, this notice of proposed rulemaking will be submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on the impact of the rules on small business.

Comments and Public Hearing

Before adopting these proposed regulations as final regulations, consideration will be given to any written comments that are submitted timely (preferably a signed original and eight copies) to the Internal Revenue Service. All comments will be available for public inspection and copying in their entirety. A public hearing will be held upon written request to the Internal Revenue Service by any person who also submits written comments. If a public hearing is held, notice of the time and place will be published in the **Federal Register**.

Drafting Information

The principle authors of these regulations are Channing Brackey of the Office of Assistant Chief Counsel (Passthroughs and Special Industries) and Tom Matragrano of the Office of Assistant Chief Counsel (Corporate), Internal Revenue Service. Other personnel from the Internal Revenue Service and the Treasury Department participated in their development.

List of Subjects in 1.336–1 through 1.338(h)(10)–1T

Income taxes, Reporting and recordkeeping requirements, Securities.

PART 1—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953

Paragraph 1. The authority citation for part 1 is amended by adding the following citation to read as follows:

Authority: 26 U.S.C. 7805 * * * Section 1.337(d)–3 also issued under 26 U.S.C. 337(d) * * *

Par. 2. Section 1.337(d)–3 is added to read as follows:

§ 1.337(d)–3 Gain recognition upon certain partnership transactions involving a partner's stock.

(a) *In general.* This section applies when a partnership, either directly or indirectly, owns, acquires, or distributes the stock of a partner. Under this section, a partner recognizes gain when it is treated as increasing its interest in its own stock in exchange for appreciated property (the deemed redemption rule). Further, if the partnership distributes stock of a partner to the partner, the partner is treated as redeeming its stock for a portion of its partnership interest and recognizes gain, if any (the distribution rule).

(b) *Purpose.* The purpose of this section is to prevent corporate taxpayers, through the use of a partnership, from avoiding the gain required to be recognized under sections 311 or 337(d). The rules of this section, including the determination of the amount of gain, must be applied in a

manner that is consistent with and reasonably carries out the purposes of this section.

(c) *Stock of a Partner.* For purposes of this section, stock of a partner includes a partner's stock, an affiliate's stock, or other equity interests in the partner or affiliate, including options, warrants, and similar interests. A corporation is treated as an affiliate of a partner at the time of a deemed redemption or distribution by the partnership if, immediately thereafter, the corporation and the partner are members of an affiliated group as defined in section 1504 (a), without regard to the exceptions in section 1504(b).

(d) *Deemed redemption rule*—(1) *In general.* A partner recognizes gain at the time of, and to the extent that, any transaction (or series of transactions) has the economic effect of an exchange by a partner of its interest in appreciated property for an interest in the stock of the partner owned, acquired, or distributed by the partnership. The economic effect of an exchange of property for stock may occur when the partner contributes property to a partnership which owns stock of a partner. It may also occur when a partnership acquires the stock of a partner, when a partnership makes disproportionate distributions, when a partnership agreement is amended to provide different sharing ratios, or when the *de minimis* rule of paragraph (f) (1) of this section no longer applies.

(2) *Basis.* If gain is recognized under this paragraph (d), appropriate adjustments in basis are made to take the gain into account.

(3) *Partner's interest in its own stock.* For purposes of the deemed redemption rule, a partner's interest in the stock of the partner held by the partnership is determined based on all the facts and circumstances, including allocations and distribution rights.

(e) *Distribution rule*—(1) *In general.* The distribution by a partnership to a partner of stock of the partner is treated as a redemption or an exchange of the stock of the partner for a portion of the partner's partnership interest with a value equal to the stock distributed. Section 311 or 1001 rather than section 731 applies to that portion of the distribution.

(2) *Distribution rule and section 732.* Section 732 does not apply to a distribution of stock of a partner if this paragraph (e) applies. If the distribution to a partner of the stock of that partner is part of a larger distribution, the distribution of the stock of the partner is treated as a separate transaction that occurs before the distribution of the other property.

(f) *Exceptions*—(1) *De minimis rule.* This section does not apply to a partner for a taxable year if—

(i) The partner has never owned more than five percent of the partnership; and

(ii) As of the close of the taxable year and while the partner is a partner, the partnership has not held in the aggregate (whether or not held at any one time) the lesser of—

(A) $250,000 of stock of the partner; or

(B) Two percent of the value of any class of stock of the partner.

(2) *Inadvertence rule.* This section does not apply to any stock of a partner that is—

(i) Disposed of by the partnership prior to the due date (including extensions) of its Federal income tax return for the taxable year during which the stock is acquired (or for the taxable year in which the partner becomes a partner, whichever is applicable); and

(ii) Not distributed to the partner or affiliate.

(g) *Effective date.* These regulations apply to any transaction or distribution that occurs after March 9, 1989.

(h) *Examples.* The following examples illustrate the principles of this section. For purposes of these examples, assume that the exceptions provided in paragraph (f) of this section do not apply.

Example 1. The deemed redemption and distribution rules. (i) In 1992, C, a corporation, and A, an individual, form partnership CA as 50-percent partners. C contributes Asset 1 with a $0 basis and $100 fair market value, and A contributes C stock with a basis and fair market value of $100. In 1998, when Asset 1 and the C stock each has a fair market value of $200, CA liquidates. C and A each receive 50 percent of Asset 1 and the C stock.

(ii) In 1992, the contributions have the economic effect of an exchange by C of its interest in appreciated property for an interest in its stock. Under the deemed redemption rule of paragraph (d) of this section, C is treated as exchanging an appreciated asset with a $0 basis and $50 fair market value for 50 percent of the partnership's C stock. C recognizes a $50 gain, and the basis of the partnership in Asset 1 and C's basis in the CA partnership interest each increase from $0 to $50.

(iii) Under the distribution rule of paragraph (e) of this section, when CA liquidates in 1998, C is treated under section 311 as redeeming the C stock received from the partnership (worth $100) in exchange for $100 of C's CA interest with a basis of $25 (one-half of C's basis in the partnership). Thus, C recognizes a $75 gain.

(iv) For purposes of section 731, C receives the 50-percent interest in Asset 1 in liquidation of its partnership interest. Under section 732, the remaining $25 basis in C's partnership interest is allocated to Asset 1.

Example 2. Gain in partnership interest. (i) In 1992, C, a corporation, and A, an individual, form partnership CA as 50-percent partners. C and A each contribute assets with a basis and value of $100. In 1998, when C's partnership interest has a basis of $100 and a value of $200 CA purchases C stock at a cost of $100.

(ii) In 1998, the purchase of the C stock by CA has the economic effect of an exchange by C of a portion of its partnership interest for an interest in its stock (one-half or $50 in value of the C stock). Under the deemed redemption rule of paragraph (d) of this section, C is treated as redeeming the C stock (worth $50) in exchange for $50 of C's CA interest with a basis of $25 (one-fourth of C's basis in the partnership). Thus, C recognizes a $25 gain and C's basis in CA increases from $100 to $125.

Example 3. Contribution of gain and loss property. (i) In 1992, C, a corporation, A, an individual, and B, an individual, form partnership CAB as 33⅓-percent partners. C contributes Asset 1 with a $9 basis and $90 fair market value and Asset 2 with a $90 basis and $9 fair market value. A contributes C stock with a basis and fair market value of $99. B contributes $99 of cash. In 1998, the assets have not changed in value and C receives the C stock in liquidation of its partnership interest.

(ii) In 1992, the contributions have the economic effect of an exchange by C of its interest in appreciated property for an interest in its stock. The rules of this section, including the determination of the amount gain, must be applied in a manner that is consistent with and carries out the purposes described in paragraph (b) of this section. Thus, C is treated as exchanging appreciated property with a $3.30 basis and $33 fair market value for one-third of the partnership's C stock worth $33. C recognizes a $29.70 gain.

(iii) In 1998, when C receives its stock in exchange for its partnership interest, C recognizes the remaining gain of $51.30.

Example 4. Stock acquired prior to effective date. (i) Prior to the effective date of these regulations, C, a corporation, and B form partnership CB. C contributes $1,000 of property (with a basis of $100) and B contributes $1,000 of cash. Also in the same year, CB purchases $1,000 of C stock. In 1994, CB makes a liquidating distribution of the C stock to C and the property to B. Assume that there has been no appreciation in the property or stock since acquired by the partnership.

(ii) In 1994, under this section, C is treated as exchanging an appreciated asset with a basis of $100 and value of $1,000 for CB's C stock. C recognizes a $900 gain.

M.P. Dolan,

Acting Commissioner of Internal Revenue.

[PS–91–90]

RIN 1545–AP52

Partnership Transactions Involving Equity Interests of a Partner; Hearing

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of public hearing on proposed regulations.

SUMMARY: This document provides notice of a public hearing on proposed Income Tax Regulations that prevent a corporate partner from avoiding corporate-level gain through transactions with a partnership involving equity interests of the partner.

DATES: The public hearing will be held on Wednesday, February 3, 1993, beginning at 10 a.m. Requests to speak and outlines of oral comments must be received by Wednesday, January 20, 1993.

ADDRESSES: The public hearing will be held in the IRS Auditorium, Seventh Floor, 7400 Corridor, Internal Revenue Building, 1111 Constitution Avenue NW., Washington, DC. Requests to speak and outlines of oral comments should be submitted to the Internal Revenue Service, P.O. Box 7604, Ben Franklin Station, Attn: CC:CORP:T:R [PS–91–90], room 5228, Washington, DC 20044.

FOR FURTHER INFORMATION CONTACT: Mike Slaughter of the Regulations Unit, Assistant Chief Counsel (Corporate), 202–622–7190 (not a toll-free number).

SUPPLEMENTARY INFORMATION: The subject of the public hearing is proposed regulations under section 337(d) of the Internal Revenue Code implementing Notice 89–37, 1989–1 C.B. 679.

The rules of § 601.601(a)(3) of the "Statement of Procedural Rules" (26 CFR part 601) shall apply with respect to the public hearing. Persons who have submitted written comments within the time prescribed in the notice of proposed rulemaking and who also desire to present oral comments at the hearing on the proposed regulations should submit not later than Wednesday, January 20, 1993, an outline of the oral comments/testimony to be presented at the hearing and the time they wish to devote to each subject.

Each speaker (or group of speakers representing a single entity) will be limited to 10 minutes for an oral presentation exclusive of the time consumed by the questions from the panel for the government and answers to these questions.

Because of controlled access restrictions, attendees cannot be admitted beyond the lobby of the Internal Revenue Building until 9:45 a.m.

An agenda showing the scheduling of the speakers will be made after outlines are received from the persons testifying. Copies of the agenda will be available free of charge at the hearing.

By direction of the Commissioner of Internal Revenue.

Dale D. Goode,

Federal Register Liaison Officer, Assistant Chief Counsel (Corporate).

40 CFR Part 52

[PA–15–1–5367; FRL–4545–2]

Approval and Promulgation of Air Quality Implementation Plans; Pennsylvania Group III CTG: RACT for VOC's From Synthetic Organic Chemical Manufacturing Industries (SOCMI) in Allegheny County, PA

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: EPA is proposing a limited approval and limited disapproval of a request from the Pennsylvania Department of Environmental Resources (PADER) to revise the Allegheny County portion of the Commonwealth of Pennsylvania State Implementation Plan (SIP) submitted on July 13, 1987. This revision establishes and requires reasonably available control technology (RACT) to control fugitive volatile organic compound (VOC) emissions from synthetic organic chemical manufacturing industries (SOCMI), and the associated test method required to determine compliance. This revision has been submitted by PADER at the request of the Allegheny County Bureau of Air Pollution Control to fulfill its 1982 ozone SIP commitment to adopt all applicable control technique guidelines (CTGs) published by EPA. EPA has evaluated Article XX of the Rules and Regulations of the Allegheny County Health Department, section 534 and section 605 I of Article XX and is proposing a limited approval under section 110(k)(3) and 301(a) of the Clean Air Act, as amended in 1990 (CAA), because the regulation strengthens the SIP. At the same time, EPA is proposing a limited disapproval of Article XX, section 534 because the regulation does not fully meet the Part D, section 182(a)(2)(A) requirements of the CAA.

DATES: Comments must be received on or before January 14, 1993.

ADDRESSES: Comments may be mailed to Thomas J. Maslany, Director, Air, Radiation and Toxics Division, U.S. Environmental Protection Agency, Region III, 841 Chestnut Building, Philadelphia, Pennsylvania 19107. Copies of the documents relevant to this action are available for public inspection during normal business hours at the Air, Radiation, and Toxics Division, U.S. Environmental Protection Agency, Region III, 841 Chestnut Building, Philadelphia, Pennsylvania 19107; Commonwealth of Pennsylvania, Department of Environmental Resources, Bureau of Air Quality Control, P.O. Box 2357, Executive House—2nd & Chestnut Street, Harrisburg, Pennsylvania 17120; and Allegheny County Health Department, Bureau of Air Pollution Control, 301 Thirty-ninth Street, Pittsburgh, Pennsylvania 15201.

FOR FURTHER INFORMATION CONTACT: Ms. Jacqueline R. Lewis, (215) 597–6863.

SUPPLEMENTARY INFORMATION: On September 12, 1978 EPA promulgated a list of ozone nonattainment areas under the provisions of the 1977 Clean Air Act (1977 CAA or pre-amended Act) that included the Southwest Pennsylvania Intrastate Air Quality Control Region (AQCR) in the Commonwealth of Pennsylvania. Allegheny County is in this AQCR 43 FR 40513, 40 CFR 81.339. Because Allegheny and other counties were unable to reach attainment by the statutory attainment date of December 31, 1982, Pennsylvania requested under section 172(a)(2), and EPA approved, an extension of the attainment date to December 31, 1987. 40 CFR 52.2022. The Pittsburgh-Beaver Valley metropolitan area, containing Allegheny County, did not attain the ozone standard by the approved attainment date. To fulfill the requirements of section 172(a)(2) and (b)(3) of the CAA and its 1982 SIP, PADER submitted a revision to the Allegheny County portion of the Pennsylvania ozone SIP and EPA on July 13, 1987.

On May 26, 1988, EPA notified the Governor of Pennsylvania that the Pittsburgh-Beaver Valley portion of the SIP was inadequate to attain and maintain the ozone standard and requested that deficiencies in the existing SIP be corrected (EPA's SIP-Call). On November 15, 1990, amendments to the 1977 CAA were enacted. Public Law 101–549, 104 Stat. 2399, codified at 42 U.S.C. 7401–7671q. In amended section 182(a)(2)(A) of the CAA, Congress statutorily adopted the

requirement that nonattainment areas fix their deficient RACT rules for ozone and establish a deadline of May 15, 1991 for states to submit corrections of those deficiencies.

In addition, although this submittal preceded the date of enactment of the CAA, it serves to fulfill part of the "RACT fix-up" requirement of section 182(a)(2)(A) of the amended Act for the Pittsburgh-Beaver Valley nonattainment area. Areas designated nonattainment before enactment of the Amendments and which retained that designation and were classified as marginal or above as of enactment are required to meet that RACT fix-up requirement. Under section 182(a)(2)(A), those areas were required by May 15, 1991, to correct RACT. RACT fix-ups were also required under pre-amended section 172(b) as that requirement was interpreted in pre-amended guidance.[1] The SIP call letters interpreted that guidance and indicated corrections necessary for specific nonattainment areas. The Pittsburgh-Beaver Valley nonattainment area is classified as moderate, and is, therefore, subject to the RACT fix-up requirement.[2]

For the purpose of assisting state and local agencies in developing RACT rules, EPA prepared a series of Control Technique Guideline (CTG) documents. The CTGs are based on the underlying requirements of the Act and specify the presumptive norms for what is RACT for specific source categories. Under the CAA, Congress ratified EPA's use of these documents, as well as other Agency policy, for requiring States to "fix-up" their RACT rules. See section 182(a)(2)(A). The CTG applicable to Allegheny County's revised Article XX section 534 is entitled "Control of Volatile Organic Compound Leaks from Synthetic Organic Chemical and Polymer Manufacturing Equipment" (SOCMI Fugitives (EPA 450/3–83–006, published March 1984)).

Further interpretations of EPA policy are found in the Blue Book. In general, these guidance documents have been set forth to ensure that VOC rules are fully enforceable and strengthen or maintain the SIP.

This revision establishes RACT for the control of fugitive emissions from SOCMI, adopted in accordance with the recommendations made in the CTG document, referenced above. The Allegheny County July 13, 1987 submittal also included an installation permit for an afterburner to control VOC emissions from an air oxidation process. Only the portion of the July 13, 1987 SIP revision submittal pertaining to the control of VOC leaks from SOCMI facilities and the associated test method are addressed by this rulemaking action and notice. The remaining portion of the SIP revision submittal will be the subject of a separate rulemaking action and notice.

Proposed SIP Revision

The proposed revision represents the revision of Article XX, by adding a new section 534, "Synthetic Organic Chemical and Polymer Manufacturing—Fugitive Sources" and paragraph I of section 605, the associated test method which references EPA method 21, required to determine compliance with section 534. EPA has reviewed this SIP revision submittal and has determined that the amendments constitute RACT for this source category. This regulation meets the requirements of the aforementioned CTG document, except as discussed below.

Allegheny County's Article XX, section 534 at paragraph D, provides for the Director of the Bureau to approve the use of alternative VOC emission reduction system and/or alternative monitoring procedures, without specifying that the use of such alternatives must also be approved by EPA. Because of this deficiency, the regulation is not approvable pursuant to 182(a)(2)(A) of the CAA because it is not consistent with the interpretation of section 172 of the pre-amendment guidance and may lead to regulatory enforceability problems.

Because of the above deficiency, EPA cannot grant full approval of this regulation under section 110(k)(3) and part D. Also, because section 534 is not composed of separable parts which meet all the applicable requirements of the CAA, EPA cannot grant partial approval of the regulation under section 110(k)(3).

However, EPA may grant a limited approval of the submitted regulation under section 110(k)(3) in light of EPA's authority pursuant to section 301(a) to adopt regulations necessary to further air quality by strengthening the SIP. The approval is limited because EPA's action also contains a simultaneous limited disapproval, due to the fact that the regulation does not meet the section 182(a)(2)(A) requirements of part D because of the noted deficiency. Thus, in order to strengthen the SIP, EPA is proposing a limited approval of Allegheny County's Article XX, section 534, under sections 110(k)(3) and 301(a) of the CAA.

At the same time, EPA is also proposing a limited disapproval of the regulation because section 534 at paragraph D of the County's regulation must be amended to require that the use of any alternative VOC emission reduction system and/or alternative monitoring procedures must be approved by the United States Environmental Protection Agency in addition to the Allegheny County Bureau of Air Pollution Control as required by section 182(a)(2)(A) of the CAA. Under section 179(a)(2), if the Administrator disapproves a submittal under section 110(k) for an area designated nonattainment based on the submittal's failure to meet one or more of the elements required by the Act, the Administrator must apply one of the sanctions set forth in section 179(b) unless the deficiency has been corrected within 18 months of such disapproval. Section 179(b) provides two sanctions available to the Administrator: Highway funding and offsets. The 18-month period referred to in section 179(a) will begin at the time EPA publishes the final notice of this disapproval. Moreover, the final disapproval triggers the 24-month period by the end of which EPA must promulgate a Federal implementation plan (FIP) under section 110(c).

Upon publishing a final notice of a limited approval and limited disapproval, that action will approve the rule into the SIP so that regulation is federally enforceable, and, at the same time, the final notice will require that the County correct the deficiency in the regulation within 18 months in order to avoid the promulgation of sanctions.

A more detailed description of EPA's evaluation of the above regulatory changes is presented in the Technical Support Document that has been prepared for this revision. That document is available for public inspection at the location provided in the **ADDRESSES** section of this notice.

Proposed Action

EPA is proposing a limited approval and limited disapproval of the addition of section 534, Synthetic Organic Chemical and Polymer Manufacturing—Fugitive Sources and section 605 I, the associated test method required to determine compliance with section 534, which revise Article XX, as a revision to

---

[1] Among other things, the pre-amendment guidance consists of the Post-87 policy, 52 FR 45044 (Nov. 24, 1987); the Bluebook, "Issues Relating to VOC Regulation Cutpoints, Deficiencies and Deviations, Clarification to Appendix D of November 24, 1987 Federal Register Notice" (of which notice of availability was published in the Federal Register on May 25, 1988); and the existing CTGs.

[2] The Pittsburgh-Beaver Valley area retained its designation and was classified by operation of law pursuant to section 107(d) and 181(a) upon the date of enactment of the amendments. See 56 FR 56694 (Nov. 6, 1991).

the Allegheny County portion of the Pennsylvania SIP.

Nothing in this action should be construed as permitting or allowing or establishing a precedent for any future request for revision to any state implementation plan. Each request for revision to the state implementation plan shall be considered separately in light of specific technical, economic, and environmental factors and in relation to relevant statutory and regulatory requirements.

SIP approvals under sections 110 and 301, and subchapter I, part D of the CAA do not create any new requirements but simply approve requirements that the State is already imposing. Therefore, because the Federal SIP approval does not impose any new requirements, I certify that it does not have a significant impact on any small entities affected. Moreover, due to the nature of the Federal-State relationship under the CAA, preparation of a flexibility analysis would constitute Federal inquiry into the economic reasonableness of state action. The Clean Air Act forbids EPA to base its actions concerning SIPs on such grounds. *Union Electric Co.* v. *U.S. EPA*, 427 U.S. 246, 255–66 (1976); 42 U.S.C. 7410(a)(2).

EPA's disapproval of the State request under section 110 and subchapter I, part D of the CAA does not affect any existing requirements applicable to small entities. Any pre-existing federal requirements remain in place after this disapproval. Federal disapproval of the state submittal does not affect its state-enforceability. Moreover, EPA's disapproval of the submittal does not impose any new Federal requirements.

Therefore, EPA certifies that this disapproval action does not have a significant impact on a substantial number of small entities because it does not remove existing requirements and impose any new Federal requirements.

This action proposes limited approval and limited disapproval of a revision to the Allegheny County portion of the Pennsylvania SIP, section 534 which establishes RACT for the control of fugitive VOC emissions from SOCMI and paragraph I of section 605 the associated test method required to determine compliance. It has been classified as a Table 2 action by the Regional Administrator under the procedures published in the **Federal Register** on January 19, 1989 (54 FR 2214–2225). On January 6, 1989, the Office of Management and Budget waived Table 2 and Table 3 SIP revisions (54 FR 2222) from the requirements of section 3 of Executive Order 12291 for a period of two years. EPA has submitted a request for a permanent waiver for Tables 2 and 3 SIP revisions. The Office of Management and Budget has agreed to continue the temporary waiver until such time as it rules on EPA's request.

BILLING CODE 6560–50–M

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 67

[Docket No. FEMA–7048]

Proposed Flood Elevation Determinations

AGENCY: Federal Insurance Administration, FEMA.

ACTION: Correction of proposed rule.

SUMMARY: This document contains corrections to the proposed rule (Docket No. FEMA–7048), which was published on Thursday, August 20, 1992, (57 FR 37747). The correction more accurately represents the Flood Insurance Study and Flood Insurance Rate Map for the Town of Dover-Foxcroft, Piscataquis, Maine, than previously published.

DATES: The comment period is thirty (30) days following the second publication of this correction of the proposed rule in a newspaper of local circulation in the community.

ADDRESSES: The proposed base flood elevations for the community are available for inspection at the Dover-Foxcroft Town Office, 34 E. Main Street, Dover-Foxcroft, Maine.

FOR FURTHER INFORMATION CONTACT: William R. Locke, Chief, Risk Studies Division, Federal Insurance Administration, 500 C Street, SW., Washington, DC 20472, (202) 646–2766.

SUPPLEMENTARY INFORMATION:

Background

The Federal Emergency Management Agency (FEMA or Agency) publishes proposed determinations of base (100-year) flood elevations and modified base flood elevations for communities participating in the National Flood Insurance Program (NFIP), in accordance with section 110 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and 44 CFR 67.4(a). These base flood and modified base flood elevations, together with the floodplain management criteria required by 44 CFR 60.3, are the minimum that are required. The community may at any time enact stricter requirements of its own, or pursuant to policies established by other Federal, state or regional entities. These proposed elevations are used to meet the floodplain management requirements of the NFIP and are also used to calculate the appropriate flood insurance premium rates for new buildings built after these elevations are made final, and for the contents in these buildings.

Need for Correction

As published the proposed rule contained location and elevation information at three sources of flooding that must be corrected to represent more accurately than before the Flood Insurance Study and the Flood Insurance Rate Map for the Town of Dover-Foxcroft, Maine.

Accordingly, the proposed rule (Docket No. FEMA–7048) published as FR Doc. 92–19908 on August 20, 1992, 57 FR 37747, is corrected as follows:

§ 67.4 [Corrected]

On page 37752, under the entry for the Town of Dover-Foxcroft, Piscataquis County, Maine, the entries for Dunham Brook, Davee Brook, and East Branch Davee Brook, are corrected as follows:

Source of Flooding	Location	#Depth in feet above ground. *Elevation in feet (NGVD)	
		Existing	Modified
. . .	. . .	.	.
Dunham Brook	Approximately 200 feet upstream from confluence with Piscataquis River	*345	*346
	At downstream side of Forest Street	*369	*368
Davee Brook	At upstream side of Railroad Avenue	*348	*349
	Approximately 220 feet downstream of confluence of East Branch Davee Brook	*373	*374
East Branch Davee Brook	Approximately 120 feet upstream of confluence with Davee Brook	*375	*374
	Approximately 190 feet upstream of upstream side of State Route 153	*375	*374
. . .	. . .	.	.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MM Docket No. 92-284, RM-8119]

Radio Broadcasting Services; Repton, AL

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This document requests comments on a petition for rule making filed by Curry Communications, Inc., requesting the allotment of FM Channel 266A to Repton, Alabama, as that community's first local aural transmission service. Coordinates used for this proposal are 31-24-30 and 87-14-24.

DATES: Comments must be filed on or before February 3, 1993, and reply comments on or before February 18, 1993.

ADDRESSES: Secretary, Federal Communications Commission, Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve the petitioner, as follows: Curry Communications, Inc., Attn: Albert Curry, President, 107 Pickens Street, Monroeville, AL 36460.

FOR FURTHER INFORMATION CONTACT: Nancy Joyner, Mass Media Bureau, (202) 634-6530.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Notice of Proposed Rule Making, MM Docket No. 92-284, adopted November 18, 1992, and released December 9, 1992. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (room 230), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, Downtown Copy Center, (202) 452-1422, 1990 M St., NW., suite 640, Washington, DC 20036.

Provisions of the Regulatory Flexibility Act of 1980 do not apply to this proceeding.

Members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. See 47 CFR 1.1204(b) for rules governing permissible *ex parte* contacts.

For information regarding proper filing procedures for comments, see 47 CFR 1.415 and 1.420.

47 CFR Part 73

[MM Docket No. 92-283, RM-8122]

Radio Broadcasting Services; Hope and Fordyce, AR

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This document requests comments on a petition for the rule making filed on behalf of KdB, Inc., licensee of Station KXAR-FM, Channel 269A, Hope, Arkansas, seeking the substitution of Channel 269C2 for Channel 269A and modification of its license accordingly. In order to accommodate the request, petitioner seeks the substitution of Channel 272A for Channel 269A at Fordyce, Arkansas, and modification of the license of Station KQEW(FM), Channel 269A, accordingly. An Order to Show Cause is issued to Dallas Properties, Inc., licensee of Station KQEW (FM). Coordinates for Channel 269C2 at Hope, Arkansas, are 33-40-15 and 93-37-10; coordinates for Channel 272A at Fordyce Arkansas, are 33-48-17 and 92-26-07. Petitioner's modification proposal complies with the provisions of section 1.420(g) of the Commission's Rules. Therefore, we will not accept competing expressions of interest in the

use of Channel 269C2 at Hope, or require the petitioner to demonstrate the availability of an additional equivalent class channel.

DATES: Comments must be filed on or before February 3, 1993, and reply comments on or before February 18, 1993.

ADDRESSES: Secretary, Federal Communications Commission, Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve the petitioner's counsel, as follows: Anne Thomas Paxson, Esq., Borsari & Paxson, 2033 M Street, NW., suite 630, Washington, DC 20036.

FOR FURTHER INFORMATION CONTACT: Nancy Joyner, Mass Media Bureau, (202) 634–6530.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Notice of Proposed Rule Making, MM Docket No. 92–283, adopted November 18, 1992, and released December 9, 1992. 47 CFR Part 76

[MM Docket No. 92–295, FCC 92–536]

Cable Television Services; List of Major Television Markets

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: The Commission invites comments on its proposal to grant a Petition for Rulemaking filed by TV 14, Inc. (TV 14) to amend the Commission Rules changing the designation of the Atlanta, Georgia, television market to include the community of Rome, Georgia, so that TV 14's station, WTLK (TV) may be considered a local station in the Atlanta area under the cable compulsory copyright license. This action is taken to test the proposal for market hyphenation through the record established based on comment filed by interested parties.

DATES: Comments are due by January 6, 1993, and reply comments are due by January 19, 1993.

ADDRESSES: Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Alan E. Aronowitz, Mass Media Bureau, Policy and Rules Division (202) 632–7792.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Notice of Proposed Rule Making in MM Docket No. 92–295, FCC 92–536, adopted December 4, 1992, released December 8, 1992. The complete text of this document is available for inspection and copying during normal business hours in the FCC Reference Center, 1919 M Street, NW., room 239, Washington, DC, and also may be purchased from the Commission's copy contractor, Downtown Copy Center, at (202) 452–1422, 1990 M Street, NW., room 640, Washington, DC 20554.

Synopsis of the Notice of Proposed Rule Making

1. The Commission, in response to a Petition for Rulemaking filed by Channel 14, licensee of WRLK (TV), Rome, Georgia, proposes to amend section 76.51 of the Rules (47 CFR 76.51) to change the designation of the Atlanta, Georgia, television market to include the community of Rome, Georgia. In a previous decision (6 FCC Rcd 7234, 1991), the Commission granted a request by Channel 14 to include WTLK in the Atlanta market for purposes of section 73.658(m) of the Rules relating to territorial exclusivity. TV 14 now requests to be included in the Atlanta market so that WTLK may be considered a local station in the Atlanta area under the cable compulsory copyright license.

2. The Commission, based on the facts presented, believes that a sufficient case for market hyphenation has been set forth to justify testing this proposal through the rulemaking process and notice and comment procedures. Therefore, comment is requested on this proposal to amend section 76.51 of the Commission's Rules by adding Rome to the Atlanta, Georgia market designation.

Administrative Matters

Initial Regulatory Flexibility Analysis

3. We certify that the Regulatory Flexibility Act of 1980 does not apply to this rulemaking proceeding because if the proposed rule amendment is promulgated, there will not be a significant economic impact on a substantial number of small business entities, as defined by section 601(3) of the Regulatory Flexibility Act. A few number of television licensees and permittees will be affected by the proposed rule amendment. The Secretary shall send a copy of this Notice of Proposed Rule Making, including the certification, to the chief counsel for Advocacy of the Small Business Administration in accordance with paragraph 603(a) of the Regulatory Flexibility Act. Public Law No. 96–354, 94 Stat. 1164, 5 U.S.C. 601 *et seq.* (1981).

Ex Parte

4. This is a non-restricted notice and comment rule-making proceeding. *Ex parte* presentations are permitted, except during the Sunshine Agenda period, provided they are disclosed as provided in the Commission's rules. See *generally* 47 CFR 1.1202, 1.203, and 1.206(a).

Comment Dates

5. Pursuant to applicable procedures set forth in 1.415 and 1.419 of the Commission's Rules, 47 CFR 1.415 and 1.419, interested parties may file comments on or before January 6, 1993, and reply comments on or before January 19, 1993. To file formally in this proceeding, you must file an original plus four copies of all comments, reply comments, and supporting comments. If you want each Commissioner to receive a personal copy of your comments, you must file an original plus nine copies. You should send comments and reply comments to Office of the Secretary, Federal Communications Commission, Washington, DC 20554. Comments and reply comments will be available for public inspection during regular

business hours in the FCC Reference Center of the Federal Communications Commission, 1919 M Street, NW., room 239, Washington, DC 20554.

6. Authority for this proposed Rule Making is contained in sections 4(i) and (j), and 303 of the Communications Act of 1934, as amended.

Federal Register
Vol. 57, No. 241
Tuesday, December 15, 1992

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Forest Service

Emerald Resource Unit Timber Sales; Idaho Panhandle National Forests, Benewah County, ID

AGENCY: Forest Service, USDA.

ACTION: Revised notice of intent to prepare an environmental impact statement.

SUMMARY: In accordance with Forest Service Handbook 1909.15, Chapter 21.2, it is necessary to publish a revised notice of intent in the **Federal Register** regarding any major changes, such as a delay of more than 6 months in filing either the draft or final EIS. The Draft EIS was released for public review on February 10, 1992 and notice is hereby given that the Final EIS for the Emerald Resource Unit Timber Sales is scheduled to be completed by April, 1993. Reference: **Federal Register**, Volume 56, No. 27, pages 5193–5194, dated Friday, February 8, 1991.

FOR FURTHER INFORMATION CONTACT: Questions should be directed to Tracy J. Gravelle, St. Maries Ranger District, P.O. Box 407, St. Maries, Idaho 83861. Phone: (208) 245–3531.

Dated: December 2, 1992.

Gary W. Sieren,

District Ranger, St. Maries Ranger District, Idaho Panhandle National Forests.

BILLING CODE 3410–11–M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Adjustment of Import Limits for Certain Cotton and Man-Made Fiber Textile Products Produced or Manufactured in the People's Republic of China

December 9, 1992.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs adjusting limits.

EFFECTIVE DATE: December 9, 1992.

FOR FURTHER INFORMATION CONTACT: Anne Novak, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 482–4212. For information on the quota status of these limits, refer to the Quota Status Reports posted on the bulletin boards of each Customs port or call (202) 927–6703. For information on embargoes and quota re-openings, call (202) 482–3715.

SUPPLEMENTARY INFORMATION:

Authority: Executive Order 11651 of March 3, 1972, as amended; section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

The current limits for certain categories are being adjusted, variously, for swing and carryforward.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see **Federal Register** notice 56 FR 60101, published on November 27, 1991). Also see 56 FR 60976, published on November 29, 1991.

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

Auggie D. Tantillo,

Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

December 9, 1992.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229.

Dear Commissioner: This directive amends, but does not cancel, the directive issued to you on November 22, 1991, by the Chairman, Committee for the Implementation of Textile Agreements. That directive concerns imports of certain cotton, wool, man-made fiber, silk blend and other vegetable fiber textiles and textile products, produced or manufactured in the People's Republic of China and exported during the twelve-month period which began on January 1, 1992 and extends through December 31, 1992.

Effective on December 9, 1992, you are directed to amend further the directive dated November 22, 1991, to adjust the limits for the following categories, as provided under the terms of the current bilateral agreement between the Governments of the United States and the People's Republic of China:

Category	Adjusted twelve-month limit [1]
Levels not in group	
226	10,219,894 square meters.
331	4,948,372 dozen pairs.
369–D [2]	4,560,250 kilograms.
607	745,985 kilograms.

[1] The limits have not been adjusted to account for any imports exported after December 31, 1991.
[2] Category 369–D: only HTS numbers 6302.60.0010, 6302.91.0005 and 6302.91.0045.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Auggie D. Tantillo,

Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 92–30357 Filed 12–14–92; 8:45 am]

BILLING CODE 3510–DR–F

Announcement of Import Restraint Limits and Guaranteed Access Levels for Certain Cotton, Wool and Man-Made Fiber Textile Products Produced or Manufactured in Guatemala

December 9, 1992.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs establishing limits and guaranteed access levels for the new agreement year.

EFFECTIVE DATE: January 1, 1993.

FOR FURTHER INFORMATION CONTACT: Nicole Bivens Collinson, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 482–4212. For information on the quota status of these limits, refer to the Quota Status Reports posted on the bulletin boards of each Customs port or call (202) 927–5850. For information on embargoes and quota re-openings, call (202) 482–3715.

SUPPLEMENTARY INFORMATION:

Authority: Executive Order 11651 of March 3, 1972, as amended; section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

Memoranda of Understanding (MOUs) dated June 26, 1992 and October 30, 1992 between the Governments of the United States and Guatemala establish import limits and guaranteed access levels (GAL) for cotton, wool and man-made fiber textile products in Categories 340/640 and 448 for the period beginning on January 1, 1993 and extending through December 31, 1993.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see **Federal Register** notice 57 FR 54976, published on November 23, 1992).

Requirements for participation in the Special Access Program are available in **Federal Register** notice 51 FR 21208, published on June 11, 1986; 52 FR 26057, published on July 10, 1987; 54 FR 50425, published on December 6, 1989; and 55 FR 3079, published on January 30, 1990.

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the MOUs, but are designed to assist only in the implementation of certain of their provisions.

Auggie D. Tantillo,

Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

December 9, 1992.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229.

Dear Commissioner: Under the terms of section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854), and the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as further extended on July 31, 1991; pursuant to the Memoranda of Understanding (MOUs) dated June 26, 1992 and October 30, 1992 between the Governments of the United States and Guatemala; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended, you are directed to prohibit, effective on January 1, 1993, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton, wool and man-made fiber textile products in the following categories, produced or manufactured in Guatemala and exported during the twelve-month period beginning on January 1, 1993 and extending through December 31, 1993, in excess of the following levels of restraint:

Category	Twelve-month limit
340/640	943,400 dozen.
448	41,873 dozen.

Imports charged to these category limits for the periods July 1, 1992 through December 31, 1992 (Category 448) and September 16, 1992 through December 31, 1992 (Categories 340/640) shall be charged against those levels of restraint to the extent of any unfilled balances. In the event the limits established for those periods have been exhausted by previous entries, such goods shall be subject to the levels set forth in this directive.

The limits set forth above are subject to adjustment in the future pursuant to the provisions of the MOU's dated June 26, 1992 and October 30, 1992 between the Governments of the United States and Guatemala.

Additionally, pursuant to the MOUs dated June 26, 1992 and October 30, 1992; and the terms of the Special Access Program, as set forth in 51 FR 21208 (June 11, 1986), 52 FR 26057 (July 10, 1987) and 54 FR 50425 (December 6, 1989), effective on January 1, 1993, guaranteed access levels are being established for properly certified textile products assembled in Guatemala from fabric formed and cut in the United States in the following categories which are re-exported to the United States from Guatemala during the period January 1, 1993 through December 31, 1993:

Category	Guaranteed access level
340/640	520,000 dozen.
448	42,000 dozen.

Any shipment for entry under the Special Access Program which is not accompanied by a valid and correct certification and Export Declaration in accordance with the provisions of the certification requirements established in the directive of January 24, 1990 shall be denied entry unless the Government of Guatemala authorizes the entry and any charges to the appropriate specific limit. Any shipment which is declared for entry under the Special Access Program but found not to qualify shall be denied entry into the United States.

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception of the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Auggie D. Tantillo,

Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510–DR–F

DEPARTMENT OF DEFENSE

Office of the Secretary

Department of Defense Selection Criteria for Closing and Realigning Military Installations Inside the United States

AGENCY: Department of Defense (DoD).

ACTION: Notice of Final Selection Criteria.

SUMMARY: The Secretary of Defense, in accordance with Section 2903(b), Public Law 101–510, as amended, published in the February 15, 1991, **Federal Register** the Final Selection Criteria to be used in making recommendations for the closure and realignment of military installations inside the United States. These final criteria became effective on February 15, 1991. The final criteria published at that time will be used again, unchanged, by the Department of Defense to make recommendations that will be reviewed by the 1993 Defense Base Closure and Realignment Commission. This notice republishes those criteria.

FOR FURTHER INFORMATION CONTACT: Mr. Peter Potochney or Colonel Kirby Allen, OASD (P&L), (703) 697–8048.

SUPPLEMENTARY INFORMATION:

A. Final Selection Criteria

The final criteria to be used by the Department of Defense to make recommendations for the closure or realignment of military installations in accordance with Public Law 101–510, as amended, follow:

In selecting military installations for closure or realignment, the Department of Defense, giving priority consideration to military value (the first four criteria below), will consider:

Military Value

1. The current and future mission requirements and the impact on operational readiness of the Department of Defense's total force.

2. The availability and condition of land, facilities and associated airspace at both the existing and potential receiving locations.

3. The ability to accommodate contingency, mobilization, and future total force requirements at both the existing and potential receiving locations.

4. The cost and manpower implications.

Return on Investment

5. The extent and timing of potential costs and savings, including the number of years, beginning with the date of completion of the closure or realignment, for the savings to exceed the costs.

Impacts

6. The economic impact on communities.

7. The ability of both the existing and potential receiving communities' infrastructure to support forces, missions and personnel.

8. The environmental impact.

B. Background Information

The February 15, 1991 **Federal Register** notice contained an analysis of public comments received and a description of the changes DoD made to the proposed criteria published in a November 30, 1990 **Federal Register** Notice. DoD received 169 public comments in response to the proposed criteria and request for comments. The proposed criteria were appropriately amended based on these comments. The final criteria were accepted by Congress in 1991 and served well in the 1991 effort. They will therefore be used again, unchanged, by the Department of Defense to make recommendations to the 1993 Defense Base Closure and Realignment Commission.

BILLING CODE 3810–01–M

Corps of Engineers, Department of the Army

Deauthorization of Water Resources Projects

December 2, 1992.

AGENCY: U.S. Army Corps of Engineers, DoD.

ACTION: Notice of project deauthorizations.

SUMMARY: The Corps of Engineers is publishing the lists of water resources projects and separable elements of projects deauthorized under the provisions of section 1001, Public Law 99–662, 33 U.S.C. 579a, and projects/separable elements not deauthorized due to obligations of funds or statutory continuations of authorization.

FOR FURTHER INFORMATION CONTACT: Mr. John Micik, Headquarters, U.S. Army Corps of Engineers, Attention: CECW–BA, Washington, DC 20314–1000. Tel. (202) 272–0705.

SUPPLEMENTARY INFORMATION: The Water Resources Development Act of 1986, Public Law 99–662, as amended, contains two provisions for the deauthorization of water resource projects or separable elements of projects. Section 1001(a), 33 U.S.C. 579a(a), requires the deauthorization of projects authorized in 1986, and thereafter, when five years have elapsed from the date of authorization without obligations of funds for planning, design or construction. Section 1001(b)(2), 33 U.S.C. 579a(b)(2), requires the Secretary of the Army to submit to the Congress a biennial list of unconstructed water resources projects, or separable elements of projects, which have had no obligations of funds for planning, design

or construction during the prior ten full fiscal years. If no funds are obligated within thirty months from the date the list is submitted, the project/separable element is deauthorized. Notwithstanding these provisions, project authorizations may be specifically continued by law.

For purposes of the Water Resources Development Act of 1986, "separable element" is defined in section 103(f), Public Law 99–662, 33 U.S.C. 2213(f).

In accordance with section 1001(b)(2), the Assistant Secretary of the Army (Civil Works) submitted a list of 30 projects/separable elements to Congress on January 18, 1990. From this list, 24 project/separable elements were deauthorized on July 19, 1992, and 6 were removed due to obligations of funds.

Eight project authorizations have been continued by law. The Energy and Water Development Appropriations Act, 1992, Public Law 102–104, August 17, 1991, 105 Stat. 510, and the Intermodal Surface Transportation Efficiency Act of 1991, Public Law 102–240, December 18, 1991, 105 Stat. 1914, each continued one; and the Water Resources Development Act of 1992, Public Law 102–580, October 31, 1992, 106 Stat. 4796, continued six.

Authority: This notice is required by the Water Resources Development Act of 1986, Pub. L. 99–662 section 1001(c), 33 U.S.C. 579a(c), and the Water Resources Development Act of 1988, Pub. L. 100–676, section 52(e), 102 Stat. 4045.

Dated: December 2, 1992.

Nancy P. Dorn,

Assistant Secretary of the Army (Civil Works).

Federal Energy Regulatory Commission

[Docket No. PL93–2–000]

Prior Notice and Filing Requirements Under Part II of the Federal Power Act; Technical Conference and Request for Comments

December 9, 1992.

Introduction

In a number of recent orders originating with *Central Maine Power Company*, 56 FERC ¶ 61,200, *reh'g denied*, 57 FERC ¶ 61,083 (1991) (*Central Maine*), the Commission has directed the payment of refunds for the late filing by public utilities of rates, charges, and related agreements for jurisdictional service. The Commission has ordered refunds in an effort to enforce the requirement of section 205 of the Federal Power Act (FPA), 16 U.S.C. 824d (1988), and the Commission's implementing regulations, 18 CFR part 35, that public utilities file rates and charges for jurisdictional service, and all contracts and agreements relating to such service, at least 60 days in advance of the commencement of jurisdictional service. The Commission also has attempted to provide additional guidance as to when it is likely to grant waiver of the prior notice requirement.

Despite the Commission's efforts, considerable uncertainty apparently remains throughout the electric utility industry concerning the filing obligations of public utilities and the applicability of the *Central Maine* remedial policy to late filings. The Commission already has issued orders clarifying the obligation of utilities to file certain types of agreements—namely, service agreements under filed tariffs of general applicability and jurisdictional agreements providing for the payment of contributions in aid of construction (CIAC agreements). In response to these orders, utilities have requested additional guidance as to the need to file other types of agreements and the extent of the Commission's willingness to apply its *Central Maine* remedial policy.

On November 16, 1992, in response to pleadings by Consolidated Edison Company of New York, Inc. (Con Edison) and the Edison Electric Institute (EEI), the Commission deferred the close of an amnesty window for the late filing of jurisdictional CIAC agreements. *See Florida Power Corp.*, 61 FERC ¶ 61,244 (1992). The Commission stated that it late would address a number of generic filing-related issues raised by Con Edison and EEI, as well as their request that the Commission engage in a comprehensive and orderly review of the filing obligations of public utilities under the FPA, as clarified in *Central Maine* and subsequent orders.

To this end, the Commission hereby schedules a technical conference, to be held on January 28, 1993, to consider issues relating to the Commission's enforcement of the prior notice and filing requirement.

Background

A. Statutory/Regulatory Framework

Section 205(c) of the FPA, 16 U.S.C. 824d(c) (1988), requires that public utilities file with the Commission all rates and charges for jurisdictional sales and transmission service, as well as all agreements that affect or relate to such rates and charges. Section 205(d) of the FPA, 16 U.S.C. 824d(d) (1988), in turn requires that public utilities file all such rates, charges, and related agreements with the Commission at least 60 days in advance of the commencement of such service. Section 205(d) also permits the Commission to waive the 60-day prior notice requirement for good cause shown. *Id.* Part 35 of the Commission's regulations implement these statutory filing requirements. See 18 CFR 35.3(a), 35.11 (1992). *See generally Indiana and Michigan Electric Co. v. FPC*, 502 F.2d 336 (D.C. Cir. 1974) (concerning earlier version of section 205 of the FPA); *National Fuel Gas Supply Corp. v. FERC*, 899 F.2d 1244 (D.C. Cir. 1990) (construing analogous filing provisions of the Natural Gas Act).

The Commission has considerable discretion in finding good cause for waiver of the prior notice and filing requirement. *See, e.g., San Diego Gas & Electric Co. v. FERC*, 904 F.2d 727, 731 (D.C. Cir. 1990); *City of Girard v. FERC*, 790 F.2d 919, 925 (D.C. Cir. 1986). For years, the Commission routinely granted waiver when the parties to a proposed rate agreed on an effective date and when waiver was adjudged to be in the public interest. *See, e.g., PacifiCorp Electric Operations*, 59 FERC ¶ 61,090, *reh'g granted*, 60 FERC ¶ 61,293 (1992). In *Central Hudson Gas & Electric Corp.*, 60 FERC ¶ 61,106, *reh'g denied*, 61 FERC ¶ 61,089 (1992), the Commission provided new guidance to the electric utility industry concerning the circumstances under which the Commission will find good cause for waiver of the 60-day prior notice requirement. Among other things, the Commission stated that, absent extraordinary circumstances, it will not grant waiver of the notice requirement when an agreement for new service, that is not provided pursuant to an accepted contract or settlement, is filed on or after the date jurisdictional service has commenced.[1] *See also United Illuminating Co.*, 61 FERC ¶ 61,186 (1992).

B. The Central Maine Policy

In *Central Maine*, the Commission was presented with the filing of 14 separate agreements for the short-term sale of capacity and energy at negotiated, market-based rates after service under all of the agreements had terminated. The Commission accepted the 14 late-filed agreements and waived the 60-day prior notice requirement, but did so only on the condition that the filing utility file revised rates reflecting a 100 percent contribution to the fixed costs of the facilities used to provide service under the 14 agreements. The Commission further directed the utility to refund all revenues received under the agreements in excess of a 100 percent contribution to fixed costs, plus associated interest.

Expressing concern with the increasing number of rate filings made after the commencement of service,[2] the

[1] The Commission also stated in *Central Hudson* that a strong showing of good cause is necessary to justify waiver with respect to a rate increase not provided for in a contract or settlement on file with the Commission. On the other hand, waiver of the notice requirement generally will be appropriate when an uncontested filing has no rate impact, when a filing reduces rates or charges, or when a rate increase and its effective date are prescribed by a Commission-accepted contract or settlement.

[2] *See* 56 FERC at 61,817. In this regard, the Commission cited its orders in Nevada Power Co., 55 FERC ¶ 61,379 at 62,153 n.14 (1991), Central

Commission took the opportunity to announce a policy statement of industry-wide application concerning implementation of the 60-day prior notice requirement. The Commission stated that utilities "transacting under existing agreements" not on file with the Commission, in violation of the prior filing requirement of Part II of the FPA, would be afforded the opportunity to file such agreements within 60 days of publication of the order in the Federal Register. The Commission further stated in *Central Maine* that any utilities filing rates (cost-based or market-based) for ongoing services during the 60-day "amnesty window" (which expired on October 7, 1991), if otherwise just and reasonable, would be entitled to recover up to a 100 percent contribution to fixed costs.

The Commission continued that any utility filing rates for ongoing jurisdictional service after the close of the amnesty window would be entitled to receive no more than its variable operation and maintenance (O&M) expenses from the date of commencement of service until the date the Commission accepts such rates for filing. Any such utility would be required to refund any amounts collected in excess of the amounts ultimately allowed by the Commission (as well as interest calculated pursuant to 18 CFR 35.19a.

C. Application of the Central Maine Policy

In the past year, the Commission has applied its *"Central Maine* policy" in a number of cases involving the late filing of jurisdictional agreements after the commencement of service. In *PacifiCorp Electric Operations*, 58 FERC ¶ 61,283, *reh'g denied*, 60 FERC ¶ 61,292 (1992), *reh'g pending*, the Commission directed the refund of certain revenues because of the late filing of a jurisdictional transmission service agreement 13 years after the date of commencement of service under the agreement and one day after the close of the *Central Maine* amnesty window. In *Green Mountain Power Corp.*, 59 FERC ¶ 61,291, *reh'g denied*, 60 FERC ¶ 61,158, *order on compliance filing*, 61 FERC ¶ _____ (1992), the Commission directed the refund of certain revenues because of the late filing of two unit power sales agreements and a related capacity exchange agreement.[3]

In a series of three cases, the Commission directed the payment of refunds for the late filing of service agreements implementing service under tariffs of general applicability. *See Mississippi Power Co.*, 58 FERC ¶ 61,286 *reh'g granted*, 61 FERC ¶ 61.014 (1992); *New England Power Co.*, 59 FERC ¶ 61,253, *reh'g granted*, 61 FERC ¶ 61.015 (1992); *Central Power & Light Co. and West Texas Utilities Co.*, 60 FERC ¶ 61,211 *reh'g granted*, 61 FERC ¶ 61,065 (1992). The utilities claimed in these cases that they were providing service under tariffs that already had been filed with and accepted by the Commission and, accordingly, that the late filing of service agreements indicating only the names of new customers taking service under approved tariffs did not warrant the harsh "penalty" of refunds. Recognizing that this matter was not entirely free of doubt at the time of issuance of *Central Maine*, the Commission announced the adoption of an additional 30-day amnesty period. See *New England Power Co.*, 61 FERC ¶ 61,015 (1992). During this amnesty period, which expired on November 9, 1992, utilities were able to file service agreements implementing tariff service at previously-approved tariff rates to particular customers without risking *Central Maine*—type refunds. See also *New England Power Co.*, 61 FERC ¶ 61,123 (1992), *reh'g pending*.

In another line of *Central Maine* cases, the Commission directed the payment of refunds for the late filing of jurisdictional agreements providing for the customer payment of contributions in aid of construction (CIAC agreements). *See Florida Power Corp.*, 58 FERC ¶ 61,161 *reh'q denied*, 60 FERC ¶ 61,003 (1992); *see also Western Massachusetts Electric Co.*, 59 FERC ¶ 61,091, *reh'g denied*, 61 FERC ¶ _____ (1992); *Blackstone Valley Electric Co.*, Docket No. ER92-207-001 (unpublished letter order, issued June 26, 1992), *reh'g pending*. The Commission explained that the type of agreements at issue always has been considered jurisdictional and subject to the statutory requirement of prior notice and filing. Nevertheless, in an order issued on October 13, 1992, the Commission recognized that the matter was not entirely clear at the time of the close (on October 7, 1991) of the *Central Maine* amnesty window. Accordingly, the Commission announced the adoption of an additional 30-day amnesty period in which to file with the Commission any now-unfiled CIAC agreements under which jurisdictional service currently is, or has been, provided. *See Florida Power Corp.*, 61 FERC ¶ 61,063 (1992).

The amnesty window for unfiled CIAC agreements originally was scheduled to expire on November 16, 1992. On November 16, 1992, the Commission issued an order extending the amnesty deadline for the filing of CIAC agreements. See *Florida Power Corp*, 61 FERC ¶ 61,244 (1992). The Commission based that decision on the applications of the Edison Electric Institute (EEI) and Consolidated Edison Company of New York, Inc. (Con Edison) to "stay" the effectiveness of the October 13 *Florida Power* order.

In support, EEI and Con Edison expressed concern about the limited amount of time available in which to search files for potentially thousands of current and expired agreements that may involve CIAC payments and that may be jurisdictional. EEI also raised a number of questions concerning the filing obligations of its member utilities: whether utilities must search files for agreements dating back to the passage of the FPA; whether the *Central Maine* policy applies to agreements which already had terminated before issuance of the *Central Maine* decision; the scope of transactions considered to be jurisdictional; and the extent to which utilities may continue to rely on past advice from Commission Staff. EEI submitted that a more formal process, in which affected parties may present their views and the Commission may respond before files are searched and documents retrieved, is necessary in order to provide a reasonable and efficient approach to addressing the concerns raised by *Central Maine* and related orders.

Some of the issues raised by EEI have been presented to the Commission in the context of individual filings currently awaiting action. In *Massachusetts Electric Co.*, 61 FERC ¶ _____(1992), the Commission explicitly deferred action on whether the remedial *Central Maine* policy should apply to the late filing of jurisdictional agreements that expired prior to the August 2, 1991 issuance of the original *Central Maine* order, as well as whether that policy should apply to the late filing of borderline sales agreements.[4] Similarly, the Commission

---

Vermont Public Service Corp., 54 FERC ¶ 61,153 at 61,484–85 (1991), and Portland General Exchange, Inc., 51 FERC ¶ 61,106 at 61,246 n.87 (1990).

[3] The Commission also has refused to apply its *Central Maine* policy to the filing of rates under jurisdictional sales and transmission agreements after the commencement of service under the agreements, when the Commission previously had evaluated the rates and reviewed the operative agreements in filings made by another party to the transaction. *See* Fale-Safe, Inc., 59 FERC ¶ 61,385 (1992).

[4] Borderline sales involve deliveries of power directly to a neighboring utility's retail customers along the electric franchise areas common to both.

Continued

has not yet acted on a petition for a declaratory order, filed by Portland General Electric Company (PGE) in Docket Nos. EL93–5–000, *et al.*, to remove a number of "uncertainties" concerning implementation of the Commission's *Central Maine* policy. These uncertainties include the applicability of the *Central Maine* policy to expired agreements. Finally, Central Maine itself has requested that the Commission reopen the original *Central Maine* proceeding and rescind its refund obligation in light of the Commission's decision in recent cases not to order refunds with respect to other late-filing utilities. See *New England Power Co.*, 61 FERC ¶ 61,123 (1992), *reh'g pending*.

Discussion

Central Maine's most recent filing brings us full circle with respect to implementation of our *Central Maine* policy. We had hoped that issuance of the original *Central Maine* order would clarify the need for compliance with the prior notice and filing requirement of the FPA and the Commission's implementing regulations. That hope was dashed by the number of filings made after the October 7, 1991 close of the *Central Maine* amnesty window, raising difficult jurisdictional and implementation issues. We further hoped that issuance of the additional amnesty windows concerning service agreements and jurisdictional CIAC agreements, as well as issuance of the *Central Hudson* order concerning waiver of notice, would resolve all remaining ambiguity concerning implementation of the prior notice and filing requirement and the applicability of the *Central Maine* remedial policy. That hope, too, proved short-lived.

As EEI and others now inform us, substantial uncertainty remains concerning the obligation of public utilities to file jurisdictional rates, charges, and related agreements for Commission consideration under the FPA and the *Central Maine* policy. Accordingly, after a year of experience with our *Central Maine* policy, and at the suggestion of EEI and some of its utility members, we believe it is appropriate to reexamine precisely how to proceed with respect to further implementation of our *Central Maine* policy.

In addition to EEI and individual public utilities that have formally raised *Central Maine*-related issues in filings before the Commission, other affected entities may have similar or additional arguments concerning the applicability of the *Central Maine* policy to unfiled rates, charges, and agreements for jurisdictional service. We believe it is appropriate to consider all of these arguments at one time, and then apply our conclusions to pending and future applications for Commission action in this area. Hopefully, this will allow us to achieve the intended purpose of the *Central Maine* policy, which was to add clarity and certainty to the filing obligations of public utilities, not to add further ambiguity. Careful consideration of any concerns related to our enforcement of the prior notice and filing requirement is especially important now, as the Commission begins to implement the Energy Policy Act of 1992, Public Law 102–486, 106 Stat. 2776 (1992), and continues to consider applications for approval of negotiated, market-based rates.

Accordingly, the Commission will hold a technical conference on these matters on January 28, 1993, at 10 a.m. in the Commission's meeting room, 9th Floor, 825 North Capitol Street, NE., Washington, DC 20426. The Commission invites public utilities and other interested entities, including state commissions and customers, to seek to participate in the conference and to submit written comments on issues concerning the Commission's enforcement of the prior notice and filing requirement. Issues may include, but are not limited to, the following:

1. What should be the extent of a utility's obligation to search its files for unfiled jurisdictional agreements? Should this obligation extend all the way back to the date of enactment of the FPA or some other date? How extensive a burden does this search obligation impose on public utilities?

2. On a related matter, should public utilities be obligated to file jurisdictional agreements that already have terminated by their terms? If the answer is no, what statutory basis would support such action? Should the *Central Maine* policy apply to jurisdictional agreements that had terminated by the August 2, 1991, issuance of the original *Central Maine* order? Did the industry read the language of the *Central Maine* policy as imposing only a "prospective" filing obligation?

3. What are the filing obligations of public utilities if uncertain as to the jurisdictional status of certain agreements at the time of execution and commencement of service thereunder? Can a utility rely on informal advice from Commission Staff, or must it file with the Commission and raise any arguments at that time?

4. How expansively should the Commission apply the amnesty windows for service agreements and jurisdictional CIAC agreements?

5. Have public utilities been afforded sufficient time in which to comply with their filing obligations under the remedial *Central Maine* policy? If not, how much time would be sufficient and why?

6. Are public utilities unable in particular circumstances to demonstrate good cause under the *Central Hudson* standard of "extraordinary circumstances" when seeking waiver of notice for agreements for short-term coordination service, not provided pursuant to an accepted contract or settlement, negotiated on short notice and filed after the commencement of service? Does the *Central Hudson* "extraordinary circumstances" standard have the practical effect of stifling short-term economy transactions that otherwise would benefit both the buyer and the seller? If so, what approaches should the Commission consider and how would such approaches ensure just and reasonable rates?

Participating entities should, to the extent possible, refrain from making comments that pertain to specific requests for Commission action in ongoing proceedings. To the extent that participating entities may have similar concerns, they are encouraged to file joint comments. Commentators should double space their comments, provide a concise description identifying the commentator, and use the same docket number as that contained in this notice. Written comments should not exceed 30 pages in length. In addition to written comments not exceeding 30 pages, commentators should also provide an executive summary of their written comments, not to exceed three pages. Comments (including an executive summary of comments) must be filed with the Commission's Office of the Secretary no later that January 11, 1993.

The Commission also invites interested persons to file requests to participate in the technical conference on these issues. Requests must be in writing and submitted to the Office of the Secretary no later than January 11, 1993. Persons with similar positions are requested to file joint requests for participation, so that the Commission can accommodate the maximum number of participants possible. A list of persons granted requests to participate in the technical conference will be available in the Commission's Office of Public Information prior to the date of the conference.

While the power is provided directly to the retail customer, the sale is to the neighboring utility within whose service territory the borderline loads are located.

While we are scheduling a technical conference on filing-related issues, nothing in this notice is intended to stay the effectiveness of the *Central Maine* policy or any of the *Central Maine* line of cases or otherwise relieve utilities of their obligation to file jurisdictional rates, charges, and related agreements in advance of the commencement of service.

The Commission Orders

(A) A technical conference to discuss issues concerning the Commission's enforcement of the prior notice and filing requirement and implementation of its *Central Maine* policy is hereby scheduled for 10 a.m. in the Commission's meeting room, 9th Floor, 825 North Capitol Street, NE., Washington, DC 20426 on January 28, 1993.

(B) Entities that wish to file comments are hereby directed to file such comments with the Secretary, as explained in the body of this notice, by January 11, 1993.

(C) Entities that wish to participate in the technical conference scheduled in Ordering Paragraph (A) are hereby directed to file a request with the Secretary, as explained in the body of this notice, by January 11, 1993.

(D) The Secretary shall promptly publish a copy of this notice in the **Federal Register**.

By direction of the Commission.

Lois D. Cashell,

Secretary.

1. EL Paso Natural Gas Company

[Docket No. CP92-580-001]

December 3, 1992.

Take notice that on November 27, 1992, EL Paso Natural Gas Company (Applicant), Post Office Box 1492, EL Paso, Texas 79978, filed in Docket No. CP92-580-001 pursuant to section 7(c) of the Natural Gas Act an amendment to its application in Docket No. CP92-580-000, in order to request authorization to eliminate from its original request certain compression and pipeline facilities, all as more fully set forth in the amendment which is on file with the Commission and open for public inspection.

Applicant states that on July 7, 1992, Applicant filed an application in Docket No. CP92-580-000 requesting authorization to construct and operate: (1) Compression facilities totalling 12,150 horsepower (HP) at the existing Wenden Compressor Station; (2) approximately 21.0 miles of 36-inch outside diameter (O.D.) loop pipeline; and approximately 93.5 miles of 30-inch O.D. pipeling, all at an approximate cost of $91.1 million. Applicant further states that this proposal is referred to as the Yuma Lateral Expansion Project which will link Applicant's existing interstate system to a point of interconnection with facilities to be sited at the International Boundary between the United States and the Republic of Mexico in Yuma County, Arizona, near San Luis Colorado, Sonora, Mexico.

Applicant indicates that the original application was to provide for firm and interruptible transportation service up to 400,000 Mcf per day of natural gas, primarily for shippers serving existing and proposed electric generation facilities in the Baja California Norte, Mexico, and existing and proposed electric generation facilities in Yuma, Arizona area.

Applicant proposes to delete from the facilities proposed in the original application filed July 7, 1992: (1) 6,500 HP from the originally proposed 12,150 HP at the existing Wenden Compressor Station; and (2) approximately 21.0 miles of 36-inch O.D. mainline loop pipeline downstream of the Wenden Compressor Station. Applicant states that the modifications results in a reduction in the project cost from approximately $91.9 million to $71.4 million, or $20.5 million.

Applicant indicates that the deletion of these facilities requires minor changes in the project in order to meet the revised pipeling operating conditions. Applicant indicates that the proposed metering stations have been changed to accommodate the revised flow and an existing compressor unit at the Wenden Compressor station will now be restaged.

Applicant states that, with these revisions, the optimum design of the expansion project could deliver the existing firm contract transportation demand of 1,210,000 Mcf per day of natural gas at the Mlythe Delivery Point located at the Arizona-California border and 348,000 Mcf per day of natural gas to the Yuma, Arizona/International boundary area.

Applicant states that it will not contract to provide new firm transportation services aggregating more than 348,000 Mcf per day through the new Yuma Lateral unless and until it has otherwise applied for an received additional, specific authorization from the Commission beyond that now being requested here to provide additional service.

Applicant proposes to construct and operate the following facilities as part of its Yuma Lateral Expansion Project:

Compression

1. Wenden Compressor Station

Install one (1) 5,650 ISO horsepower Solar Centaur "H" compressor unit, with appurtenances, at the existing Wenden Compressor Station located in La Paz County, Arizona.

Pipeline

2. California Lines to the United States Border

Install approximately 93.5 miles of 30-inch O.D. pipeline, with appurtenances, at milepost 714.6 on Applicant's existing 30-inch O.D. pipeline in La Pax County, Arizona, and terminating in Yuma County, Arizona.

Meter Stations

3. Yuma, Arizona

Install two (2) 6-inch standard orifice-type meter facilities, with appurtenances, at milepost 91.8 on Applicant's proposed 30-inch pipeline located in Yuma County, Arizona.

4. International Boundary

Install three (3) 16-inch standard orifice-type meter run, with appurtenances, at milepost 93.5 at the terminus of Applicant's proposed 30-inch pipeline located in Yuma County, Arizona.

Applicant indicates that it will construct and operate, under § 2.55(a) of the Commission's Statement of General Policy and Interpretations under the NGA the following facilities:

Compression

1. Wenden B Compressor Station

Restage one (1) compressor unit at the existing Wenden B Compressor Station located in La Paz County, Arizona.

Comment date: December 24, 1992, in accordance with the first subparagraph of Standard Paragraph F at the end of this notice.

2. Equitrans, Inc.

[Docket No. CP93-81-000]

December 3, 1992.

Take notice that on November 27, 1992, Equitrans, Inc. (Equitrans), 3500 Park Lane, Pittsburgh, PA 15275, filed in Docket No. CP93-81-000 a request pursuant to § 157.205 and § 157.211 of

the Commission's Regulations under the Natural Gas Act for authorization to construct and operate a sales tap, under the blanket certificate issued in Docket No. CP83–508–000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open for public inspection.

Equitrans proposes that the new sales tap be constructed on its transmission line in Franklin Township, Greene County, Pennsylvania to permit gas service to The State Correctional Institution of Franklin Township. Equitrans projects that the quantity of gas to be delivered through the new sales tap will be approximately 2,100 Mcf on a peak day.

Comment date: January 19, 1993, in accordance with Standard Paragraph G at the end of this notice.

3. Oryx Energy Company

[Docket No. CP93–85–000]

December 7, 1992.

Take notice that on December 1, 1992, Oryx Energy Company (Oryx), P.O. Box 2880, Dallas, Texas 75221–2880 filed in Docket No. CP93–85–000 a petition pursuant to Rule 207(a)(2) of the Commission's Rules of Practice and Procedure (18 CFR 385.207(a)(2)) for a declaratory order stating that the Commission has no jurisdiction over the services and facilities that Oryx intends to perform or acquire in Alfalfa and Grant Counties, Oklahoma, all as more fully set forth in the petition which is on file with the Commission and open to public inspection.

Oryx states that it has agreed to purchase facilities currently owned by Williams Natural Gas Company (WNG) known as the Wakita/Clyde Gathering System. Oryx submits that the services and facilities to be performed or acquired by Oryx fall within the definition of gathering facilities and are, therefore, excluded from the Commission's jurisdiction under section 1(b) of the Natural Gas Act.

The portion of the Wakita/Clyde Gathering System covered by the petition consists of approximately 70.4 miles of pipeline. Oryx states that all portions of the Wakita/Clyde Gathering System are located behind a processing facility known as the Wakita Plant (also sometimes referred to as West Hawley) which is owned by Oryx.

Oryx states that WNG provided natural gas service to two domestic customers at two taps located on the Wakita/Clyde Gathering System. Oryx states that they will assume WNG's obligations to provide a service to these domestic users and states an intent to convert the service to propane.

WNG has filed in Docket No. CP92–711–000 for authorization to abandon the subject facilities by sale to Oryx. Oryx requests that its petition be consolidated with WNG's application.

Comment date: January 6, 1993, in accordance with the first subparagraph of Standard Paragraph F at the end of this notice.

4. ANR Pipeline Company

[Docket No. CP93–86–000]

December 7, 1992.

Take notice that on December 2, 1992, ANR Pipeline Company (ANR), 500 Renaissance Center, Detroit, Michigan 48243, filed in Docket No. CP93–86–000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to operate under the provisions of Section 7 of the Natural Gas Act certain facilities that have been constructed pursuant to section 311 of the Natural Gas Policy Act of 1978, under ANR's blanket certificate issued in Docket No. CP82–480–000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the application on file with the Commission and open to public inspection.

ANR states that it constructed the Springboro metering facilities, located in Warren County, Ohio, pursuant to Section 311 of the NGPA to deliver gas to Cincinnati Gas and Electric. ANR asserts that it is requesting certificate authorization for these facilities so that any shipper may use the facilities when capacity is available.

Comment date: January 21, 1993, in accordance with Standard Paragraph G at the end of this notice.

5. Mid Louisiana Gas Company North Louisiana Gathering Company

[Docket No. CP93–79–000]

December 7, 1992.

Take notice that on November 25, 1992, Mid Louisiana Gas Company (Mid Louisiana), and North Louisiana Gathering Company (North Louisiana Gathering), both of P.O. Box 61865, Houston, Texas 77208–1865, filed in Docket No. CP93–79–000, a joint application pursuant to section 7(b) of the Natural Gas Act and Rule 207(a)(2) of the Commission's Rules of Practice and Procedure (18 CFR 385.207(a)(2), seeking authorization for Mid Louisiana to abandon all of its certificated gathering facilities which will be transferred to North Louisiana Gathering after the abandonment and petitioning the Commission to determine that the gathering facilities will not be subject to the Commission's Regulations pursuant to section 1(b) of the Natural Gas Act after the abandonment and transfer of the facilities to North Louisiana Gathering, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Mid Louisiana states that it would abandon and transfer to North Louisiana Gathering, all of its gathering facilities located in the Monroe Field in Louisiana. The facilities consist of nine field compressors and approximately 430 miles of gathering line, ranging in diameter from 1.25 inches to 22 inches, it is stated.

Mid Louisiana and North Louisiana Gathering request that the authorization which they seek be made effective the earlier of April 30, 1993, or the date the Commission permits Mid Louisiana's compliance filing in Docket No. RS92–20–000 to become effective.

North Louisiana asserts that upon acquisition of the facilities, it will provide its services to all persons on terms and conditions that are consistent with open-access principles and that gathering services would be available on a nondiscriminatory basis.

Comment date: December 28, 1992, in accordance with Standard Paragraph F at the end of this notice.

Standard Paragraphs

F. Any person desiring to be heard or make any protest with reference to said file with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE, Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this filing if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public

convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for the applicant to appear or be represented at the hearing.

G. Any person or the Commission's staff may, within 45 days after the issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefore, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the Natural Gas Act.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket No. JD93-01373T Arkansas-4]

State of Arkansas; NGPA Notice of Determination by Jurisdictional Agency Designating Tight Formation

December 8, 1992.

Take notice that on December 3, 1992, the Arkansas Oil and Gas Commission (Arkansas) submitted the above-referenced notice of determination pursuant to § 271.703(c)(3) of the Commission's regulations, that a portion of the Haynesville Formation, Springhill Field, Columbia County, Arkansas, qualifies as a tight formation under section 107(b) of the Natural Gas Policy Act of 1978. The area of application is described as the Fractional Section 12, Township 20 South, Range 23 West; the S/2 of Sections 1-3 and Fractional Sections 7-12, Township 20 South, Range 22 West, and Fractional Section 7, Township 20 South, Range 21 West, Columbia County, Arkansas.

The notice of determination also contains Arkansas' findings that the referenced portion of the Haynesville Formation meets the requirements of the Commission's regulations set forth in 18 CFR part 271.

The application for determination is available for inspection, except for material which is confidential under 18 CFR 275.206, at the Federal Energy Regulatory Commission, 825 North Capitol Street, NE, Washington, DC 20426. Persons objecting to the determination may file a protest, in accordance with 18 CFR 275.203 and 275.204, within 20 days after the date this notice is issued by the Commission.

Lois D. Cashell,

Secretary.

[FR Doc. 92-30336 Filed 12-14-92; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP93-92-000]

Arkla Energy Resources, a Division of Arkla, Inc.; Application

December 9, 1992.

Take notice that on December 4, 1992, Arkla Energy Resources, a division of Arkla, Inc. (AER), P.O. Box 21734, Shreveport, Louisiana 71151, filed in Docket No. CP93-92-000 an application pursuant to section 7(b) of the Natural Gas Act for authorization to abandon by sale to Bayou South Gas Gathering Company, L.C. (Bayou South) certain existing certificated pipeline facilities and facilities appurtenant thereto in Texas and Louisiana, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Specifically, AER proposes to abandon and transfer to Bayou South the following facilities:

(1) 114 feet of AER's Line ST-4 located in Webster Parish, Louisiana;

(2) 1,325 feet of Line LT-3 and Line LT-4 (approximately 25,492 feet) located in Claiborne Parish, Louisiana; and

(3) Line AT-2 (approximately 970 feet) located in Marion County, Texas.

AER states that, pursuant to an agreement with Bayou South, it has transferred to Bayou South gathering facilities in the same areas and upon receipt of the requested abandonment authority, will transfer these pipeline segments to Bayou South. AER states that abandonment would not impair services from the abandoned facilities and Bayou South would continue to gather and deliver gas from the connected fields through the facilities. It is also indicated that there would be no effect on AER's existing tariffs and AER's customers would benefit from the resulting reduction in AER's operating and maintenance costs and rate base.

Any person desiring to be heard or to make any protest with reference to said application should on or before December 30, 1992, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that permission and approval for the proposed abandonment are required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for AER to appear or be represented at the hearing.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket No. CP93–82–000]

Equitrans, Inc.; Notice of Request Under Blanket Authorization

December 8, 1992.

Take notice that on November 27, 1992, Equitrans, Inc. (Equitrans), 3500 Park Lane, Pittsburgh, Pennsylvania 15275, filed in Docket No. CP93–82–000 a request pursuant to § 157.205 and § 157.211 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205 and 157.211) for authorization to construct and operate a sales tap to permit deliveries to Equitable Gas Company (Equitable) for service to Mr. Charles E. Gaston, of Weston, West Virginia, under the blanket certificate issued in Docket No. CP83–508–000, as later transferred to Equitrans in Docket No. CP86–676–000, pursuant to section 7(c) of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Equitrans proposes to construct and operate a sales tap to be installed on its transmission line F–783 in Weston, West Virginia. It is indicated that the tap would be installed to permit gas service to Mr. Charles E. Gaston. It is also indicated that the customer would be served by Equitable and Equitable would be charged the applicable rate contained in Equitrans' FERC tariff. Equitrans projects that the quantity of gas to be delivered through the proposed sales tap would be approximately one Mcf on a peak day.

Equitrans states that the volumes to be delivered are within the certified entitlements of Equitable and that Equitrans' certificate does not prohibit the addition of new delivery points.

Any person or the Commission's staff may, within 45 days after issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the Natural Gas Act.

BILLING CODE 6717–01–M

[Docket No. CP85–221–009]

Frontier Gas Storage Co.; Notice of Sale Pursuant to Settlement Agreement

December 8, 1992.

Take notice that on December 1, 1992, Frontier Gas Storage Company (Frontier), % Reid & Priest, Market Square, 701 Pennsylvania Avenue, NW. Washington, DC 20004, in compliance with the provisions of the Commission's February 13, 1985 Order in Docket No. CP82–487–000 et. al., submitted an executed Service Agreement under Rate Schedule LVS–1 providing for the possible sale of up to 1 Bcf of Frontier's gas storage inventory on an "as metered" basis to UNIGAS Corporation (UNIGAS). The Service Agreement, dated November 30, 1992, contemplates the possible sale to commence December 16, 1992.

Under subpart (b) of Ordering Paragraph (F) of the Commission's February 13, 1985 Order, Frontier is "authorized to commence this sale of its inventory under such an executed service agreement fourteen days after the filing of the agreement with the Commission and may continue making such sale unless the Commission issues an order either requiring Frontier to stop selling and setting the matter for hearing or permitting the sale to continue and establishing other procedures for resolving the matter."

Any person desiring to be heard or to make a protest with reference to said tariff sheet filing should, on or before December 21, 1992, file with the Federal Energy Regulatory Commission (825 North Capitol Street, NE., Washington DC 20426) a motion to intervene or protest in accordance with the requirements of the Commission's Rules of Practice and Procedures, 18 CFR 385.214 or 385.211. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

Northwest Pipeline Corp.; Change in Service Agreements

December 9, 1992.

Take notice that on November 30, 1992, Northwest Pipeline Corporation (Northwest) tendered for filing and acceptance of new service agreements, as described below, in compliance with Commission directives in the above docket.

The purpose of this filing is to tender new Rate Schedule ODL–1 service agreements with various customers reflecting the partial conversion of sales services to transportation services, new service agreements under Rate Schedule SGS–1 reflecting the abandonment of SGS–1 (Option 10) Sales, and new LS–1 service agreements with various customers, which reflect the abandonment of Rate Schedule LS–1 Sales.

Northwest has requested an effective date of November 1, 1992 for the tendered service agreements.

Northwest states that copies of the filing is being served on the affected customers, all intervenors in Docket No. CP92–79 and associated state regulatory commissions.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rule 211 of the Commission's Rules of Practice and Procedure 18 CFR 385.211. All such protests should be filed on or before December 16, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make Protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket Nos. RP93–44–000]

Questar Pipeline Co.; Tariff Filing

December 9, 1992.

Take notice that Questar Pipeline Company, on December 7, 1992, tendered for filing and acceptance to be effective January 1, 1993, First Revised Sheet No. 40 and Original Sheet No. 40A to Original Volume No. 2–A of its FERC Gas Tariff.

Questar states that this filing revises section 5 of the General Terms and Conditions to Original Volume No. 2–A of its FERC Gas Tariff by adding tariff language that allows for the transfer of gas in place from one storage customer to another at Questar's Clay Basin storage reservoir.

Questar states further that this filing was served upon its Clay Basin storage customers and the Wyoming and Utah public service commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 385.211 and 385.214 of the Commission's Rules and Regulations 18 CFR 385.211 and 385.214. All such motions or protests should be filed on or before December 16, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. ES93–15–000]

South Carolina Electric & Gas Co.; Notice of Application

December 8, 1992.

Take notice that on December 1, 1992, South Carolina Electric & Gas Company filed an application with the Federal Energy Regulatory Commission under section 204 of the Federal Power Act requesting authorization to issue not more than $200 million of unsecured promissory notes on or before December 31, 1994, with a final maturity date no later than December 31, 1995.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426 in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before December 24, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket No. RP92–162–002]

Superior Offshore Pipeline Co., Motion to Place Tariff Sheets into Effect

December 9, 1992.

Take notice that on December 1, 1992, Superior Offshore Pipeline Company (SOPCO), respectfully moves to place into effect on December 1, 1992, subject to refund, its proposed rates submitted on April 29, 1992 that were suspended for the five-month statutory period by the Commission order dated June 26, 1992.

SOPCO states that on April 29, 1992, SOPCO submitted its Original Sheets No. 5 and 6 to its FERC Gas Tariff First Revised Volume No. 1. These sheets proposed base rates, plus the approved ACA charges, of $0.0321 and $0.0277 for transportation on SOPCO's system upstream and downstream of the Lowry Gas Plant, respectively. The Commission's June 26, 1992 order suspended the effectiveness of these filed-for rates until December 1, 1992.

SOPCO moves to place these proposed rates into effect December 1, 1992, the end of the suspension period. SOPCO states that the revised Tariff Sheet Nos. 5 and 6 which reflect the suspended rates and the current ACA charge as of October 1, 1992 are attached to the filing.

SOPCO states that copies of the filing have been served upon all of SOPCO's customers and each person designated on the official service list.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rule 211 of the Commission's Rules of Practice and Procedure 18 CFR 385.211. All such protests should be filed on or before December 16, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary

[FR Doc. 92-30401 Filed 12-14-92; 8:45 am]

BILLING CODE 6712-01-M

[Docket No. RP93-43-000]

Transcontinental Gas Pipe Line Corp.; Motion for Waivers and Request for Interim Authority

December 9, 1992.

Take notice that on December 3, 1992, Transcontinental Gas Pipe Line Corporation (TGPL) tendered for filing a request for waiver of § 284.223(f) of the Commission's regulations, and for authorization to waive certain provisions of its FERC Gas Tariff to the extent necessary to enable TGPL to convert certain firm transportation agreements with Conoco Inc. (Conoco) from service authorized under section 311 of the Natural Gas Policy Act of 1978 (NGPA) and subpart B of part 284 of the regulations to service under TGPL's blanket transportation certificate under section 7(c) of the Natural Gas Act (NGA) and subpart B of part 284.

TGPL seeks to convert the FT Agreements at the request of Conoco. With the issuance of the Commission's Order No. 636 series, Conoco seeks the greater flexibility available under the blanket certificate authorization in order to utilize more fully its firm capacity on TGPL and meet the needs expressed by Conoco's customers. TGPL requests a waiver of the requirement at § 284.223(f)(1)(ii) of the Commission's regulations that conversion from subpart B service to service under subpart G occur prior to November 1, 1990.

TGPL also requests, to the extent necessary, a waiver of § 8.1 of Rate Schedule FT of its tariff which requires TGPL to announce any new firm transportation capacity which comes available and to hold an open season for such capacity. TGPL seeks a waiver of its tariff to the extent necessary to permit it to convert Conoco's transportation to subpart G without first holding an open season. TGPL requests that the Commission expeditiously grant TGPL interim authority to transport gas for Conoco pursuant to subpart G pending approval of the instant request. TGPL submits that waiver of § 284.223(f) of the regulations should moot the need for any waiver of TGPL's tariff.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with 18 CFR 385.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protests should be filed on or before December 16, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the public reference room.

Lois D. Cashell,

Secretary.

ENVIRONMENTAL PROTECTION AGENCY

[OPPT-51812; FRL-4180-6]

Certain Chemicals; Premanufacture Notices

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 5(a)(1) of the Toxic Substances Control Act (TSCA) requires any person who intends to manufacture or import a new chemical substance to submit a premanufacture notice (PMN) to EPA at least 90 days before manufacture or import commences. Statutory requirements for section 5(a)(1) premanufacture notices are discussed in the final rule published in the **Federal Register** of May 13, 1983 (48 FR 21722). This notice announces receipt of 53 such PMNs and provides a summary of each.

DATES: Close of review periods:

SUPPLEMENTARY INFORMATION: The following notice contains information extracted from the nonconfidential version of the submission provided by the manufacturer on the PMNs received by EPA. The complete nonconfidential document is available in the TSCA Public Docket Office, NE–G004 at the above address between 8 a.m. and noon and 1 p.m. and 4 p.m., Monday through Friday, excluding legal holidays.

P 93–127

Manufacturer. The C. P. Hall Company.

Chemical. (S) Hexanedioic acid dimethyl ester; pentanedioic aciddimethyl ester; 2-methyl-1,3-propanediol; 1,3-propanediol 2-ethyl-2-(hydroxymethyl).

Use/Production. (S) Intermediate for urethanes. Prod. range: Confidential

P 93–128

Manufacturer. Confidential.

Chemical. (G) Diamno disulfo naphthalene.

Use/Production. (S) Dye intermediate. Prod. range: Confidential.

P 93–129

Manufacturer. Confidential.

Chemical. (G) Substituted carboxylic acid, compound with diethylaminoethanol.

Use/Production. (S) Oxygen scavenger for boiler feedwater. Prod. range: Confidential.

Toxicity Data. Acute oral toxicity: LD50 > 5.0 g/kg species (rat). Acute dermal toxicity: LD50 > 2.0 g/kg species (rabbit). Eye irritation: none species (rabbit). Static acute toxicity: time LC50 48H > 1,000 mg/l species (Daphnia magna). Skin irritation: negligible species (rabbit).

P 93–130

Manufacturer. Confidential.

Chemical. (G) Diamino disulfo naphthalene.

Use/Production. (S) Dye intermediate. Prod. range: Confidential.

P 93–131

Manufacturer. Confidential.

Chemical. (G) Diazo coupled amino *J* acid.

Use/Production. (S) Dye intermediate. Prod. range: Confidential.

P 93–132

Manufacturer. Confidential.

Chemical. (G) Tris(diamino carbopolycycle)terrate(III).

Use/Production. (S) Anti-halation dye. Prod. range: Confidential.

P 93–133

Manufacturer. Confidential.

Chemical. (G) Modified diphenylmethane diisocyanate.

Use/Production. (G) Polyurethane coating component. Prod. range: Confidential.

P 93–134

Manufacturer. Confidential.

Chemical. (G) Unsaturated polyester resin.

Use/Production. (G) On-site maintenance. Prod. range: Confidential.

P 93–135

Importer. Confidential.

Chemical. (G) Polyoxyalkanes, alcohols C_{12-30} saturated and C_{18} unsaturated, ethoxylate reaction products with 1, 6-diisocyanato-2,4,4-trimethylhexane and 1,6-diisocyanato-2,4,4-trimethylhexane.

Use/Import. (G) Nondispersive thickener for plastic solutions. Import range: Confidential.

Toxicity Data. Acute oral toxicity: LD50 5,000 mg/kg species (rat). Mutagenicity: negative.

P 93–136

Manufacturer. Confidential.

Chemical. (G) Alkyl ester of oligomer.

Use/Production. (G) Resin for transparency. Prod. range: Confidential.

Toxicity Data. Acute oral toxicity: LD50 1,091 mg/kg species (rat). Skin irritation: slight.

P 93–137

Manufacturer. Dow Corning Corporation.

Chemical. (G) Crosslinked polydimethylsiloxane.

Use/Production. (S) Thermoclave pressure packing. Prod. range: Confidential.

P 93–138

Manufacturer. Confidential.

Chemical. (G) Propanenitrile, 3-(alkylene).

Use/Production. (S) Amine production. Prod. range: Confidential.

P 93–139

Manufacturer. Confidential.

Chemical. (G) 1-Propanamine, 3(alkyloxy).

Use/Production. (S) Precursor for amino propane nitrile production. Prod. range: Confidential.

P 93–140

Manufacturer. Confidential.

Chemical. (G) Propanenitrile, 3-amino-*N*-(alkyloxy)propyl).

Use/Production. (S) Precursor to propanediamine production. Prod. range: Confidential.

P 93–141

Manufacturer. Confidential.

Chemical. (G) 1,3-Propanediamine, *N*-(3-(alkoxy)propyl).

Use/Production. (S) Flotation reagent for use in mining. Prod. range: Confidential.

P 93–142

Manufacturer. Confidential.

Chemical. (G) 1,3-Propanediamine, *N*-(3-(alkyloxy)propyl),acetates.

Use/Production. (S) Flotation reagent for use in mining. Prod. range: Confidential.

P 93–143

Manufacturer. Confidential.

Chemical. (G) Alkoxylated diphenol.

Use/Production. (G) Chemical intermediate. Prod. range: Confidential.

P 93–144

Manufacturer. Confidential.

Chemical. (G) Alkoxylated diphenol.

Use/Production. (G) Chemical intermediate. Prod. range: Confidential.

P 93–145

Manufacturer. Confidential.

Chemical. (G) Polymeric diphenol.

Use/Production. (G) Chemical intermediate. Prod. range: Confidential.

P 93–146

Manufacturer. Bostik, Inc.

Chemical. (G) Polyamine.

Use/Production. (G) Open, nondispersive use. Prod. range: Confidential.

P 93–147

Importer. Confidential.

Chemical. (G) Ethyl carbazole violet.

Use/Import. (G) Pigment for colorants. Import range: Confidential.

P 93–148

Importer. Confidential.

Chemical. (G) Novolac-resin from substituted phenols and formaldehyde.

Use/Import. (G) A component of the material for IC fabrication. Import range: Confidential.

P 93–149

Importer. Confidential.

Chemical. (G) Ethylene-vinylacetates emulsion.

Use/Import. (S) Adhesive. Import range: Confidential.

P 93–150

Manufacturer. Confidential.

Chemical. (G) Isopthalic acid polymer with benzene sulfonic acid, dicarboxy, sodium salt, monoisopropanolamine, Alkyl glycol, and styrene/acrylic polymer.

Use/Production. (G) Additive for inks. Prod. range: Confidential.

P 93–151

Importer. Goldschmist Chemical Corporation.

Chemical. (G) Polyether modified polysiloxane.
Use/Import. (G) Open nondispersive. Import range: Confidential.

P 93–152

Manufacturer. E.I. Du Pont De Nemours and Company.
Chemical. (G) Substituted alkylated polyethylene.
Use/Production. (G) Belts and hoses. Prod. range: Confidential.

P 93–153

Manufacturer. Confidential.
Chemical. (G) Substituted phosphoramide.
Use/Production. (G) Isolated intermediate used to produce specialty additive. Prod. range: Confidential.

P 93–154

Manufacturer. Hoechst Celanese Corporation.
Chemical. (G) Azo substituted naphthalene sulfonic acid.
Use/Production. (S) Fiber reactive dye for textile dyeing. Prod. range: 2,500–10,000 kg/yr.

P 93–155

Manufacturer. Hoechst Celanese Corporation.
Chemical. (G) Disubstituted nitrobenzene.
Use/Production. (S) Captive intermediate. Prod. range: 15,000–35,000 kg/yr.

P 93–157

Importer. Confidential.
Chemical. (G) Di bacic/glycol ester.
Use/Import. (S) Product is a resinous constituent for use in food and beverage can coatings. Import range: Confidential.

P 93–158

Manufacturer. Minnesota Mining and Manufacturing Co.
Chemical. (S) *N*-Vinylpyrrolidone; 2-propenoic acid, 2-methoxyethyl ester; 2-propenoic acid, 2-methoxyethyl ester 2,propenoic acid, ammonium salt.
Use/Production. (G) Binder. Prod. range: Confidential.

P 93–159

Importer. Confidential.
Chemical. (G) Dibasic acid/glycol ester.
Use/Import. (G) Product is a resinous constituent for food and Beverage can linings. Import range: Confidential.

P 93–160

Manufacturer. Confidential.
Chemical. (G) Alkylcarbbamate.

P 93–161

Manufacturer. Confidential.
Chemical. (G) Amine phosphate.
Use/Production. (G) Contained use. Prod. range: Confidential.

P 93–162

Manufacturer. Confidential.
Chemical. (G) Aromatic polyether polyester.
Use/Production. (G) Epoxy resin ingredient. Prod. range: Confidential.

P 93–163

Manufacturer. Confidential.
Chemical. (G) Polyester polyurethane.
Use/Production. (G) Coating for open, nondispersive use in orginal equipment manufacture. Prod. range: Confidential.

P 93–164

Manufacturer. Confidential.
Chemical. (G) Modified diphenylmetthane diisocyanate.
Use/Production. (G) Polyurethane foam component. Prod. range: Confidential.

P 93–165

Manufacturer. Monsanto Company.
Chemical. (S) Hexanedioic acid, bis-*N*-hexyl, bis(cyclohexyl) esters ox mixed dihexyl, dicyclohexyl (hexyl, cycohexyl) adipates.
Use/Production. (G) Plasticizer. Prod. range: Confidential.
Toxicity Data. Acute oral toxicity: LD50 > 5,000 mg/kg species (rat). Acute dermal toxicity: LD50 > 5,000 mg/kg species (rabbit). Eye irritation: slight species (rabbit). Skin irritation: negligible species (rabbit).

P 93–166

Manufacturer. Confidential.
Chemical. (G) Crosslinked polymeric acrylic microparticles.
Use/Production. (S) Coatings. Prod. range: 208,506–625,000 kg/yr.

P 93–167

Manufacturer. Confidential.
Chemical. (G) Crosslinked polymeric acrylic microparticles.
Use/Production. (S) Coatings. Prod. range: 208,000–625,518 kg/yr.

P 93–168

Importer. Confidential.
Chemical. (S) Alcohols, C_{12-18}, ethers with polyethylene.
Use/Import. (S) Spin finish synthetic fiber. Import range: 500–2,000 kg/yr.

P 93–169

Manufacturer. Confidential.
Chemical. (G) Polyurethane elastomer.
Use/Production. (G) Engineering thermoplastic alloy material. Prod. range: Confidential.

P 93–170

Manufacturer. Confidential.
Chemical. (S) Functionalized polyester polyurethane dispersion.
Use/Production. (G) Component of spray applied coating. Prod. range: 50,000–150,000 kg/yr.

P 93–171

Manufacturer. Confidential.
Chemical. (G) Functionalized. polyester polyurethane dispersion.
Use/Production. (G) Component of spray applied coating. Prod. range: 50,000–150,000 kg/yr.

P 93–172

Manufacturer. Confidential.
Chemical. (G) Functionalized polyester polyurethane dispersion.
Use/Production. (G) Component of spray applied coating. Prod. range: 50,000–150,000 kg/yr.

P 93–173

Manufacturer. Air Products and Chemicals, Inc.
Chemical. (S) 1-Chloromethyl-4-fluoro-1,4-diazoniabicycle(2,2,2)otane bis(tetrafluoroborate).
Use/Production. (G) Selective fluorination of organic and inorganic chemical substrates. Prod. range: Confidential.

P 93–174

Manufacturer. Air Products and Chemicals, Inc.
Chemical. (G) Substituted triethylenediamine chloride.
Use/Production. (G) An isolated but site-limited intermediate in the manufacture of chemical identified. Prod. range: Confidential.

P 93–175

Manufacturer. Air Products and Chemicals, Inc.
Chemical. (G) Substituted triethylenediamine fluoroborate.
Use/Production. (G) An isolated but site-limited intermediate in the manufacture of the chemical identified. Prod. range: Confidential.

P 93–176

Importer. Confidential.
Chemical. (G) Hyrophthalically modified polyurethane.
Use/Import. (G) Open, nondispersive. Import range: Confidential.
Toxicity Data. Acute oral toxicity: LD50 > 5,000 mg/kg species (rats). Acute dermal toxicity: LD50 > 2,000 mg/kg species (rabbit).

P 93–177

Manufacturer. Hoechst Celanese Corporation.
Chemical. (G) Substituted naphthalene sulfonic acid salt.
Use/Production. (S) Liquid and powder formulation of fiber reactive dye. Prod. range: 11,000–33,000 kg/yr.

P 93-178

Manufacturer. Bostik, Inc.

Chemical. (G) Polyurethane.

Use/Production. (G) Open, nondispersive use. Prod. range: Confidential.

P 93-179

Manufacturer. R.T. Vanderbilt Company, Inc.

Chemical. (G) 2,5-Dimercapto-1,3,4-thiadazole reaction product.

Use/Production. (S) Multifunctional additives for fuel and lubricants. Prod. range: Confidential.

P 93-180

Manufacturer. R.T. Vanderbilt Company, Inc.

Chemical. (G) 2,5-Dimercapto-1,3,4-thiadiazole reactin product.

Use/Production. (S) Multifunctional additives for fuel and lubricants. Prod. range: Confidential.

Certain Chemical; Test Market Exemption Application

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA may upon application exempt any personfrom the premanufacturing notification requirements of section5(a) or (b) of the Toxic Substance Control Act (TSCA) to permitthe person to manufacture or process a chemical for test marketing purposes under section 5(h)(1) of TSCA. Requirements for test marketing exemption (TME) applications, which must either be approved or denied within 45 days of receipt are discussed in EPA's final rule published in the **Federal Register** of May 13, 1983 (48 FR 21722). This notice, issued under section 5(h)(6) of TSCA, announces receipt of announces receipt of two application(s) for exemption, applications for exemption, provides a summary, and requests comments on the appropriateness of granting these exemptions.

DATES:

Written comments by:

FEDERAL DEPOSIT INSURANCE CORPORATION

Information Collection Submitted to OMB for Review

AGENCY: Federal Deposit Insurance Corporation.

ACTION: Notice of information collection submitted to OMB for review and approval under the Paperwork Reduction Act.

SUMMARY: The submission is summarized as follows:
Type of Review: Extension of expiration date without any change in substance or method of collection.
Title: Application to Participate in a Conversion Transaction.
Form Number: None (letter application).
OMB Number: 3064–0098.
Expiration Date of OMB Clearance: February 28, 1993.
Frequency of Response: On occasion.
Respondents: Any insured depository institution applying for approval from the FDIC to participate in a conversion transaction which involves the transfer of deposits between a member of the Savings Association Insurance Fund and a member of the Bank Insurance Fund or vice versa.
Number of Respondents: 35.
Number of Responses per Respondent: 1.
Total Annual Responses: 35.
Average Number of Hours per Response: 3.
Total Annual Burden Hours: 105.
OMB Reviewer: Gary Waxman, (202) 395–7340, Office of Management and Budget, Paperwork Reduction Project 3064–0098, Washington, DC 20503.
FDIC Contact: Steven F. Hanft, (202) 898–3907, Office of the Executive Secretary, room F–400, Federal Deposit Insurance Corporation, 550 17th Street, NW., Washington, DC 20429.
Comments: Comments on this collection of information are welcome and should be submitted on or before February 16, 1993.

ADDRESSES: A copy of the submission may be obtained by calling or writing the FDIC contact listed above. Comments regarding the submission should be addressed to both the OMB reviewer and the FDIC contact listed above.

SUPPLEMENTARY INFORMATION: The FDIC is requesting OMB approval to extend the use of the letter application, which is required for depository institutions that wish to obtain the FDIC's approval to participate in a conversion transaction. Such transactions generally involve the transfer of deposits between the Savings Association Insurance Fund and the Bank Insurance Fund or vice versa. The requirement is based on statutory requirements contained in the Financial Institutions Reform, Recovery, and Enforcement Act of 1989 ("FIRREA"). Under FIRREA (section 206(a)(7), Pub. L. 101–73), no insured depository institution may participate in a conversion transaction without the prior approval of the FDIC.

Dated: December 9, 1992.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,

Executive Secretary.

FEDERAL EMERGENCY MANAGEMENT AGENCY

[FEMA–969–DR]

Georgia; Amendment to Notice of a Major Disaster Declaration

AGENCY: Federal Emergency Management Agency (FEMA).

ACTION: Notice.

SUMMARY: This notice amends the notice of a major disaster for the State of

Georgia (FEMA–969–DR), dated December 1, 1992, and related determinations.

EFFECTIVE DATE: December 4, 1992.

FOR FURTHER INFORMATION CONTACT: Pauline C. Campbell, Disaster Assistance Programs, Federal Emergency Management Agency, Washington, DC 20472, (202) 646–3606.

SUPPLEMENTARY INFORMATION: The notice of a major disaster for the State of Georgia, dated December 1, 1992, is hereby amended to include the following areas among those areas determined to have been adversely affected by the catastrophe declared a major disaster by the President in his declaration of December 1, 1992.

The counties of Dade and Talbot for Individual Assistance. The counties of Jones, Lincoln, Lumpkin, Monroe, Spaulding, Taliaferro, and Wilkes for Individual Assistance and Public Assistance.

(Catalog of Federal Domestic Assistance No. 83.516, Disaster Assistance.)

Grant C. Peterson,

Associate Director, State and Local Programs and Support.

BILLING CODE 6718–02–M

[FEMA–969–DR]

Georgia: Notice of Major Disaster and Related Determinations

AGENCY: Federal Emergency Management (FEMA).

ACTION: Notice.

EFFECTIVE DATE: December 1, 1992.

SUMMARY: This is a notice of the Presidential declaration of a major disaster for the State of Georgia (FEMA–969–DR), dated December 1, 1992, and related determinations.

FOR FURTHER INFORMATION CONTACT: Pauline C. Campbell, Disaster Assistance Programs, Federal Emergency Management Agency, Washington, DC 20472, (202) 646–3606.

SUPPLEMENTARY INFORMATION: Notice is hereby given that, in a letter dated December 1, 1992, the President declared a major disaster under the authority of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5121 *et seq.*), as follows:

I have determined that the damage in certain areas of the State of Georgia, resulting from tornadoes, accompanied by high winds and heavy rain, on November 22, 1992, and continuing is of sufficient severity and magnitude to warrant a major disaster declaration under the Robert T. Stafford Disaster Relief and Emergency Assistance Act ("the Stafford Act"). I, therefore, declare that such a major disaster exists in the State of Georgia.

In order to provide Federal assistance, you are hereby authorized to allocate from funds available for these purposes, such amounts as you find necessary for Federal disaster assistance and administrative expenses.

You are authorized to provide Individual Assistance and Public Assistance in the designated areas. Consistent with the requirement that Federal assistance be supplemental, any Federal funds provided under the Stafford Act for Public Assistance will be limited to 75 percent of the total eligible costs.

The time period prescribed for the implementation of section 310(a), Priority to Certain Applications for Public Facility and Public Housing Assistance, 42 U.S.C. 5153, shall be for a period not to exceed six months after the date of this declaration.

Notice is hereby given that pursuant to the authority vested in the Director of the Federal Emergency Management Agency under Executive Order 12148, I hereby appoint Mr. Edward Thomas of the Federal Emergency Management Agency to act as the Federal Coordinating Officer for this declared disaster.

I do hereby determine the following areas of the State of Georgia to have been affected adversely by this declared major disaster:

The counties of Carroll, Cherokee, Cobb, Greene, and Putnam for Individual Assistance and Public Assistance.

(Catalog of Federal Domestic Assistance No. 83.516, Disaster Assistance.)

Wallace E. Stickney,

Director.

[FEMA–970–DR]

Texas; Notice of Major Disaster and Related Determinations

AGENCY: Federal Emergency Management Agency (FEMA).

ACTION: Notice.

EFFECTIVE DATE: December 4, 1992.

SUMMARY: This is a notice of the Presidential declaration of a major disaster for the State of Texas (FEMA–970–DR), dated December 4, 1992, and related determinations.

FOR FURTHER INFORMATION CONTACT: Pauline C. Campbell, Disaster Assistance Programs, Federal Emergency Management Agency, Washington, DC 20472, (202) 646–3606.

SUPPLEMENTARY INFORMATION: Notice is hereby given that, in a letter dated December 4, 1992, the President declared a major disaster under the authority of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5121 *et seq.*), as follows:

I have determined that the damage in certain areas of the State of Texas, resulting from severe thunderstorms and tornadoes on November 21, 1992, is of sufficient severity and magnitude to warrant a major disaster declaration under the Robert T. Stafford Disaster Relief and Emergency Assistance Act ("the Stafford Act"). I, therefore, declare that such a major disaster exists in the State of Texas.

In order to provide Federal assistance, you are hereby authorized to allocate from funds available for these purposes, such amounts as you find necessary for Federal disaster assistance and administrative expenses.

You are authorized to provide Individual Assistance in the designated areas. Public Assistance may be added at a later date if requested and warranted. Consistent with the requirement that Federal assistance be supplemental, any Federal funds provided under the Stafford Act for Public Assistance will be limited to 75 percent of the total eligible costs.

The time period prescribed for the implementation of section 310(a), Priority to Certain Applications for Public Facility and Public Housing Assistance, 42 U.S.C. 5153, shall be for a period not to exceed six months after the date of this declaration.

Notice is hereby given that pursuant to the authority vested in the Director of the Federal Emergency Management Agency under Executive Order 12148, I hereby appoint Mr. Brad Harris of the Federal Emergency Management Agency to act as the Federal Coordinating Officer for this declared disaster.

I do hereby determine the following areas of the State of Texas to have been affected adversely by this declared major disaster:

Harris County for Individual Assistance.

(Catalog of Federal Domestic Assistance No. 83.516, Disaster Assistance.)

FEDERAL MARITIME COMMISSION

Notice of Agreement(s) Filed; American President Lines, Ltd. et al.

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 800 North Capitol Street, NW., 9th Floor.

Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the Federal Register in which this notice appears. The requirements for comments are found in § 572.603 of title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 202–010778–072.

Title: Asia North America Eastbound Rate Agreement.

Parties:

American President, Lines, Ltd.
Kawasaki Kisen Kaisha, Ltd.
A.P. Moller-Maersk Line
Mitsui O.S.K. Lines, Ltd.
Neptune Orient Lines, Ltd.
Nippon Yusen Kaisha Line
Orient Overseas Container Line
Sea-Land Service, Inc.

Synopsis: The proposed amendment would restrict voting privileges on tariff items related to all-water service to those carriers who maintain and advertise regular all-water service.

Agreement No.: 203–011223–007.

Title: Transpecific Stabilization Agreement.

Parties:

American President Lines, Ltd.
Evergreen Marine Corp. (Taiwan) Ltd.
Hanjin Shipping Co., Ltd.
Hyundai Merchant Marine Co., Ltd.
Kawasaki Kisen Kaisha, Ltd.
A.P. Moller-Maersk Line
Maersk K.K.
Mitsui O.S.K. Lines, Ltd.
Neptune Orient Lines, Ltd.
Nippon Yusen Kaisha
Orient Overseas Container Line, Inc.
Sea-Land Service, Inc.
Yangming Marine Transportation Corp.

Synopsis: This modification adds Hapag-Lloyd Aktiengesellschaft as a party to the Agreement and corrects the addresses of several existing parties to the Agreement. The parties have requested a shortened review period.

Dated: December 9, 1992.

By Order of the Federal Maritime Commission.

Joseph C. Polking,

Secretary.

FEDERAL RESERVE SYSTEM

Barclays PLC, et al.; Notice of Applications to Engage de novo in Permissible Nonbanking Activities

The companies listed in this notice have filed an application under § 225.23(a)(1) of the Board's Regulation Y (12 CFR 225.23(a)(1)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to commence or to engage *de novo*, either directly or through a subsidiary, in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding the applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than January 4, 1993.

A. Federal Reserve Bank of New York (William L. Rutledge, Vice President) 33 Liberty Street, New York, New York 10045:

1. *Barclays PLC*, London, England, and Barclays Bank PLC, London, England; to engage *de novo* through Barclays de Zoete Wedd Securities, Inc., New York, New York, in acting, for affiliated and nonaffiliated persons, as a futures commission merchant and advisor with respect to financial futures and options contracts, pursuant to §§ 225.25(b)(18) and (19) of the Board's Regulation Y.

Board of Governors of the Federal Reserve System, December 9, 1992.

Jennifer J. Johnson,

Associate Secretary of the Board.

BILLING CODE 6210–01–F

Citizens Financial Corporation Employee Stock Ownership Plan and Trust, et al.; Formations of; Acquisitions by; and Mergers of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than December 30, 1992.

A. Federal Reserve Bank of Chicago (David S. Epstein, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *Citizens Financial Corporation Employee Stock Ownership Plan and Trust*, Fort Atkinson, Wisconsin; to acquire 40 percent of the voting shares of Citizens Financial Corporation, Fort Atkinson, Wisconsin, and thereby indirectly acquire Citizens State Bank, Fort Atkinson, Wisconsin.

B. Federal Reserve Bank of St. Louis (Randall C. Sumner, Vice President) 411 Locust Street, St. Louis, Missouri 63166:

1. *Union Planters Corporation*, Memphis, Tennessee; to acquire 100 percent of the voting shares of Farmers Union Bank, Ripley, Tennessee.

C. Federal Reserve Bank of Dallas (W. Arthur Tribble, Vice President) 400 South Akard Street, Dallas, Texas 75222:

1. Overton Financial Corporation, Overton, Texas, and its wholly-owned subsidiary, Overton Delaware Corporation, Dover, Delaware; together to acquire up to 15 percent of the voting shares of Longview Financial Corporation, Longview, Texas, and Longview Bank & Trust Company, Longview, Texas.

Board of Governors of the Federal Reserve System, December 9, 1992.

BILLING CODE 6210-01-F

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Agency for Health Care Policy and Research

Development of Clinical Guideline For Smoking Prevention and Cessation with Centers for Disease Control

The Agency for Health Care Policy and Research and the Centers for Disease Control announce that they are: (1) Establishing a panel of health care experts and consumers to develop a clinical practice guideline for smoking prevention and cessation; and (2) inviting nominations of qualified individuals to serve as the chairperson(s) and as panel members.

Background

The Omnibus Budget Reconciliation Act of 1989 (Pub. L. 101-239) added a new title IX to the Public Health Service

Act (the Act), which established the Agency for Health Care Policy and Research (AHCPR) to enhance the quality, appropriateness, and effectiveness of health care services, and access to such services. (See 42 U.S.C. 299–299c–6 and 1320b–12.) The Agency for Health Care Policy and Research Reauthorization Act of 1992 (Pub. L. 102–410) enacted on October 13, 1992, amended certain provisions of the Act. In keeping with its legislative mandates, AHCPR is arranging for the development, periodic review, and updating of clinically relevant guidelines that may be used by physicians, other health care practitioners, educators, and consumers to assist in determining how diseases, disorders, and other health conditions can most effectively and appropriately be prevented, diagnosed, treated, and clinically managed.

Section 912 of the Act (42 U.S.C. 299b–1(b)), as amended by Public Law 102–410, requires that the guidelines:

1. Be based on the best available research and professional judgment;
2. Be presented in formats appropriate for use by physicians, other health care practitioners, medical educators, medical review organizations, and consumers;
3. Be presented in treatment-specific or condition-specific forms appropriate for use in clinical practice, educational programs, and reviewing quality and appropriateness of medical care;
4. Include information on risks and benefits of alternative strategies for prevention, diagnosis, treatment, and management of the particular health condition(s); and
5. Include information on the costs of alternative strategies for prevention, diagnosis, treatment, and management of the particular health condition(s), where cost information is available and reliable.

Section 913 of the Act (42 U.S.C. 299b–2) describes two mechanisms through which AHCPR may arrange for development of guidelines: 1. Panels of qualified health care experts and consumers may be convened; and 2. contracts may be awarded to public and private non-profit organizations. The AHCPR has elected to use the panel process for development of clinical practice guidelines for smoking prevention and cessation.

Section 914 of the Act (42 U.S.C. 299b–3(a)), as amended by Public Law 102–410, identifies factors to be considered in establishing priorities for guidelines, including the extent to which the guidelines would:

1. Improve methods for disease prevention;
2. Improve methods of diagnosis, treatment, and clinical management for the benefit of a significant number of individuals;
3. Reduce clinically significant variations among clinicians in the particular services and procedures utilized in making diagnoses and providing treatments; and
4. Reduce clinically significant variations in the outcomes of health care services and procedures.

Also, in accordance with title IX of the PHS Act and section 1142 of the Social Security Act, the Administrator is to assure that the needs and priorities of the Medicare program are reflected appropriately in the agenda and priorities for development of guidelines.

The Centers for Disease Control (CDC) serve as the national focus for developing and supporting disease prevention and control, environmental health, and health promotion and health education activities designed to improve the health of the people of the United States. Their responsibilities under 42 U.S.C. 241, 300u–300u–2, and 15 U.S.C. 1341 and 4401, include the study and prevention of chronic diseases and controllable risk factors such as cigarette smoking and smokeless tobacco use. The Office on Smoking and Health (OSH), a division of the National Center for Chronic Disease Prevention and Health Promotion, administers a program to inform Americans about the dangers of tobacco use in order to reduce death and disability due to smoking and smokeless tobacco use. In order to reduce the morbidity and mortality from tobacco use, OSH promotes and stimulates research on the determinants and health effects of smoking and smokeless tobacco use.

Panel Nominations

The panel that will develop the guideline for smoking prevention and cessation will consist of two co-chairpersons and nine to fifteen members. To assist in identifying members for the panel, AHCPR and CDC are requesting recommendations from a broad range of interested individuals and organizations, including physicians representing primary care and relevant specialties, physicians' assistants, nurses, nurse practitioners, dentists, pharmacists, respiratory care therapists and allied health and other health care practitioners, health care institutions, and consumers with pertinent experience or information. In making panel selections, AHCPR and CDC will maintain a balance between individuals selected from academic settings and individuals selected without full-time academic appointments. Also, at least two other members of this panel shall be individuals who do not derive their primary source of revenue directly from the performance of procedures discussed in this guideline.

AHCPR and CDC are especially interested in receiving nominations of: (1) Persons with experience in developing clinical guidelines; (2) persons with relevant experience in basic and clinical research in: Disease prevention and health promotion, particularly as they relate to smoking prevention and cessation; addictive behaviors; behavioral medicine; pulmonary medicine; social psychology of health behaviors, social marketing, cardiovascular medicine or other related areas; (3) persons with relevant experience and clinical and technical skills needed to produce smoking-related behavior changes in various types of smokers (including pre-symptomatic as well symptomatic individuals); (4) persons with relevant experience and clinical and technical skills needed to prevent people in different target populations from beginning smoking; (5) epidemiologists who are familiar with smoking-related diseases or their treatments; (6) health services researchers or health economists who have expertise regarding smoking-related diseases as well as smoking cessation interventions and other treatments; and (7) consumers who have had personal experience with smoking prevention or cessation, either as a former smoker, a family member or friend of a former smoker, or as a person who actively works with smoking prevention or cessation programs.

This notice requests nominations of qualified individuals to serve on the panel as members or as panel chairpersons. The functions of the panel chairpersons are critical to the process of developing guidelines. Chairpersons provide leadership regarding methodology, literature review, panel deliberations, and formation of the final products. Nominations for chairpersons should take into consideration the criteria specified below, which AHCPR and CDC will use in making panel selections.

- Relevant training and clinical experience;
- Demonstrated interest in quality assurance and research on the clinical condition(s) under consideration and the related treatment of the condition(s), including publication of relevant peer-reviewed articles;
- Commitment to the need to produce clinical guidelines;
- Recognition in the field with a record of leadership in relevant activities;

- Broad public health view of the utility of particular procedures(s) or clinical services(s);
- Demonstrated capacity to lead a health care team in group decision making processes;
- Demonstrated capacity to respond to consumer concerns;
- Prior experience in developing guidelines for the clinical condition in question; and
- No conflict of interest that would impair the scientific integrity of the guidelines.

When the panel chairperson(s) has been appointed, nominations for members of the panel will be submitted to the chairperson(s) for review and consideration. The chairperson(s) will, in turn, recommend proposed panel members to AHCPR and CDC. Appointments of the panel members will be made by the Administrator, AHCPR, in consultation with CDC, after review of proposed members' qualifications and the overall composition of the panel to ensure representation of a range of expertise and experience.

Nominations should indicate whether the individual is being recommended to serve as the panel chairperson(s) or to serve as a panel member. The term of appointment for panel chairpersons is three years and the subsequent panel chairpersons will be selected from the existing panel members at that time. Each nomination must include a copy of the individual's curriculum vitae or resume, plus a statement of the rationale for the specific nomination. To be considered, nominations must be received by January 22, 1993, at the following address: Office of the Forum for Quality and Effectiveness in Health Care, Kathleen McCormick, PhD, RN, Director, 2101 E. Jefferson Street, Suite 401 West, Rockville, MD 20852, Phone: (301) 227–6671, Fax: (301) 227–8332.

For Additional Information

Additional information on the guideline development process is contained in the AHCPR Fact Sheet, "AHCPR-Commissioned Clinical Practice Guidelines," dated January 1992 and the Program Note, "Clinical Guideline Development," dated August 1990. These documents can be obtained from the AHCPR Publications Clearinghouse, P.O. Box 8547, Silver Spring, MD 20907; or call Toll-Free: 1–800–358–9295.

Also, information can be obtained by contacting Kathleen A. McCormick, Ph.D., R.N., Director, Office of the Forum for Quality and Effectiveness in Health Care, Agency for Health Care Policy and Research, at the Rockville address above.

Dated: December 7, 1992.

J. Jarrett Clinton,

Administrator.

BILLING CODE 4160–90–M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[WY–920–03–4120–03]

Notice of Competitive Coal Lease Sale; West Rocky Butte Tract, WYW122586

AGENCY: Bureau of Land Management, Interior, Wyoming.

SUMMARY: Notice is hereby given that certain coal resources in the West Rocky Butte Tract described below in Campbell County, Wyoming, will be offered for competitive lease by sealed bid in accordance with the provisions of the Mineral Leasing Act of 1920, as amended (30 U.S.C. 181 et seq.).

DATES: The lease sale will be held at 2 p.m., on Thursday, January 7, 1993. Sealed bids must be submitted on or before 4 p.m., on Wednesday, January 6, 1993.

ADDRESSES: The lease sale will be held in the third floor conference room of the Wyoming State Office, 2515 Warren Avenue, Cheyenne, Wyoming 82001. Sealed bids must be submitted to the Cashier, Wyoming State Office, at the address given above, or to the Wyoming State Office, P.O. Box 1828, Cheyenne, Wyoming 82003–1828.

FOR FURTHER INFORMATION CONTACT: Laura Steele, Land Law Examiner or Eugene Jonart, Coal Coordinator at (307) 775–6250.

SUPPLEMENTARY INFORMATION: This coal lease sale is being held in response to an application for a coal lease sale from Northwestern Resources Co., of Butte, Montana. The coal resources to be offered consist of all reserves recoverable by surface mining methods in the following described lands located in Campbell County, Wyoming, approximately 10 miles southeast of the city of Gillette, Wyoming:

T. 48 N., R. 71 W., 6th P.M., Wyoming
Sec. 5: Lots 7 thru 9, 16 and 17;
Sec. 6: Lots 8, 14 (E2), 15, 16 and 23 (E2);
Sec. 7: Lot 5 (E2);
Sec. 8: Lot 4;
T. 49 N., R. 71 W., 6th P.M., Wyoming
Sec. 32: Lot 15.
Containing 463.205 acres.

The West Rocky Butte tract, located adjacent to the existing Rocky Butte Tract Federal coal lease, WYW78633, held by Northwestern Resources Co., contains Fort Union Formation coal of the Wyodak-Anderson zone. Up to three mineable coal seams (referred to as the Upper, Middle, and Lower coals) occur in this coal zone in this area. The Upper coal is the main seam, averaging approximately 67.5 feet thick over the entire West Rocky Butte Tract. The Middle coal of the Fort Union Formation is absent from the West Rocky Butte Tract; however, the Lower coal of the Fort Union Formation, present over a small area in the northeast portion of the West Rocky Butte Tract, averages about 21 feet thick. The Upper coal in the tract is estimated to consist of 55.5 million tons of in-place coal reserves and an estimated 1.2 million tons of in-place reserves in the lower coal. The tract area has an average overall stripping ratio of approximately 3.75 BCY (Bank Cubic Yards) overburden/ton of in-place coal. The Upper and Lower coals combined contain an estimated 55.0 million tons of recoverable coal (57.5 million tons of in-place coal). The coal rank is subbituminous C. Average in-place quality for the Upper coal is 8,354 BTU/LB., 4.30% ash, 0.27% sulfur, and 31.0% moisture. Average in-place quality for the Lower coal is 7,871 BTU/LB., 7.20% ash. 0.40% sulfur, and 31.0% moisture. This places the coal reserves in the West Rocky Butte Tract at the lower end of the quality range for coal being mined in the southern Powder River Basin.

The tract in this lease offering consists of split estate lands where the surface is owned by private surface owners. Consents granted by the surface owners have been filed with and verified by the Bureau of Land Management. The consents, consisting of agreements dated December 14, 1976, July 1, 1980, and October 2, 1992, which contain the purchase price, are a part of the detailed statement for the sale.

Bids for the tract will be in the form of sealed bids. Sealed bids should be sent by "Certified Mail, Return Receipt Requested", or be hand delivered to the Cashier, Wyoming State Office, 2515 Warren Avenue, P.O. Box 1828, Cheyenne, Wyoming 82003–1828. Bids received after 4 p.m., on Wednesday, January 6, 1993, will not be considered and will be returned to the sender.

If the applicant for the lease by application is not the successful bidder, the BLM may evaluate the existing National Environmental Policy Act documentation for the tract to determine if further analysis may be necessary, which could lead to a delay in lease issuance.

Any lease issued as a result of this offering will provide for payment of an annual advance rental of $3.00 per acre or fraction thereof per year and of a royalty payable to the United States of 12½ percent of the value of coal produced by strip or augur mining methods and 8 percent of the value of the coal produced by underground mining methods. The value of the coal will be determined in accordance with 30 CFR 203.250.

Bidding instructions for the tract offered and the terms and conditions of the proposed coal lease are contained in the Detailed Statement available from the Wyoming State Office Public Information Desk at the addresses above. Case file documents, WYW122586, are also available for inspection at the Wyoming State Office.

Dale L. Wadleigh,

Acting Chief, Branch of Mining Law & Solid Minerals.

[UT-050-03-4410-03]

Proposed Amendment to the Henry Mountain Resource Area Management Framework Plan

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of proposed amendment.

SUMMARY: The Henry Mountain Resource Area (HMRA) is proposing to amend the HMRA Management Framework Plan (MFP) to allow for the change in allocation of forage between wildlife and livestock within the HMRA. The Utah Division of Wildlife Resources has evaluated the need for additional buffalo (Bison bison) in the HMRA and has assisted the Bureau of Land Management (BLM) in preparing an Environmental Assessment (EA) addressing the forage allocations in the Pennell, Steel Butte, and Nasty Flat allotments. This area is within the area which has been nominated for the Buffalo Habitat Area of Critical Environmental Concern. The following Wilderness Study Areas (WSA) are involved: Mount Ellen-Blue Hills WSA, Bull Mountain WSA, and Mount Pennell WSA. Changes would be within the guidelines of the Interim Management Policy and would not impair or prevent areas from being eligible for wilderness designation.

This proposal would increase the allocation of forage to buffalo and reduce the allocation of forage to livestock on the Pennell, Steel Butte, and Nasty Flat allotments.

This amendment would also provide for the adjustment in forage allocations between allotments throughout the HMRA between livestock and wildlife as determined to be needed by monitoring and analysis.

FOR FURTHER INFORMATION CONTACT: Alan Partridge, Bureau of Land Management, Richfield District Office, 900 North 150 East, Richfield, Utah 84701.

SUPPLEMENTARY INFORMATION: An EA will be prepared by the Richfield District of the BLM to address any impacts of the proposed amendments. Public participation is requested to identify issues or concerns on the proposed amendment. The comment period for this notice will commence with the date of publication of this notice. Protests must be submitted on or before January 15, 1993.

G. William Lamb,

Acting State Director.

BILLING CODE 4310-DQ-M

[NV-930-93-4210-04; N-48090]

Issuance of Land Exchange Conveyance Document and Order Providing for Opening of Land, Nevada

AGENCY: Bureau of Land Management, Interior.

SUMMARY: This notice identifies Federal and non-Federal land involved in a recently completed exchange transaction. The mineral estates in the Federal and non-Federal land were conveyed simultaneously with the surface estate.

EFFECTIVE DATE: January 14, 1993.

FOR FURTHER INFORMATION CONTACT: Mary Clark, Nevada State Office, Bureau of Land Management, P.O. Box 12000, Reno, NV 89520, (702) 785-6530.

SUPPLEMENTARY INFORMATION: On November 10, 1992, the United States issued Patent No. 27-93-0002 to Van Norman Ranches, Inc., a Nevada corporation, for the following described land pursuant to section 206 of the Act of October 21, 1976 (43 U.S.C. 1716):

Mount Diablo Meridian, Nevada

T. 40 N., R. 52 E.,
Sec. 25, lots 1, 2, and 3.

The area described contains 118.36 acres in Elko County, Nevada.

In exchange for that land, the United States acquired the following described land from the above-named party:

Mount Diablo Meridian, Nevada

T. 38 N., R. 53 E.,
Sec. 5, SW¼SE¼;
Sec. 8, NE¼NW¼;
Sec. 16, NW¼SE¼;
Sec. 17, SW¼SE¼.

The area described contains 160 acres in Elko County, Nevada.

Title to the non-Federal land was accepted on November 10, 1992. The value of the Federal land exceeded the value of the non-Federal land by $100.00. An equalization payment in that amount was made to the United States by Van Norman Ranches, Inc. The purpose of the exchange was for the United States to acquire non-Federal land with high values for crucial mule deer summer habitat, habitat for sagegrouse, nongame birds and mammals, and nesting habitat for raptors and cavity nesting birds.

At 10 a.m. on January 14, 1993, the lands acquired by the United States will be open to the operation of the public land laws generally, subject to valid existing rights, the provisions of existing withdrawals, other segregations of record and the requirements of applicable law. All valid applications received at or prior to 10 a.m. on January 14, 1993, will be considered as simultaneously filed at that time.

Those received thereafter shall be considered in the order of filing. At 10 a.m. on January 14, 1993, the land acquired by the United States will be open to location under the mining laws. Appropriation of the land under the general mining laws prior to the date and time of restoration is unauthorized. Any such attempted appropriation, including attempted adverse possession under 30 U.S.C. 38, shall vest no rights against the United States. Acts required to establish a location and to initiate a right of possession are governed by State law where not in conflict with Federal law. The Bureau of Land Management will not intervene in disputes between rival locators over possessory rights since Congress has provided for such determinations in local courts.

At 10 a.m. on January 14, 1993, the land acquired by the United States will also be open to applications/offers under the mineral leasing laws, the material sale laws, and the Geothermal Steam Act.

Robert G. Steele,

Acting State Director, Nevada.

Availability of Proposed Planning Criteria for the Florida Resource Management Plan

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of availability.

SUMMARY: Pursuant to 43 CFR 1610.4–2, notice is hereby given of the availability of proposed planning criteria for the Florida Resource Management Plan (RMP).

DATES: Comments on the proposed planning criteria will be accepted through January 15, 1993.

ADDRESSES: Send comments to Bureau of Land Management, Jackson District, 411 Briarwood Drive, suite 404, Jackson, Mississippi 39206.

FOR FURTHER INFORMATION CONTACT: Duane Winters, RMP Team Leader, Jackson District, (601) 977–5400.

SUPPLEMENTARY INFORMATION: The RMP will guide future use of several hundred acres, comprised of small parcels of public land located in counties throughout the State. The RMP will also guide the Bureau's mineral leasing and permitting responsibilities on approximately 270,000 acres of split estate land where federal ownership is limited to mineral interests.

The BLM also has certain mineral leasing and permitting responsibilities on other areas of federal ownership including military reservations and National Forests. These responsibilities will be carried out in accordance federal laws and regulations as well as applicable land use plans of other federal agencies. The RMP will include an Environmental Impact Statement (EIS) which will address the impacts of foreseeable mineral development of these lands.

Copies of the proposed planning criteria and records of all phases of the planning process will be available for public review at the Jackson District Office. Draft and final documents of the RMP/EIS will be available upon request.

Dated: December 3, 1992.

Sammy St. Clair,

Acting District Manager.

INTERSTATE COMMERCE COMMISSION

Notice of Trackage Rights Exemption; Dallas, Garland & Northeastern Railroad, Inc., et al.

[Finance Docket No. 32198]

The Atchison, Topeka & Santa Fe Railway Company (ATSF) has agreed to grant overhead trackage rights to Dallas, Garland & Northeastern Railroad, Inc. (DGNO) between milepost 66.7 at Garland, TX, and milepost 51.7 at Dallas, TX, a distance of approximately 15 miles. DGNO will also acquire the right to use certain sidings for the purpose of meeting and passing trains and the right to use certain existing connections. The involved trackage rights are presently held by Missouri Pacific Railroad Company (MP).[1] DGNO will obtain the trackage rights through an unconditional assignment of an agreement between ATSF and MP, dated April 22, 1992. ATSF has agreed to the assignment of trackage rights from MP to DGNO. The trackage rights were to become effective on or after December 2, 1992.

This notice is filed under 49 CFR 1180.2(d)(7). Petitions to revoke the exemption under 49 U.S.C. 10505(d) may be filed at any time. The filing of a petition to revoke will not stay the transaction. Pleadings must be filed with the Commission and served on: Kelvin J. Dowd, Slover & Loftus, 1224 Seventeenth Street, NW., Washington, DC 20036.

As a condition to the use of this exemption, any employees, including employees of MP, adversely affected by the trackage rights will be protected under Norfolk and Western Ry. Co—Trackage Rights—BN, 354 I.C.C. 605 (1978), as modified in Mendocino Coast Ry., Inc.—Lease and Operate, 360 I.C.C. 653 (1980).

Decided: December 7, 1992.

By the Commission, David M. Konschnik, Director, Office of Proceedings.

Sidney L. Strickland, Jr.,

Secretary.

b. All of SP's right-of-way from south of Palmdale (milepost B–414.72) to north of Saugus (milepost B–448.55);

c. All of SP's remaining right-of-way from north of Saugus (milepost B–448.55) to north of Taylor Yard (milepost B–478.21);

d. A 50-foot right-of-way, through Taylor Yard on SP's new alignment from north of Taylor Yard (milepost B–478.21) to Bridge Five (milepost B–481.10); and

e. Sale of SP's interest in the bridge from East Bank Junction (milepost B–481.9) to Mission Tower (milepost B–482.2) across LAUPT Bridge over the Los Angeles River.

DEPARTMENT OF JUSTICE

Lodging of Consent Decree Pursuant to the Federal Water Pollution Control Act in United States v. Sepco Industries, Inc.

In accordance with Department of Justice regulation, 28 CFR 50.7, 38 FR 19029, notice is hereby given that a proposed Consent Decree in United States versus Sepco Industries, Inc., Civil Action No. 86–0670, was lodged in the United States District Court for the Eastern District of New York on November 24, 1992. The proposed Consent Decree, if entered, will resolve the liability of Sepco Industries, Inc., under sections 307, 308, and 309 of the Federal Water Pollution Control Act ("Act"), 33 U.S.C. 1317, 1318, 1319, for alleged violations of the pretreatment requirements of the Act at Sepco Industries' electroplating facility in Brooklyn, New York. The settlement reflected in the proposed Consent Decree would require the Defendant to pay a civil penalty of $25,000 and to conduct specified tests in order to ensure compliance with the Act's pretreatment requirements in the future.

The Department of Justice will receive, for a period of thirty (30) days from the date of publication of this notice, written comments relating to the proposed Consent Decree. Comments should be addressed to the Acting Assistant Attorney General of the Environment and Natural Resources Division, United States Department of Justice, Washington, DC 20530, and should refer to United States versus Sepco Industries, Inc., Department of Justice No. 90–5–1–1–2546.

The proposed Consent Decree may be examined at the office of the United States Attorney for the Eastern District of New York, One Pierrepont Plaza, 11th Floor, Brooklyn, New York 11201; at the Region II office of the United States Environmental Protection Agency, Jacob Javits Federal Building, 26 Federal Plaza, New York, New York 20005; and at the Environmental Enforcement Section Document Center, 601 Pennsylvania Avenue, NW., Washington, DC 20004, 202–347–2072. A copy of the proposed consent decree may be obtained in person or by mail from the Document Center, Box 1097 at the above address. In requesting a copy, please enclose a check in the amount of $5.00 (25 cents per page reproduction costs) payable to Consent Decree Library.

Roger Clegg,
Acting Assistant Attorney General, Environment & Natural Resources Division.

[TA–W–27,964]

Homco International, Incorporated, Williston, ND; Notice of Termination of Investigation

Pursuant to section 221 of the Trade Act of 1974, an investigation was initiated on November 9, 1992 in response to a worker petition which was filed on October 26, 1992 on behalf of workers at Homco International, Incorporated, operating out of Williston, North Dakota.

On November 18, 1992, the Department of Labor amended the determination of investigation TA–W–27,571 assigned to Homco International, Incorporated, Wilburton, Oklahoma. The amended determination, a certification, was issued to include various other operating locations in the state of North Dakota (TA–W–27,571B). This amended determination covers the workers at the site of the subject investigation. Therefore, further investigation in this case would serve no purpose, and the investigation has been terminated.

Signed at Washington, DC, this 4th day of December 1992.

Marvin M. Fooks,
Director, Office of Trade Adjustment Assistance.

[FR Doc. 92–30368 Filed 12–14–92; 8:45 am]
BILLING CODE 4510–30–M

Determinations Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents summaries of determinations regarding eligibility to apply for adjustment assistance issued during the period of November 1992.

In order for an affirmative determination to be made and a certification of eligibility to apply for adjustment assistance to be issued, each

of the group eligibility requirements of section 222 of the Act must be met.

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated,

(2) That sales or production, or both, of the firm or subdivision have decreased absolutely, and

(3) That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Negative Determinations

In each of the following cases the investigation revealed that criterion (3) has not been met. A survey of customers indicated that increased imports did not contribute importantly to worker separations at the firm.

TA-W-27,816; Lally Manufacturing Corp.; New York, NY

TA-W-27,817; Lally Manufacturing Corp., Port Leyden, NY

TA-W-27,818; Lally Manufacturing Corp., Adams NY

TA-W-27,822; Power Conversion, Inc., Elmwood Park, CA

TA-W-27,621; Central Plastic Co., Shawnee, OK

TA-W-27,686; Corrugated Paper Corp., Westborough, MA

TA-W-27,705; Unocal Corp., Energy Resources Div., North American Div., Louisiana Region, Lafayette, LA

TA-W-27,839; Omak Wood Products, Inc., Omak, WA

TA-W-27,808; Specialty Steel Products, Pittsburgh, PA

In the following cases, the investigation revealed that the criteria for eligibility has not been met for the reasons specified.

TA-W-27,868; Spooner Energy, Inc., Jackson, MS

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

TA-W-27,909; Haverhill Shoe Co., Haverhill, MA

Increased imports did not contribute importantly to worker separations at the firm.

TA-W-27,926; Staballoy, Inc., Broussard, LA

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

TA-W-27,617 & TA-W-27,775; Fujitsu Imaging Systems, Danbury, CT and Waltham, MA

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

TA-W-27,698; The Timken Co., Canton, OH

U.S. imports of tapered roller bearings declined absolutely and relative to domestic shipments in 1991 compared to 1990 and remained essentially the same absolutely in the twelve month period ending in July 1992 compared to the same period ending in July 1991.

TA-W-27,913; Intrasearch, Inc., Englewood, CO

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

TA-W-27,801; Spaulding Composites Co., Inc., Tonawanda, NY

The investigation revealed that criterion (2) and criterion (3) have not been met. Sales or production did not decline during the relevant period as required for certification. Increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have not contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Affirmative Determinations

TA-W-27,820, TA-W-27,830, TA-W-27,831; Mitchell Energy Corp., Decator, Alba and Bridgeport, TX

A certification was issued covering all workers separated on or after September 8, 1991.

TA-W-27,908; Center Fashions, Inc., DuPont, PA

A certification was issued covering all workers separated on or after September 9, 1991.

TA-W-27,874; Lor-Rog Industries, Inc., Joplin, MO

A certification was issued covering all workers separated on or after September 16, 1991.

TA-W-27,810; Hercules, Inc., Radford, VA

A certification was issued covering all workers separated on or after August 27, 1991.

TA-W-27,853 & TA-W-27,853A; Chevron Oil Field Research, LaHabra, CA & in The State of Texas

A certification was issued covering all workers separated on or after September 14, 1991.

TA-W-27,804; Anadrill (A Div of Schlumberger Technology Corp), Headquartered in Sugarland, TX and Operating at the Following Various Locations: A, Anchorage, AK; B, Bakersfield, CA; C, Houma, LA; D, Lafayette, LA; E, New Orleans, LA; F, Hobbs, NM; G, Williston, ND; H, Oklahoma City, OK; I, Alice, TX; J, Kilgore, TX; K, Houston, TX; L, Odessa, TX; M, Casper, WY

A certification was issued covering all workers separated on or after August 28, 1991.

I hereby certify that the aforementioned determinations were issued during the month of November 1992. Copies of these determinations are available for inspection in room C-4318, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, DC 20210 during normal business hours or will be mailed to persons to write to the above address.

Dated: December 8, 1992.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

[FR Doc. 92-30367 Filed 12-14-92; 8:45 am]

BILLING CODE 4510-30-M

Job Training Partnership Act; Indian and Native American Grantees

AGENCY: Employment and Training Administration, Labor.

ACTION: Notice of availability of funds and of Solicitation for Grant Applications (SGA).

SUMMARY: The Employment and Training Administration, U.S. Department of Labor, announces the intent to award a grant on a competitive basis to develop an effective approach to communicating directly with Indian and Native American grantees on a timely and meaningful basis; and, to research and identify the best employment practices found among these grantees. The Indian and Native American Program is funded under the Job Training Partnership Act (JTPA), title IV, part A, section 401. The purpose of the Program is to provide comprehensive employment and training services for the Indian and Native American population;

Only Indian and Native American-owned or controlled organizations are eligible for this award. Indian or Native American-owned or controlled organizations are those where ownership or members of the governing body is at least 51% Indian or Native American.

DATES: The applications will be available December 30, 1992. The requests must be made in writing to the address below. Requests via telephone and/or telefacsimile (FAX) will not be honored. The request must cite SGA/DAA 92-014 and must include two (2) self-addressed labels. Requests will be

honored on a first come, first served basis until the supply of 300 solicitation packages is exhausted. The closing date for receipt of proposals will be February 16, 1993, 2 p.m. Eastern time. Any application not received at the designated place, date, and time of delivery specified will not be considered.

ADDRESSES: Mail your request to obtain a copy of the Solicitation's for Grant Application (SGA) to: U.S. Department of Labor, Employment and Training Administration, Office of Grants and Contract Management, Division of Acquisition and Assistance, 200 Constitution Avenue, NW., room C–4305, Washington, DC 20210, Attention: Brenda Banks, Reference SGA/DAA 92–014. In order to receive a copy of the application package, your request must include a certification that your organization is an "Indian" or "Native-American owned or controlled." Requests which fail to submit a Certification Statement will not be honored.

FOR FURTHER INFORMATION CONTACT: Brenda Banks, Telephone: (202) 219–8702 (This is not a toll free number).

SUPPLEMENTARY INFORMATION: The Employment and Training Administration, U.S. Department of Labor, will award one (1) grant at approximately $150,000. The period of performance will one (1) year from date of execution by the Government.

Signed at Washington, DC, on December 7, 1992.

Robert D. Parker,

ETA Grant Officer.

[FR Doc. 92–30323 Filed 12–14–92; 8:45 am]

BILLING CODE 4510–30–M

Mine Safety and Health Administration

Petitions for Modification

The following parties have filed petitions to modify the application of mandatory safety standards under section 101(c) of the Federal Mine Safety and Health Act of 1977.

1. Costain Coal, Inc.

[Docket No. M–92–158–C]

Costain Coal, Inc., P.O. Box 289, Sturgis, Kentucky 42459 has filed a petition to modify the application of 30 CFR 75.380(f)(2) (escapeways: bituminous and lignite mines) to its Wheatcroft Mine (I.D. No. 15–13920) and its Baker Mine (I.D. No. 15–14492) both located in Webster County, Kentucky. The petitioner proposes to maintain a fire extinguisher on board the golf cart as an alternate to using the automatic fire suppression system, and would not permit the golf cart to be left unattended in the primary escapeway. The petitioner asserts that the proposed alternate method would provide at least the same measure of protection as would the mandatory standard.

2. Shadow Coal Co.

[Docket No. M–92–159–C]

Shadow Coal Company, HC66, Box 494, Artemus, Kentucky 40903 has filed a petition to modify the application of 30 CFR 75.313 (methane monitors) to its No. 1 Mine (I.D. No. 15–16052) located in Knox County, Kentucky. The petitioner proposes to use a hand-held continuous-duty methane and oxygen monitor on permissible three-wheel tractors with drag bottom buckets.

3. Costain Coal, Inc.

[Docket No. M–92–160–C]

Costain Coal, Inc., P.O. Box 289, Sturgis, Kentucky 42459 has filed a petition to modify the application of 30 CFR 75.507 (power connection points) to its No. 11 High Wall Mine (I.D. No. 15–13920) located in Webster County, Kentucky. The petitioner proposes to use a nonpermissible submersible pump in a borehole in a sealed area of the 11 high wall Second Main East approximately 11 crosscuts from the William Station elevator landing. The petitioner asserts that the proposed alternate method would provide at least the same measure of protection as would the mandatory standard.

4. Drummond Company, Inc.

[Docket No. M–92–161–C]

Drummond Company, Inc., P.O. Box 10246, Birmingham, Alabama 35203 has filed a petition to modify the application of 30 CFR 75.1002 (location of trolley wires, trolley feeder wires, high-voltage cables and transformers) to its Shoal Creek Mine (I.D. No. 01–02901) located in Jefferson County, Alabama. The petitioner proposes to use high-voltage cables to power longwall equipment. The petitioner asserts that the proposed alternate method would provide at least the same measure of protection as would the mandatory standard.

5. Consolidation Coal Co.

[Docket No. M–92–162–C]

Consolidation Coal Company, 1800 Washington Road, Pittsburgh, Pennsylvania 15241 has filed a petition to modify the application of 30 CFR 75.304 (weekly examinations for hazardous conditions) to its Arkwright No. 1 Mine (I.D. No. 46–01452) located in Monongalia County, West Virginia. Due to deteriorating roof conditions, certain areas of the mine cannot be safely traveled. The petitioner proposes to establish evaluation points to monitor the quantity and quality of air entering and leaving the affected area. The petitioner asserts that the proposed alternate method would provide at least the same measure of protection as would the mandatory standard.

6. Costain Coal, Inc.

[Docket No. M–92–163–C]

Costain Coal, Inc., P.O. Box 289, Sturgis, Kentucky 42459 has filed a petition to modify the application of 30 CFR 75.360 (preshift examinations) to its Pyro No. 9 Wheatcroft Mine (I.D. No. 15–13920) located in Webster County, Kentucky. Due to hazardous conditions, the petitioner proposes to establish a continuous monitoring station to monitor the air passing through the Main North Parallel beginning at the Wheatcroft intake air shaft and ending at the First Submain East. The petitioner asserts that the proposed alternate method would provide at least the same measure of protection as would the mandatory standard.

7. Costain Coal, Inc.

[Docket No. M–92–164–C]

Costain Coal, Inc., P.O. Box 289, Sturgis, Kentucky 42459 has filed a petition to modify the application of 30 CFR 75.360 (preshift examinations) to its Pyro No. 9 Wheatcroft Mine (I.D. No. 15–13920) located in Webster County, Kentucky. Due to hazardous conditions, the petitioner proposes to establish a continuous monitoring station to monitor the air passing through the intersection of the First Submain North and the Fourth Submain East. The petitioner asserts that the proposed alternate method would provide at least the same measure of protection as would the mandatory standard.

8. Costain Coal, Inc.

[Docket No. M–92–165–C]

Costain Coal, Inc., P.O. Box 289, Sturgis, Kentucky 42459 has filed a petition to modify the application of 30 CFR 75.364 (weekly examination) to its Pyro No. 9 Wheatcroft Mine (I.D. No. 15–13920) located in Webster County, Kentucky. Due to hazardous conditions, the petitioner proposes to establish a continuous monitoring station to monitor the air passing through the First North Parallel. The petitioner asserts that the proposed alternate method would provide at least the same measure of protection as would the mandatory standard.

9. Costain Coal, Inc.

[Docket No. M–92–166–C]

Costain Coal, Inc., P.O. Box 289, Sturgis, Kentucky 42459 has filed a petition to modify the application of 30 CFR 75.360 (preshift examinations) to its Pyro No. 9 Wheatcroft Mine (I.D. No. 15–13920) located in Webster County, Kentucky. Due to hazardous conditions, the petitioner proposes to establish a continuous monitoring station to monitor the air passing through the William Station intake air shaft, the 3rd East, the 8th Main North intake, and the 9th Maine North entries. The petitioner asserts that the proposed alternate method would provide a least the same measure of protection as would the mandatory standard.

10. Costain Coal, Inc.

[Docket No. M–92–167–C]

Costain Coal, Inc., P.O. Box 289, Sturgis, Kentucky 42459 has filed a petition to modify the application of 30 CFR 75.364 (weekly examination) of its Baker Mine (I.D. No. 15–14492) located in Webster County, Kentucky. Due to hazardous conditions, the petitioner proposes to establish a continuous monitoring station to monitor the air passing through the No. 11 Seam Main North Parallel. The petitioner asserts that the proposed alternate method would provide at least the same measure of protection as would the mandatory standard.

11. Costain Coal, Inc.

[Docket No. M–92–168–C]

Costain Coal, Inc., P.O. Box 289, Sturgis, Kentucky 42459 has filed a petition to modify the application of 30 CFR 75.364 (weekly examination) to its Baker Mine (I.D. No. 15–14492) located in Webster County, Kentucky. Due to hazardous conditions, the petitioner proposes to establish a continuous monitoring station to monitor the air passing through the No. 13 Seam Main North Parellel. The petitioner asserts that the proposed alternate method would provide at least the same measure of protection as would the mandatory standard.

12. Helvetia Coal Co.

[Docket No. M–92–169–C]

Helvetia Coal Company, Box 179, Indiana, Pennsylvania 15701 has filed a petition to modify the application of 30 CFR 75.1405 (automatic couplers) to its Lucerne No. 6 Extension Mine (I.D. No. 36–07691) located in Indiana County, Pennsylvania. The petitioner proposes to use a metal detached bar on each motor and mantrip to uncouple haulage equipment as an alternative to using the machine mounted uncoupling device. The petitioner asserts that the proposed alternative method would provide at least the same measure of protection as would the mandatory standard.

13. Mate Creek Development, Inc.

[Docket No. M–92–170–C]

Mate Creek Development, Inc., P.O. Box 138, Sidney, Kentucky 41564 has filed a petition to modify the application of 30 CFR 75.305 (weekly examinations for hazardous conditions) to its Mine No. 2 (I.D. No. 15–10753) located in Pike County, Kentucky. The petitioner requests that granted petition for modification for New Era Coal Company, docket number M–88–247–C (now Mate Creek Development, Inc.) be amended to establish evaluation points to monitor air in the affected area of the mine with return air instead of intake air. The petitioner asserts that the proposed alternate method would provide at least same measure of protection as would the mandatory standard.

14. Minton Hickory Coal Co.

[Docket No. M–92–171–C]

Minton Hickory Coal Company, P.O. Box 922, Barbourville, Kentucky 40906 has filed a petition to modify the application of 30 CFR 75.313 (methane monitors) to its Mine No. 6 (I.D. No. 15–17317) located in Knox County, Kentucky. The petitioner proposes to use a hand-held deck-mounted continuous methane and oxygen monitor on permissible three-wheel tractors with drag bottom buckets.

15. Carey Salt Co.

[Docket No. M–92–20–M]

Carey Salt Company, P.O. Box 10, Lydia, Louisiana 70569 has filed a petition to modify the application of 30 CFR 57.22301 (atmospheric monitoring systems) to its Cote Blanche Salt Mine (I.D. No. 16–00358) located in St. Mary County, Louisiana. The petitioner proposes to conduct limited mining operations while the atmospheric monitoring system is being repaired using specific restrictions. The petitioner asserts that the proposed alternate method would provide at least the same measure of protection as would the mandatory standard.

Request for Comments

Persons interested in these petitions may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before January 14, 1993. Copies of these petitions are available for inspection t that address.

Dated: December 4, 1992.

Patricia W. Silvey,

Director, Office of Standards, Regulations and Variances.

NATIONAL FOUNDATION OF THE ARTS AND HUMANITIES

Agency Information Collection Under OMB Review

AGENCY: National Endowment for the Humanities.

ACTION: Notice.

SUMMARY: The National Endowment for the Humanities (NEH) has sent to the Office of Management and Budget (OMB) the following proposals for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

DATES: Comments on this information collection must be submitted on or before January 14, 1993.

ADDRESSES: Send comments to Ms. Susan Daisey, Assistant Director, Grants Office, National Endowment for the Humanities, 1100 Pennsylvania Avenue, NW., room 310, Washington, DC 20506 (202–606–8494) and Mr. Steve Semenuk, Office of Management and Budget, New Executive Office Building, 726 Jackson Place, NW., room 3002, Washington, DC 20503 (202–395–6880).

FOR FURTHER INFORMATION CONTACT: Ms. Susan Daisey, Assistant Director, Grants Office, National Endowment for the Humanities, 1100 Pennsylvania Avenue, NW., room 310, Washington, DC 20506 (202) 606–8494 from whom copies of forms and supporting documents are available.

SUPPLEMENTARY INFORMATION: All of the entries are grouped into new forms, revisions, extensions, or reinstatements. Each entry is issued by NEH and contains the following information: (1) The title of the form; (2) the agency form number, if applicable; (3) how often the form must be filled out; (4) who will be required or asked to report; (5) what the form will be used for; (6) an estimate of the number of responses; (7) the frequency of response; (8) an estimate of the total number of hours needed to fill out the form; (9) an estimate of the total annual reporting and recordkeeping burden. None of these entries are subject to 44 U.S.C. 3504(h).

Category: Revision

Title: NEH Study Grants for College and University Teachers.

Form Number: NA.

Frequency of Collection: Annual.

Respondents: University and college faculty.

Use: The application instructions provide direction for preparing narrative and budgetary parts of applications for grant funds.

Estimated Number of Respondents: 1,816.

Frequency of Response: Once.

Estimated Hours for Respondents to Provide Information: 3.51 per respondent.

Estimated Total Annual Reporting and Recordkeeping Burden: 6,411.16 hours.

Thomas S. Kingston,

Assistant Chairman for Operations.

NATIONAL ARCHIVES AND RECORDS ADMINISTRATION

John F. Kennedy Assassination Records

AGENCY: National Archives and Records Administration (NARA).

ACTION: Notice to Federal agencies.

SUMMARY: In accordance with the President John F. Kennedy Assassination Records Collection Act (Pub. L. 102-526, 106 Stat. 3443) and after consultation with Government offices, NARA has created an identification aid system and established an electronic database in which to store information on each assassination record subject to review under the act.

Agencies having any records relating to the assassination of John F. Kennedy are reminded to provide agency contact point information to NARA as explained in the **Federal Register** notice dated November 23, 1992.

FOR FURTHER INFORMATION CONTACT: Mary Ronan, Access Staff, National Archives and Records Administration, 202-501-5380.

Dated: December 10, 1992.

Don W. Wilson,

Archivist of the United States.

BILLING CODE 7515-01-M

NUCLEAR REGULATORY COMMISSION

Draft Regulatory Guide; Issuance, Availability

The Nuclear Regulatory Commission has issued for public comment a draft of a proposed revision to a guide in its Regulatory Guide Series. This series has been developed to describe and make available to the public such information as methods acceptable to the NRC staff for implementing specific parts of the Commission's regulations, techniques used by the staff in evaluating specific problems or postulated accidents, and data needed by the staff in its review of applications for permits and licenses.

Draft Regulatory Guide DG-1010, "Quality Assurance Program Requirements," is the proposed Revision 4 to Regulatory Guide 1.28. This guide is being developed to describe methods acceptable to the NRC staff for establishing and implementing the required quality assurance program for the design, construction, modification, and decommissioning of nuclear power plants.

This proposed draft regulatory guide would integrate current guidance for complying with appendix B, "Quality Assurance Criteria for Nuclear Power Plants and Fuel Reprocessing Plants," to 10 CFR part 50, "Domestic Licensing of Production and Utilization Facilities." In appendix B, section II, "Quality Assurance Program," states, "The quality assurance program shall provide control over activities to an extent consistent with their importance to safety." In an effort to recognize current interest in applying risk-based techniques to the regulatory framework, the NRC staff is soliciting comments on how risk-based techniques can be applied to the quality assurance program in a way that maintains safety and allows a gradation in the application of quality assurance consistent with the importance to safety of the structures, systems, and components.

The NRC staff is particularly interested in receiving comments on the impact of basing the annual evaluations on activities performed during the previous 12 months, including some type of direct observation of the operation of the suppliers' quality assurance programs (see Regulatory Position 3.2.2 of the guide).

The staff is also soliciting comments on whether this regulatory guide should be expanded to cover quality assurance programs in nuclear facilities other than power reactors and fuel reprocessing plants. Because of the general applicability of quality assurance programs, there may be an advantage in using a single regulatory guide to provide uniform guidance on quality assurance programs for a broad range of activities, thereby leading to simplication of quality assurance activities.

Commenters may submit comments in an electronic format in addition to the paper copy. Comments in an electronic format should be IMB PC DOS compatible 3.5- or 5.25-inch double-sided, double-density diskettes. Data files should be provided in WordPerfect 5.1, ASCII code, or IBM revisable-form text document content architecture.

The draft guide is being issued to involve the public in the early stages of the development of a regulatory position in this area. It has not received complete staff review and does not represent an official NRC staff position.

Public comments are being solicited on the guide. Comments should be accompanied by supporting data. Written comments may be submitted to the Regulatory Publications Branch, Division of Freedom of Information and Publications Services, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555. Copies of comments received may be examined at the NRC Public Document Room, 2120 L Street NW., Washington, DC. Comments will be most helpful if received by February 8, 1993.

Although a time limit is given for comments on these drafts, comments and suggestions in connection with (1) items for inclusion in guides currently being developed or (2) improvements in all published guides are encouraged at any time.

Regulatory guides are available for inspection at the Commission's Public Document Room, 2120 L Street NW., Washington, DC. Requests for single copies of draft guides (which may be reproduced) or for placement on an automatic distribution list for single copies of future draft guides in specific divisions should be made in writing to the U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Distribution and Mail Services Section. Telephone requests cannot be accommodated. Regulatory guides are not copyrighted, and Commission approval is not required to reproduce them.

(5 U.S.C. 552(a))

Dated at Rockville, Maryland this 24th day of November 1992.

For the Nuclear Regulatory Commission.

Brian W. Sheron,

Director, Division of Systems Research, Office of Nuclear Regulatory Research.

[FR Doc. 92-30417 Filed 12-14-92; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50-388]

Pennsylvania Power and Light Co.; Allegheny Electric Cooperative, Inc.; Consideration of Issuance of Amendment to Facility Operating License, Proposed No Significant Hazards Consideration Determination, and Opportunity for Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. NPF-22 issued to Pennsylvania Power and Light Company and Allegheny Electric Cooperative, Inc. (the licensees) for operation of the Susquehanna Steam Electric Station (SSES), Unit 2, located in Salem Township, Pennsylvania.

The amendment would revise the Technical Specifications (TSs) to authorize operation of the Reactor Water Cleanup (RWCU) system in the current fuel cycle (Cycle 6) with the RWCU system non-regenerative heat exchanger discharge high temperature channel substituting for the inoperable 'B' RWCU High Flow isolation trip channel.

Before issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

The Commission has made a proposed determination that the amendment request involves no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

No Significant Hazards Consideration

1. This request does not involve a significant increase in the probability or consequences of an accident previously evaluated. The RWCU piping is carbon steel and is therefore resistant to IGSCC. For one operating cycle, the probability of a RWCU line break coincident with a failure to isolate the RWCU containment penetration in the section of piping which depends on it for diversity has been determined to be very low (1.1 E-6). For the balance of the RWCU piping, operation without the inoperable RWCU high flow trip channel does not increase the probability of containment isolation malfunction as analyzed in the Susquehanna IPE [Individual Plant Examination]. With regard to consequences, other redundant and diverse means of break detection are available, and have been determined to be adequate to cover the range of potential break scenarios evaluated in the FSAR [Final Safety Analysis Report]. For the section of RWCU piping that is dependent on high flow for diversity, the combined protection of the OPERABLE 'A' channel, the compensatory actions, and the Level 2 isolation will ensure that the consequences are bounded by previous FSAR evaluations. A specific evaluation concluded that radiological consequences for RWCU pipe breaks outside of containment are within the bounds of the FSAR analysis for Main Steamline Breaks outside of containment.

2. This request does not create the possibility of a new or different kind of accident from any previously evaluated. Inoperability of an isolation channel can only affect the probability or consequences of analyzed events (a leak/break with subsequent failure to isolate). It cannot create a new event.

3. The proposed change does not involve a significant reduction in a margin of safety. For the reasons described in 1 above, the 'B' high flow trip channel can be inoperable for one cycle of operation. Adequate diversity to operate the Susquehanna units has been determined to exist in the remaining OPERABLE trip channels and those channels have been determined to cover the complete range of analyzed break scenarios required. The exception is the section of piping which depends on the High Flow function for diversity. The probability of a line break of this piping coincident with a failure to isolate has been found to be sufficiently low for one cycle. Given this low probability and the one for one replacement of the inoperable high flow channel with the non-regenerative heat exchanger discharge high temperature channel which effectively provides the same leak detection capabilities, an acceptable level of RWCU isolation reliability continues to exist, and a significant reduction in safety margin will not occur.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

The Commission is seeking public comments on this proposed determination. Any comments received within thirty (30) days after the date of publication of this notice will be considered in making any final determination. The Commission will not normally make a final determination unless it receives a request for a hearing

Written comments may be submitted by mail to the Rules and Directives Review Branch, Division of Freedom of Information and Publications Services, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and should cite the publication date and page number of this **Federal Register** notice. Written comments may also be delivered to room P-223, Phillips Building, 7920 Norfolk Avenue, Bethesda, Maryland, from 7:30 a.m. to 4:15 p.m. Federal workdays. Copies of written comments received may be examined at the NRC Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555. The filing of requests for hearing and petitions for leave to intervene is discussed below.

By January 14, 1993, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party is the proceeding must file a written request for a hearing and a petition for leave to intervene. Requests for a hearing and a petition for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR part 2. Interested persons should consult a current copy of 10 CFR 2.714 which is available at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555 and at the local public document room located at Osterhout Free Library, Reference Department, 71 South Franklin Street, Wilkes-Barre, Pennsylvania 18701. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board, will rule on the request and/or petition; and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made party to the proceeding; (2) the

nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later that fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter. Each contention must consist of a specific statement of the issue of law or fact to be raised or controverted. In addition, the petitioner shall provide a brief explanation of the bases of the contention and a concise statement of the alleged facts or expert opinion which support the contention and on which the petitioner intends to rely in proving the contention at the hearing. The petitioner must also provide references to those specific sources and documents of which the petitioner is aware and on which the petitioner intends to rely to establish those facts or expert opinion. Petitioner must provide sufficient information to show that a genuine dispute exists with the applicant on a material issue of law or fact. Contentions shall be limited to matters within the scope of the amendment under consideration. The contention must be one which, if proven, would entitle the petitioner to relief. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If a hearing is requested, the Commission will make a final determination on the issue of no significant hazards consideration. The final determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it immediately effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

If the final determination is that the amendment request involves a significant hazards consideration, any hearing held would take place before the issuance of any amendment.

Normally, the Commission will not issue the amendment until the expiration of the 30-day notice period. However, should circumstances change during the notice period such that failure to act in a timely way would result, for example, in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 30-day notice period, provided that its final determination is that the amendment involves no significant hazards consideration. The final determination will consider all public and State comments received. Should the Commission take this action, it will publish in the **Federal Register** a notice of issuance and provide for opportunity for a hearing after issuance. The Commission expects that the need to take this action will occur very infrequently.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Services Branch, or may be delivered to the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at 1–(800) 325–6000 (in Missouri 1-(800) 342–6700). The Western Union operator should be given Datagram Identification Number N1023 and the following message addressed to Charles L. Miller, Director, Project Directorate I–2, Division of Reactor Projects—I/II: petitioner's name and telephone number, date petition was mailed, plant name, and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to Shaw, Pittman, Potts and Trowbridge, 2300 N Street NW., Washington, DC 20037, attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board that the petition and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)–(v) and 2.714(d).

For further details with respect to this action, see the application for amendment dated November 30, 1992, which is available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555 and at the local public document room located at Osterhout Free Library, Reference Department, 71 South Franklin Street, Wilkes-Barre, Pennsylvania 18701.

Dated at Rockville, Maryland, this 9th day of December 1992.

For the Nuclear Regulatory Commission.

Charles L. Miller,

Director, Project Directorate I–2, Division of Reactor Projects—I/II, Office of Nuclear Reactor Regulation.

SECURITIES AND EXCHANGE COMMISSION

Self-Regulatory Organizations; Applications for Unlisted Trading Privileges and of Opportunity for Hearing; Cincinnati Stock Exchange, Inc.

December 9, 1992.

The above name national securities exchange has filed applications with the Securities and Exchange Commission ("Commission") pursuant to section 12(f)(1)(B) of the Securities Exchange Act of 1934 and Rule 12f–1 thereunder for unlisted trading privileges in the following securities:

McDermott, Inc.
  $2.20 Cum. Conv. Pfd., Ser. A, $1.00 Par Value (File No. 7–9768)
MCN Corp. (Holding Co.)
  Common Stock, $1.00 Par Value (File No. 7–9769)
Mellon Bank Corp.
  6.75% Cum. Conv. Ser. B Pfd., $1.00 Par Value (File No. 7–9770)
Mercury Finance Co.
  Common Stock, $1.00 Par Value (File No. 7–9771)
Metropolitan Edison Co.

3.90% Cum. Pfd. Ser. C, $100.00 Par Value (File No. 7–9772)
Metropolitan Edison Co.
8.12% Cum. Pfd. Ser. F, $100.00 Par Value (File No. 7–9773)
Metropolitan Edison Co.
7.68% Cum. Pfd. Ser. G, $100.00 Par Value (File No. 7–9774)
Metropolitan Edison Co.
8.32% Cum. Pfd. Ser. H, $100.00 Par Value (File No. 7–9775)
Metropolitan Edison Co.
8.12% Cum. Pfd. Ser. I, $100.00 Par Value (File No. 7–9776)
Metropolitan Edison Co.
8.32% Cum. Pfd. Ser. J, $100.00 Par Value (File No. 7–9777)
Metropolitan Edison Co.
$2.00 Cum. Conv. Pfd. A, $.01 Par Value (File No. 7–9778)
MFS Multimarket Total Return Trust
Common Stock, No Par Value (File No. 7–9779)
MGM Grand, Inc.
Common Stock, $.01 Par Value (File No. 7–9780)
Mickelberry Corp.
Common Stock, $1.00 Par Value (File No. 7–9781)
Morgan (J.P.) & Co., Inc.
Adj. Rte. Cum. Pfd., Ser. A (File No. 7–9782)
Munienhanced Fund, Inc.
Common Stock, $.10 Par Value (File No. 7–9783)
Myers, (L.E.) Co. Group
Common Stock, $1.00 Par Value (File No. 7–9784)
Navistar International Corp.
Conv. Jr. Pfd., Ser. D, No Par Value (File No. 7–9785)
Navistar International Corp.
$6.00 Cum. Conv. Pfd., Ser. G, $1.00 Par Value (File No. 7–9786)
NBB Bancorp, Inc. (Holding Co.)
Common Stock, $.10 Par Value (File No. 7–9787)

These securities are listed and registered on one or more other national securities exchange and are reported in the consolidated transaction reporting system.

Interested persons are invited to submit on or before December 31, 1992, written data, views and arguments concerning the above-referenced applications. Persons desiring to make written comments should file three copies thereof with the Secretary of the Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Following this opportunity for hearing, the Commission will approve the application if it finds, based upon all the information available to it, that the extensions of unlisted trading privileges pursuant to such applications are consistent with the maintenance of fair and orderly markets and the protection of investors.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010–01–M

Self-Regulatory Organizations; Applications for Unlisted Trading Privileges and of Opportunity for Hearing; Midwest Stock Exchange, Inc.

December 9, 1992.

The above named national securities exchange has filed applications with the Securities and Exchange Commission ("Commission") pursuant to section 12(f)(1)(B) of the Securities Exchange Act of 1934 and Rule 12f–1 thereunder for unlisted trading privileges in the following securities:

Insteel Industries, Inc.
Common Stock, No Par Value (File No. 7–9788)
Healthsource, Inc.
Common Stock, $.10 Par Value (File No. 7–9789)
Caremark International, Inc.
Common Stock, $.01 Par Value (File No. 7–9790)

These securities are listed and registered on one or more other national securities exchange and are reported in the consolidated transaction reporting system.

Interested persons are invited to submit on or before December 31, 1992, written data, views and arguments concerning the above-referenced application. Persons desiring to make written comments should file three copies thereof with the Secretary of the Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Following this opportunity for hearing, the Commission will approve the application if it finds, based upon all the information available to it, that the extensions of unlisted trading privileges pursuant to such application is consistent with the maintenance of fair and orderly markets and the protection of investors.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

[Release No. 34–31572; File No. SR–OCC–92–34]

Self-Regulatory Organizations; The Options Clearing Corporation; Notice of Filing of a Proposed Rule Change Relating to the Stock Loan Hedge Program

December 7, 1992.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 "Act"),[1] notice is hereby given that on October 23, 1992, The Options Clearing Corporation ("OCC" or "Commission") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared primarily by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule change would permit OCC to operate a centralized facility for administering stock loan and borrow transactions between OCC clearing members and to allow certain of the stock loan and borrow positions resulting from such transactions to serve as hedges against stock option positions overlying the same stocks.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, OCC included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. OCC has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose of the Proposed Rule Change

(a) *General.* In general, the purpose of the proposed rule change is to amend OCC's By-Laws and Rules to permit OCC to operate a centralized facility for administering stock loan and borrow transactions between OCC clearing members and to allow hedges of certain of the stock loan and borrow positions

[1] 15 U.S.C. 78s(b)(1) (1988).

resulting from such transactions against stock option positions overlying the same stocks. OCC's program for performing these services is referred to as the "Stock Loan/Hedge Program." Clearing members that are approved to participate in the program are referred to as "hedge clearing members." A clearing member that lends stock through the Stock Loan/Hedge Program is referred to as a "lending clearing member," and a clearing member that borrows stock is referred to as a "borrowing clearing member." Stocks that are eligible for the program are referred to as "eligible stocks." Only stocks that underlie stock option contracts issued by OCC will be eligible for the Stock Loan/Hedge Program.[2]

(b) *Initiation of a Stock Loan.* A hedge clearing member that has shares of a stock available to lend will identify another hedge clearing member that wishes to borrow the stock. (OCC will have no role in matching would-be lending and borrowing clearing members, but it is conceivable if the Stock Loan/Hedge Program is successful that the program might at some time in the future be expanded to give OCC a role in this process.) The two clearing members will agree on the amount of stock to be borrowed, the fee to be paid by the borrowing clearing member to the lending clearing member (this fee will be paid separately, and OCC will have no responsibility for it), and the value of the collateral to be initially paid by the borrowing clearing member to OCC and by OCC to the lending clearing member. Regulation T of the Board of Governors of the Federal Reserve System specifies that the value of the collateral for a stock loan cannot be less than 100% of the market value of the stock at the close on the preceding day, and OCC's proposed rules reflect this requirement. Initially, OCC will require that collateral be all cash, but this requirement may be changed to allow other types of collateral permitted by Regulation T as OCC develops experience with the program.

After the two clearing members have agreed to the terms of the transaction, the lending clearing member, prior to a time established by OCC, will transfer the stock by book-entry[3] to OCC's account at a "correspondent depository."[4] Midwest Securities Trust Company ("MSTC") will act as the initial correspondent depository, but OCC is prepared to establish correspondent relationships with other depositories if circumstances warrant. The transfer will be made pursuant to instructions identifying the borrowing clearing member and specifying the collateral to be received by the lending clearing member. Upon receiving notice from the correspondent depository of its receipt of the stock, OCC will direct the depository to re-deliver the stock to the borrowing clearing member against payment of the required collateral amount.

Money settlement with respect to the initiation of stock loans will also take place through the correspondent depository's facilities. OCC's right to receive cash from the borrowing clearing member will net against its obligation to pay cash to the lending clearing member. If the borrowing clearing member fails to make money settlement with the correspondent depository for the day on which the stock transfers take place, the correspondent depository will reverse the transfers.[5] If the borrowing clearing member makes money settlement with the correspondent depository each transfer will constitute under the rules of the correspondent depository "an entry on the books" of the correspondent depository (*i.e.*, the transaction will become final).[6]

OCC's rules will define the term "stock loan" as a "matched pair of securities contracts for the loan of eligible stock made through the Stock Loan/Hedge Program, with one such securities contract being between the lending clearing member and the Corporation as borrower and the second such securities contract being between the Corporation as lender and the borrowing clearing member."[7] OCC's rules will provide that OCC will be deemed to have "accepted" a stock loan and to have become a party to the stock loan at the time that "a transfer of the eligible stock that is the subject of such stock loan from the Corporation to the borrowing clearing member constitutes a final entry on the books of the correspondent depository"[8] (*i.e.*, when the borrowing clearing member has completed money settlement with the correspondent depository). OCC's rules will further provide that commencing at the time that OCC is deemed to have accepted a stock loan "the role of the Corporation in respect of the stock loan shall be that of a principal, and the Corporation shall have the position of borrower to the lending clearing member and lender to the borrowing clearing member" and that thereafter the rights and obligations of the two clearing members shall be against OCC.[9]

The position of a lending clearing member in respect of a stock loan is referred to as a "stock loan position" and the position of a borrowing clearing member in respect of a stock loan is referred to as a "stock borrow position." OCC's proposed rules require that stock loan positions held for the account of a customer (*i.e.*, one other than a market-maker or specialist) be carried in the lending clearing member's customers' account, and permit stock loan positions held for the account of a market-maker or a specialist to be carried in the lending clearing member's customers' account.[10] OCC's proposed rules also require that stock loan positions held for the account of a non-customer be carried in a firm account.[11] Accordingly, clearing members participating in the Stock Loan/Hedge Program will comply with paragraph (a)(2) of Commission Rules 8c–1 and 15c2–1 because OCC's By-Laws and Rules will prohibit the commingling of securities carried for the account of customers with securities

---

[2] In order for a stock to qualify as an eligible stock, the stock must also be eligible for deposit at the "correspondent depository" (as defined in the text below), and OCC must not have made a determination, pursuant to proposed paragraph 2(c) of Article XXI of its By-Laws, to terminate all outstanding stock loans relating to the security.

[3] All transfers in the Stock Loan/Hedge Program will be by book-entry.

[4] A "correspondent depository" is a securities depository at which OCC has an account for processing Stock Loan/Hedge Program activity.

[5] See, *e.g.*, MSTC Article III, Rule 1, particularly Section 2 ("Right to Reverse Book-Entry Movements").

[6] See, *e.g.*, MSTC Article III, Rule 1, Section 2.

[7] Proposed paragraph 1(S)(9) of Article I of OCC's By-Laws. The term "securities contract" is used in the definition of "stock loan," among other reasons, to make clear that the contracts between OCC and a lending clearing member and between OCC and a borrowing clearing member are each a securities contract for purposes of the Bankruptcy Code. (Under section 741(7) of the Bankruptcy Code, 11 U.S.C. 741(7), a securities contract means a contract for the loan of a security.) OCC's ability to make the Stock Loan/Hedge Program available in the manner described in the proposed rule change is contingent upon the applicability to stock loans of the special provisions of the Bankruptcy Code that protect the closeout activities of securities clearing agencies from attack by the trustee for a bankrupt clearing member. The proposed definition of the term stock loan is intended to make clear that the Stock Loan/Hedge Program is within the purview of these special provisions.

[8] Proposed paragraph 2(b) of Article XXI of OCC's By-Laws.

[9] Proposed paragraph 2(a) of Article XXI of OCC's By-Laws.

[10] Proposed paragraph 5(c) of Article XXI of OCC's By-Laws. OCC's definition of the term "customer" is set out at paragraph 1(C)(16) of Article I of its By-Laws. The definition parallels the definition of the term in Commission Rules 8c–1 and 15c2–1 (17 CFR 240.8c–1 and 17 CFR 240.15c2–1, respectively).

[11] Proposed paragraph 5(e) of Article XXI of OCC's By-Laws. OCC's definition of the term "non-customer" is set out in paragraph 1(N)(1) of Article I of its By-Laws. The definition includes the clearing member itself and all other persons that are excluded from the definition of "customer" in Commission Rules 8c–1 and 15c2–1.

carried for the account of non-customers.

OCC's proposed rules require each lending clearing member to instruct OCC as to the account in which the stock loan position resulting from a stock loan is to be maintained and require each borrowing clearing member to instruct OCC as to the account in which the stock borrow position resulting from a stock loan is to be carried.[12] OCC's proposed rules permit any lending clearing member or borrowing clearing member to submit "standing instructions" to the effect that all of the clearing member's stock loan positions or stock borrow positions, as applicable, are to be carried in a specified account except as the clearing member may otherwise specify with respect to particular stock loan positions or stock borrow positions, as applicable.[13] Proposed paragraph 5(b) of Article XXI of OCC's By-Laws states that an instruction, including a standing instruction, from a lending clearing member to OCC identifying a customers' account or a market-maker's or specialist's account as the account in which a stock loan position is to be carried shall constitute a written notice pursuant to paragraph (f) of Commission Rules 8c–1 and 15c2–1 that the loaned stock to which the stock loan position relates is carried for the account of a customer and that the hypothecation of such loaned stock to OCC does not contravene any provision of either such Rule. This provision is intended to put clearing members on notice with respect to the notice and certification requirements of paragraph (f) of Commission Rules 8c–1 and 15c2–1 as these requirements apply to the Stock Loan/Hedge Program and to permit clearing members to satisfy these requirements in an efficient manner.[14]

The language of OCC's market-maker's (specialist's) account agreement currently does not accommodate stock loans. Accordingly, OCC's proposed rules specify that stock loan and borrow positions may not be maintained in a master-maker's or specialist's account unless the market-maker or specialist has entered into a market-maker's (specialist's) account agreement that authorizes stock loan and borrow positions to be maintained in the account, or in the case of a combined market-makers' or specialists' account unless each market-maker or specialist that is a participant in the account has entered into a market-maker's (specialist's) account agreements that authorizes stock loan and borrow positions to be maintained in the account.[15] OCC is planning to submit revised versions of the various forms of market-maker's (specialist's) account agreement to the Commission in a separate proposed rule change in the near future. In addition to authorizing stock loan and borrow positions to be maintained in market-maker's or specialist's accounts, the revised versions will contain a variety of other updating changes.

(c) *Margin treatment.* Stock loan positions and stock borrow positions will both be subject to two types of margin. First, lending clearing members and borrowing clearing members will be required to pay or entitled to receive daily mark-to-market payments. These payments will cause the collateral value held by the lending clearing members to be adjusted daily so that the collateral value is always equal to the closing market price for the loaned stock on the preceding trading day.[16]

Second, lending clearing members and borrowing clearing members will both be required to deposit margin with OCC to cover OCC's risk that the market will move against a stock loan position or a stock borrow position during a day and that the clearing member carrying the position will fail before making the required mark-to-market payment on the next business day. The margin required to be deposited with OCC in respect to stock loan positions and stock borrow positions in analogous to additional margin on short stock option positions, and it is referred to in OCC's proposed rules and hereinafter as "additional margin."

OCC will compute additional margin in respect of stock loan and borrow positions as follows.[17] Stock loan and borrow positions will be treated as being in the same "class group" as stock options overlying the same eligible stock. Stock loan and borrow positions in each account relating to an eligible stock will be summed to produce a net loan or net borrow position for the account. Additional margin will be determined on a combined basis on the net stock loan or borrow position and any stock options in the same class group in the account. Additional margin will be determined on the remaining stock loan and borrow positions in the account on a "gross" basis by (1) multiplying the applicable margin interval times the number of shares in the remaining gross stock loan position times the prior trading day's closing price ("marketing price"), (2) multiplying the applicable margin interval times the number of shares in the remaining gross stock loan position times the prior trading day's closing price ("marking price"), (2) multiplying the applicable margin interval times the number of shares in the remaining gross stock borrow position times the marketing price, and (3) summing the two resulting margin requirements together. The additional margin requirement on the gross stock loan and borrow positions will then be added to the combined additional margin requirement for the stock option positions and the net stock loan or borrow position to determine the total additional margin requirement for the class group.[18]

If a hedge clearing member is carrying no long or short options positions in a class group in an account in which the clearing member is carrying any stock loan position or stock borrow position, OCC's margin system will assign a "margin interval"[19] for five percent to the stock underlying the stock loan and borrow position in the account. If the clearing member is carrying any long or short options in the same class group in its account, OCC's margin system will assign the same margin interval to the stock underlying the stock loan and borrow positions in the account that OCC uses in respect of that stock as the underlying security for options positions.[20]

OCC will first collect additional margin with respect to a stock loan from the lending clearing member and the borrowing clearing member on the morning of the first business day after the stock loan is initiated. This means

---

[12] Proposed OCC Rule 2201(d).

[13] Proposed paragraph 5(f) of Article XXI of OCC's By-Laws. Paragraph 5(f) expressly states that any stock loan position or stock borrow position that is carried in an account pursuant to a standing instruction shall nonetheless comply with all applicable provisions of OCC's By-Laws and Rules.

[14] Proposed paragraph 5(b) of Article XXI of OCC's By-Laws also requires each lending clearing member to represent, with respect to each stock loan position that is to be carried in a customers' account or a market-maker's or specialist's account, that the loaned stock to which the stock loan position relates is not a "fully paid security" or an "excess margin security" within the meaning of Commission Rule 15c3–3.

[15] Proposed Interpretation .01 to Section 5 of Article XXI of OCC's By-Laws.

[16] Mark-to-market payments are described in proposed OCC Rule 2203.

[17] Additional margin for stock loan and borrow positions is described in revised OCC Rule 601.

[18] Stock loan and borrow positions will also be taken into account in calculating the alternative "minimum additional margin requirement" described in OCC Rule 601(c)(1)(C)(6) in parallel to the way in which they will be taken into account in calculating the ordinary additional margin requirement.

[19] The margin interval is the maximum daily change in the marking price of the underlying security, upwards or downwards, assumed by OCC for purposes of calculating additional margin.

[20] Proposed Interpretation .06 to OCC Rule 601 sets out the treatment of the margin interval for stock loan and borrow positions.

that OCC will have no margin on deposit if a lending clearing member or a borrowing clearing member defaults after a stock loan becomes final but before margin is collected on the next business day. OCC has concluded that the other elements of its protection and back-up systems, particularly its surveillance systems and its recourse to the clearing fund deposits of clearing members, should be adequate to protect it against this risk.

(d) *Termination of stock loans.* A stock loan will be terminable by either the borrowing clearing member or the lending clearing member. The borrowing clearing member will be able to terminate a stock loan by delivering the loaned stock to OCC's account at a correspondent depository with instructions identifying the lending clearing member to which the stock is to be redelivered. Upon receiving notice of the delivery, OCC will instruct the correspondent depository to redeliver the loaned stock to the lending clearing member against payment by the lending clearing member of the then current value of the collateral, which will be equal to the preceding trading day's closing value for the stock. A lending clearing member will be required to give notice of termination to OCC five business days in advance of the day on which it wishes the termination to be settled, in order to give the borrowing clearing member time to obtain the stock that it will be required to deliver. OCC will notify the borrowing clearing member of the termination on the day that it receives the notice from the lending clearing member. Commencing at a time specified by OCC on the day appointed for settlement, the lending clearing member will have the right to buy in the loaned stock if the borrowing clearing member has failed to make delivery prior to that time. OCC will continue to require the parties to a stock loan to make and receive market-to-market payments and will continue to require additional margin with respect to both the stock loan position and the stock borrow position, until the stock loan is actually terminated.

(e) *Close-out of stock loans.* If OCC suspends a hedge clearing member, commencing at the time of the suspension OCC will not accept any new stock loan transactions to which the suspended clearing member is a party.[21] OCC also will assess the open stock loan and borrow positions of the suspended clearing member and close them out (by offset if appropriate) or keep them open (and establish additional hedges for them if appropriate) as appears to be appropriate in the circumstances.[22] In general, OCC's proposed rules relating to open stock loan and borrow positions of a suspended clearing member are designed to make the set of possible actions that are currently available to OCC in respect of open options positions also available to OCC in respect of stock loan and borrow positions.

With respect to stock loans that are in the process of being terminated at the time that the clearing member is suspended, OCC will direct the non-suspended clearing member to buy in or sell out the loaned stock for the account of OCC unless OCC concludes that the buy in or sell out may be deferred because arrangements adequate to protect OCC and the non-suspended clearing members have been made.[23]

(f) *Clearing fund provisions.* Article VII of OCC's By-Laws and OCC Rule 1001 will be amended to make clear that the stock clearing fund will be available to make good losses suffered by OCC as a result of the Stock Loan/Hedge Program and to make clear that for purposes of clearing fund deposit requirements of hedge clearing members, the "average daily aggregate margin requirement" is the aggregate margin for the stock option product group, which includes stock loan positions. OCC Rule 1001 also will be amended to specify that open stock loan obligations of clearing members will be taken into account in calculating their respective stock clearing funding obligations. This will be done essentially by determining the total number of shares of stock underlying each stock loan position and each stock borrow position and dividing each such number by the unit of trading applicable to options contracts overlying that same stock to arrive at "options contract equivalent" numbers that can be used for clearing fund calculation purposes.

(g) *OCC authority to terminate stock loans.* Proposed new paragraph 2(c) of article XXI of OCC's By-Laws gives OCC the authority to terminate the outstanding stock loans relating to one or more particular eligible stocks upon determination that circumstances warrant such action. OCC anticipates that this authority would rarely, if ever, be needed. However, OCC believes that it should have this authority, in part because stock loans, unlike options, will have an indefinite duration, and in the absence of this authority, OCC would be unable to be certain as to when the Stock Loan/Hedge Program could be terminated if OCC simply stopped accepting new stock loans.

2. Statutory Basis for the Proposed Rule Change

The proposed changes to OCC's By-Laws and Rules are consistent with the purposes and requirements of section 17A of the Act because, as compared to the current environment in which stock loan and borrow transactions are effected without a centralized facility acting as a principal, the proposed changes provide for the prompt and accurate clearance and settlement of stock loans with enhanced safeguarding of securities and funds related thereto, and for reduced exposure to counterparty default. The proposed changes accomplish this by applying procedures and protections to stock loans that have been developed by OCC in the clearance and settlement of options and that have been demonstrated to be efficient, effective, and safe in that context.

B. Self-Regulatory Organization's Statement on Competition

OCC does not believe that the proposed rule change would impose any burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were not and are not intended to be solicited by OCC with respect to the proposed rule change, and none have been received by OCC.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within thirty-five days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to ninety days of such date if it finds such longer period of be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange

[21] Proposed OCC Rule 2209(a).

[22] Proposed OCC Rules 22099(b), (c), and (d).

[23] Proposed OCC Rule 2210.

Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of OCC. All submissions should refer to File No. SR–OCC–92–34 and should be submitted by January 6, 1993.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010–01–M

Self-Regulatory Organizations; Applications for Unlisted Trading Privileges and of Opportunity for Hearing; Philadelphia Stock Exchange, Inc.

December 9, 1992.

The above named national securities exchange has filed applications with the Securities and Exchange Commission ("Commission") pursuant to section 12(f)(1)(B) of the Securities Exchange Act of 1934 and Rule 12f–1 thereunder for unlisted trading privileges in the following securities:

Western Gas Resources, Inc.
$2.28 Cum. Pfd. Stock, $.10 Par Value (File No. 7–9758)
Pratt Hotel Corporation
Common Stock, "When Issued", $.01 Par Value (File No. 7–9759)
Caremark International, Inc.
Common Stock, $.01 Par Value (File No. 7–9760)
SPI Holding, Inc.
Class B Common Stock, "When Issued", $.01 Par Value (File No. 7–9761)
Healthsource, Inc.
Common Stock, $.10 Par Value (File No. 7–9762)
Interdigital Communications Corporation
Common Stock, $.01 Par Value (file No. 7–9763)
Insteel Industries, Inc.
Common Stock, No Par Value (File No. 7–9764)
Capstead Mortgage Corporation
$.126 Cum. Conv. Pfd Stock Series B, $.10 Par Value (File No. 7–9765)
Taubman Centers, Inc.
Common Stock, $0.01 Par Value (File No. 7–9766)

These securities are listed and registered on one or more other national securities exchange and are reported in the consolidated transaction reporting system.

Interested persons are invited to submit on or before December 31, 1992, written data, views and arguments concerning the above-referenced application. Persons desiring to make written comments should file three copies thereof with the Secretary of the Securities and Exchange Commission, 450 5th Street, NW., Washington, DC 20549. Following this opportunity for hearing, the Commission will approve the application if it finds, based upon all the information available to it, that the extensions of unlisted trading privileges pursuant to such applications are consistent with the maintenance of fair and orderly markets and the protection of investors.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010–01–M

[Rel. No. IC–19149; 812–7933]

Crestfunds, Inc., et al.; Notice of Application

December 8, 1992.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of application for exemption under the Investment Company Act of 1940 (the "Act").

APPLICANTS: Crestfunds, Inc. (formerly Bayshore Funds, Inc.) (the "Fund"), Capitoline Investment Services Incorporated (the "Investment Adviser"), and Fidelity Distributors Corporation (the "Distributor").

RELEVANT ACT SECTIONS: Conditional order requested under section 6(c) of the Act for an exemption from sections 18(f), 18(g), and 18(i).

SUMMARY OF APPLICATION: Applicants seek a conditional order under section 6(c) that would permit the Fund to issue separate classes of shares representing interests in the same portfolio of securities.

FILING DATE: The application was filed on June 3, 1992, and amended on September 18, 1992 and November 23, 1992. By supplemental letter dated December 7, 1992, counsel, on behalf of applicants, agreed to file a further amendment during the notice period to make certain technical changes. This notice reflects the changes to be made to the application by such further amendment.

HEARING OR NOTIFICATION OF HEARING: An order granting the application will be issued unless the SEC orders a hearing. Interested persons may request a hearing by writing to the SEC's Secretary and serving applicants with a copy of the request, personally or by mail. Hearing requests should be received by the SEC by 5:30 p.m. on January 4, 1993, and should be accompanied by proof of service on the applicants, in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by writing to the SEC's Secretary.

ADDRESSES: Secretary, SEC, 450 Fifth Street, NW., Washington, DC 20549. The Fund and the Distributor, 82 Devonshire Street, Boston, Massachusetts 02109; the Investment Adviser, 1919 East Main Street, Richmond, Virginia 23219.

FOR FURTHER INFORMATION CONTACT: John V. O'Hanlon, Staff Attorney, at (202) 272–3922, or Elizabeth G. Osterman, Branch Chief, at (202) 272–3016 (Office of Investment Company Regulation, Division of Investment Management).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained for a fee at the SEC's Public Reference Branch.

Applicants' Representations

1. The Fund is an open-end management investment company registered under the Act. The fund currently consists of ten series of shares. The series represent interests in three separate money market portfolios—Cash Reserve Fund, U.S. Treasury Money Fund, and Tax Free Money Fund (collectively, the "Money Market Portfolios"). The Fund also consists of seven additional series of shares representing interests in four bond portfolios and three equity portfolios (the Money Market Portfolios, bond portfolios, and equity portfolios are referred to herein collectively as the "Portfolios").

2. The Investment Adviser is a wholly owned subsidiary of Crestar Bank, which is a subsidiary of Crestar Financial Corporation. The Fund compensates the Investment Adviser

pursuant to an investment advisory agreement. Crestar Bank acts as the Fund's transfer agent and custodian, and is compensated by the Fund pursuant to a transfer agency agreement and a custodian contract.

3. The Distributor is a wholly owned subsidiary of FMR Corp. The Distributor sells shares of the Portfolios as agent on behalf of the fund, and assists in the Portfolios' administration and operation.

4. Existing shares of the Portfolios ("Existing Shares") are intended for investment of short-term monies held in trust, fiduciary, advisory, agency, custodial, or similar accounts held by financial institutions or business organizations. Existing Shares are sold and redeemed daily at net asset value without a sales or redemption charge, and are subject to a distribution plan adopted pursuant to rule 12b–1 under the Act (the "Administrative 12b–1 Plan").

5. Applicants seek an exemptive order that would permit the Fund to offer multiple classes of shares representing interests in the same Portfolio. Each class of new shares ("New Shares") would be identical in all respects to each class of Existing Shares, except for its class designation, the allocation of certain expenses, voting rights, and exchange privileges. Each portfolios' investment objectives, policies, and restrictions would apply to the New Shares of any Portfolio to the same extent as to the Existing Shares of such Portfolio.

6. Each Portfolio may offer several classes of New Shares (a) in connection with a distribution and service plan adopted pursuant to rule 12b–1 (a "Distribution and Service Plan"); and/or (b) in connection with a non-rule 12b–1 shareholder services plan (a "Shareholder Services Plan"). The Fund may offer an unlimited number of different classes of shares, either in connection with one or more of the plans described above or without any plan. All classes of shares issued by the Fund in connection with any order granted in response to the application will comply with all representations and conditions contained in the application.[1]

[1] Applicants request that any relief also apply to any future series of the Fund and any other future investment company, or series thereof, advised by the Investment Adviser or any person directly or indirectly controlling, controlled by, or under common control with the Investment Adviser (collectively, "Future Funds"). Applicants state that any such Future Fund issuing classes of shares pursuant to any order granted in response to the application will comply with all representations and conditions contained in the application.

7. Under the Administrative 12b–1 Plan adopted on behalf of Existing Shares of the Portfolios, the Portfolio pays the Distributor a monthly fee at an annual rate of up to .15% of the average net assets of such Portfolio. Each Administrative 12b–1 Plan also provides that the Investment Adviser is authorized to make payments out of its own resources, including the payments it receives under its investment advisory agreement, to third parties who engage in the sale of shares or who render shareholder support services.

8. Under the Distribution and Service Plan, either the Fund (on behalf of a Portfolio) or the Distributor (such election to be at the discretion of the Fund) would enter into servicing agreements ("Service Agreements") with banks, broker-dealers, or other institutions ("Service Organizations") that would provide certain account administration services to the customers of the Service Organizations ("Customers"), which Customers from time to time beneficially own shares that are offered pursuant to the plan. The Distribution and Service Plan would be used with respect to Service Organizations authorized to provide distribution and distribution-related liaison services. Service Agreements under the Distribution and Service Plan would provide for an asset-based sales charge to compensate Service Organizations or their affiliates, if appropriate, for the distribution of shares and the provision of certain additional shareholder liaison services to Customers. Payments to a Service Organization and to the Distributor pursuant to the Distribution and Service Plan would not exceed 0.75% (or such other amount as may be permitted under applicable regulations of the National Association of Securities Dealers, Inc. ("NASD")) per annum of the average daily net asset value of the Distribution and Service Plan shares beneficially owned by Customers of the Service Organization with respect to which services and assistance are provided under the Distribution and Service Plan. The amount of such payments to Service Organizations currently is expected to be a maximum of 0.50% per annum. The level of payments permitted under the Distribution and Service Plan shall be changed only pursuant to approval by the shareholders of the affected class of the Fund.

9. Under the Shareholder Service Plan, either the Fund (on behalf of a Portfolio) or the Distributor (such election to be at the discretion of the Fund) would enter into Service Agreements with Service Organizations concerning the provision of certain account administration services to Customers, which Customers from time to time beneficially own shares that are offered pursuant to the plan. The Shareholder Services Plan would be used with respect to Service Organizations authorized to provide only personal and account maintenance services. Service payments pursuant to the Shareholder Services Plan would not exceed 0.25% (or such other amount as may be permitted under applicable NASD regulations) per annum of the average daily net asset value of the shares beneficially owned by Customs of the Service Organization with respect to which personal and account maintenance services are performed under a Shareholder Services Plan. Such service payments currently are expected to be a maximum of 0.25% per annum.

10. Service Organizations may charge other fees to Customers who are the beneficial owners of Distribution and Service Plan shares or Shareholder Services Plan shares in connection with their customer accounts, subject to the procedures set forth in conditions 6, 7, and 8. Such fees would be in addition to any amounts received by the Service Organization under a Service Agreement. Under the terms of the Service Agreements, Service Organizations would be required to provide Customers with a schedule of fees that relate to the investment of their assets in Distribution and Service Plan shares or Shareholder Services Plan shares.

11. The expense of payments under the Administrative 12b–1 Plan, Distribution and Service Plan, and Shareholder Services Plan would be borne entirely by the beneficial owners of the class of shares of the Fund to which the particular plan relates. In the event that a Distribution and Service Plan and a Shareholder Service Plan are adopted with respect to a single class of shares, the Directors will apply the analysis required under rule 12b–1(d) to the aggregate amount paid under such plans in order to assure that, to the extent that the plans may be deemed to overlap in some respects, compensation shall not be duplicative as a result of the use of both plans.

12. The gross income of all Portfolios will be allocable among the classes of shares based upon the relative net asset values. Expenses of the Fund cannot be attributed directly to any one Portfolio will be allocated to each Portfolio based on the relative net assets of such Portfolio. Certain expenses may be attributable to a particular Portfolio, but not to a particular class ("Portfolio

Expenses"). All such Portfolio Expenses will be allocated to each class of shares in a Portfolio on the basis of the relative net asset values of the classes of that Portfolio. All expenses incurred by a class of shares ("Class Expenses") will be borne on a *pro rata* basis by the outstanding shares of such class. Because of the differing Class Expenses that may be borne by each class of shares, the net income of (and dividends payable to) each class may be different from the net income of (and dividends payable to) the other classes of shares in the same Portfolio.

13. Each class of the shares may be exchanged only for shares of the same class in another Portfolio. Notwithstanding the foregoing, exchanges will be permitted among classes should a shareholder cease to be eligible to purchase shares of the original class by reason of a change in the shareholder's status. This situation might occur, for example, when an investor who beneficially owned shares held by an institution becomes the holder of legal title by reason of a distribution from the institutional account. Such distributions may be occasioned by a termination of a trust and distribution of the corpus of the trust to beneficiaries. An individual would become the holder of shares designed for institutions, and the individuals may desire the services offered by Service Organizations in substitution of the services formerly provided by the trustees of such trust. Exchanges will be limited to within the same "group of investment companies" as that term is defined in rule 11a-3 under the Act.

Applicants' Legal Analysis

1. Applicants seek an exemption from sections 18(g), 18(f)(1), and 18(i) to the extent that the proposed issuance and sale of New Shares may result in a senior security, as defined by section 18(g), the issuance and sale of which would be prohibited by section 18(f)(1), and to the extent the allocation of voting rights in connection with New Shares may violate the provisions of 18(i).

2. Applicants assert that the proposed issuance of New Shares does not raise any of the legislative concerns that section 18 of the Act was designed to ameliorate. The proposal does not involve borrowings and does not affect the Fund's existing assets or reserves. Each class of shares will be redeemable at all times. No class of shares will have preference or priority over any other class of the Fund in the usual sense (that is, no class will have distribution or liquidation preferences to particular assets and no class will be protected by any reserve or other account).

3. Applicants state that the proposed arrangement will not increase the speculative character of the shares in a Portfolio, since each class of shares will participate in all of such Portfolio's income and expenses on the basis of the relative net assets of each class (with the exception of the payments and other expenses which are attributed solely to a particular class).

4. Applicants assert that owners of each class of shares may be relieved of a portion of the fixed costs normally associated with investing in mutual funds since such costs would, potentially, be spread over a greater number of shares than they would be otherwise. Applicants believe that the proposed allocation of expenses and voting rights relating to the plans is equitable and would not discriminate against any group of shareholders. In addition, such arrangements should not give rise to any conflict of interest because the rights and privileges of each class of shares are substantially identical.

5. Applicants assert that the requested exemption is appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Applicants' Conditions

Applicants agree that the following conditions may be imposed in any SEC order granting the requested relief.[2]

1. Each class of shares of a Portfolio will represent interests in the same portfolio of investments and be identical in all respects, except as set forth below. The only differences among the classes of shares of a Portfolio will relate solely to one or more of the following: (a) The method of financing certain Class Expenses, which are limited to any or all of the following: (i) transfer agent fees identified by applicants as being attributable to a specific class of shares; (ii) printing and postage expenses related to preparing and distributing materials such as shareholder reports, prospectuses and proxy statements to current shareholders of a specific class; (iii) SEC and Blue Sky registration fees incurred by a class of shares; (iv) the expense of administrative personnel and services as required to support the shareholders of a specific class; (v) Directors' fees or expenses incurred as a result of issues relating to one class of shares; and (vi) accounting expenses relating to one class of shares; (b) expenses assessed to a class pursuant to a Shareholder Services Plan and/or 12b-1 Plan (whether an Administrative 12b-1 Plan or a Distribution and Service Plan or both) with respect to such class; (c) the fact that the classes will vote separately with respect to the Fund's Shareholder Services Plan and/or any 12b-1 Plan; (d) the different exchange privileges of the classes of shares; and (e) the designation of each class of shares of the Fund. Any additional incremental expenses not specifically identified above which are subsequently identified and determined to be properly allocated to one class of shares shall not be so allocated unless and until approved by the Commission.

2. The Directors of the Fund, including a majority of the independent Directors, will approve the offering of additional classes of New Shares (the "Multi-Class System"). The minutes of the meetings of the Directors regarding the deliberations of the Directors with respect to the approvals necessary to implement the Multi-Class System will reflect in detail the reasons for the Directors' determination that the proposed Multi-Class System is in the best interest of both the Fund and its shareholders.

3. The initial determination of the Class Expenses that will be allocated to a particular class and any subsequent changes thereto will be reviewed and approved by a vote of the Board of Directors, including a majority of the independent Directors. Any persons authorized to direct the allocation and disposition of monies paid or payable by the Fund to meet Class Expenses shall provide to the Board of Directors, and the Directors shall review at least quarterly, a written report of the amounts so expended and the purposes for which such expenditures were made.

4. On an ongoing basis, the Directors of the Fund, pursuant to their fiduciary responsibilities under the Act and otherwise, will monitor the Fund for the existence of any material conflicts among the interests of the classes of shares. The Directors, including a majority of the independent Directors, shall take such action as is reasonably necessary to eliminate any such conflicts that may develop. The distributor and the investment adviser will be responsible for reporting any potential or existing conflicts to the Directors. If a conflict arises, the distributor and the investment adviser,

[2] One of the conditions in the application (condition 5), which relates to shareholder approval of rule 12b–1 plans, is no longer required for exemptive relief permitting multiple classes of shares. Any order issued granting such relief would not be subject to this condition. The conditions in this notice have been renumbered to reflect the deletion of the condition.

at their own cost, will remedy such conflict up to and including establishing a new registered management investment company.

5. The Distributor will adopt compliance standards as to when each class of shares may be sold to particular investors. Applicants will require all persons selling shares of the Fund to agree to conform to such standards.

6. The Shareholder Services Plans will be adopted and operated in accordance with the procedures set forth in rule 12b-1(b) through (f) as if the expenditures made thereunder were subject to rule 12b-1, except that shareholders need not enjoy the voting rights specified in rule 12b-1. In evaluating the Shareholder Services Plans, the Directors will specifically consider whether (a) such plans are in the best interest of the applicable classes and their respective shareholders, (b) the services to be performed pursuant to the Plans are required for the operation of the applicable classes, (c) the Service Organizations can provide services at least equal, in nature and quality, to those provided by others, including the Fund, providing similar services, and (d) the fees for such services are fair and reasonable in the light of the usual and customary charges made by other entities, especially non-affiliated entities, for services of the same nature and quality.

7. Each Service Agreement entered into pursuant to a Shareholder Services Plan will contain a representation by the Service Organization that any compensation payable to the Service Organization in connection with the investment of Customers' assets in the Fund (a) will be disclosed by it to the Customers, (b) will be authorized by its Customers, and (c) will not result in an excessive fee to the Service Organization.

8. Each Service Agreement entered into pursuant to a Shareholder Services Plan will provide that, in the event an issue pertaining to a Shareholder Services Plan is submitted for shareholder approval, the Service Organization will vote any shares held of its own account in the same proportion as the vote of those shares held for its Customers' accounts.

9. The Directors will receive quarterly and annual statements concerning the amounts expended under the Shareholder Services Plans and any 12b–1 Plans and the related Service Agreements complying with paragraph (b)(3)(ii) of rule 12b–1, as it may be amended from time to time. In the statements, only expenditures properly attributable to the sale or servicing of a particular class of shares will be used to justify any distribution or servicing fee charged to that class. Expenditures not related to the sale or servicing of a particular class will not be presented to the Directors to justify any fee attributable to that class. The statements, including the allocations upon which they are based, will be subject to the review and approval of the independent Directors in the exercise of their fiduciary duties.

10. Dividends paid by the Fund with respect to each class of its shares, to the extent any dividends are paid, will be calculated in the same manner, at the same time, on the same day, and will be in the same amount per outstanding share, except that Administrative or Service Payments made by a class under a Plan and any Class Expenses will be borne exclusively by that class.

11. The methodology and procedures for calculating the net asset value and dividends and distributions of the classes and the proper allocation of expenses among the classes have been reviewed by an expert (the "Expert") who has rendered a report to the applicants that such methodology and procedures are adequate to ensure that such calculations and allocations would be made in an appropriate manner. On an ongoing basis, the Expert, or an appropriate substitute Expert, will monitor the manner in which the calculations and allocations are being made and, based upon such review, will render at least annually a report to the Fund that the calculations and allocations are being made properly. The reports of the Expert will be filed as part of the periodic reports filed with the Commission pursuant to section 30(a) and 30(b)(1) of the Act. The work papers of the Expert with respect to such reports, following request by the Fund (which the Fund agrees to provide), will be available for inspection by the Commission staff upon written request to the Fund for such work papers by a senior member of the Division of Investment Management, limited to the Director, an Associate Director, the Chief Accountant, the Chief Financial Analyst, and Assistant Director, and any Regional Administrators or Associate and Assistant Administrators. The initial report of the Expert is a "Special Purpose" report on the "Design of a System" and ongoing reports would be "Special Purpose" reports on the "Design of a System and Certain Compliance Tests" as defined and described in SAS No. 44 of the AICPA, as it may be amended from time to time, or in similar auditing standards as may be adopted by the AICPA from time to time.

12. Applicants have adequate facilities in place to ensure implementation of the methodology and procedures for calculating the net asset value and dividends and distribution of the classes of shares and the proper allocation of expenses among the classes and this representation has been concurred with by the Expert in the initial report referred to in condition 11 above and will be concurred with by the Expert, or an appropriate substitute Expert, on an ongoing basis at least annually in the ongoing reports referred to in condition 11 above. Applicants will take immediate corrective action if this representation is not concurred in by the Expert or appropriate substitute Expert.

13. The prospectuses of each class of shares will contain a statement to the effect that a salesperson and any other person entitled to receive compensation for selling or servicing Fund Shares may receive different compensation with respect to one particular class of shares over another in the Fund.

14. The conditions pursuant to which the exemptive order is granted and the duties and responsibilities of the Directors with respect to the Multi-Class Systems will be set forth in guidelines which will be furnished to the Directors.

15. The Fund will disclose the respective expenses, performance data, distribution arrangements, services, fees, sales loads, deferred sales loads, and exchange privileges applicable to each class of shares in every prospectus, regardless of whether all classes of shares are offered through each prospectus. The Fund will disclose the respective expenses and performance data applicable to all classes of shares in every shareholder report. To the extent that any advertisement or sales literature describes the expenses or performance data applicable to any class of shares of a Portfolio, it will also disclose the respective expenses and/or performance data applicable to all classes of shares of such Portfolio. The information provided by Applicants for publication in any newspaper or similar listing of the Fund's net asset value or public offering price will present each class of shares separately.

16. Applicants acknowledge that the grant of the exemptive order requested by the application will not imply Commission approval, authorization of, or acquiescence in any particular level of payments that the Fund may make pursuant to its Administrative 12b–1 Plan, Distribution and Service Plan or Shareholder Services Plan in reliance on the exemptive order.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8025–01–M

[Declaration of Disaster Loan Area #2605]

Texas; Declaration of Disaster Loan Area

Maverick County and the contiguous counties of Dimmit, Kinney, Uvalde, Webb, and Zavala in the State of Texas constitute a disaster area as a result of damages caused by severe thunderstorms and flooding which occurred on July 21–22, 1992. Applications for loans for physical damage as a result of this disaster may be filed until the close of business on January 29, 1993 and for economic injury until the close of business on August 30, 1993 at the address listed below: U.S. Small Business Administration, Disaster Area 3 Office, 4400 Amon Carter Blvd., Suite 102, Ft. Worth, TX 76155, or other locally announced locations.

The interest rates are:

For Physical Damage	*Percent*
Homeowners with credit available elsewhere	8.000
Homeowners without credit available elsewhere	4.000
Businesses with credit available elsewhere	8.000
Businesses and non-profit organizations without credit available elsewhere	4.000
Others (including non-profit organizations) with credit available elsewhere	8.500
For Economic Injury:	
Businesses and small agricultural cooperatives without credit available elsewhere	4.000

The number assigned to this disaster for physical damage is 260506 and for economic injury the number is 776700.

(Catalog of Federal Domestic Assistance Program Nos. 59002 and 59008)

Dated: November 30, 1992.

Patricia Saiki,

Administrator.

[Declaration of Economic Injury Disaster Loan Area #7766]

Washington; Declaration of Disaster Loan Area

Clallam County and the contiguous county of Jefferson in the State of Washington constitutes an Economic Injury Disaster Loan Area due to the effects of El Nino on the Salmon fishing industry in the Neah Bay area during 1992. Eligible small businesses without credit available elsewhere and small agricultural cooperatives without credit available elsewhere may file applications for economic injury assistance until the close of business on August 13, 1993 at the address listed below:

U.S. Small Business Administration, Disaster Area 4 Office, P.O. Box 13795, Sacramento, CA 95853–4795, or other locally announced locations. The interest rate for eligible small businesses and small agricultural cooperatives is 4 percent.

BILLING CODE 8025–01–M

Women's Business Development Act; Federal Assistance

AGENCY: U.S. Small Business Administration.

ACTION: Notice.

SUMMARY: Federal Assistance to Individuals or Enterprises Eligible Under the Women's Business Ownership Act of 1991, Public Law 102–191. Federal Assistance will be provided to develop training and counseling centers for women business owners under the Women's Business Development Act of 1991, Program Announcement No. OWBO–93–005. The Program announcement is intended to assist SBA's Office of Women's Business Ownership train and counsel women wanting to start or expand businesses. The Women's business Development Act of 1991, Public Law 102–191, seeks applicants who are experienced in conducting programs or on-going efforts designed to impart or upgrade the business skills of women business owners or potential owners. The applicant must commence a demonstration project within a minimum amount of time. The applicant must provide training and services to a representative number of women who are both socially and economically disadvantaged. Each applicant shall submit a three year plan on proposed fundraising and training activities and may receive financial assistance for a maximum of three years per site, subject to availability of funds. As a public/private partnership, successful applicants will match SBA funding in the first year with one non-Federal dollar for each 2 Federal dollars; in the second year, one non-Federal dollar for each Federal dollar; and in the third and final year, two non-Federal dollars for each Federal dollar. The training activities must include, but need not be limited to: (1) Financial assistance, including training and counseling in how to apply for and secure business credit and investment capital, preparing and presenting financial statements and managing cash flow and other financial operations of a business concern; (2) management assistance; and (3) marketing assistance. Up to one-half of the non-Federal matching assistance may be in the form of in-kind contributions which are budget line items only, including but not limited to office equipment and office space. The Small Business Administration may disburse up to 25 percent of each year's Federal share awarded to a recipient organization after notice of the award has been issued and before the non-Federal matching funds are obtained. If any recipient of assistance fails to obtain the required non-Federal contribution during any year of any project, it shall not be eligible thereafter for advance disbursements during the remainder of that project or for any other project for which it is or may be funded.

DATES: Applicants must submit their application proposal on or before January 8, 1993 at 4 p.m., Eastern Standard Time, at the SBA office specified in the program announcement.

FOR FURTHER INFORMATION CONTACT: Harriet Fredman, Senior Program Representative at 202/205–6673 or Sally Murrell, Agreement Officer at 202/205–6621.

Dated: December 8, 1992.

Northeastern Capital Corp.; Notice of Surrender of License

[License No. 01/02–0062]

Notice is hereby given that, pursuant to § 107.105 of the Small Business Administration (SBA) Rules and

Regulations governing Small Business Investment Companies (13 CFR 107.105 (1992)), Northeastern Capital Corporation, 209 Church Street, New Haven, CT 06510, incorporated under the laws of the State of Connecticut has surrendered its license, No. 01/02–0062 issued by the SBA on April 1, 1983.

Northeastern Capital Corporation has complied with all conditions set forth by SBA for surrender of its license. Therefore, under the authority vested by the Small Business Investment Act of 1958, as amended, and pursuant to the above-cited Regulation, the license of Northeastern Capital Corporation is hereby accepted and it is no longer licensed to operate as a Small Business Investment Company.

The Capital Fund; Notice of Application to Operate as a Small Business Investment Company Licensee

[Applicant No. 99000072]

Notice is hereby given that an application has been filed with the Small Business Administration (SBA) pursuant to § 107.102 of the Regulations governing small business investment companies (13 CFR 107.102 (1992)) by The Capital Fund (TCF), for a license to operate as a small business investment company (SBIC) under the Small Business Investment Act of 1958 (the Act), as amended (15 U.S.C. 661 et seq.).

The proposed officers, directors, and shareholders of the Applicant are as follows:

Name and address	Title
Robert F. Dailey, 7021 North Ridge Road, Lansing, Michigan 48917.	Chairman.
Barry A. Wilson, 7840 West Willow Highway, Grand Ledge, Michigan 48837.	President, Director.
Craig A. Woodman, 315 Greentree Lane, Ada, Michigan 49301.	Senior Vice President, Treasurer, Director.
Stephen L. Sandstedt, 2127 Montego Drive, Lansing, Michigan 48912.	Vice President, Secretary, Director.
Dana W. Tousley, 2206 Rockdale, Lansing, Michigan 48917.	Director.
Capital BIDCO Inc., 6412 Centurion Drive, Suite 150, Lansing, Michigan 48917	100% Shareowner.

Capital BIDCO Inc., a corporation organized and existing under the laws of the State of Michigan, owns 100% of the issued and outstanding capital stock of The Capital Fund.

The applicant, TCF, a Michigan corporation will begin operations with $2,500,000 paid-in capital and paid-in surplus. TCF will conduct its activities primarily in the State of Michigan but will consider investments in businesses in other areas in the United States.

Matters involved in SBA's consideration of the application include the general business reputation and character of the proposed owners and management, and the probability of successful operation of the company under their management, including adequate profitability and financial soundness in accordance with the Small Business Investment Act of 1958, as amended, and the SBA Rules and Regulations.

Notice is further given that any person may, not later than 30 days from the date of publication of this Notice, submit written comments on the proposed applicant. Any such communication should be addressed to the Associate Administrator for Investment, Small Business Administration, 409 Third Street SW., Washington, DC 20416.

A copy of this notice shall be published in a newspaper of general circulation in Lansing, Michigan.

[License No. 03/03–0181]

Meridian Venture Partners, Filing of Application for Approval of Conflict of Interest Transaction Between Associates

Notice is hereby given that Meridian Venture Partners (MVP) 259 Radnor-Chester Road, Radnor, PA 19087, a Federal Licensee under the Small Business Investment Act of 1958, as amended (Act), has filed an application pursuant to § 107.903 of the Regulations governing small business investment companies (13 CFR 107.903 (1992)), for approval of a conflict of interest transaction. MVP desires to invest $409,998 in Preferred Stock in Mother's Work, Inc., 1307 Noble Street, Philadelphia, PA 19123.

MVP is a limited partnership and has four general partners, one of which has been a director of Mothers Work since 1985. The conflict of interest arises under § 107.903(b)(1) of CFR part 13 because a general partner of MVP is also a director of Mothers Work, the small business concern in which MVP proposes to invest. Consequently, the proposed transaction falls within the purview of § 107.903 of the Regulations, and requires a written exemption granted by SBA. In addition, three of the four General partners of MVP collectively own 2.14% of the stock of Mothers Work, Inc.

Notice is hereby given that any interested person may, not later than 30 days from the date of publication of this Notice, submit written comments on the proposed transaction to the Associate Administrator for Investment, Small Business Administration, 409 3rd Street, SW., Washington, DC 20416.

A copy of this Notice shall be published in the newspaper of general circulation in the Philadelphia area.

[Application No. 99000075]

Opportunity Capital Partners II, L.P.; Application for a Small Business Investment Company License

An application for a license to operate a small business investment company (SBIC) under the provisions of the Small Business Investment Act of 1958, as amended (15 U.S.C. 661 *et seq.*) has been filed by Opportunity Capital Partners II, L.P. (Applicant), 39650 Liberty Street, suite 425, Fremont, California 94538, with the Small Business Administration pursuant to 13 CFR 107.102 (1992).

The proposed individual General Partners of the General Partner (GP), a general partnership and the General Partner and Limited Partner of the Applicant are as follows:

		Ownership
Thompson Capital Management, 39650 Liberty Street, Suite 425, Fremont, CA 94538.	General Partner	1%
J. Peter Thompson, 223 E. Las Palmas Ave., Fremont, CA 94539	Managing General Partner of the GP	
Joyce M. Thompson, 223 E. Las Palmas Ave., Fremont, CA 94538	General Partner	
Bank of America NT&SA, 555 California Street, San Francisco, CA 94104	Sole Limited Partner	99%
BankAmerica Corporation, 555 California Street, San Francisco, CA 94104	Sole Shareholder of Limited Partner	

The Applicant, a California limited partnership, is expected to begin operations with $1,556,161 of private capital. The Applicant will conduct its activities primarily in the State of California.

Matters involved in SBA's consideration of the Application include the general business reputation and character of the proposed owners and management, and the probability of successful operations of the company under their management, including profitability and financial soundness, in accordance with the Small Business Investment Act and the SBA Rules and Regulations.

Notice is further given that any person may, not later than 30 days from the date of publication of this Notice, submit written comments on the proposed SBIC to the Associate Administrator for Investment, Small Business Administration, 409 3rd Street, SW., Washington, DC 20416.

A copy of the Notice shall be published in a newspaper of general circulation in Fremont, California.

Culturally Significant Objects Imported for Exhibition

Determination

Notice is hereby given of the following determination: Pursuant to the authority vested in me by the Act of October 19, 1965 (79 Stat. 985, 22 U.S.C.

2459), Executive Order 12047 of March 27, 1978 (43 FR 13359, March 29, 1978), and Delegation Order No. 85–5 of June 27, 1985 (50 FR 27393, July 2, 1985), I hereby determine that the objects to be included in the exhibit, "Irish Watercolours and Drawings from the National Gallery of Ireland" (see list [1]), imported from abroad for the temporary exhibition without profit within the United States, are of cultural significance. These objects are imported pursuant to a loan agreement with the foreign lenders. I also determine that the temporary exhibition or display of the listed exhibit objects at the Boston College Museum of Art, Chestnut Hill, Massachusetts from on or about October 2, 1993 to on or about December 12, 1993, is in the national interest.

Public notice of this determination is ordered to be published in the **Federal Register**.

Limitation on Alcohol use by Transportation Workers

AGENCIES: Federal Aviation Administration (FAA), the Federal Highway Administration (FHWA), the Federal Railroad Administration (FRA), the Federal Transit Administration (FTA) and the Research and Special Programs Administration (RSPA), DOT.

ACTION: Proposed rule; common preamble.

SUMMARY: This document is a common preamble to five proposed alcohol testing rules being published by several operating administrations of the Department of Transportation (FAA, FHWA, FRA, FTA, and RSPA) elsewhere in today's issue of the **Federal Register**. Four of these rules are required by the Omnibus Transportation Employee Testing Act of 1991. All of them should enhance the overall safety of the transportation industry and the public.

DATES: Comments on the NPRMs must be received on or before April 14, 1993. Late-filed comments will be considered to the extent practicable.

ADDRESSES: Comments on the operating administrations' NPRMs should be mailed to the operating administrations at the addresses contained in the NPRMs following this common preamble. Comments on the alcohol testing procedures NPRM should be mailed to the address contained in that NPRM. Each rulemaking has a separate docket. Since there are common requirements, bases and purposes for the rules, each DOT organization involved may rely on comments submitted to the dockets of the other participating DOT organizations as necessary for developing the final rules. If a DOT organization relies upon a comment directed to the docket of another DOT organization, it will place a copy of that comment in its own docket. To ensure that comments applicable to more than one operating administration are read by each, those comments should be sent to each affected operating administration's docket.

FOR FURTHER INFORMATION CONTACT: Gwyneth Radloff, Office of the General Counsel, Department of Transportation, (202) 366–9305, 400 7th Street, SW., Washington, DC 20590, with respect to the overall Departmental effort. For information concerning a particular NPRM, contact the individual(s) listed under the **FOR FURTHER INFORMATION CONTACT** section for that NPRM. The full texts of this document and all the other related DOT rulemaking documents appearing in today's **Federal Register** are electronically available through DOT's Anti-Drug Information Center (ADIC). Call 1–800–CAL–DRUG for further information.

SUPPLEMENTARY INFORMATION:

Summary

FAA, FHWA, FRA, and FTA are proposing rules to implement the Omnibus Transportation Employee Testing Act of 1991 ("the Act"), which requires alcohol testing programs and changes to the drug testing programs in the aviation, motor carrier, rail, and mass transit industries in the interest of public safety. RSPA is proposing to apply similar requirements to the pipeline transportation industry using existing statutory authority to ensure application of the drug and alcohol testing requirements to all safety-sensitive employees in that industry. The maritime industry has not been included in the proposals published in today's **Federal Register**; the U.S. Coast Guard (USCG) has some existing regulations on alcohol misuse and the industry would have difficult problems with the implementation of additional requirements similar to those being proposed by the five other operating administrations (OAs).

The five proposals generally have the same requirements and common language to a great extent, but are not exactly the same. Intended substantive differences (where industry-specific differences are necessary or to comport with existing regulatory format or statutory requirements) are explained in the preambles to the individual OA proposals.

In general, the proposed rules would prohibit covered employees from performing safety-sensitive functions: (1) When test results indicate a breath alcohol concentration of 0.04 or greater; (2) Within four hours after using alcohol; (3) While using alcohol on the job; (4) During 8 hours following an accident if their involvement has not been discounted as a contributing factor in the accident or until they are tested; (5) While behavior and appearance are characteristic of alcohol misuse or their ability to perform safety-sensitive functions is adversely affected by alcohol use; and (6) If they refuse to submit to required alcohol tests. Employers would have to remove from a safety-sensitive function any covered employee who violates any of these prohibitions until he or she has met the conditions for returning to a safety-sensitive function. Slightly different rules would apply with respect to an employee who is found to have an alcohol concentration of 0.02 or greater but less than 0.04. The proposed rules would require employers to conduct pre-employment, reasonable suspicion, post-accident, random, return-to-duty and follow-up alcohol testing with evidential breath testing devices. They also would impose reporting and recordkeeping requirements and provide for alcohol misuse information for employees, supervisor training, and referral of employees to employee assistance programs (EAPs).

Each of the OA notices of proposed rulemaking (NPRMs) developed as part of this effort has common language, to the extent possible, in recognition of the common elements of the statute and the problem being addressed. This will ease compliance for those companies, employers and third-party service providers that may be subject to the rules of more than one of the OAs.

This document is a common preamble jointly issued by each of the five OAs and provides the background for and an overview of the general, common elements of their proposed rules. It is incorporated by reference as part of the preamble for each individual OA's NPRM; additional modal-specific preambles have been issued by each of the OAs to provide an explanation of any differences from, or additions to, the common language. The following related documents appear in today's **Federal Register**:

(1) This common preamble;

(2) An Office of the Secretary (OST) NPRM on alcohol testing procedures and conforming changes to the existing drug testing procedures that is incorporated by reference into the OAs' NPRMs;

(3) The modal-specific OA preambles and proposed alcohol misuse prevention rule language for the: FAA; FHWA; FRA (also includes drug changes); FTA; and RSPA;

(4) FAA, FRA, and FHWA advance notices of proposed rulemaking (ANPRMs) seeking public comment on application of alcohol and drug testing requirements to foreign operators in the

United States in the aviation, rail, and motor carrier industries;

(5) An FTA NPRM that would impose on recipients of Federal funding in the transit industry drug testing requirements similar to those in the other transportation industries;

(6) FAA, FHWA, FRA, RSPA and USCG NPRMs that would require submission of drug test results to the Department's new Management Information System (MIS) (FTA's MIS proposal is included in its drug testing NPRM.);

(7) An FHWA NPRM that proposes changes to its existing drug rule in order to conform to the Act, including extending coverage to intrastate truck and motorcoach operations (FAA will be separately proposing, in the near future, conforming changes to its existing drug testing rule.); and

(8) A DOT-wide ANPRM that seeks public comment concerning whether there are less costly alternatives to the current random drug testing programs for the aviation, motor carrier, rail, mass transit, pipeline and maritime industries that can maintain an adequate level of deterrence and detection of illegal drug use.

Draft regulatory evaluations that analyze the costs and benefits of and the alternatives considered for each of the OA NPRMs and for the NPRM on testing procedures (part 40) have been placed in the individual dockets. We request public comment on these draft analyses and solicit additional information that would aid each OA in developing its final rule and regulatory evaluation.

The Department plans to conduct one or more public hearings on these proposed rules. The hearing dates and locations will be announced in a separate **Federal Register** notice.

Background

The Omnibus Transportation Employee Testing Act of 1991

On October 28, 1991, President Bush signed the Omnibus Transportation Employee Testing Act of 1991 ("the Act"). (Pub. L. 102–143, Title V). The Act requires the Department to prescribe regulations within one year that require testing of safety-sensitive employees in the aviation, highway, rail, and mass transit industries and in the Federal Aviation Administration for use, in violation of law or Federal regulation, of alcohol and drugs listed in the Controlled Substances Act. The Act preempts inconsistent state and local laws, except certain state criminal laws, in the aviation, highway, and mass transit industries and requires that the regulations be consistent with U.S. international obligations. It specifically mandates, among other things, privacy in collection techniques, incorporation of the Department of Health and Human Services' (DHHS) mandatory guidelines for drug testing and comparable safeguards for alcohol testing, quantified confirmation of any initial positive result, collection of split samples of body fluid specimens, confidentiality of test results, and scientifically-random selection of employees to be tested. It requires pre-employment, random, post-accident, and reasonable suspicion testing; periodic testing is discretionary. Regulations prescribed under the Act must include provisions for the identification of, and opportunity for treatment for, covered employees in need of assistance due to misuse of alcohol or controlled substances. The Act states that current federally-mandated programs are unaffected by the new statutory requirements.

At the time of enactment of the Act, several OAs already had implemented programs designed to address the use and misuse of drugs and alcohol by transportation workers, and the Department had published an ANPRM on alcohol misuse by employees in the DOT-regulated transportation industries (54 FR 46326, November 2, 1989). In 1988, six of the Department's OAs: FAA; FHWA; FRA; FTA, formerly the Urban Mass Transportation Administration, (UMTA); USCG; and RSPA, issued drug testing rules for members of their regulated industries (53 FR 47002 et. seq., Nov. 21, 1988). (The FTA rule was overturned by a Federal appellate court in January 1990 on the grounds that the agency lacked statutory authority to issue nationwide standards requiring drug testing.) The rules generally apply

to persons performing safety-sensitive and security-related functions in commercial operations. The Department also published in 1988, and revised in 1989, a Department-wide drug testing procedures rule (49 CFR part 40) that governs testing under all the OA rules (53 FR 47002, Nov. 21, 1988; 54 FR 49854, Dec. 1, 1989). As noted above, the Act requires certain changes to the existing drug testing rules (*e.g.*, it requires split samples and extends coverage to intrastate truck and motorcoach operations under the FHWA rule). It also directs FTA to issue drug testing rules.

In addition to the requirements discussed above, the Act requires alcohol and drug testing for certain DOT employees. Air traffic controllers employed by the FAA are the largest group of employees subject to this testing (they are already subject to drug testing under an existing DOT policy). Another example of DOT employees subject to coverage is vehicle drivers who must have a Commercial Driver's License (CDL). The Department is developing a DOT Order (an internal program document) to conform the Department's drug testing program for its own employees to the requirements of the Act and to implement alcohol testing.

Regulatory History

During the drug testing rulemakings, we noted on numerous occasions that alcohol is a drug. We recognized alcohol's wide use, its addictive nature, and the number of transportation-related deaths and injuries that result every year from its misuse. We also realized that, for numerous reasons, the solution to the alcohol problem may be very different from that concerning other drugs, such as cocaine or marijuana. For that reason, with one exception, the OAs did not include alcohol among the list of substances to be tested for under the drug testing regulations. (Pursuant to a statutory mandate, the Coast Guard made post-accident alcohol testing mandatory in an amendment to an existing rule permitting that testing. The FRA had previously included alcohol in its post-accident testing mandate and had authorized alcohol testing for reasonable cause.) In announcing the drug testing rules, then Secretary of Transportation James Burnley stated that he had directed his General Counsel to review the Department's existing alcohol regulations to determine if they were sufficient.

In his June 15, 1989, testimony before the Senate Committee on Commerce, Science and Transportation, former Secretary Samuel Skinner committed the Department to further exploration of the need for additional regulation of alcohol use. "Drug and Alcohol Testing: Hearings on S. 561. Before the Committee on Commerce, Science, and Transportation", 101st Cong., 1st Sess. 23–39 (1989). On November 2, 1989, the Department published an advance notice of proposed rulemaking (ANPRM) to solicit public comment on whether the Department's existing regulatory requirements and programs were sufficient to respond to the hazards of alcohol use and misuse in DOT-regulated transportation industries and to determine what additional action, if any, should be taken. The ANPRM is discussed in greater detail below.

The Public Hearing

To enable better evaluation and comparison of the capabilities of different alcohol testing methods, the Department of Transportation conducted a public hearing on November 18, 1991, to obtain specific information from the manufacturers of breath test devices. Our purpose was to examine the current or feasible capabilities of equipment to handle the problems of testing in the transportation industry, particularly verification of the identity of tested individuals and the validity of the test result. At the hearing, the Department noted that attempts to tamper with the test and refusals to acknowledge the test result may be problems since an immediate result is available. Even with procedural safeguards, we are concerned about the integrity of a breath test in various situations, for example:

1. *Tampering:* An employer may want to ignore a positive result to keep its business operating to the detriment of public safety. Alternatively, an employer may insist that a result is positive in order to get rid of a troublesome employee. In either case, the tester could substitute someone with or without alcohol in his/her system for the covered employee who was to be tested. The Department would need to be able to verify that the employer is complying with regulatory requirements and to protect the employee.

2. *Identification of Tested Employee:* A covered employee faced with an immediate positive result and the possible loss of his/her job may insist that he/she never blew into a breath test device; *e.g.*, that he or she completed the form and then the employer/tester blew into the device. The Department would need to be able to verify that the employee was the one tested.

The Department also indicated that it would need to ensure accurate test results without adding prohibitive costs to any proposed program. Representatives of eight manufacturers assured DOT officials that existing technology can keep adequate, verifiable records of tests. They claimed that they could make the following safeguards against tampering with only minor adjustments to hardware and software: storage of results in secure computer systems, assignment of a serial number to each test, and use of magnetic cards to identify testees. Voice identification of the testee is another possible technology, but it is still being developed. DOT's query about whether a camera could be added to the breath test device elicited industry warnings that more complicated equipment would be less portable and more prone to breakdown. The manufacturers pointed out that currently available equipment alone cannot provide an indisputable verification procedure or replace trained human supervision of the testing process.

The Department believes that the testing procedures set forth in the separate document proposing new alcohol provisions for 49 CFR part 40 published in today's **Federal Register** provide adequate safeguards for breath testing in response to the above concerns, but specifically seeks comment on this issue.

The ANPRM

In its November 2, 1989, ANPRM, the Department set forth a number of options for reducing alcohol misuse in DOT-regulated transportation industries, if further action were deemed necessary. The options included:

1. Requiring employers to establish Employee Assistance Programs (EAP) that provide education on the dangers of alcohol misuse as well as training to detect alcohol use or impairment on the job;

2. Requiring employers to set up self- and peer-referral programs designed to identify alcohol abusers and get them into rehabilitation programs, with the understanding that the identified abusers could retain their jobs if rehabilitation is successfully completed;

3. Requiring alcohol testing of transportation employees similar in whole or in part to our drug testing rules (e.g., pre-employment, periodic, reasonable cause, post-accident and random testing);

4. Requiring pre-performance testing prior to permitting a covered employee to operate a vehicle or perform safety- or security-related duties (e.g., a pilot

could be tested before entering the cockpit to fly an airplane); and/or

5. Encouraging the states to implement safety programs directed at alcohol misuse and to increase their enforcement efforts.

Comments on the ANPRM

General Summary

Over 225 comments were filed in response to the ANPRM. Commenters included governmental agencies, trade associations, academic and medical institutions and associations, companies, unions and individuals. About one-half of all commenters favored no additional federal regulation. About one-third of the commenters favored some combination of testing, education, rehabilitation, and enforcement. Twelve commenters, who directed their comments to all of the OAs, favored a combination of rehabilitation and education. Twenty-eight commenters, all of whom directed their comments to the FAA, favored a combination of education and enforcement; and 39 commenters who directed their comments to various OAs favored a combination of testing, rehabilitation, and enforcement. About one-sixth of all commenters favored testing as their preferred approach.

Grounds

About 75 percent of the commenters who addressed the question of what are the most appropriate grounds for testing favored reasonable cause and post-accident testing. These commenters argued that testing should occur only where there is cause to test, such as where a covered employee is suspected of being intoxicated, or where an accident may be causally linked to alcohol consumption. A number of these commenters also suggested that there should be increased enforcement of the existing regulations.

About 40 percent of commenters who addressed the issue favored different combinations of grounds for testing. In addition to reasonable cause and post-accident testing, preferred by all of these commenters, they also favored various combinations of pre-employment, periodic, random, pre-performance and post-rehabilitation testing. Commenters who favored such combinations, usually failed to provide specific reasons to support their favored combination. Those supporting random testing, however, focused on the unpredictable occurrences of this type of testing and the resulting deterrent effect.

Testing Techniques

About one-third of the commenters who focused on this issue suggested that employers be allowed to choose the testing techniques appropriate for their businesses and financial positions. Another third of the commenters favored breath testing. These commenters noted that breath test devices are portable and inexpensive. In addition, these devices provide the least invasive of all the testing techniques, because they do not rely upon the provision of any bodily fluid.

The remaining comments were equally divided in support of blood and urine testing. Those favoring blood believed that, although it is the most invasive, it is the only legally defensible testing technique for intoxication. Those favoring urine testing, on the other hand, focused on the ease of administration, particularly if combined with the current DOT-required drug testing program. Two commenters favored a two-tiered testing method, in which a breath test device is used as a screening device with a follow-up blood test, if the screen test was positive. These two commenters focused on avoiding the intrusiveness of a blood test without a showing of cause.

Finally, one manufacturer supported the saliva-based method it currently markets. This commenter claimed that its alcohol testing method is accurate, quick (the test may be performed within two minutes), does not need calibration, and does not require technical training to operate. In addition, the colored litmus paper upon which the testing method is based is relatively inexpensive when compared with other testing techniques requiring sophisticated equipment.

Alcohol Concentration

Commenters who addressed the issue of the appropriate concentration for a "positive" alcohol test favored concentrations ranging from zero to 0.05 alcohol concentration as the standard for prohibition. About half of these commenters favored 0.04 because, currently, most federal and state regulations mandate 0.04 as the prohibited alcohol concentration for commercial transportation operators. Twenty percent of these commenters favored an alcohol concentration of zero. They noted that alcohol's effects vary among individuals and that only zero tolerance would ensure zero alcohol impairment.

The remaining comments were divided equally among three different groups. The first group recommended implementation of different alcohol concentrations according to the type of testing that is employed. For example, the College of American Pathologists favored an alcohol concentration of 0.04 for blood testing, and 0.06 for breath testing. These commenters stated that different testing techniques are not equally accurate and that different alcohol concentrations should be chosen to account for the different chances of error associated with each testing technique.

The second group favored 0.02 as the prohibited alcohol concentration. Those commenters noted that although DOT should strive for "zero tolerance" of alcohol use while an individual is on duty, they believed 0.02 is the minimum alcohol concentration that can be reliably measured. Finally, the third group favored .05, believing that current technology is unable to accurately detect an alcohol concentration below that.

Consequences of a Positive Test

Commenters who addressed this issue favored one of four general approaches. Half argued that employers should be able to take whatever action they deem appropriate. Several were concerned by the prospect of a federal regulation that would dictate the manner in which they should deal with a covered employee who might place their business at risk because of an alcohol problem. Twenty percent favored mandatory rehabilitation. These commenters noted that alcoholism is a disease that requires treatment and stated that the employer has a duty to provide treatment before deciding to terminate a covered employee. Twenty percent favored federal regulations that would allow the employer to fire a covered employee for alcohol misuse if the problem is discovered through testing, but favored rehabilitation for a covered employee who comes forth voluntarily for treatment. They argued that this approach serves the dual goals of providing treatment to those who both want and need treatment, while allowing an employer to terminate those who pose too great a risk to the employer's business. About ten percent of the commenters favored automatic termination for any transportation employee with an alcohol misuse problem on the ground that such an employee poses too great a risk to the safety of passengers and the public at large.

Several of the matters at issue in the ANPRM are no longer issues, since the Act or other legislation mandates certain action. For example, the Act requires pre-employment, reasonable suspicion, random and post-accident testing for aviation, motor carriers, rail, and mass transit. Specific responses to the issues raised by the commenters as well as the specific statutory mandates,

authorizations, and prohibitions are discussed in more detail in this preamble and the preambles of the OA NPRMs.

The NPRM

General Information and Definitions

Throughout this document, we have generally relied on or referred to the results of many studies concerning alcohol. Parenthetical references to these studies are included in the text; their full names are listed alphabetically in a bibliography in appendix A. Copies of these studies have been placed in the OST rulemaking docket. It is important to note that the test data we have are not complete; often the database includes only those tests that were performed. Tests are performed after some accidents, but not others, depending upon current regulatory requirements, the availability of testing personnel, and location and timing of accidents. Also, data are not comparable among the transportation modes, because of differences in reporting requirements, databases, and time periods. In addition, the referenced studies generally used different parameters and are therefore not comparable to each other.

Many of the words relating to alcohol are used interchangeably in our society, which may cause some confusion. In this document, we use the terms "driving while intoxicated" (DWI) and "driving under the influence" (DUI) to refer to the same thing: violation of state and/or Federal alcohol concentration standards defining intoxication. "Zero tolerance" refers to a 0.00 alcohol concentration standard. "Impairment" and "under the influence" refer to the effect of alcohol ingestion in the performance of a safety-sensitive function, without regard to a specific alcohol concentration.

Existing Safety Problem

Effects of Alcohol

The potential effects of alcohol misuse are substantial in terms of lives lost, injuries and environmental and property damage. Alcohol misuse claims at least 100,000 lives annually, 25 times as many as all illegal drugs combined. In 1991, 41,462 deaths occurred on our nation's highways, of which 38.5 percent involved an intoxicated (with an alcohol concentration over 0.10) driver or non-occupant (e.g., pedestrian), and another 9.5 percent where at least some alcohol was involved. (National Highway Traffic Safety Administration, "1991 Alcohol Fatal Crash Facts.")

Ethanol (the psychoactive component of alcoholic beverages) is a central nervous system depressant. It has been widely recognized for years that consumption of alcohol can degrade performance of demanding or delicate tasks. There is less agreement, however, about how much alcohol must be ingested before there is a significant degradation of performance. Studies have indicated that the effects of alcohol vary among individuals, and, even for a given individual, alcohol will have varying effects depending on such factors as motivation, fatigue, and previous experience with alcohol (Zero Alcohol, 1987; Ryder, 1981; Landauer, 1983; Lister, 1983). One reason for the substantial variation among individuals is that ingestion of a specified quantity of alcohol by two people will not necessarily produce the same alcohol concentration in each, even if they have the same body weight (Zero Alcohol, 1987).

In one study, for example, it was found that a given body-weight-adjusted dose of ethanol could produce a range of alcohol concentrations of .036 to .095 (O'Neill, 1983). In addition, alcohol appears to enter the blood stream at different rates in different people (Zero Alcohol, 1987). In another study, subjects were given controlled doses and had equal amounts of food in their system. Nevertheless, the time required to reach the peak alcohol concentration varied from 15 to 90 minutes after ingestion (Wilson, 1984).

There also are performance differences between individuals that are unrelated to the blood alcohol concentration. It appears that highly skilled professionals may be better able to compensate for the physiological effects of alcohol than persons who are less skilled, particularly at lower alcohol concentrations. In two studies comparing the effect of alcohol on the performance of racing drivers and ordinary drivers on a closed track, the skill of the ordinary drivers showed some degradation at an alcohol concentration of 0.05, while the racing drivers showed no impairment until they reached substantially higher alcohol concentrations (Forney, 1961). Similarly, in a comparison of nonprofessional and professional pilots at alcohol concentrations of 0.04, 0.08, and 0.12, the nonprofessionals made numerous errors in tracking, while the professionals' tracking ability did not decrease even at the highest alcohol concentration (Billings, 1972). The study noted, however, that the professional pilots committed more procedural errors than normal after alcohol consumption. Compounding factors, such as fatigue and unexpected challenges, are likely to affect results in a real-world situation.

Most States have adopted an alcohol concentration of 0.10 as the definition of intoxication in connection with laws on driving under the influence for non-commercial as well as for commercial operators. Some use it as a rebuttable presumption of a violation; others as a *per se* violation. Five states have lowered their alcohol concentration standards to 0.08; and a number of states are in the process of considering adoption of the 0.04 FHWA alcohol concentration standard for commercial drivers. States with alcohol concentration standards for operating recreational vessels or aircraft typically use 0.10.

As indicated above, however, a number of laboratory studies have shown that performance on some tasks can begin to degrade at alcohol concentrations well under 0.10 (Moskowitz, 1973; Drew, 1959; Landauer, 1983). Some studies have suggested that performance degrades in a linear fashion, beginning with the lowest levels tested (Moskowitz, 1985; Drew, 1959). Blood alcohol concentrations (BAC) lower than 0.05 have been associated with increases in errors in tasks requiring divided attention, and it appears that cognitive performance is decreased for most individuals at BAC's of 0.04 or less (Zero Alcohol, 1987; Evans, 1974). Low alcohol concentrations have also been shown to affect a driver's stopping distance and to increase errors in steering (Laurell, 1977). There is no definitive answer to how much the risk of accident occurrence increases as a result of the performance deficit, but some relationship can be assumed. Those OAs in the Department that have set allowable alcohol concentrations for transportation workers (FAA, FHWA, FRA and Coast Guard) generally have used 0.04 as the prohibited concentration.

The Alcohol Problem—Generally

The National Institute on Alcohol Abuse and Alcoholism (NIAAA) reported in 1987 that two of every three adults in the United States drink, but 10 percent of those drinkers consume half of the nation's beer, wine and liquor. The National Institute on Drug Abuse (NIDA) reported that an estimated 17 million U.S. adults are alcoholics, which is about six times higher than the number of cocaine users. (NIDA study, 1989). While it is difficult to estimate the precise cost to society from alcohol misuse, there is no doubt that the cost is enormous. The potential effects of alcohol misuse are substantial in terms

of lives lost, personal injuries, property damage, business losses (lost productivity, absenteeism, increased health care costs, etc.) and environmental damage.

According to a Research Triangle Institute study performed for the Department of Health and Human Services, the overall economic cost to American society from alcohol misuse was $89.5 billion in 1980. This amount represents direct costs, such as medical treatment, and indirect costs, such as lost wages and reduced productivity. In 1987, the NIAAA estimated the economic costs to society of alcohol misuse to be nearly $117 billion a year, including $18 billion from premature deaths, $66 billion in lost productivity, and $13 billion for rehabilitation. Assuming the base numbers are still the same, inflation presumably has increased the cost in current dollars.

Alcohol Misuse in the Transportation Industry

General

Generally, the Department's previous alcohol misuse prevention efforts have focused on alcohol as it affects an individual's medical qualifications; prohibitions against on-duty use, operating while under the influence, and, in certain cases, use during defined pre-duty periods; and sanctions for violations of the Federal regulatory scheme, as well as sanctions for violations of State alcohol laws. Thus alcohol testing, with limited exceptions, has been left to State enforcement. (Current FRA rules require post-accident and authorize reasonable cause testing. The FAA requires crewmembers to submit to State tests upon request and to furnish the results to the Administrator. The Coast Guard also has existing requirements concerning alcohol misuse, including some testing.) Each of the following sections briefly describes the existing OA rules on alcohol and contains Departmental data on the alcohol problem in each segment of the transportation industry. We specifically invite commenters to provide to the appropriate OA docket any additional relevant data about the alcohol problem in the different modes of transportation.

Aviation

The current FAA regulations prohibit a person from acting or attempting to act as an aircraft crewmember if he or she is under the influence of alcohol, has consumed any alcoholic beverage within the prior 8 hours, or has an alcohol concentration of 0.04 or greater. The FAA may medically disqualify a pilot with a history of drug dependence, alcoholism, or mental problems. Since having a valid medical certificate is an essential job qualification for a pilot, a pilot lacking such a certificate is not a "qualified individual with a disability," and the Americans with Disabilities Act of 1990 (ADA) does not require an aviation employer to provide "reasonable accommodation" to such an individual.

In 1987, the Department's Inspector General checked the National Driver Register (NDR) against records in the Florida Department of Motor Vehicles; it found that nearly 8,000 FAA-certified pilots in Florida had been convicted of drunk-driving offenses. Recent legislation allowed FAA and the rail industry to use the NDR to locate and review individual driving records to screen qualifications of airline pilots and locomotive engineers. The FAA was unaware of these DUI convictions because the pilots had not reported them to the FAA as required. The FAA then issued a DUI enforcement policy and a rule that includes, among other matters, a process for examining driving records. Pilots with 2 or more drug- or alcohol-related driving offenses within 3 years are subject to FAA certificate revocation action.

There has never been an accident involving a large U.S. passenger airline in which the probable cause was attributed to alcohol use. However, in August 1990, three Northwest Airlines pilots were sentenced for flying while intoxicated between Fargo, ND, and Minneapolis, MN. Two hours after the flight ended, the crew captain's alcohol concentration was found to be 0.13; he testified that he drank 20 rum and cokes the night before the 6:00 AM flight. Starting in the early 1970's, the Air Line Pilots Association and the major airlines, in cooperation with the FAA, developed a program to identify alcoholic pilots, so that they could be treated and, as appropriate, returned to duty. More than 1,500 pilots have been through this program, with a relapse rate of approximately 10 percent. Since the program provides for stringent surveillance of treated pilots, there has been no compromise of safety. Nevertheless, the existence of such an extensive program and the occurrence of the Northwest pilots incident demonstrate that the air carrier industry is not immune to the problem of alcohol misuse. We do not have any data, however, on the costs of alcohol misuse in terms of lost productivity and increased medical expenses.

The National Transportation Safety Board (NTSB) has collected the following data concerning the relationship between alcohol and aviation accidents. From 1975 through 1986, eleven part 135 carriers (all except one were commercial air taxi cargo planes; the exception was a non-scheduled charter carrier with a foreign crew) were involved in accidents in which alcohol was determined to be a factor. As noted above, there have been no part 121 or part 135 (large or air taxi/commuter air carrier) accidents in which alcohol has been determined to be a cause.

Motor Carriers

Currently, drivers found to be under the influence of alcohol or drugs are disqualified from operating a commercial motor vehicle (CMV), or any vehicle subject to the Federal Motor Carrier Safety Regulations (FMCSRs). FHWA regulations prohibit the use of alcoholic beverages within four hours of reporting to work and also prohibit a driver from working while having any measurable alcohol concentration or any detected presence of alcohol in his or her system. This effectively amounts to a zero alcohol limitation for CMV operators. In addition, a driver will not be considered physically qualified to drive a motor vehicle if, among other things, the driver is an active alcoholic. On October 4, 1988, FHWA issued requirements that, by October 1, 1993, states must adopt regulations whereby a commercial motor vehicle (CMV) operator convicted of having an alcohol concentration of 0.04 or above will be deemed to be DUI and subject to a disqualification of at least one year, or the states will lose a percentage of federal-aid highway funds. These alcohol concentration regulations are integral to the commercial driver's license (CDL) program, a nationwide restructuring (under FHWA and state auspices) of testing, licensing, and disqualification procedures for CMV operators. Mandated by the Commercial Motor Vehicle Safety Act of 1986, the CDL program includes a national clearinghouse through which states exchange commercial drivers' record information, including the alcohol concentrations of convicted drivers.

Accident statistics indicate that nearly half of the fatally injured noncommercial motor vehicle drivers had a measurable amount of alcohol in their blood (usually 0.10 or more) compared with about 15 percent of fatally injured drivers of medium and heavy trucks. Moreover, as the chart below indicates, for those truck drivers who had been drinking before an accident, the highest accident rate was among those consuming the most alcohol. Drivers of heavy and medium

trucks with measurable alcohol concentrations are involved in about 750 fatal crashes annually, along with another 7,700 crashes resulting in personal injuries and 4,750 crashes involving only property damage (Zero Alcohol, 1987).

	Percentage of all fatal truck accidents	Percent of the 15% of truck drivers who had alcohol in their blood
No Truck Driver Use of Alcohol	85.0	N/A
AC = 0.10 or more	9.1	60
AC = 0.04-0.10	2.7	18
AC = .03 or less	3.2	21

(Zero Alcohol, 1987) (FARS data tapes, 1982–1985) (AC means alcohol concentration).

In 1990, the NTSB published the results of a study of alcohol (and other drugs) used by CMV operators in fatal-to-the-driver, heavy truck accidents. Thirteen percent of the fatally injured drivers tested positive for alcohol. (Another 20 percent of the drivers tested positive for other drugs.) We also know that the cost of accidents to employers is substantial, over and above the lives lost, whether CMV accidents are caused by alcohol or something else. The National Safety Council estimates that an on-the-job accident is four times more costly than one that occurs in a personal vehicle, with an average cost to employers of $168,000 for a fatal accident and $6,900 for a non-fatal accident. The impact of on-the-job accidents caused by alcohol on employer costs is quite significant.

Rail

Current FRA regulations (49 CFR part 219) prohibit on-the-job use of, possession of, or impairment by, alcohol or any controlled substance, or having an alcohol concentration of 0.04 or more, for employees covered by the Hours of Service Act. FRA further prohibits any employee who performs service under the Hours of Service Act from using a controlled substance at any time, whether on duty or off-duty, except as authorized, and at the prescribed dosage, by a medical practitioner who is aware of the employee's duties. If a railroad determines that there is reason to believe that a covered employee has used a controlled substance, as evidenced by the results of certain tests, the railroad must immediately remove the employee from covered service.

Operation RedBlock is a peer prevention substance abuse program. Workers who use controlled substances or who report for duty under the influence can be identified, removed from the workplace, and referred for assistance. The covered employee can be referred for assistance by a peer, a supervisor or himself/herself. From February 1986, when mandatory FRA post-accident blood testing for alcohol began, through December 1991, 22 employees tested positive for alcohol (0.6 percent of employees tested). However, the number of positive findings has declined dramatically from 6 (1.0 percent of all persons tested) in 1989, to 1 (0.2 percent of all persons tested) in 1990. In 1991, 2 alcohol positives were recorded (0.4 percent of all tested.)

Since 1986, however, alcohol appears to have played a causal role in 10 accidents/incidents involving four deaths, three injuries, and property damage in excess of $3.2 million. In one, the engineer tested positive at an alcohol concentration of 0.16, and alcohol was found by the NTSB to be a contributing factor to the accident. The incident caused $1.58 million damage and the death of the engineer. In another accident, eight injuries and $194,000 in damages resulted, and a dispatcher tested positive at 0.15 alcohol concentration. In a 1990 accident, an engineer tested positive with an alcohol concentration of 0.05 after his train passed a stop signal and collided with another train, resulting in one injury and nearly $500,000 in property damage. In 1991, two brakemen were killed, one by a train when struck during a switching operation and the other when he fell from the side of a train. Post-mortem toxicology revealed alcohol concentrations of 0.04 and 0.08, respectively.

Reasonable cause breath testing under the FRA program or pursuant to railroad authority (triggered by rule violations, less serious accidents and injuries, or reasonable suspicion) has produced the following results: 11 of 348 persons so identified tested positive in 1986 (3.2 percent); 24 of 593 tested positive in 1987 (4.0 percent) 46 of 1005 tested positive in 1988 (4.6 percent); 31 of 973 tested positive in 1989 (3.2 percent); 32 of 2662 tested positive in 1990 (1.2 percent) and 37 of 2798 tested positive in 1991 (1.3 percent). FRA regulations define a "positive" breath test as one indicating an alcohol concentration of 0.02 or above. The significance of these results with respect to measuring prevalence in the population is difficult to determine, since some of the tests were performed because of reasonable suspicion of recent use. It should be expected that a high percentage of reasonable suspicion tests will be positive, since prohibited use or impairment had already been identified or suspected.

Mass Transit

FTA does not have any existing regulations concerning alcohol. Its primary mission is to provide grants for the financing and improvement of mass transportation systems. Many of FTA's grantees, however, are subject to other Federal requirements on alcohol use. All commuter rail operations funded by FTA, for example, are subject to FRA regulations.

The need for alcohol testing of mass transit employees recently was highlighted by a December 28, 1990, accident in Boston, Massachusetts, where a mass transit operator, with an alcohol concentration above 0.10, crashed a trolley car, injuring 33 people. In addition, the Senate Committee on Commerce, Science, and Transportation's report on S. 676, No. 102–54, (May 2, 1991), noted that in Philadelphia alone, transit operators have tested positive for drug or alcohol use in six major accidents between 1986 and 1990, involving at least 183 injuries and three deaths. (Separate figures for drug and alcohol involvement were not provided.) On August 28, 1991, a motorman later found to have an alcohol concentration of 0.21 crashed a subway train resulting in 5 deaths and 171 injuries; this accident broke the Congressional impasse on alcohol/drug testing legislation and led to the prompt passage of the Act. Following issuance of the 1988 FTA anti-drug rulemaking, some industry members indicated that alcohol is a more serious problem than drugs. One transit-specific survey indicates that between 1982 and 1985, only five out of 1,210 bus drivers tested positive for alcohol following a fatal accident. However, information originating from industry sources indicates that transit bus drivers are heavier drinkers than the general population (U.S. Census Bureau, 1984). One survey found that 57 percent of bus drivers drink alcohol at least weekly, with an average consumption of nine alcoholic drinks per week; the national median is six drinks per week (U.S. Census Bureau, 1984).

An FTA document entitled, "Substance Abuse in the Transit Industry," November 1991 (prepared under the UMTA nomenclature), was based upon a transit agency survey and an employee survey. Responding transit managers perceived alcohol as the major substance of misuse. Fifty-eight percent of the transit systems test for alcohol. Employee knowledge of coworker use of alcohol was extensive; about 70 percent

of employees surveyed had some knowledge, either through hearsay or by direct observation, of alcohol impairment of colleagues in the workplace during the past year. About six percent of the safety-sensitive employees reported alcohol use during or just before duty. Another 15 percent of the safety-sensitive employees reported less frequent alcohol consumption, but at nearly similar volume as those employees noted above. When comparing these data with those contained in the "National Household Survey on Drug Abuse: Population Estimates 1988" and the comparable 1990 NIDA survey, it appears that reported alcohol use in the transit industry is slightly lower than that reported for the general population.

Pipeline

RSPA has no specific regulations on alcohol. It does have a general regulation on health of pipeline workers at liquefied natural gas plants. Pipeline operators must look for any physical condition that would impair performance, including any observable disorder or condition that is discoverable by a professional examination.

We have no specific data on alcohol-related accidents or lost productivity data in this area; however, a number of the commenters in the anti-drug rulemaking seemed to believe that alcohol is a more pervasive problem than drugs in the pipeline industry. We also are aware that many companies in the pipeline industry are known to have alcohol prevention programs, but we do not have statistics or data on the prevalence of the problem in the industry. Although we recognize that the largest single cause of pipeline accidents is excavation damage by people digging into pipelines (people not regulated by RSPA), we specifically request public comment and data on alcohol misuse and its relationship to safety problems in the pipeline industry.

Legal Authority/Issues

General

The Omnibus Transportation Employee Testing Act of 1991 is a direct statutory mandate for the proposed alcohol testing in the aviation, motor carrier, rail, and mass transit industries. In addition to this authority, the general safety authority relied on for issuing the drug testing rules described above also provides a basis for issuing alcohol misuse prevention rules by FAA, FHWA, FRA, and RSPA. Although the existing case law addressing the constitutionality of employee alcohol testing programs remains more sparse than that for drug testing, the Department believes that existing legal precedents support this rulemaking effort to require alcohol testing in the regulated transportation industries.

Consistent with court findings in the area of government-mandated drug testing of employees, alcohol testing mandated by the government is considered a search within the meaning of the Fourth Amendment to the U.S. Constitution. See, *Schmerber* v. *California*, 384 U.S. 757, 767–768 (1966)("compelled intrusions into the body for blood to be analyzed for alcohol content" must be considered a Fourth Amendment search); *Skinner* v. *Railway Labor Executives' Association*, 489 U.S. 616–617 (1989) ("Subjecting a person to a breathalyzer test, which generally requires the production of alveolar or 'deep lung' breath for chemical analysis * * * implicates * * * concerns about bodily integrity and, like the blood-alcohol test * * * considered in *Schmerber*, should also be deemed a search.")

In deciding whether a particular search comports with Fourth Amendment protections, courts must determine that under all the particular circumstances the search itself is "reasonable." As the leading case on bodily fluid testing, *Skinner* v. *Railway Labor Executives' Association*, makes clear, issuance of a warrant or the existence of probable cause or individualized suspicion is not a minimum essential requirement in establishing the reasonableness of a search under an administrative testing program.

In *Skinner (id.)*, the Supreme Court upheld regulations issued by the Federal Railroad Administration governing drug and alcohol post-accident and reasonable cause testing of railroad employees (49 CFR part 219). The Court concluded that the testing procedures and methods of procuring blood, breath, or urine for testing as set forth in subparts C and D of the FRA regulations "pose only limited threats to the justifiable expectations of privacy of covered employees." 489 U.S. 628. In specifically focusing on the privacy implications of breath alcohol tests, the Court also pointed out that:

> The breath tests authorized by subpart D of the regulations (testing for reasonable cause) are even less intrusive than the blood tests prescribed by subpart C (post-accident toxicological testing). Unlike blood tests, breath tests do not require piercing the skin and may be conducted safely outside a hospital environment and with a minimum of inconvenience or embarrassment. Further, breath tests reveal the level of alcohol in an employee's bloodstream and nothing more. Like the blood-testing procedures mandated by subpart C, which can be used only to ascertain the presence of alcohol or controlled substances in the bloodstream, breath tests reveal no other facts in which the employee has a substantial privacy interest. * * * In all the circumstances, we cannot conclude that the administration of a breath test implicates significant privacy concerns. *Id.*, at 625–626.

While the Court indicated that the collection of urine samples requires employees "to perform an excretory function traditionally shielded by great privacy, [thus] rais[ing] concerns not implicated by blood or breath tests[,]" it pointed out that the FRA collection procedures significantly reduced the degree of personal privacy intrusion. *Id.*, at 626. The Court also examined the overall privacy expectations of covered railroad workers subject to the FRA testing requirements. It concluded that these expectations "are diminished by reason of [covered employees'] participation in an industry that is regulated pervasively to ensure safety * * * *Id.*, at 627.

By contrast, the Court found that the government's interests in seeking to determine the cause of an accident or incident, deterring alcohol and illegal drug use by rail employees, and safeguarding the general public are compelling. Under these circumstances, the Court held that alcohol and drug testing pursuant to the FRA regulations are reasonable within the meaning of the Fourth Amendment. Also, the Court found that the government's justification in testing for misuse of alcohol—a legal substance—was entitled to no less weight than its justification for testing for drugs, the possession of which is unlawful. Thus, as the Court pointed out, the FRA-prescribed toxicological tests were not designed "to assist in the prosecution of employees, but rather 'to prevent accidents and casualties in railroad operations that result from impairment of employees by alcohol or drugs.'" *Id.*, at 621–622, 633 (quoting FRA regulations at 49 CFR 219.1(a)).

The proposed alcohol testing requirements for transportation industry workers published by each of the OAs in today's Federal Register are consistent with the Court's views in *Skinner*. Given the overwhelming public safety considerations associated with alcohol testing programs and the limited degree of intrusion into individual privacy interests engendered by the tests, testing programs along the lines proposed would be constitutionally permissible under the Fourth Amendment.

Also, the proposed requirement that an employer perform random alcohol testing that is performance-related, *i.e.*, related closely in time to an employee's actual performance of safety-related duties, further demonstrates the reasonableness of the proposal for Fourth Amendment purposes by ensuring that testing for misuse of alcohol is clearly related to the employee's performance of these duties. However, it is important to point out that performance-related testing is not an irreducible minimum requirement for ensuring that such testing passes Fourth Amendment muster. As a number of courts have pointed out, the reasonableness of a testing program does not necessarily turn on the existence of other alternatives that might be less intrusive. See *American Federation of Government Employees* v. *Skinner*, 885 F.2d 884, 897 (1989), *cert. denied*, 495 U.S. 923–924 (1990).

The lack of a demonstrated substance abuse problem among the workforce in a particular industry should not, of itself, pose insurmountable constitutional impediments to a testing program for that workforce. This point was made clear by the Supreme Court in *National Treasury Employees Union* v. *Von Raab*, 489 U.S.674–675 (1989), which was decided the same day as *Skinner*. In *Von Raab*, the Court upheld urinalysis testing for illegal drugs of U.S. Customs Service employees slated for promotions into positions that involved either interdicting illegal drugs or carrying a firearm. Despite the Commissioner of Customs stated belief that "Customs is largely drug-free," the Court concluded that there was little reason to suspect that the Customs Service was "immune" from society's pervasive drug abuse problem and held that the testing program was constitutionally defensible as a means to ensure that employees promoted to these sensitive positions are drug-free. *Id.*, at 660, 674. It stated that the government does not have to first establish that a specific industry has a problem. ("It is sufficient that the government have a compelling interest in preventing an otherwise pervasive societal problem from spreading through the particular context.") *Id.*, footnote 3.

Skinner and *Von Raab* established the analytical framework for courts to resolve constitutional challenges to various employee substance abuse testing programs. Not surprisingly, Federal courts reviewing anti-drug abuse regulations issued by the Department have relied extensively on these two decisions in upholding drug testing of safety- and security-sensitive workers in industries regulated by the Department. See, *Bluestein* v. *Skinner*, 908 F.2d 451 (9th Cir. 1990), *cert. denied*, 111 S.Ct. 954 (1991) (upholding constitutionality of Federal Aviation Administration regulations requiring random drug testing of flightcrew members, maintenance personnel, and other categories of employees in the commercial aviation industry); *International Brotherhood of Teamsters* v. *Department of Transportation*, 932 F.2d 1292 (9th Cir. 1991) (upholding constitutionality of Federal Highway Administration regulations requiring random, biennial, pre-employment and post-accident drug testing of commercial motor vehicle drivers operating in interstate commerce); *Railway Labor Executives' Association* v. *Skinner*, 934 F.2d 1096 (9th Cir. 1991) (upholding constitutionality of Federal Railroad Administration's regulations requiring random drug testing of railroad workers in safety-sensitive positions); *International Brotherhood of Electrical Workers* v. *Skinner*, 913 F.2d 1454 (9th Cir. 1990), and *United Steelworkers of America* v. *Skinner*, 768 F. Supp 30 (D. RI 1991)(upholding constitutionality of Research and Special Programs Administration's regulations requiring random, pre-employment, and post-accident drug testing of safety-sensitive employees engaged in natural gas, liquefied natural gas, and hazardous liquid pipeline operations.) See also, *Transportation Institute* v. *Coast Guard*, 727 F. Supp. 648 (D.D.C. 1989) (upholding constitutionality of Coast Guard regulations requiring pre-employment, periodic, post-casualty, and reasonable cause drug testing for merchant marine personnel; however, regulations requiring random drug testing of all vessel crewmembers were found to violate the Fourth Amendment because the safety-sensitive duties performed by this entire class of employees was not evident. Although the court noted that random testing for employees could be constitutionally acceptable, it held that the Coast Guard had not adequately described the safety-sensitive functions of the covered employees to allow the court to establish the necessary nexus. The missing safety nexus was established in a subsequent Coast Guard final rule reimplementing random drug testing).

Even pre-*Skinner* and *Von Raab* court decisions addressing the constitutionality of various employee alcohol testing programs have concluded that such testing comports with the Fourth Amendment. Thus, a state regulation requiring jockeys to submit to mandatory warrantless breath alcohol tests on each racing day was found to be constitutionally permissible. *Shoemaker* v. *Handel*, 795 F.2d 1136 (3d Cir.), *cert. denied*, 479 U.S. 986 (1986). Similarly, alcohol and drug testing during a pre-employment physical examination, work-related examination, return to work after unscheduled absence, or on the basis of reasonable suspicion or involvement in an accident or incident was upheld in the case of mass transit employees directly involved in the operation, maintenance, and decisionmaking of a public transit system. *Amalgamated Transit Union, Local 933* v. *City of Oklahoma City*, 710 F. Supp. 1321 (W.D. Okla. 1988). *Accord, Amalgamated Transit Union, Division 1279* v. *Cambria County Transit Authority*, 691 F. Supp. 898 (W.D. Pa. 1988)(mandatory drug and alcohol testing during annual physical examination does not violate Fourth Amendment).

Also, several more recent Federal court decisions upheld employee alcohol testing in the wake of *Skinner*. Thus, in *Transport Workers Union, Local 234* v. *Southeastern Pennsylvania Transportation Authority*, 863 F.2d 1110 (3d Cir. 1988), *vacated and remanded*, 492 U.S. 902 (1989), *aff'd on remand sub nom. United Transportation Union* v. *Southeastern Pennsylvania Transportation Authority*, 884 F.2d 1110 (1989), the U.S. Court of Appeals for the Third Circuit upheld, *inter alia*, random breath testing of mass transit operating employees. See also, *Tanks* v. *Greater Cleveland Regional Transit Authority*, 930 F.2d 475 (6th Cir. 1991) and *Holloman* v. *Greater Cleveland Regional Transit Authority*, 741 F. Supp. 677 (N.D. Ohio 1990), affirmed, 930 F.2d 918 (6th Cir. 1991) (upholding transit authority's drug and alcohol testing program requiring testing of blood, saliva, and urine in the face of challenges by two bus drivers subjected to random, post-accident, and periodic testing); *Moxley* v. *Regional Transit Services*, 722 F. Supp. 977, 980 (W.D. NY 1989) (upholding constitutionality of transit authority's drug and alcohol testing program and noting that "the Government's interest in the efficient and proper operation of the workplace is at a zenith where public's [sic] lives depend on the reliable and sober performance of Government employees").

Consistent with the Supreme Court's analysis in *Skinner* and *Von Raab* and lower court decisions, if the Congress determines that there is a need for properly-administered alcohol testing to ensure that employees in transportation

industries are not impaired while performing sensitive safety-related functions, that need would outweigh the privacy interests of these employees and, thus, would be constitutionally permissible.

The Americans With Disabilities Act of 1990

The Americans with Disabilities Act of 1990 (ADA) does not, in any way, preclude or interfere with employers' compliance with the Department's proposed or existing drug and alcohol testing regulations. However, Title I of the ADA, which prohibits discrimination against a "qualified individual with a disability," may affect the personnel actions an employer might wish to take with respect to some individuals who test positive for alcohol or drugs or otherwise violate the prohibitions of the Department's drug and alcohol rules.

Title I covers employers who have fifteen or more employees for more than 20 calendar weeks in a year (Section 101(5)(A)). Until July 26, 1994, only employers with 25 or more such employees are covered. Covered employers may not discriminate against a qualified individual with a disability with respect to applications, hiring, advancement, discharge, compensation, or other terms, conditions or privileges of employment (Section 102(a)).

Before discussing the effect Title I may have on employer personnel actions following a positive DOT-mandated drug or alcohol test or other violations of DOT drug and alcohol rules, it is important to note the specific ADA provisions that address DOT drug and alcohol rules. The ADA specifically authorizes employers to require that employees comply with the standards established in regulations of the Department of Transportation if the employees of the covered entity are employed in a transportation industry subject to such regulations, including complying with such regulations (if any) that apply to employment in sensitive positions in such an industry, in the case of employees of the covered entity who are employed in such positions (as defined in the regulations of the Department of Transportation). (Section 104(c)(5)(C)). By authorizing employers to require employees to comply with the standards in DOT rules, this provision authorizes compliance not only with testing provisions of the rules but also of other drug and alcohol-related provisions that affect safety-sensitive employees (e.g., pre-duty abstinence, on-the-job use). The legality under the ADA of employer compliance with DOT drug and alcohol requirements other than those concerning testing is underlined by several other provisions of Title I. An employer may prohibit the use of drugs and alcohol in the workplace, may require that employees not be under the influence of alcohol or be engaging in the illegal use of drugs in the workplace, and may require that employees conform to the requirements of the Drug-Free Workplace Act (section 104(c)(1–3)).

Concerning drug and alcohol testing and its consequences, the statute further provides that nothing in this title shall be construed to encourage, prohibit, restrict, or authorize the otherwise lawful exercise by entities subject to the jurisdiction of the Department of Transportation of authority to (1) test employees of such entities in, and applicants for, positions involving safety-sensitive duties for the illegal use of drugs and for on-duty impairment by alcohol; and (2) remove such persons who test positive for illegal use of drugs and on duty-impairment by alcohol pursuant to paragraph (1) from safety-sensitive duties in implementing subsection (c). (Subsection (c) includes the statutory language cited above.) (Section 104(e)). These ADA provisions clearly specify that the ADA does not interfere with the compliance by covered employers with DOT regulations concerning drug and alcohol use, including requirements for testing and for removing persons who test positive from safety-sensitive functions. Under the ADA, an employer is not viewed as "discriminating" for following the mandates of DOT drug and alcohol rules.

In considering the effects on the personnel actions that employers choose to take after a safety-sensitive employee tests positive for drugs or alcohol or otherwise violates DOT drug or alcohol rules, it is important to note that the ADA's prohibition of employment discrimination applies only with respect to a "qualified individual with a disability." The ADA specifically provides that an employee or applicant who is currently engaging in the illegal use of drugs is not a "qualified individual with a disability" (section 104(a)). The ADA does not protect such an employee from adverse personnel actions. For purposes of the ADA, the drugs that trigger this provision are those they use, possession or distribution of which is prohibited by the Controlled Substances Act (section 101(6)). The five drugs for which DOT mandates tests fit this definition (alcohol is not a drug covered by the Controlled Substances Act).

What does "currently engaging" in the illegal use of drugs mean? According to the Equal Employment Opportunity Commission (EEOC), whose rules carry out Title I, the term "currently engaging" is not intended to be limited to the use of drugs on the day of, or within a matter of days or weeks of, the employment action in question. Rather, the provision is intended to apply to the illegal use of drugs that has occurred recently enough to indicate that the individual is actively engaged in such conduct. (56 FR 35745–46, July 26, 1991). It is clear that an individual who fails a DOT-mandated drug test is currently engaging in the illegal use of drugs. Therefore, under Title I, an employer may discharge or deny employment to an individual who fails a DOT-mandated drug test.

This provision that an individual who is currently engaging in the illegal use of drugs is not a "qualified individual with a disability" does not apply, of course, if the individual is erroneously regarded as engaging in the illegal use of drugs. In addition, if an individual, even a former user of illegal drugs, is not currently engaging in the illegal use of drugs and has successfully completed a supervised rehabilitation program or otherwise has been successfully rehabilitated, or is participating in a supervised rehabilitation program, the individual can continue to be regarded as a "qualified individual with a disability," if the individual is otherwise entitled to this status (section 104(b)). An employer may seek reasonable assurance that an individual is not currently engaging in the illegal use of drugs (including requiring a drug test) or is in or has completed rehabilitation. Some employers (EEOC uses the example of a law enforcement agency) may also be able to impose a job qualification standard that would exclude someone with a history of drug abuse if they can show that the standard is job-related and consistent with business necessity (56 FR 35746, July 26, 1991).

Unlike the situation with respect to the current use of illegal drugs, the use of alcohol contrary to law, Federal regulation, or employer policy does not deprive an individual of status as a "qualified individual with a disability" that he or she would otherwise have under Title I. An individual is protected by Title I, however, only if the individual has a disability in the first place. (This is also true with respect to a former drug user or any other individual who seeks the protection of the ADA.) To have a disability, an individual must have a "physical or mental impairment that substantially limits one or more major life activities of such individual, a record of such

impairment, or being regarded as having such an impairment" (section 1(2)). While, as the EEOC notes in its Title I regulation, "individuals disabled by alcoholism are accorded the same protections accorded other individuals with disabilities" (56 FR 35752, July 26, 1991), not all individuals who use alcohol in violation of law, Federal regulation, or employer policy are "disabled by alcoholism."

The courts interpreting section 504 of the Rehabilitation Act of 1973 (with which ADA employment provisions are intended to be consistent) have concluded that alcoholism can be a disability which may call for reasonable accommodation. See, e.g. *Walker* v. *Weinberger*, 600 F. Supp. 757 (D.D.C., 1985); *Tinch* v. *Walters*, 765 F.2d 599 (6th Cir., 1985); *McKelvey* v. *Walters*, 596 F. Supp.1317 (D.D.C., 1984); *Anderson* v. *University of Wisconsin*, 665 F. Supp. 1372 (W.D. Wis., 1987), aff'd 841 F.2d 737 (7th Cir., 1988); *Richardson* v. *Postal Service*, 613 F. Supp. 1213 (D.D.C., 1985); *Sullivan* v. *City of Pittsburgh*, 811 F.2d 171 (3rd Cir., 1987).

The logic of the ADA, and EEOC's regulatory provisions implementing the statute, suggest that, in determining whether an employee or applicant who fails a DOT-mandated alcohol test or otherwise violates a DOT alcohol rule is disabled by alcoholism, the employer would answer two questions. First, does the individual have a physical or mental impairment; e.g., is the individual an alcoholic? (It seems clear that, in most cases, someone who is merely a recreational drinker would not have a physical or mental impairment related to alcohol use.) This question would probably have to be answered with the assistance of a physician or substance abuse professional. Second, if the individual is an alcoholic, does this impairment substantially limit a major life activity or is it regarded as substantially limiting a major life activity? This question would be answered on a case-by-case basis, following EEOC's guidance (see 56 FR 35740–44, July 26, 1991). It is likely that, under DOT's proposed alcohol rules, these determinations would be made by or in cooperation with the substance abuse professional that the proposed rules would require to be involved following a positive test or rule violation.

If the individual is determined to be disabled by alcoholism, then the employer may not discriminate against the individual on the basis of his or her disability and must make "reasonable accommodations" to the individual's known physical or mental limitations, unless the employer can demonstrate that doing so would impose an "undue hardship" on the employer's business.

The selection of an appropriate "reasonable accommodation" is done on a case-by-case basis, as EEOC guidance provides (See 56 FR 35744, July 26, 1991). Reasonable accommodation for an individual disabled by alcoholism could include such actions as referral to an Employee Assistance Program or other rehabilitation program, provision of rehabilitation services, and giving an employee sufficient time to demonstrate that rehabilitation had been successful. *See, e.g., Washington* v. *Department of the Navy*, 30 M.S.P.R. 323 (1986); *Swafford* v. *Tennessee Valley Authority*, 18 M.S.P.R. 481 (1983).

Even when an individual is disabled by alcoholism, however, the employer is not required to provide a reasonable accommodation that creates an "undue hardship." Undue hardship involves significant difficulty or expense in, or resulting from, providing an accommodation. EEOC describes an undue hardship as "an accommodation that would be unduly costly, extensive, substantial or disruptive, or that would fundamentally alter the nature or operation of the business." (*Id.*) This concept takes into account the financial resources of the employer (e.g., an accommodation that would be reasonable for a large business may be an undue hardship for a small business). But the concept is not limited to financial difficulty. For example, if a small trucking company with two drivers determined that the accommodation that one of them needed for an alcoholism-related disability was lengthy in-patient rehabilitation, the company not only might find the accommodation beyond its financial resources but also too disruptive of its operations (i.e., a temporary replacement would have to be hired or the work of the firm be halved).

Under title I, an employer may hold an employee who engages in the illegal use of drugs or who is an alcoholic to the same qualification standards for employment or job performance or behavior as it holds other employees, even if any unsatisfactory performance or behavior is related to the drug use or alcoholism of the employee (Section 104(c)(4)). For example, if, as the result of alcoholism, an employee is chronically late or absent, or makes frequent job errors, the employee would be subject to personnel action on the same basis as any other employee who exhibited similar behavior for other reasons.

There are also situations in which meeting qualification standards of DOT safety rules, or having a valid license or certificate from a DOT operating administration, is an essential job qualification. If a truck driver does not meet FHWA qualification standards to obtain a Commercial Driver's License from a state, or if a pilot does not qualify for an FAA medical certificate, that individual is not a "qualified" individual with a disability, even if the reason for the failure to meet DOT qualifications is a condition that an employer might be required to accommodate under the ADA. The legislative history of the ADA specifically recognizes this special status for DOT qualification standards (See Senate Report 101–116 at 27, August 30, 1989).

Overview of the Operating Administrations' Proposed Rules

Purpose

Each of the OAs is proposing to establish alcohol testing programs designed to help prevent accidents and injuries resulting from the misuse of alcohol by employees who perform safety-sensitive functions in the industry under its purview. Generally, the rules would prohibit any alcohol misuse that could affect performance of a safety-related function, including (1) Use on the job, (2) Use during the four hours (in most cases) before performance of a safety-sensitive function, (3) Having prohibited concentrations of alcohol in the system while performing safety-sensitive functions, (4) Exhibiting behavior and/or appearance characteristic of alcohol misuse or an adverse effect on the employee's ability to perform due to alcohol misuse while performing safety-sensitive functions, and (5) Use following an accident. The rules would require pre-employment, reasonable suspicion (which is comparable to reasonable cause testing as used in the DOT OAs' drug rules and as discussed in the DOT ANPRM on alcohol testing), random, post-accident, return-to-duty and follow-up testing for alcohol using an evidential breath testing device; refusal to take a required test would be prohibited. The primary purpose of the testing provisions is to deter misuse of alcohol. For those who persist in their misuse of alcohol, these tests also would provide for detection.

The proposed part 40 procedural rule published elsewhere in this **Federal Register** provides for two tests to ensure accuracy: an initial and a confirmatory test. Following a determination that an employee has misused alcohol, as

determined through testing or other means, the rules generally would require the employees removal from safety-related functions and provide a bifurcated system of consequences:

(1) Following a determination that the employee has violated prohibitions in these rules, an employee must be removed from and could not be returned to a safety-sensitive function until, at a minimum,

(a) The employee undergoes evaluation, and where necessary, rehabilitation,

(b) A substance abuse professional determines that the employee has successfully complied with any required rehabilitation,

(c) The employee tests at less than 0.02, and

(d) The employer determines that the employee can resume safety-sensitive functions;

(2) An employee with an alcohol concentration of 0.02 or greater but less than 0.04 would not be permitted to perform safety-sensitive functions for

(a) A minimum of eight hours or

(b) Until a retest shows that the alcohol concentration has dropped below 0.02.

The proposed rules also would impose reporting and recordkeeping requirements and provide for alcohol misuse information for employees, supervisor training, and referral of employees to employee assistance programs (EAPs).

There are some differences among the OA NPRMs. For example, some OAs have regulatory authority over employers/companies only; others have regulatory authority over employees. Also, employees holding a license or certificate may be subject to customary agency action against their license or certificate in addition to the consequences proposed for violations of these rules. See the individual OA preambles for an explanation of any differences from the general requirements discussed above.

Applicability

The OA existing drug rules generally cover persons who perform sensitive safety- or security-related functions in commercial transportation. They affect approximately 4 million persons and include, for example, commercial truck drivers, pilots, pipeline employees, licensed and documented mariners and others serving on board a vessel with a licensed operator, and railroad workers subject to the Hours of Service Act. (An FTA proposed rule published in today's **Federal Register** would add drug testing for such workers as transit bus and subway operators.) If the proposed alcohol testing rules covered the same population, the inclusion of intrastate truck and motor coach operations (including those operated by Federal, State and local government agencies, church and civic organizations, farmers and for-hire companies) under the Act would increase total persons covered by the alcohol testing rules to about 7 million (this number excludes the maritime industry personnel covered by the drug rules, but not by the alcohol proposals, and is increasing as more people apply for Commercial Drivers Licenses).

In the ANPRM, we asked what, if any, rationale there is for covering a different population for alcohol testing than drug testing. It would appear that the same employees who could cause safety problems if they are on drugs could cause problems through misuse of alcohol. The basis for imposing any requirements concerning alcohol misuse should be the performance of safety-sensitive functions. Therefore, we are proposing to cover the same population under the proposed alcohol testing programs. Although the term "security" is used with respect to aviation passenger and baggage screeners, these persons really are performing a safety-related function-maintaining aircraft security, and, therefore, would be covered by the FAA NPRM.

The proposed OA rules focus on function rather than a defined job or position. An individual's job may encompass several different functions, some of which are not safety-sensitive. Since alcohol is a legal substance, alcohol use is relevant only to the extent it affects performance of a safety-related function. As a safety regulatory matter, for example, we are not concerned if an aircraft mechanic has a drink before or while performing functions that are not safety-related (as long as no other rule is violated); if the mechanic is receiving all-day training on retirement planning along with non-safety employees and the other employees can have a drink at lunch, the mechanic may also.

Alcohol Testing Procedures

Each of the OA NPRMs would require that employers ensure that all alcohol testing conducted under these rules complies with the procedures for alcohol testing contained in the proposed 49 CFR part 40 (the testing procedures NPRM) issued by DOT elsewhere in todays **Federal Register**. Each OA NPRM incorporates by reference the proposed 49 CFR part 40. Since the testing procedures are designed to apply to alcohol testing conducted by those OAs publishing NPRMs today, the DOT is issuing these procedures for incorporation into each OA NPRM in order to avoid unnecessary duplication.

In the ANPRM, we requested comment on which of the following test methods would be best for use in industry alcohol testing programs: (1) Preliminary or screening breath test devices, including tubes containing crystals that change color when exposed to alcohol and passive alcohol sensors; (2) Evidential breath test devices; (3) Blood; (4) Urine; (5) Saliva; and (6) Psycho-physical sobriety tests, such as the Walk and Turn, One-Leg Stand and Horizontal Gaze Nystagmus. Since that time, other testing devices for so-called "performance testing" and "fitness for duty testing" have become commercially available. As with saliva testing (see below), these devices generally are not recognized as evidential test devices (those that provide the necessary verification of an accurate result and the testee's identity upon which permanent employment consequences should rest). The Department intends in the future to seek comment on the scientific, technological, and legal status of these performance testing devices in a separate notice.

All of the preliminary breath test devices are useful as screening devices for determining the presence of alcohol and the need for further testing. As many commenters noted, they are inexpensive and easy to transport. While some are quite accurate at measuring an individuals alcohol concentration, others are not or their accuracy is too sensitive to environmental conditions. None of the preliminary breath devices currently provides the necessary verification of an accurate result upon which permanent employment consequences should rest. The National Highway Traffic Safety Administration (NHTSA) recently tested a saliva device, which represents a relatively new technology, but did not find it accurate enough to be considered an evidential alcohol testing device.

We agree with assertions by several commenters that blood testing is accurate and, conducted according to the proper procedures, provides evidential-quality results. However, it has several drawbacks. It is physically more invasive than other techniques and requires collection by qualified professionals at suitable locations. Blood test results would not be available immediately, since samples must be sent to a laboratory for analysis; this raises safety problems in the alcohol area that are of less concern in the drug area. Waiting a few days for a drug test result is still valuable, as drugs may stay

in the body for some time and the presence of drugs in urine does not necessarily mean that the person was affected by the drugs on the day tested or during the performance of safety-sensitive functions. In contrast, alcohol in the blood is affecting the person; therefore, to protect safety, it is best to determine the test result immediately to enable immediate removal from a safety-sensitive position. Blood testing also raises concern in some peoples minds because of fear of needle sticks as well as the perceived potential for spreading disease. Whether blood testing was required or simply permitted, it would require the establishment of complex collection and chain of custody procedures similar to those needed for drug testing. Its use also would require that the Department establish procedures for the certification of laboratories to do the testing, a task for which the Department lacks resources and expertise. It also would require that the federal government inspect and monitor those laboratories to ensure compliance if DOT did not find that adequate certification existed. There is currently no parallel in the alcohol area to the NIDA drug testing laboratory certification process (which the OAs rely on in their drug testing rules). Consequently, we do not propose to require or permit blood testing under the rules.

This is not to say that blood testing is not a legally valid means of establishing alcohol concentration, on the basis of which it is appropriate to take action with respect to an employee. For example, existing Coast Guard alcohol testing regulations provide for post-accident alcohol blood tests in some situations. The validity of these procedures, which are subject to evidentiary hearings, has long been recognized in administrative and court proceedings, and it is not brought into question by the Department's proposal to use breath testing in other contexts.

Some commenters noted the convenience and cost savings of using urine samples taken under the drug program for both drug and alcohol testing. Urine testing has the same drawbacks as blood testing with respect to delay in obtaining the result and the need for complicated collection, chain of custody and laboratory certification and inspection procedures. Urine alcohol testing also does not give a reliable indication of the current alcohol concentration without the time and cost of obtaining two successive urine samples. In order to establish with certainty the alcohol concentration at the time of the test, the collector must ensure that the individual completely emptied his or her bladder for the first sample; this is difficult to verify. Even with two successive samples, some experts regard the conversion factors as imprecise. While we strive for efficiency in our rulemaking, we do not believe that using urine makes sense for alcohol testing conducted to accomplish a safety objective.

Behavioral sobriety tests, while useful in conjunction with other tests, would not be a suitable method to use in our rules; they are subjective, require significant amounts of training to implement, are less reliable at the low alcohol concentrations that the OAs propose testing for, and consume a considerable amount of the tester's and the employee's time. They also cannot provide a quantified result, as required by the Act.

Part 40 proposes exclusive reliance on evidential breath test devices (EBTs) listed on NHTSAs Conforming Products List (CPL)(49 FR 48854, December 14, 1984), which sets out model specifications for EBTs used by State law enforcement officials, for alcohol testing under these rules. NHTSA carries out programs relating to the safety performance of motor vehicles and drivers and is actively involved in developing programs to reduce alcohol and other drug use among drivers. EBTs that meet NHTSA CPL specifications are highly accurate at detecting and documenting low alcohol concentrations, if they are properly calibrated and operated by trained personnel. Breath testing raises some problems with test validity and employee verification discussed earlier in the section on the public hearing. Therefore, we also propose that the EBTs would have to be capable of: (1) Printing three copies of each test result; (2) Numbering each test consecutively; (3) Processing an air blank (test of ambient air) with printed record; (4) External calibration; and (5) Distinguishing alcohol from acetone at a 0.02 concentration. Additional testing procedures to protect the integrity of the process are proposed in the part 40 procedures NPRM published elsewhere in today's **Federal Register**.

Evidential breath testing is as accurate, faster, relatively less expensive, and less invasive and frightening than blood testing. It eliminates the need for elaborate procedures for packaging, chain of custody, and laboratory certification. Since the rule would prohibit an indication of a specific concentration of alcohol in the system, there is no need for a medical review officer to interpret positive results, as is required under DOT's drug testing rules. Use of these devices is possible in all transportation settings envisioned in those industries for which the OAs are issuing rules today and provides an immediate confirmed result, which enables immediate removal of the employee who has misused alcohol. Breath testing devices have been in use a long time; all states accept breath test device results as credible evidence of an individual's violation of a law establishing a *per se* prohibited blood alcohol concentration, so long as the devices are properly calibrated and operated by trained personnel. Each device on NHTSA's conforming products list, with or without a printer, has been accepted by at least one state for use in court proceedings in that state. (Acceptance by a state of a particular device is not, however, necessary for the use of that device in that state for purposes of the DOT testing program.)

This discussion is in the context of an extensive, multi-modal testing program, including random testing as well as testing triggered by reasonable suspicion of the occurrence of an accident. Greater protections are needed in such a program, especially in the absence of procedural protections present in some existing programs that may use non-evidential testing methods in some circumstances. For example, the Coast Guard post-accident alcohol testing program can involve an administrative proceeding at which the employee has the opportunity to challenge test results before a license is revoked or an investigative inquiry at which further evidence could be introduced. In any event, the use of non-evidentiary alcohol testing devices alone would not meet the statutory requirement for verification in the testing program proposed by the five modal NPRMs and these proposed procedures.

The Department considered allowing the use of screening devices (*e.g.*, saliva and preliminary breath testers) for initial tests followed with confirmation by evidential devices. Since the Act requires a test that uses a scientifically recognized method to confirm an impermissible concentration of alcohol, employers must purchase or have access to an evidential breath test device in any event. Alcohol is processed by the body so rapidly that, particularly at low alcohol concentrations, the confirmation test must be conducted within 15–30 minutes in order to verify the initial test. The employer can use the evidential device both for the initial and confirmation tests. Using screening devices would not cut the costs of the program since the per test costs of the screening devices would exceed those of the already purchased EBTs. In addition

to the cost of purchasing and using screening devices, some of those devices are less accurate and would record false positives, directing more employees to the confirmation test at greater cost to the employer. In addition, at lower alcohol concentrations, they may record false negatives; i.e., they would not identify all persons with prohibited concentrations of alcohol for confirmation testing, allowing some violators to escape detection. Finally, it would be difficult for the employer to establish that the initial tests had been conducted to establish compliance with the rules because they could not provide the same type of record as the evidential breath devices. Comment is specifically sought on whether the requirement for EBTs for screening purposes is too restrictive. If screening devices were to be allowed, other procedural requirements of these rules and the proposed part 40 would need to be changed. For example, since screening devices are not capable of recording the sequential number and result of the initial test, what other records would suffice, if any, to satisfy the verification needed?

We are proposing the only testing method and testing devices that currently meet the criteria that the Department has determined are necessary to the success of these programs. At this time, none of the alternative testing methods of which we are aware is now appropriate for use in these proposed programs. While there may be some promising techniques under development that someday may satisfy the Department's criteria, they are not sufficiently developed to warrant inclusion in this rulemaking at this time. If, in the future, the current drawbacks of alternative testing methods are resolved or other testing devices are developed that have the requisite capabilities, we will consider permitting their use for alcohol testing under these rules.

Definitions

Some of the definitions, such as those defining *accident, covered employee,* and *safety-sensitive function,* among others, will be different in each OA NPRM based on differences in the individual regulated industries; some, such as *consortium,* are umbrella definitions that include all of the customary terms used in the different industries. Other definitions are identical in all of the OA NPRMs. *Alcohol concentration* in all of the proposed rules means the alcohol in a volume of breath expressed in terms of grams of alcohol per 210 liters of breath as indicated by an evidential breath test under these rules. For example, an alcohol concentration of 0.04 means 0.04 grams (four one-hundredths of one gram) of alcohol in 210 liters of expired deep lung air. This breath standard is equivalent to a blood alcohol concentration of 0.04.

The definition of *alcohol use* means consumption of any beverage, mixture, or preparation, including any medication, containing ethyl alcohol. Since ingestion of a given amount of alcohol produces the same alcohol concentration in an individual whether the alcohol comes from a mixed drink or cough syrup, the Department would apply the prohibitions in these rules to the use of any substance containing alcohol, such as prescription or over-the-counter medication or liquor-filled chocolates. Allowing an exception for medication would make it very difficult, if not impossible, to enforce the rules. Moreover, alcohol-based drugs could be used to satisfy alcohol needs rather than medical needs, if permitted. We believe there are now non-alcohol alternatives for all non-prescription medications, but we specifically seek comment on this. Prescription medications containing alcohol may have a greater impairing effect due to the presence of other elements, *e.g.*, antihistamines. We are not aware of prescription medications used (over a long term) that cannot be formulated in an aqueous preparation and that would themselves be safe to use while at work. We request comment on prohibiting use of all medications containing alcohol. Should we also prohibit possession of such medications while performing safety-sensitive functions? What hardship would this prohibition cause? We recognize that operators who take their vehicles home may stop at the drug store to pick up medications on the way home.

The proposed definition of *substance abuse professional* (SAP) encompasses licensed physicians, limited to medical doctors and doctors of osteopathy; as well as licensed or certified psychologists, social workers and employee assistance professionals. All of the categories listed must have knowledge of and clinical experience in the diagnosis and treatment of alcohol-related disorders. We specifically request comment on whether there is any other professional classification that we should include.

Preemption of State and Local Laws

The Act contains an express preemption of State and local requirements that are inconsistent with the Federal alcohol rules applicable to the aviation, highway, and transit industries. Through its implementation of the Hazardous Materials Transportation Act (HMTA), the Department has long interpreted statutory preemption under an inconsistency standard by using a two-pronged test. The test was derived from Supreme Court decisions on preemption under the Constitution, has been followed successfully by the Department, and has been upheld by court decisions on preemption under the HMTA. In 1990, at the request of the Department, Congress recognized this long-standing interpretation by incorporating it into the statutory preemption provision of the HMTA. (49 U.S.C. App. 1804) The proposed rule would adopt this interpretation of the inconsistency standard for preemption by incorporating the two-pronged test.

Generally, the OA rules would preempt any state or local requirement if it is not possible to comply with both the Federal and the State or the local requirements or if compliance with the State or the local requirement would frustrate the Federal requirement. For example, a State requirement prohibiting the alcohol testing of transit employees would be preempted. Also a local requirement for a blood test to confirm alcohol use by a commercial truck driver would be preempted since it would frustrate accomplishment of the Federal rule by adding additional complicated procedures that may make it difficult to fully and accurately comply with the DOT procedures and by adding costs that may make compliance impossible for many companies. The rules would not preempt provisions of state criminal law that impose sanctions for reckless conduct leading to actual loss of life, injury, or damage to property, whether the rule applies specifically to transportation employees or employers or to the general public.

The purpose of preemption is to avoid the confusion and expense of inconsistent requirements for employers or testing entities that operate in several states and to prevent interference with the functioning of the Federal program by extraneous, burdensome requirements that may defeat its purpose and benefits by making effective implementation difficult or impossible (*e.g.*, by requiring that employers pay for any rehabilitation or requiring confirmatory tests beyond those required by DOT). Because of the nationwide application of the Federal program and the interstate nature of the operations covered, even minor requirements in the aggregate may become unduly burdensome. For this reason, we intend to scrutinize closely State and local requirements under this

preemption authority. FRA operates under a statute with different preemption language; this is discussed further in the preamble of the FRA NPRM.

Other Requirements Imposed by Employers

Except as provided in the OA rules, employers retain their existing authority with respect to alcohol testing and termination or rehabilitation of their employees and employees retain their rights with respect to the use or possession of alcohol. An employer may continue to conduct an alcohol test under his/her own authority and conduct substance abuse rehabilitation programs. Employees are free to consume alcohol on their own time so long as that consumption does not violate any of the provisions of these rules or other applicable rules. Employers and employees are not free, however, to bargain away any of the requirements of the proposed rules. Whatever rights they may have to bargain collectively or otherwise agree on employer-employee relations, they cannot change or ignore Federal safety standards.

Requirement for Notice

Before performing an alcohol test under these rules, the employer must notify the employee being tested that the alcohol test being administered is required by these rules. The notice can be oral or written. An employer shall not falsely represent that a test administered under other authority is being administered under federal rules. We seek comment on whether the testing form proposed by part 40 is sufficient to constitute adequate notice.

Starting Date for Alcohol Testing Programs

The attached OA proposed rules discuss the specific implementation schedules for each industry. The requirements would be similar to those under the DOT drug testing rules. Generally, large employers would have one year from the effective date of the final rules in which to implement the requirements and small employers would have two years. Some variations justified by industry differences are noted in the OA proposals; FAA and FRA have a three tier phase-in for covered employers and contractors. The timetables generally would allow smaller employers to join alcohol misuse programs already established by larger employers or preexisting consortia, which should reduce their costs. The implementation schedules also take into account the time needed by the manufacturers to produce the required breath test devices. All employers must have an alcohol misuse program in place two years after the effective date of the rules. Thus, employers that begin to operate after the effective date of these rules must have their programs in place by the deadline according to size or by the time they initiate their operation, whichever is later.

Prohibitions

General

The OAs' drug testing rules target drug *usage* by covered employees, regardless of whether the use occurred on- or off-duty. A verified positive drug test indicates illegal use, whenever the drug was used. Moreover, it is not possible to determine, based on a chemical test, at what amount a particular drug impairs each user's performance of particular functions and thus could have safety consequences, so the mere presence of the drug must be prohibited. Data relating body fluid concentrations of alcohol to performance degradation is more extensive than that available for drugs. However, it is not possible to relate a given alcohol concentration definitively to impairment in specific individuals. The OAs therefore propose the following combination of prohibitions designed to prevent any adverse alcohol effect on a covered employee during performance of safety-sensitive functions.

Alcohol Concentration

As noted above, unlike some other drugs, alcohol is a legal substance with legally and socially acceptable uses for persons 21 years of age and older. The Department already has some prohibitions on alcohol misuse. Most of the OA's regulating commercial transportation (FAA, FHWA, FRA and USCG) have selected a 0.04 alcohol concentration as the *per se* standard for determining whether an individual is under the influence of alcohol, and prohibit any use of alcohol on the job. Some OA's (FAA, FHWA and USCG) subject certain persons to pre-duty abstinence periods. FHWA rules require that commercial vehicle operators with any measurable alcohol concentration be placed out-of-service for a 24-hour period. RSPA and FTA currently do not have alcohol concentration prohibitions.

Today's proposed rules would prohibit covered employees from reporting for duty or remaining on duty requiring the performance of safety-sensitive functions while having an alcohol concentration of 0.04 or greater. They define alcohol concentration in terms of breath, not blood testing, and would specifically relate a violation of this prohibition to the alcohol concentration as indicated on the breath testing device to avoid problems associated with an absolute breath to blood correlation. In addition, no employer who actually knows that an employee has that concentration could permit the employee to perform or continue to perform safety-sensitive functions.

An alcohol concentration of 0.04 represents the point at or above which impairment for most individuals rises dramatically, thus justifying its use as a *per se* standard for commercial transportation employees. Studies about the effects of *any* alcohol, however, raise our concern about the effects of lower alcohol concentrations on transportation employees. For example, the National Academy of Sciences (NAS) noted that several credible studies measuring task performance at low blood alcohol concentrations indicate that, "[a]lthough individual reactions to alcohol vary depending on * * * [various] factors * * *, sensory and cognitive performance is significantly reduced at or below 0.04 percent BAC." (Zero Alcohol, 1987) The study concluded that "across broad populations of drivers, BACs exceeding about 0.04 to 0.05 clearly increase the probability of causing a crash. * * * [W]hen the driver's age and experience with alcohol are controlled for statistically, the risk of crash involvement increases at any recorded BAC above zero."

A recent National Highway Traffic Safety Administration (NHTSA) report to Congress stated that "[a]lthough the effects of alcohol on impairment and crash risk appear more dramatically above 0.05 or 0.08, for some drivers, any measurable alcohol puts them at increased risk." It noted that relatively few studies have looked at alcohol concentrations below 0.04; therefore, only a small number of studies have found clearly impairing effects for alcohol concentrations below 0.04. NHTSA noted that individuals performing more complex tasks (especially those involving a subsidiary task requiring time-sharing or divided attention) often show evidence of impairment at alcohol concentrations as low as 0.02. NHTSA concluded that one cannot specify an alcohol concentration above which all drivers are dangerous and below which they are safe or at "normal" risk. The NAS and the National Transportation Safety Board (NTSB) have favored setting an explicit policy of zero BAC. The NTSB said that "[i]t should be absolutely clear that no

alcohol is acceptable in commercial transportation because research has demonstrated that low blood alcohol levels can produce impairment." The Transportation Research Board, in a study performed for the FHWA during its Commercial Driver's License rulemaking, recommended a 0.04 BAC as the concentration where the serious penalties should apply to commercial motor vehicle drivers, but it noted that some degree of impairment such as slowed reaction time, loss of coordination, and deterioration in judgment begins with any BAC above zero. (Zero Alcohol, 1987)

Having any standard other than 0.00 raises troubling questions about whether an employer should allow an employee whose test shows an alcohol concentration between 0.00 and 0.04 to continue performing a safety-sensitive function. Clearly, the Department's concern about public safety and an employer's additional concern about liability are raised in a situation in which an employee "passed" a test with an indicated alcohol concentration below 0.04 and then begins or resumes performing safety-sensitive functions. The likelihood of being involved in an accident when performing safety-sensitive functions with a measurable alcohol concentration is increased. Therefore, we propose a two-tiered system of consequences discussed in detail later in this document. The covered employee must be removed from a safety-sensitive position at any alcohol concentration of 0.02 or greater. If the employees alcohol concentration is 0.02 or greater but less than 0.04, the employee would not be allowed to perform safety-sensitive functions until the next scheduled duty period (usually the next day), if at least eight hours has elapsed, or until a retest shows the alcohol concentration has fallen below 0.02. If the employee has an alcohol concentration of 0.04 or greater, the employee could not return to a safety-sensitive function until evaluated, treated, if applicable, and retested. In either case, the employee would be prevented from posing any danger to the public.

The Department has used the 0.02 alcohol concentration rather than 0.00, because it represents the lowest level at which scientifically accurate alcohol concentration can be measured given the limitations of any current technology (*e.g.*, blood, breath). Results below 0.02 are not statistically significant and would be forensically insufficient to support consequences under these rules. In essence, use of a 0.02 standard represents a zero tolerance standard for alcohol. NHTSA's model specifications for devices on the CPL were developed for police use under criminal laws prohibiting alcohol concentrations of 0.10 and above. Although all of the EBTs on the CPL exceed existing requirements, NHTSA plans to modify the model specifications and certify the devices at the 0.04 and 0.02 alcohol concentrations. The NHTSA proceeding would respond not only to these rulemakings, but also to the ongoing efforts of States to lower prohibited alcohol concentrations to 0.08 (0.02 for drivers under 21) and to the prohibition on 0.04 alcohol concentration or greater for commercial drivers.

Behavior and/or Appearance

The proposed rules would prohibit an employee from reporting for duty or remaining on duty requiring the performance of safety-sensitive functions while the employees behavior and/or appearance is characteristic of alcohol misuse or the employee's ability to perform his or her assigned functions is adversely affected by alcohol use. The proposed rules would prohibit an employer who actually knows the covered employee is in violation of this prohibition from permitting the employee to perform or continue to perform safety-sensitive functions. An employer observing such behavior and/or appearance would be required to conduct a reasonable suspicion test under these rules.

The time-frame for testing is limited because the body rapidly eliminates alcohol. This prohibition is therefore needed for circumstances in which it is infeasible or impossible to conduct a reasonable suspicion test in a timely manner (*e.g.*, an EBT is unavailable or broken). People are more familiar with the symptoms of alcohol intoxication than those of drug use; moreover, the presence of alcohol is easier to detect from physical symptoms (*e.g.*, breath) or behavior (*e.g.*, inability to walk a straight line), although alcohol symptoms often can be successfully masked. However, since observable alcohol-related behavior tends to become apparent only at fairly high alcohol concentrations—generally 0.12 and higher—, it is unlikely that misuse would be detected in this manner at alcohol concentrations in the 0.02–0.04 range. Thus, there are important safety reasons for requiring that an employee be removed from his or her safety-sensitive function based on behavior and/or appearance alone.

To the extent some OAs already permit removal of an employee based on observation alone, the employee has a right to an evidentiary hearing (*e.g.*, as part of a certificate revocation action). These rules would not provide for a right to a hearing. Under the proposed rules, a violation of this prohibition would require removal from a safety-sensitive position, and evaluation by a SAP. Rehabilitation, if necessary, and a determination that the employee is ready to return to duty as well as a result below 0.02 on a return-to-duty test would be required before the employee could be reinstated. Because this proposed prohibition involves a subjective determination, unverified by a test, and may provide an opportunity for the employer to harass an employee, should lesser consequences for violating this prohibition apply, *e.g.*, removal from the safety-sensitive function for 8 hours or until obtaining a result below 0.02 on a return-to-duty test? Would a lesser consequence under these rules impinge upon the employer's need to retain their authority to remove employees on this basis? The lesser consequences would not include a SAP evaluation. Should not a SAP evaluate the employee in view of the seriousness of his or her offense (observable alcohol-related behavior and/or appearance generally occur at high alcohol concentrations)? Is this any less of a safety concern because the decision is made based on a subjective observation?

On-Duty Use

The proposed rules also would prohibit a covered employee from using alcohol while performing safety-related functions and prohibit an employer who actually knows of such use from allowing the employee to perform or continue to perform safety-sensitive functions. The need for this prohibition is self-evident. Should this prohibition extend also to possession of alcohol on the job? What problems would such a prohibition raise? See the above discussion concerning the proposed prohibition on use of medications.

Pre-Duty Use

Drinking during off-duty periods may impinge upon a person's ability to function safely on the job. The proposed rules generally would prohibit a covered employee from using alcohol within the four hours preceding the performance of safety-sensitive functions. They also would prohibit an employer, who actually knows that the employee has used alcohol within that period of time, from allowing the employee to perform or continue to perform safety-sensitive functions. The FAA's long-standing eight-hour pre-duty use prohibition for crewmembers would remain in effect under its proposal. Because duty tours often are not predictable in the rail

industry, the four-hour period would be shortened for unscheduled assignments to the interval between being "called to duty" and "reporting for duty."

The Department specifically requests comment on a number of questions concerning pre-duty abstinence. Is the proposed abstinence period necessary if testing is required? Is it still valuable as an extra enforcement tool? Is it valuable for public perception; *i.e.*, should the Department consider public concern at seeing pilots drinking in an airport lounge or truck drivers drinking at a roadside restaurant, even though when they report for work a short while later they have no alcohol in their systems? Is four hours reasonable? Should all persons within an industry be subject to the same pre-duty limits, or do certain professions carry an extra duty of care? Does it matter that in some industries, lengthy abstinence periods may bar any drinking for days or weeks, because of the nature of work/rest shifts?

Use Following an Accident

Since it is important to determine whether alcohol is implicated in an accident, a covered employee who has actual knowledge of an accident in which his or her performance of a safety-sensitive function has not been discounted by the employer as a contributing factor to the accident would be prohibited from using alcohol for eight hours following the accident. The prohibition would end once the covered employee has taken a post-accident test under these rules or the employer has determined that the employee's performance could not have contributed to the accident.

The Department is aware of accidents in which employees who should have been tested after an accident left the scene and may have consumed alcohol. This rule would prevent employees who know they are subject to testing from explaining "positive" findings on an alcohol test by alleging they had a drink after the accident, since such action also would constitute a rule violation. In some situations, the employee involved in an accident may not know of the accident. For example, a mechanic makes a mistake that causes an accident hours later or half a continent away. Without actual knowledge of an accident, we do not believe a ban on drinking could be effectively enforced, but we specifically seek public comment on how to address this situation. See specific OA proposals that limit the application of this prohibition to performance of a safety-sensitive function at or near the time of the accident or on the vehicle or aircraft involved. Also, the FRA proposal does not include this requirement because under current FRA rules the employees involved remain on duty status after an accident.

Refusal to Submit to a Required Alcohol Test

The proposed rules would prohibit a covered employee from refusing to submit to required post-accident, random, reasonable suspicion or follow-up alcohol tests. This, in effect, provides that the employee must take those tests when required. The consequences for a refusal to submit to a required test would be the same as if the employee had tested at 0.04 or greater or had violated any of the other prohibitions in these rules. Failure to provide adequate breath for testing when required without a valid medical explanation or engaging in conduct that clearly obstructs the collection process would constitute a refusal to submit to testing. A covered employee subject to a post-accident test who leaves the scene of the accident without a valid reason before being tested would be deemed to have refused to submit to a required test. The proposed rules would prohibit an employer from permitting an employee who refuses to submit to testing to perform or continue to perform safety-sensitive functions. In addition, the FRA proposal would prohibit anyone refusing a required test from engaging in covered service for nine months. The FHWA would disqualify drivers for one year following a refusal.

An applicant's or employee's refusal to submit to a pre-employment test or a return-to-duty test would not trigger consequences under the rules that result in the need for evaluation. In those cases, the applicant or employee does not have to be removed from a safety-sensitive position. Since those tests are a condition precedent to starting or returning to safety-sensitive functions, the applicant or employee simply could not be hired or returned to duty.

Tests Required

General

In the Department's drug testing rules, we generally required pre-employment, periodic, reasonable cause/suspicion, post-accident and random tests (testing also is required for employees who seek to return to work following a positive test or refusal to submit to a test). The Act requires all these forms of testing except periodic tests, which generally are performed as part of required physical examinations for certification for some employees. Although periodic tests are discretionary under the Act, the Department has decided not to propose either requiring or authorizing periodic testing for alcohol at this time. We question its value with respect to alcohol if the employee would know when the test was to be conducted. We specifically request public comment on the utility of periodic testing. Would such a test be more likely to identify an alcohol misusing employee than existing safeguards or the provisions of these proposed rules? The tests required by these rules would be conducted after a triggering event (pre-employment/pre-duty, post-accident, reasonable suspicion, return-to-duty, follow-up or retest) and just before, during or just after performance of a safety-sensitive function (random).

Pre-Employment/Pre-Duty Testing

The Act requires pre-employment testing, which we noted in our ANPRM is one of the least useful types of tests when dealing with alcohol, because drinking off duty generally is legal and because alcohol remains in the body for such a short period of time. Often, a test result indicating alcohol use may only indicate bad judgment or bad timing (*e.g.*, one notices an employment advertisement after having beer and a hamburger for lunch, immediately applies, and is tested.) The drugs for which DOT requires testing are illegal at any time used and can stay in the body for a fairly long time, so pre-employment testing for illegal drugs makes more sense. In fact, some employers have detected a high rate of positives (3–8 percent in the transportation industry) from DOT-required pre-employment drug testing. Pre-employment tests comprise a large and costly portion of the total number of drug tests given, especially in industries with large employee turnover.

To make such a test more meaningful, we are proposing that a covered employee shall undergo alcohol testing any time prior to the first time the employee performs safety-sensitive functions for an employer. The employer would have the option of testing during the hiring process or before (preferably just before) the employee starts performing safety-sensitive functions. The latter option would enable the employer to avoid the cost of testing several applicants for each job, tie pre-employment tests to the performance of safety-sensitive functions and accommodate the statutory language requiring a pre-employment test for an "employee," rather than an applicant. The former option would permit identification of someone with alcohol in his/her system before incurring additional hiring

expenses. For the above reasons, the definition of "covered employee" used in these rules would include applicants for a safety-sensitive function as well as current employees applying to move into a safety-sensitive function. The rules would not confer any rights or consequences upon applicants or employees who fail a pre-employment test.

The rules would prohibit an employer from allowing an employee to perform safety-sensitive functions unless that employee has been tested with a resulting alcohol concentration less than 0.04. If the pre-employment/pre-duty test result indicates an alcohol concentration of 0.02 or greater but less than 0.04, the employee cannot perform or be allowed to perform safety-sensitive functions until the alcohol concentration falls below 0.02 on a subsequent test or until the next scheduled duty period, if it is not less than eight hours following the test.

The rules would not require an employer to administer a pre-employment test if the employee has had an alcohol test conducted under an OA alcohol misuse rule following part 40 procedures with a result less than 0.04 within the previous six months and the employer ensures that no prior employer of whom the employer has knowledge has records showing a violation of these rules within the previous six months. Generally, this means that when checking a prior employer to verify that the applicant had "passed" a previous alcohol test, the new employer would also verify that the prior employer has no records of a violation of an OA alcohol misuse rule. If the new employer knows the applicant had other employers within the last six months, the new employer would have to check them too. Does it make sense to restrict the latter requirement to six months? This option would provide the greatest flexibility for avoiding the constant retesting and related costs involved in an industry, such as trucking, which has a high employee turnover rate. The FHWA drug testing regulations currently allow a similar option for pre-employment tests. Should this option also be extended to the aviation, rail, mass transit and pipeline industries? An employer, of course, could choose to conduct pre-employment tests in lieu of reviewing information on past employment provided by the employee.

Should employers be required to give notice that a pre-employment test will be conducted to avoid the lunch situation described above? Should there be more serious consequences for failure of the test if such notice is given? Should an alcohol concentration of 0.02 be the standard for a pre-employment test, if, for example, a 24-hour notice were required? Should not the employer expect an applicant given such notice to have no alcohol in his or her system? Would not presence of any alcohol after such notice indicate a serious problem with the applicant? What cost or implementation problems would be associated with such notice, particularly for smaller employers? Would they be mitigated by a shorter notice period, such as eight or four hours? Eight hours generally represents the loss of a work day, which may impose hardship on some businesses. Four hours, the pre-duty abstinence period for most covered employees, may make more sense. Should applicants be allowed to waive such notice? Would such a waiver truly be a voluntary act? If not, should it matter? Would a waiver option introduce unfairness into the process for those who would prefer to wait the designated amount of time, since the employer may simply hire an individual who waived the right to wait before being tested?

Post-Accident Testing

Post-accident alcohol testing already is required by federal regulation in some transportation modes, and serves as a valuable accident investigation and enforcement tool. States also conduct post-accident tests, depending upon the circumstances. Post-accident testing for alcohol at remote locations can be more difficult to accomplish than drug testing, because alcohol passes from the blood and breath more quickly than most drugs. Also, delays in transporting trained personnel to an accident site can result in negative or inconclusive tests. The current drug rules of those OAs involved in this rulemaking proceeding require employers to test employees involved in an accident as soon as possible, but not later than specified maximum time limits (generally 32 hours).

The definitions of accidents or occurrences that would trigger a post-accident test vary by industry and are discussed in each OA's proposed rule. They generally are the same as the triggering events for post-accident drug testing. We are generally proposing that as soon as practicable following an accident, each employer shall test each surviving covered employee for alcohol, if that employee's performance of a safety-sensitive function either contributed to an accident or cannot be completely discounted as a contributing factor to the accident. The need for testing is presumed; any decision not to administer a test must be based on the employer's determination, using the best information available at the time the determination is made, that the employee's performance could not have contributed to the accident. See the OA proposed rules for additional events that trigger post-accident testing or for modifications to the general approach.

Any employee subject to post-accident testing who leaves the scene of an accident without a valid reason before the test is administered can be deemed by the employer to have refused to submit to testing; such a refusal is treated as if the employee recorded a test result of 0.04 or greater. The employer is responsible for judging the validity of the reason and generally must report the incident to the OA regulating the employer's industry. Where possible, employers should make every effort possible under the circumstances surrounding the accident to ensure that the employee is available for a post-accident test. This, of course, does not mean that necessary medical treatment for injured people should be delayed or that an employee cannot leave the scene of an accident for the period necessary to obtain assistance in responding to the accident or to obtain necessary emergency medical care.

Because alcohol is eliminated from the body so quickly, using a 32-hour maximum limit as in the drug rules would be inappropriate. It is important that a post-accident test be administered as soon as possible to provide any information on whether alcohol misuse was a possible cause of or contributor to the accident. If a post-accident test is not administered within two hours following the accident, the employer would have to submit a report to the OA stating why the test was not promptly administered. If a post-accident test is not administered within eight hours following the accident, there is little likelihood of finding a meaningful alcohol concentration resulting from use preceding the accident. The employer then would have to cease attempts to administer the test and the report to the OA must explain why the employer was unable to administer a test. The Department recognizes there will be valid reasons for not conducting the tests in these timeframes, but every effort must be made to do so. It is important to note that this test is not meant to be a full toxicological workup for the purpose of determining accident causation. The primary purpose of the test is to determine whether the employee(s) involved should be removed from safety-sensitive functions.

FHWA is considering allowing employers to substitute a post-accident test administered by on-site police or

public safety officials, particularly if that test can be administered earlier than the employer can get to the scene. These local authorities often are first to arrive at an accident site, particularly if the accident occurs in a remote area, and sometimes are equipped to conduct field alcohol breath tests. We seek public comment on whether to allow employers to authorize, where feasible, on-site police or public safety officials to carry out post-accident testing, if they are first to arrive at the scene of the accident and they determine there is reason to test. To what degree should we allow employers to rest on the assumption that local police will administer an alcohol test, which presumably would be based only on local authority? How could we ensure cooperation in getting test reports from the police? How would conducting such tests deviate, if at all, from part 40 procedures or applicable DHHS guidelines? Is it possible to ensure employee rights, such as privacy, in that context? Is it only necessary that the test comply with the requirements applicable to the local authorities conducting it? We would not want to permit this option if police or public safety officials would use the results of the tests against the employee in a criminal proceeding where the local authority did not have independent probable cause to test. FRA has its own preexisting procedures for conducting a full toxicological analysis following an accident; see the FRA NPRM for its post-accident testing proposal.

Random Testing

In the ANPRM, commenters were requested to focus on how the objectives of random alcohol testing (*e.g.*, deterrence and detection) could be accomplished. The deterrent effect of random alcohol testing might not equal that provided by random drug tests, because alcohol is so rapidly eliminated from the body that violators are more difficult to detect. In view of the fact that alcohol is legal, we asked what is the significance of a random alcohol test of an employee indicating use. Random alcohol breath testing is considered a federally-mandated "search," under the Fourth Amendment. Accordingly, the proposed programs for detecting the misuse of alcohol promote our compelling interest in ensuring transportation safety. One option that we considered in the ANPRM was a "pre-performance" random testing requirement limited to the specific times an employee begins to perform a safety-sensitive function. That limitation provides the requisite nexus to ensuring proper performance of safety-related functions that is our primary concern and the principal purpose of these rules.

We are proposing to require random alcohol testing that is limited to the time period surrounding the performance of safety-related functions. An employee could only be tested while the employee is performing safety-sensitive functions, just before the employee is to perform safety-sensitive functions, or just after the employee has ceased performing such functions. Obviously, the best time to test is before the employee begins to perform the safety-sensitive function. Detection at that point would prevent the employee from actually performing the function while he or she had alcohol in his or her system. However, if the employee understands that a random test would only be administered before he or she begins work and there is an opportunity to drink during work, deterrence is limited. The ability to test just before, during or just after performance increases the deterrent effect and may enable detection of employees who use alcohol on the job. The purpose of the concept of "just before" and "just after" is to avoid the problem that some safety-sensitive functions could not be interrupted for the performance of a test (*e.g.*, piloting an aircraft). It is intended to be close enough to the actual performance of the safety-sensitive function, however, that the test results would clearly indicate that the employee would be or was at 0.04 or above (or 0.02-or greater but less than 0.04) at the time when performing those functions. The rules also would provide that employers require that each covered employee selected for random testing proceed to the testing site immediately. In the event the employee is performing a safety-sensitive function when notified, the employer must ensure that the employee ceases the function consistent with safety and proceeds to the site as soon as possible. Should there be specific time limits on how long before or after performance of a safety-sensitive function a test can be given and still be reasonably performance-related? What period of time would make sense in view of the fact that the unannounced nature of the test provides its deterrence?

The rules would require each employer to randomly select covered employees at various times for unannounced alcohol testing. The employer must select covered employees for testing through a scientifically valid method, such as a random number table or a computer-based random number generator that is matched with employees' Social Security numbers, payroll identification numbers, or other comparable identifying numbers. Each covered employee must have an equal chance of being tested under the random selection process used. During each year following the start of the employers random testing program, the employer would have to meet certain conditions: (1) The dates for administering random tests would be spread reasonably throughout the year (the deterrent effect would disappear if employees know that the employer had completed all required random tests for the year); and (2) The number of employees randomly selected for testing during the year would equal an annual rate of not less than a specified percent of the total number of employees subject to alcohol testing. Testing dates should not be predictable (*e.g.*, every Monday or the first week of each month). Because of the randomness of the testing, some employees may be tested more than once during the year, while others will not be tested at all.

Random testing pools could be formed in a variety of ways. To promote efficiency and reduce costs, particularly for smaller employers and employers subject to more than one OA rule, we permit the combination of geographically-proximate employees covered by different OA rules into one pool. To maintain fairness and the equal chance of each type of employee for selection, certain conditions could be set. For example, employees in any industry who travel most of the time could constitute one pool; others who remain in the vicinity of the testing site would be in another. However, if the testing method chosen required testing of employees immediately upon selection or whenever they first returned to the testing location after their selection (but still unannounced), there would be no need for separate pools. Any acceptable method must ensure that each employee has an equal chance of being selected for testing. Although these multi-modal pools would be permitted, other specific OA requirements might have to be met such as the FAA proposal to require prior approval of random testing pools.

If the employer joins a consortium, the rules would permit the calculation of the annual rate on either the total number of covered employees for each individual employer or the total number of covered employees subject to random testing by the consortium's pool covering the employer. This would mean that a consortium member could have less than its required number of random tests conducted if the overall consortium rate equals the required rate. Thus, if Employer A has ten covered

employees and the consortium has 500 covered employees in the pool covering Employer A, and a 50 percent rate applies, if Employer A chooses to have the rate based on the consortium, the consortium must conduct at least 250 tests even if only four or fewer covered employees of Employer A are tested. So long as each employee has an equal chance of being tested each time the consortium conducts random tests, the requisite deterrence factor remains. Membership in a consortium should improve deterrence for small companies because their employees would continue to perceive an equal chance of being selected throughout the year; it would avoid the situation where an employer of two conducts the one required test in June and both employees know they will not be tested for the remainder of the year. On the other hand, the relative perception of vulnerability to testing may lessen when a small group of employees is included in a larger pool and over time few members are selected.

We request comment on what annual rate to require for random testing within a 10 to 50 percent range. Under the Department's current drug testing rules, employers must conduct random drug tests at a 50 percent annualized rate; that is, the number of annual random tests conducted equal half the number of the covered population. We are asking for comment on whether the rate for alcohol can be lower because alcohol symptoms are somewhat better known and easier to detect. A greater chance of detection is one factor in deterrence and may provide a rationale for a lower testing rate. The Department currently believes that the higher the percentage, the greater the likely deterrence and detection. But costs also rise as the number of tests increases. What percentage best balances deterrence, detection, and cost? Commenters should note that the Department is publishing a separate ANPRM in today's **Federal Register** that seeks comment on whether there are less costly alternatives to the current drug random testing programs that could maintain an adequate level of deterrence and detection of illegal drug use.

In addition, the FRA currently is conducting a limited study of the effectiveness of random drug testing at a 25 percent rate; the results should be available as we are preparing the final alcohol misuse rules and may be helpful in determining the appropriate random rate for alcohol.

We specifically request commenters to provide extant data from their experience testing at different random rates in programs that are comparable to the OA proposals. We welcome comment on the applicability of data from one industry to another and from outside the transportation community. We also request comment on the relationship between drug random testing and alcohol random testing rates. In addition, we seek comment on how employers with large seasonal variances in numbers of covered employees should address the computation of the numbers of tests required?

Reasonable Suspicion Testing

Because alcohol use (at least at higher consumption amounts) often results in more observable symptoms than other drug use, and because more research has been done on how to train people to make these observations, reasonable suspicion testing may be more valuable for alcohol than for illegal drugs. Supervisor observation is not a complete solution, however; "practiced" drinkers often can mask symptoms (*e.g.*, they can walk a straight line) and avoid detection. Also, supervisors may have reasons to overlook employee alcohol use (*e.g.*, sympathy for the employee, the desire to avoid confrontation, or the lack of a readily available replacement). The U.S. Army has found that supervisors have a tendency to underreport alcohol involvement in accidents (The Alcohol and Accidents Guide, February 1987).

The OA NPRMs would require employers to test covered employees for alcohol when the employer has reasonable suspicion to believe that the employee has violated the prohibitions in these rules. The employer's determination that reasonable suspicion exists to require an alcohol test must be based on specific, contemporaneous, articulable observations concerning the appearance, behavior, speech, or body odors of the employee. Reasonable suspicion testing under these rules would be authorized only if the required observations are made during, just preceding or just after the period of the work day that the covered employee is performing a safety-sensitive function. A covered employee would be required to undergo reasonable suspicion testing for alcohol as soon as possible; such testing could occur while the employee is to perform safety-sensitive functions, just before the employee is to perform safety-sensitive functions, or just after the employee has ceased performing such functions.

The factors set out for determining when reasonable cause exists, in the drug rules and in the alcohol NPRMs, are short-term factors. They focus on what a supervisor sees at the present moment. The Department seeks comment on whether it is also appropriate for supervisors to take into account longer-term factors (*e.g.*, a long-term decline in work performance, patterns of absenteeism, lateness, or abuse of sick leave). Such factors would be considered only in conjunction with the shorter-term observations by supervisors, however.

Our drug rules require that two supervisors, at least one of whom is trained in detecting the symptoms of drug use, make the required observations and concur in the existence of reasonable suspicion. These proposed rules generally would allow a single supervisor trained in detecting the symptoms of alcohol misuse to make the required observations and determine the existence of reasonable suspicion. The rationale for allowing the testing decision to rest on one trained supervisor is that alcohol testing is too time-sensitive to incorporate as a general rule the time it takes to consult a second supervisor, which is difficult in some transportation industries. Symptoms of alcohol use also are more widely-known and easier to detect than those of drug use so there may be less need for corroboration. In addition, the supervisor who makes the determination that reasonable suspicion exists, generally is prohibited from conducting the reasonable suspicion test on that employee. The latter prohibition, like the requirement for two supervisors in the drug rules, is designed to protect against a supervisor's harassment of a specific employee. In some cases, the Breath Alcohol Technician (BAT), who conducts the test, may be there in time to provide corroboration of the employee's appearance and behavior.

We request public comment on allowing a single trained supervisor to make the decision to order a reasonable suspicion test. Should this be restricted in any way to avoid the perception of greater opportunity for harassment by supervisors? How could this be reasonably accomplished in light of the above concerns? We also request comment on the possibility of allowing a supervisor to base a decision to order a reasonable suspicion test on reports by a credible third person who has made the observations. Should specific industry/federal government rule violations also be an occasion that requires an alcohol test? The railroad industry has operated with rules that authorize the employer to test under these circumstances for several years. What events should trigger testing, if any?

Return-to-Duty Testing

The OA rules would require each employer to ensure that a covered employee, who has violated any of these alcohol misuse rules, has been evaluated and undergoes an alcohol test with a result indicating an alcohol concentration of less than 0.02 before returning to a safety-sensitive function. We believe that compelling concerns about safety and possible recidivism justify imposing a stricter 0.02 standard for those employees returning to safety-sensitive functions after they already have demonstrated problems with alcohol. In any event, under other provisions of the rules, employees could not perform safety-sensitive functions until they have a result lower than 0.02; since this test is specifically for return-to-duty, the application of the 0.02 standard would be logical. We specifically request comment on whether this is a good rationale for imposing a stricter alcohol concentration standard on individuals returning to duty.

Follow-Up Testing

The alcohol ANPRM asked numerous questions on return-to-duty or follow-up testing, *i.e.*, testing required of a covered employee who has violated the alcohol rules, undergone rehabilitation, and has been returned to duty to perform safety-sensitive functions. Many of these questions were premised on the rehabilitation/Medical Review Officer (MRO) evaluation that occurs in the illegal drug area. As discussed later in this preamble, an employer would have the option of allowing an employee to return to safety-sensitive functions after SAP evaluation, rehabilitation (if needed), and a successful return-to-duty test. Once an employee's alcohol problem has been identified, there is a chance of recidivism and a need to ensure continued disassociation from alcohol through periodic unannounced follow-up testing.

The OA rules would require that each covered employee who has been identified by an SAP as needing assistance in resolving problems with alcohol misuse, and who has returned to duty involving the performance of a safety-sensitive function, shall be subject to a minimum of six (6) unannounced, follow-up alcohol tests administered by the employer over the following twelve (12) months. The SAP could direct additional testing during this period or for an additional period up to a maximum of 60 months from the date the employee returns to duty. The SAP could terminate the requirement for the follow-up testing in excess of the minimum at any time, if the SAP determines that the testing is no longer necessary. Should the rule establish this minimum requirement or should any follow-up testing be based only on the SAP's discretion? Is it appropriate to vest this responsibility in the SAP?

The proposed rules would provide that the evaluation and the rehabilitation may be provided by the employer, by an SAP under contract with the employer or by an SAP not affiliated with the employer. The choice of SAP would be made in accordance with employer/employee agreements and employer policies. In view of the "gatekeeper" function that the SAP has under the proposed rules, should the employer designate the SAP? Experts note that, due to training and the profession's normal employee orientation, the SAP may be eager to place the employee back into the normal work environment, *i.e.*, the safety-sensitive function, but reluctant to require testing by the employer. The SAP may prefer to conduct any necessary follow-up testing as part of an after-case or follow-up treatment program. While we recognize that placement of the employee back on the job without follow-up testing may help the employee, it could put public safety at risk. The SAP's customary loyalty to the employee client would directly conflict with the safety responsibility of the employer. In order for this program to work and to ensure public safety, the SAP must recognize his or her obligations to be responsive to the employer's need for a fair evaluation of the employee. Would a requirement that the employer designate the SAP lead to abuses, such as appointment of a relative who would charge twice the going rate? Should the Department's final rule impose a requirement on the use of SAPs to ensure adequate candor and objectivity?

The FRA's experience under its drug testing rules with required follow-up testing for employees who tested positive for prohibited drugs illustrates the need for a minimum number of required follow-up tests. In 1991, FRA conducted a compliance review on a large railroad company and found that 9 of 10 employees who had tested positive and were returned to service for up to one year had received no follow-up tests. One employee received one follow-up test six months after returning to work. One of the employees who had received no follow-up testing later tested positive on an FRA-required random drug test. The Department's Office of Inspector General (OIG) recently completed a review of the FRA's alcohol and drug program. The OIG reviewed follow-up testing practices on several railroads and found inconsistent procedures and a lack of follow-up tests. Its report recommends prescribing procedures for follow-up tests, including a minimum number of tests and a minimum period for follow-up testing. For the above stated reasons, we believe that we should require a minimum amount of follow-up testing.

Should the 0.04 alcohol concentration standard be used for follow-up tests? In view of the fact that these employees already have had an alcohol problem, should they be subject to a stricter 0.02 alcohol concentration standard, such as that imposed on return-to-duty tests? Would the costs and time lost in conducting these follow-up tests discourage employers from bringing employees back into safety-sensitive functions? What consequences should follow an employee's failure to "pass" a follow-up alcohol test? Would these consequences be different from those following failure to "pass" any other mandated alcohol test? Should follow-up testing be administered in a way similar to random testing (e.g., at or near the time the employee is performing a safety-sensitive function)? Given the potential for poly-drug misuse, should an employee who has "failed" an alcohol test automatically be subject to follow-up testing for drugs after being returned to safety-sensitive functions following alcohol misuse? For example, if the employee has "failed" an alcohol test (even if the employee has not also "failed" a drug test), should the employee be subject to six unannounced follow-up urine drug tests as well as six breath alcohol tests in the year following the employee's return to duty? How frequently does this problem occur? What additional costs would a requirement for follow-up drug tests following alcohol misuse incur? FRA currently has such a requirement in its locomotive certification regulations. (49 CFR 240.119(d).)

Retesting of Covered Employees with an Alcohol Concentration of 0.02 or Greater, But Less Than 0.04

The rules would provide that if the employer chooses to permit the employee to perform a safety-sensitive function within 8 hours following the administration of an OA-required alcohol test indicating an alcohol concentration of 0.02 or greater but less than 0.04, the employer must first retest the employee. The employee could return to the safety-sensitive function if the retest results in an alcohol concentration of less than 0.02. The FHWA proposal does not contain a retesting provision because of a

statutory requirement that drivers found to have a measurable amount of alcohol in their systems must be removed for 24 hours. Should this be an available option? Or should the employee be taken off the job for the full 8 hours? What logistical and economic consequences would the absence of the retest option cause? Should we be concerned about a possible "hangover" effect that an employee now below 0.02 after a session of hard drinking may be suffering? Would an enforced 8 hour absence take care of this concern?

Handling of Test Results, Record Retention, and Confidentiality

Retention of Records

To facilitate Department oversight of the alcohol testing program and to protect employee confidentiality, we propose to require each employer to maintain records of its alcohol misuse prevention program in a secure location with controlled access. Recordkeeping is necessary for effective enforcement of the regulations. It also would allow the Department to track progress in the programs and later make changes, if justified, that could reduce costs, ease implementation and enforcement, provide better employee protection, and/or increase benefits. The OA proposed rules would require employers to retain, for a minimum of five years, records of any employee alcohol test results indicating an alcohol concentration of 0.02 or greater; documentation of refusals to take required alcohol tests; equipment calibration documentation; and documentation of employee evaluation and referrals. They would require employers to retain for a minimum of two years any records related to the collection process (except equipment calibration documentation) and training. Records of negative test results would have to be retained for a minimum of one year.

Generally, the proposed rules would require each employer to maintain the following specific records:

(1) Records related to the collection process, including: collection logbooks, if used; documents relating to the random selection process; EBT equipment calibration documentation; verification of BAT training; documents generated in connection with decisions to administer reasonable suspicion and post-accident tests; and documents verifying existence of a medical explanation of an employee's inability to provide adequate breath for testing;

(2) Records related to test results, to the refusal of any covered employee to submit to a required alcohol test and to an employee dispute over the result of an alcohol test;

(3) Records related to other violations of these rules;

(4) Records related to evaluations and return to duty; and

(5) Records related to education and training.

Should documentation of reasonable suspicion determinations be required? If so, what kind?

Reporting of Results in a Management Information System

For oversight purposes, each employer would be required to submit to the Department OA that regulates it, at minimum, an annual report summarizing the results of its alcohol misuse prevention program for each calendar year. Employers subject to more than one DOT OA alcohol rule would have to identify each employee covered by the regulations of more than one OA and report the total number of such employees broken down by category of covered function. Before conducting any alcohol test on an employee regulated by more than one OA, the employer would have to determine which DOT OA rule or rules require the test and then identify such test results in the appropriate DOT OA reports. We note that the employer would provide aggregated not individual information under the MIS. The employer would be responsible for ensuring the accuracy and timeliness of each report submitted by it or a third-party service provider acting on the employers behalf. The employer would have to submit the annual reports no later than February 15 of each year for the preceding calendar year on the specified form. (The first reporting year may be different depending upon the effective date of the final rules.) Each report would contain a number of information items relevant to program evaluation or enforcement. Several of the OAs in other documents in today's **Federal Register** also are proposing a management information system for their drug testing rules. If those proposals are adopted, the alcohol and drug testing reporting requirements would be merged to permit one annual report and eliminate any duplicative information items.

Access to Facilities and Records

To preserve employee confidentiality, the proposed rules generally would prohibit employers from releasing information pertaining to an alcohol test of a covered employee or any violation of these rules, except as required by law. They would provide, however, that the employee is entitled, upon written request, to obtain copies of any records concerning the employee's use of alcohol, including alcohol test records. Employers must promptly provide any records requested by the employee, but could not make access to an employee's records contingent upon payment for records other than those specifically requested. The bundling of requested records with unrequested material at much higher cost has been a problem under the drug rules. Employers would have to release information as required by law, including court orders or subpoenas.

The proposed rules generally would require an employer to permit access to all facilities involved in its alcohol testing program and make available copies of all test results and any other alcohol program records, upon request, to the Secretary of Transportation or any OA with regulatory authority over the employer or any of its covered employees. In addition, upon request by the National Transportation Safety Board (NTSB) as part of an accident investigation, employers would be required to disclose information related to the employer's administration of a post-accident alcohol test following the accident under investigation.

Generally, the rules would require an employer to release information regarding an employee's records as directed by the specific, written consent of the employee authorizing release to an identified person. In view of the fact that these rules would permit employers to rely upon negative pre-employment alcohol tests conducted within the preceding six months, it specifically would require an employer, upon written request from the employee, to make records available to a subsequent employer. To preserve the employee's confidentiality, the identified person or recipient employer could not subsequently disclose the records, except as expressly authorized by the terms of the employee's written request.

It is likely that a prudent employer would ask an applicant to request this information from former covered employers, and not hire the applicant until satisfactory information had been received. The Department seeks comment, however, on whether it would be useful to require employers to require applicants to consent to obtaining this information from previous employers. In this approach, an employer would be prohibited from hiring an applicant for a safety-sensitive position if the applicant did not provide this consent. When a previous employer did not respond (*e.g.*, had gone out of business, could not be located, failed or refused to provide the requested

information), should the employer presume the employee's record as having been "clean" for that previous employer? How far back into the applicant's employment history should such a search go? Should the search apply only to tests mandated by DOT regulations? Would this approach produce significant delays in employers' ability to bring new workers on board? The Department seeks comment on these issues.

The rules would permit the employer to disclose information arising from the results of an alcohol test administered under these rules or from the employer's determination that the employee violated any prohibitions in these rules to the employee or in the context of a proceeding relating to an employee benefit, to DOT agency action against the employee (*e.g.*, an action to revoke a certificate), or to an NTSB safety investigation. The employer would also have to make information available to DOT offices having regulatory or review authority.

Consequences for Employees Engaging in Alcohol-Related Conduct

Removal From Safety-Sensitive Function

In general, the OA rules would prohibit a covered employee who has engaged in conduct prohibited by any of the OA rules from performing safety-sensitive functions until he or she has met the conditions for returning to such work. The rules would require employers, if they have determined that the employee has violated these rules, to ensure that the employee does not perform or continue to perform safety-sensitive functions. The rules, however, would prohibit the employer from taking any other action under these rules against an employee based solely on test results showing an alcohol concentration less than 0.04. The proposed rules would not prohibit an employer with authority independent of these rules from taking any other action.

Required Evaluation and Testing

Each OA NPRM would prohibit a covered employee from performing safety-sensitive functions following the employee's violation of an OA rule, unless the employee has been evaluated by a SAP, completed any requirements for rehabilitation, and "passed" a return-to-duty test with a result below 0.02.

The rules would provide an exception to the requirement for immediate removal and prohibition on return-to-duty without undergoing an evaluation; they would not prohibit the employee from temporarily continuing to perform safety-sensitive functions necessary to respond to an emergency, including responding to a situation that could result in an emergency or an imminent threat to public health and safety. For example, a truck driver who has violated the alcohol rules could continue to attempt to move a truck carrying hazardous materials if it were stuck on railroad tracks, a bridge, or on an exit ramp of a highway. The exception would not support the employee's continued performance of the safety-sensitive functions once safety is achieved or if a replacement employee is readily available.

Other Alcohol-Related Conduct

Although the Department is not proposing that alcohol concentrations below 0.04 constitute a violation of the rules, it is concerned about employees whose alcohol test indicates some alcohol in their system. As noted earlier in this preamble, an alcohol concentration of .039 may not warrant evaluation and rehabilitation but it may have an adverse effect on that individual's abilities. Alternatively, the individual's blood alcohol curve may be rising (*i.e.*, the individual may have just consumed enough to produce an alcohol concentration of 0.04 or greater, but the alcohol is just entering the bloodstream and, at the time of testing, the alcohol concentration is rising). Permitting such employees to continue performing safety-sensitive functions, even though there is knowledge of alcohol in their systems, would violate our and the employer's and employee's safety responsibility. Therefore, in addition to the 0.04 alcohol concentration prohibition, the rules would prohibit covered employees found to have an alcohol concentration of 0.02 or greater but less than 0.04 from performing or continuing to perform safety-sensitive functions. The employer could not permit the employee to perform or continue to perform such functions, until the employee's alcohol concentration drops below 0.02 or until the start of the employee's next regularly scheduled duty period, if it occurs at least eight hours following administration of the test. As discussed above, the rules would not prohibit the employee from temporarily continuing to perform safety-sensitive functions necessary to respond to an emergency, including a situation that could result in an emergency or an imminent threat to public health and safety, but they would not support continuance of the functions once the emergency has been averted.

If the employer wants to use the employee to perform safety-sensitive functions less than eight hours after the test, the employer must conduct a retest. When it falls below 0.02, the employee could be put back into a safety-sensitive function. If the retest result is above 0.04, the employee has violated the prohibition against having an alcohol concentration greater than 0.04. (Given the characteristics of alcohol metabolism, it is also likely that the employee would have violated the prohibitions on pre-duty or on-duty use.) The employee would then be required to meet the conditions for returning to safety-sensitive functions.

The OA NPRMs and the part 40 alcohol testing procedures would treat any indicated alcohol concentration reading of less than 0.02 on an evidential breath testing device (EBT) as "negative." Given the limits placed on the accuracy of measuring alcohol concentration in body fluids or breath, the rules use 0.02 as the threshold for establishing any measured alcohol concentration. Readings below 0.02, therefore, would have no significance for any purpose under our rules.

Use of Back Extrapolation

What should employers be required or permitted to do under the proposed regulations where the indicated breath alcohol concentration is 0.02 or greater, but less than 0.04, and enough time has passed since the performance of a safety sensitive function (*e.g.*, in a post-accident test) to raise questions about whether the alcohol concentration during the performance of the safety-sensitive functions (*e.g.*, at the time of the accident) was 0.04 or greater? The rules would require action only based on actual readings on the EBTs. They would not permit back extrapolation.

The employers' requirement to remove persons with indicated alcohol concentrations of 0.02 or greater and less than 0.04 from safety-sensitive functions for a period of not less than 8 hours or until they retest below 0.02 would achieve some of the goals of allowing back extrapolation. The Department seeks comment on the extent to which employers (and other fact finders) should be free to apply forensic principles to evaluate whether the individual may have used alcohol on the job or reported for the safety-sensitive functions with a prohibited alcohol concentration. The Department also seeks comment on whether, if employers conduct this kind of analysis, the results of back extrapolation should be allowed to have effect under the DOT alcohol testing program and visit upon the covered employee the consequences

of a DOT test result in that range. In the alternative, should the employer, as far as the DOT program is concerned, only be permitted to apply the consequences attaching to a result of 0.02 or greater but less than 0.04, but have the discretion, under its own authority, to take other action? Should the employer be prohibited from taking action against the employee based on a DOT-mandated test beyond actions required by the DOT rules?

The rationale for back extrapolation is based on studies that show that the average rate of elimination of alcohol from the bloodstream is around .015 per hour, though this rate may well decline at low concentrations (0.02 and below). Individuals' rates of alcohol elimination are very often not "average," however. Further, it is ordinarily not known when the individual last ingested alcohol or how much alcohol he or she consumed. All of these factors makes back extrapolation subject to substantial inaccuracy. Such analysis requires a number of "assumptions." Some of the assumptions relate to the individual subject (*e.g.*, whether there is healthy liver function; or the rate of elimination may be less than or greater than 0.015 per hour due to metabolic differences), some to facts or claims that may be supplied by the individual (no on-duty consumption, no consumption during the pre-duty abstinence period), and others to data that can be supplied by the employer (when the event occurred that triggered the test, when the test occurred). It is not only desirable but necessary for such analysis to be conducted by an expert in forensic toxicology. Such services may be in short supply. Therefore, we do not propose to permit back extrapolation of alcohol test results under these rules.

Alcohol Misuse Information, Training, and Referral

Employer Obligation to Promulgate a Policy on Alcohol Misuse

Each employer would have to provide educational materials that explain the requirements of these rules and the employer's policies and procedures with respect to meeting those requirements. Each employer also would have to provide written notice to every covered employee and to representatives of employee organizations concerning the availability of this information. Under the rules, the materials would have to include: the identity of a contact person knowledgeable about the materials; categories of employees subject to testing; what period of the workday or what functions would be covered by the rules; a description of prohibited conduct and the circumstances that would trigger testing; testing procedures; an explanation of what constitutes a refusal to submit to testing and the attendant consequences; and the consequences of violating the rules.

In addition to information on how the employer would implement the DOT program, the materials also may include the description of any self-identification program or procedure under which a covered employee may decline to perform or continue to perform safety-sensitive functions without penalty when he or she may be in violation of these rules, including any limits on the program. The employer also may include information on additional employer policies with respect to the use or possession of alcohol, including any consequences for an employee found to have a specified alcohol concentration, that are based on the employers authority independent of these rules. These additional policies must be clearly identified as based on the employers independent authority.

We believe motivating employees about safety in the workplace and good health is important to making an alcohol misuse prevention program work. Because the primary objective of any effective alcohol misuse program is deterrence rather than detection, it is especially important that, before any testing is begun, employers make their employees fully aware of the dangers of alcohol misuse in their jobs, advise them where help can be obtained if they have a problem with alcohol use, and the potential consequences for people who violate these rules. An effective company policy and educational effort can more than pay for itself with the benefits it can achieve. Should these rules require that employers give covered employees a minimum period of notice (e.g., 60 days) that the testing program is going into effect?

We recognize that it may be difficult to get the attention and support of workers by handing them literature or displaying various materials on a bulletin board. To illustrate this, a soon-to-be released safety study of the New York City Transit Authority (NYCTA) finds that merely distributing literature about NYCTA's substance abuse program without establishing an on-going substance abuse awareness program has not effectively communicated training information to employees. Generally, employees interviewed for the report could not remember receiving the distributed literature; the few who did remember it could not describe its purpose. What more effective means for educating employees and transmitting information about alcohol misuse prevention programs are available that would be economically feasible for employers? Should the OAs impose training requirements for non-supervisory employees? What additional costs would such requirements impose? What quantifiable benefits would they generate?

Training for Supervisors

Under the OA NPRMs, employers would have to ensure that persons designated to determine whether reasonable suspicion exists to require an alcohol test receive at least 60 minutes of training on the physical, behavioral, speech, and performance indicators of probable alcohol misuse. Would this amount of time be adequate? Is more extensive supervisor training necessary because of the need to require identification of symptoms associated with lower concentrations of alcohol? Since comparable training for drug use detection is required by the DOT drug testing rules, can this requirement be melded into that one to minimize costs to employers?

Referral, Evaluation, and Treatment

The Act requires that an opportunity for treatment be made available to covered employees. This does not require employers to provide or pay for rehabilitation or to hold a job open for an employee with or without salary; the costs of such a requirement could be prohibitive and could jeopardize this program. In the drug testing rules, the Department decided that it was inappropriate to establish a federal role in mandating that employers provide for rehabilitation and that it should be left for management/employee negotiation. The same logic would apply here and the Department has decided not to propose mandating employer-provided rehabilitation in these rules.

We encourage those employers who can afford to provide rehabilitation to do so through established health insurance programs, since it helps their employees, benefits morale, is often cost-effective and ultimately contributes to the success of both their business and their testing programs. However, repeated provision of access to rehabilitation services after "positive" testing, followed by repeated reinstatement and repeated violations may raise public safety and liability concerns for employers. Would it dilute the deterrent value of testing programs and encourage further misuse of alcohol or drugs?

To implement the statutory mandate, these proposed rules would require an

employer to advise a covered employee, who engages in conduct prohibited under these rules, of the available resources for evaluation and treatment of alcohol problems, including the names, addresses, and telephone numbers of SAPs and counseling and treatment programs. The employer would have no similar obligation to applicants who refuse to submit to or fail a pre-employment test; this obligation would run only to current employees. The rules would not prohibit an employer with independent authority from taking any other action otherwise consistent with law.

A SAP would evaluate each covered employee who violates these rules to determine whether the employee needs assistance resolving problems associated with alcohol misuse and refer the employee for any necessary treatment. Before returning to duty, each employee identified as needing assistance must (1) Be evaluated again by a SAP to determine whether the employee has successfully complied with the rehabilitation program prescribed following the initial evaluation, (2) Undergo an alcohol test with a result of less than 0.02 alcohol concentration, and (3) Be subject to a minimum of six (6) unannounced, follow-up alcohol tests over the following twelve (12) months. Compliance with the prescribed treatment and passing the alcohol test would not guarantee a right of reemployment; they would be preconditions the employee must meet in order to perform safety-sensitive functions. The decision on whether to return the employee to his or her job we would leave to the employer.

The proposed rules would provide that the evaluation and the rehabilitation may be provided by the employer, by a SAP under contract with the employer or by a SAP not affiliated with the employer. The choice of SAP and assignment of costs would be made in accordance with employer/employee agreements and employer policies. Is the requirement for an evaluation meaningful if we do not specify who should pay for the evaluation? What if both the employer and employee refuse to pay for the evaluation? Should the rules go further and prohibit an employer from taking any action under the rules against a covered employee unless the employee has been evaluated by a SAP or refused such an evaluation? Should a failure to pay constitute a refusal? What problems would this raise?

Since the determination made in alcohol tests required by these NPRMs is whether there is a prohibited concentration of alcohol in an individual's system, regardless of the source, we believe that there is no need to require a medical review officer (MRO) to interpret positive test results, as required by the DOT drug testing rules. There is no acceptable explanation for the prohibited alcohol concentration, so there is no role for an MRO. The mental health and/or medical professionals to whom the employee is referred for treatment can diagnose the disorder or disease, if any, associated with the alcohol misuse. A SAP would then determine whether the employee has complied with any rehabilitation requirements. The rules define the SAP to include a licensed physician (with a Medical Doctor or Doctor of Osteopathy degree) with knowledge of and clinical experience in the diagnosis and treatment of alcohol-related disorders (the degrees alone do not confer this knowledge), or a licensed or certified psychologist, social worker, or employee assistance professional with knowledge of and clinical experience in the diagnosis and treatment of alcohol-related disorders. In some OA rules, where the employee operates under a certificate or license, a licensed physician must certify, in conjunction with a medical examination, whether the employee can return to work.

Other Issues

As in the drug testing rules, we want to provide program flexibility to allow employers to carry out their programs in a more efficient, cost-effective manner and to ease the compliance burden on small businesses. Testing, for example, could be conducted by the employer, an outside contractor, a consortium, a union, or any other entity. The use of consortia has worked well in the drug testing area; in fact, it is the predominant method of compliance in some industries, particularly among smaller employers. We propose to delay implementation of the rules for smaller employers to enable them to join established consortia or large employer testing programs, rather than have to establish their own programs. The operating administrations have tried to make it easier for smaller employers; FRA proposes to retain its existing exemption from its drug and alcohol rules for railroads with 15 employees or less. (These entities are not considered sufficiently safety-sensitive to be subject to testing, since they tend to operate on private track at slow speeds.) FAA, which is proposing to require covered employers to submit plans for their alcohol misuse programs, would impose significantly reduced plan requirements on smaller employers. (FRA and FAA both propose plan submission, which is customary in conducting their programs; FTA proposes to require employer certification of compliance with the rules, which is customary in its programs.) What additional measures can we take to make it easier for smaller employers to comply with the rules?

Employers may find it more cost-effective and convenient to conduct alcohol testing at the same time they conduct drug testing. Because we are proposing to require alcohol testing at or near the time of performance, however, all random and reasonable suspicion drug testing also would have to occur at such times. For random testing, employers could easily accomplish this by randomly choosing the employee's number and then testing the employee the next time he or she performs safety-sensitive functions. What problems would be raised by combining the two programs?

Motor Carrier Safety Assistance Program (MCSAP Proposal)

Each OA also seeks public comment, especially from state and local governments, on the possibility of an alternative to requiring motor carrier, aviation, rail, mass transit and pipeline employers to conduct some or all alcohol testing, particularly post-accident and random testing. Specifically, we seek comments on whether the testing could be conducted under the FHWA Motor Carrier Safety Assistance Program (MCSAP), which is a Federal/State cost reimbursement and matching grant-in-aid program, or a similar program. Possible use of the MCSAP program for motor carrier testing is discussed in detail in the FHWA NPRM. The objective of MCSAP is to reduce the number and severity of accidents and hazardous materials incidents involving commercial motor vehicles. The MCSAP seeks to accomplish this by substantially increasing the level of nationally-uniform inspection and enforcement activities and the likelihood that safety defects, driver deficiencies, including alcohol misuse, and unsafe carrier practices will be detected and corrected. Currently, 48 States and four U.S. territories are actively participating in the MCSAP.

The statute requires the Secretary of Transportation to conduct a pilot program for the purpose of testing drivers on a random basis to determine if a driver has used alcohol or a controlled substance in violation of law or federal regulation. The pilot testing program is to be administered as part of the MCSAP and implemented in four states for a period of one year. At the completion of the pilot program, the

Department will issue a report of the program, including recommendations concerning the desirability and implementation of a MCSAP-administered random testing program. FHWA began the implementation of the required pilot project in Fiscal Year 1993.

In the MCSAP option presented in the FHWA NPRM, participating States would have to submit a random alcohol testing plan as part of their application for FHWA MCSAP funding. The random alcohol testing plan component would conform to the requirements of these rules.

Recognizing that some statutory changes to implement the MCSAP option may be necessary, we seek public comment on whether involving State and local authorities in alcohol testing would work. It could be accomplished at three different levels of involvement. First, the FHWA NPRM's MCSAP option would substitute post-accident and random testing by local officials for motor carrier based testing. Would this save costs? Since States already have some equipment and their officials are already trained in using that equipment, overall costs may be less. As neutral, third-party testers, their tests may be better accepted by employees. Due to the fact that local officials may reach an accident first, they can help in determining who was involved in the accident.

The second would involve extending this option to covered safety-sensitive employees from the other transportation industries issuing proposed rules today. Could the program be adapted so that employees regulated by other OAs, such as RSPA and FAA, could be included?

The third would allow substitution of local official testing for all types of testing required by these rules (*i.e.*, pre-employment and reasonable suspicion in addition to random and post-accident). Would this be useful? Employers could send employees needing testing to a local State testing facility or the State could come to the employer upon request, since it may have mobile vans for this purpose.

Because the expenses of such a program would lessen the resources available for other MCSAP programs, user fees may be necessary for such an alternative to be possible. Would it be feasible to impose user fees for such a system? As noted above, costs may be less under such a program, so even if all employers were assessed a user fee, their overall costs would be much less than if they had to conduct their own testing. Do employers think such an option is feasible and would result in lower costs for them if available? Since some States use blood tests upon a testee's request for confirmation, we also seek comment on whether blood tests conducted by state officials should be acceptable for the purposes of these proposed rules, because such tests must meet standards that would already make them acceptable in court.

Multi-Agency Coverage

In some transportation industries, a significant percentage of employees are subject to the testing rules of more than one DOT OA; some are subject to the testing rules of more than one federal agency (*e.g.*, employee drivers covered by the Department of Energy may also be covered by FHWA). This is one reason we have tried to make the DOT OA proposals as uniform as possible. Generally, where it would not compromise the effectiveness of the testing program or other requirements, one DOT agency would defer to another or recognize the validity of the other's requirements.

There are different situations in which multi-agency coverage can occur:

(1) An employee may perform different modal functions for the same employer. For example, an employee may act as both a pipeline inspector and a truck driver for a single employer, activities regulated by the RSPA and the FHWA, respectively. Such an employee could be in a single random pool under the proposed rules, but would have to have an equal chance of being selected for random testing while performing either pipeline inspection or driving functions.

(2) An employee may have two employers. For example, an employee may fly for one employer and drive for another. That employee would be subject to two random testing requirements and would generally be in two different pools. As discussed above, however, the employee could be covered by one random testing pool, *e.g.*, one run by a consortium; in both situations, the employee would be subject to random testing in either job.

The rules would require that employees cease safety-sensitive functions in every mode of transportation, once determined to be in violation of any one of the OA rules. We note that the Act also prohibits the performance of safety-sensitive functions in the aviation, rail, motor carrier, or mass transit industries by an employee who has used alcohol in violation of any law or any federal regulation.

We also have been consulting with other federal agencies during this rulemaking proceeding in an attempt to make Federal government rules as consistent as possible. The Department of Energy (DOE) already has issued a similar proposed rule on alcohol misuse for employees in nuclear facilities. At this early stage, we are not aware of any serious programmatic differences with our rulemakings. However, to avoid any potential conflict, DOE officials have indicated that they plan to defer to the DOT rules where there are entities covered by both programs. We seek comment on any other problems caused by multi-agency coverage and potential solutions.

Impairment Testing

In the ANPRM, we discussed the possible use of impairment testing, such as ignition interlock devices (IIDs) that prohibit operation of a vehicle if the driver does not pass the test. These are being required in some states in passenger vehicles used by persons convicted of driving under the influence. Such devices, which use breath test components, are costly and relatively easy to circumvent (*e.g.*, another person could operate or blow into the device). Other devices exist that purport to measure impairment. These include the critical tracking tester (CTT), the Tracometer (which requires a driver to align a pointer on a moving target), computer devices, and simulators. The use of some devices that measure certain performance decrements would require the employer to run baseline tests on each employee for comparison with the results. These devices may need further validation before a practical device is available for use at the workplace to achieve the objectives of the proposed alcohol testing regulations. Moreover, these devices measure performance decrement, which can be caused by many things other than alcohol or illegal drug use.

It makes good sense to remove employees impaired for any reason from safety-sensitive positions, and these rules do not prohibit any employer from doing so under his or her own authority. However, the Act requires that the covered OAs require testing for alcohol concentration, not impairment. Indeed, the Act specifically requires that the devices used for confirmation testing be capable of providing quantitative data regarding alcohol by a scientifically recognized method. Even if performance testing devices could be accurate as screening devices, if employers then had to confirm positive results with an EBT, these costs would be much higher than if they used an EBT with both tests. Therefore, the OAs have not proposed anything other than breath alcohol testing in these rules. As noted earlier,

the Department intends in the future to seek comment on the scientific, technological, and legal status of these "performance testing" devices in a separate notice.

Self-Identification/Peer-Referral Programs

Since our primary purpose is to keep employees who have alcohol in their systems from performing safety-sensitive functions, employees should be able to identify themselves as unfit to work. We would like to encourage employers to establish self-identification or peer-referral programs and encourage employees to use them. These programs, which already exist in some segments of the transportation industry, allow an employee to decline without penalty to perform or continue to perform his or her job if the employee knows that he or she is or may be impaired by alcohol. We do not propose to require self-identification programs, because we believe that they are a matter more appropriate for collective bargaining. The successful implementation of such programs depends upon joint labor-management commitment to an alcohol/drug-free work environment.

None of the proposed rules would prohibit employers from establishing or continuing a self-identification program or procedure under which a covered employee is permitted to decline to perform safety-sensitive functions when the employee may be in violation of an alcohol prohibition. However, the program could not interfere with the conduct of the alcohol tests required by these rules. Such a program could permit a covered employee to take a voluntary alcohol test to determine whether the employee is in violation of these rules; there would be no Federal consequences or requirements pertaining to the test or its results, however, since the test would not be required by DOT rules.

Employers and employees must address some important questions if they set up such programs. For example, should employees be allowed to self-identify after they have reported for duty? What should happen to employees referred by co-workers? They might be in violation of these rules by having a prohibited concentration of alcohol in their body while they are performing safety-sensitive functions. Should an undetected person be allowed off the job as quickly as possible no matter when he/she self-reports? What would best enhance safety?

The proposed rules would not interfere with an employer's unfettered discretion to impose its own sanctions against self-identifying employees, so long as the sanctions are not premised on our rules.

Education

In conjunction with the implementation of the proposed rules, the Department would distribute educational materials and conduct seminars designed to increase employee awareness of the risks of alcohol misuse by those who perform safety-sensitive functions. The Department took similar action in the drug area. There is some disagreement about the respective effectiveness of education vis-a-vis enforcement. Some researchers claim that education is more effective in preventing alcohol misuse than apprehension of the abuser. The American Automobile Association Foundation for Traffic Safety compared eight states that adopted tougher drunk driving laws with six that did not. The new laws had no effect at all on traffic fatalities. The Foundation attributes the overall decline in U.S. traffic-related deaths between 1980 and 1985 to public awareness campaigns by such groups as Mothers Against Drunk Driving (MADD). A Boston University researcher similarly concluded that social pressure and publicity "may be as important as government regulations in reducing drunk driving and fatal crashes." (Both quoted in "USA Today", Wednesday, August 3, 1988.)

These studies have been criticized as poorly designed and misleading, since education programs were never isolated as an independent variable for comparison. NHTSA believes that the most effective programs are those that combine education and enforcement. Public information and education programs, in the absence of enforcement activities or sanctions, have never been shown to have an impact on alcohol-related fatal crashes. Conversely, scores of studies have found that programs involving enhanced enforcement, roadside sobriety checkpoints, and the use of sanctions such as license suspensions frequently have resulted in significant reductions of alcohol-related fatalities. Although there is disagreement on the effectiveness of education alone, it appears that using education as an adjunct to deterrent measures would make both more effective. What more can the Department do to increase educational efforts about the misuse of alcohol?

International Issues

The Act mandates that the requirements for pre-employment, reasonable suspicion, random and post-accident tests for alcohol (and drugs) be applied to foreign operators in the aviation, rail and motor carrier industries to the extent those requirements are consistent with our international obligations. We must also "take into consideration any applicable laws and regulations of foreign countries." Because of the many questions raised about the implementation of this statutory mandate, we have decided that the best approach is to issue advance notices of proposed rulemaking on these issues. The FRA, FHWA, and FAA ANPRMs on international issues are published elsewhere in today's Federal Register.

Regulatory Analyses and Notices

General

Each of the OA preambles separately addresses a number of administrative matters concerning compliance with administrative requirements in statutes, executive orders and Departmental policies and procedures. Readers should refer to the individual OA NPRMs for statements specific to each NPRM.

AGENCY: Office of the Secretary, DOT.

ACTION: Proposed rule.

SUMMARY: Under the Omnibus Transportation Employee Testing Act of 1991, the Department of Transportation is required to implement alcohol testing programs in various transportation industries. This rule proposes uniform testing procedures that would be used by all Department of Transportation agencies conducting alcohol testing programs of the kind mandated by the Act. The statute also requires certain changes in the Department's drug testing procedures, which this rule proposes to implement. The Department is also proposing a Management Information System (MIS) to gather evaluation and enforcement information for the Department's drug and alcohol testing programs.

DATES: Comments must be received on or before April 14, 1993.

ADDRESSES: Comments should be sent to Docket Clerk, Att: Docket No. 48513, Department of Transportation, 400 7th Street, SW., room 4107, Washington DC, 20590. For the convenience of persons wishing to review the docket, it is requested that comments be sent in duplicate. Persons wishing their comments to be acknowledged should enclose a stamped, self-addressed postcard with their comment. The docket clerk will date stamp the postcard and return it to the sender. Comments may be reviewed at the above address from 9 a.m. through 5:30 p.m. Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Robert C. Ashby, Deputy Assistant General Counsel for Regulation and Enforcement, Department of Transportation, 400 7th Street, SW., room 10424, Washington DC., 20590, 202–366–9306; or Donna Smith, Department of Transportation Office of Drug Enforcement and Program Compliance, same street address, room 9404, 202–366–3784.

SUPPLEMENTARY INFORMATION:

Background

The Omnibus Transportation Employee Testing Act of 1991, enacted October 28, 1991, directed significant changes in the Department of Transportation's substance abuse-related programs for most transportation industries that the Department regulates. First, the Act directed the Federal Transit Administration (FTA) to promulgate a drug testing regulation for the transit industry. A previous FTA drug testing rule had been enjoined by the Federal courts on the basis of insufficient statutory authority. The Act also widened the Federal Highway Administration (FHWA) drug testing program to include some intrastate as well as interstate drivers for motor carriers.

Second, the Act required some changes in the Department's existing drug testing procedural rule. The most important of these changes was a requirement for using the "split sample" approach to testing in the programs covered by the Act, which Congress believed would provide an additional safeguard for employees.

Third, the Act required the Department to establish alcohol testing programs for the aviation, railroad, motor carrier, and transit industries. In response, the Department's operating administrations (the Federal Aviation Administration, Federal Railroad Administration, Federal Highway Administration, and Federal Transit Administration) are each today proposing an alcohol testing rule for its regulated industry. The Research and Special Programs Administration, for the pipeline industry, is proposing a similar regulation, in order to ensure parallel coverage for the Department's alcohol and drug testing regulations. The latter proposal is being issued under the existing RSPA safety regulatory authority. The Coast Guard is not proposing to change its existing alcohol testing regulations (33 CFR part 95 and 46 CFR part 4). The Department of Transportation has carefully coordinated the five proposed industry regulations, in order to provide substantive consistency and common language. Only where industry-specific differences can be justified as essential do the proposals differ from one another.

The Department's drug testing procedures, 49 CFR part 40, have governed drug testing under all operating administration drug testing rules. This proposal extends the same organization to alcohol testing for the five modes affected. Under the proposal, the existing drug testing procedures would become a separate subpart of the regulation, and a new subpart containing the alcohol testing procedures would be added.

Finally, the Department is proposing management information system (MIS) requirements for the Department's drug and alcohol testing requirements. The basic, Department-wide MIS provisions for drug and alcohol testing are proposed in part 40; separate modal drug MIS NPRMs and MIS provisions of the modal alcohol NPRMs apply these requirements to particular industries.

Having all the Department's uniform drug and alcohol testing procedures, as well as MIS provisions, in a single

regulation will simplify compliance for covered parties and avoid confusion by permitting all parties to look to one source for information on these issues. This should be particularly helpful to those employers who have employees covered by more than one DOT operating administration rule. However, employers regulated by the Coast Guard would continue to refer to 33 CFR part 95 and 46 CFR part 4.

Subpart A—General

Section 40.1 Applicability

This section would be revised to more accurately state the relationship between part 40 and operating administration rules. The operating administration drug and alcohol testing rules and part 40 are all manifestations of the Secretary's authority to regulate transportation industries in the interest of safety. Part 40 governs the activities of transportation employers not directly, but through the medium of the operating administration regulations, which direct the respective covered employers to conduct their tests according to part 40. As noted above, the Coast Guard has retained its existing alcohol tests rules. For this reason, while part 40 drug testing procedures apply to testing of employees covered by Coast Guard drug testing rules, part 40 alcohol testing procedures would not apply to employees covered by existing Coast Guard alcohol testing rules.

Applying the alcohol and drug testing procedural requirements to regulated parties through the regulations of the operating administrations is key because each operating administration has responsibility to implement the alcohol and drug testing programs for the mode of transportation it regulates. Oversight, administration and enforcement will be done by an operating administration for the employers it regulates. For example, an air carrier covered under the FAA's alcohol testing rule that failed to comply with a procedural requirement of part 40 would be violating the FAA's regulatory requirement that the air carrier use part 40 procedures. The FAA would use its existing enforcement procedures and would have authority to assess civil penalties and take certificate action, as appropriate.

In any regulatory program involving several different Department of Transportation agencies, coordination and consistency in the application and interpretation of regulatory provisions are essential. With two exceptions (the Coast Guard alcohol testing program and the FAA post-accident toxicology program), part 40 controls all the Department's drug and alcohol testing programs. This uniform regulatory language must be interpreted consistently. A provision cannot mean one thing in the railroad industry, something different in the transit industry, and a third thing in the aviation industry. Consequently, the Department has made a commitment to establish, before the issuance of a final rule, an internal coordination process that will ensure that formal interpretations of part 40 and guidance material developed for general distribution would be reviewed and receive DOT concurrence to ensure that they are valid on a Department-wide basis. The Department seeks comment on the most appropriate means through which regulated parties could learn that interpretations or guidance had been coordinated in this way. This could be particularly useful for employers with employees subject to more than one operating administration rule.

In creating this mechanism, the Department would ensure that it did not prevent operating administration personnel from answering questions, offering informal guidance or pursuing enforcement actions. But to maintain the essential Department-wide consistency—the absence of which would impose a significant, unnecessary burden on the regulated industries and on employees subject to testing—the Department strongly believes that a coordination mechanism of this kind must be established.

A related issue concerns the possibility of differences, or real or perceived conflicts, between part 40 and operating administration rules. The operating administration rules all would require employers to follow part 40 procedures. However, are there any provisions of any operating administration rules that might be viewed as inconsistent with the mandate to use part 40 procedures?

For example, under existing part 40 drug testing rules, an MRO must grant a retest if the employee asks for the retest within 72 hours of learning of a positive result. Some modal rules allow up to 60 days for such a request. The Department received questions about how the provisions related to each other. (We said that since a request received within 72 hours was clearly a request received within 60 days, there was no conflict between the provisions.)

The part 40 NPRM explicitly addresses this question, but there may be similar issues between the proposed part 40 alcohol testing procedures and the operating administrations' proposed alcohol testing rules. We ask commenters to point out any potential problems of this kind to us. It is the Department's objective to eliminate or clarify any such perceived inconsistencies. We also seek comment on any mechanisms or rules of construction commenters think would be appropriate to resolve any problems of this kind that may occur after final rules are published.

Although implementation of part 40 generally would be done through an operating administration, part 40 is an Office of the Secretary of Transportation (OST) regulation. As such, requests for exemption would be processed under 49 CFR part 5, an existing regulation covering requests for exemption from or amendment to all OST rules, rather than through separate operating administration exemption procedures. This would add an additional element of consistency. This approach is consistent with the existing part 40 drug testing procedures, from which exemptions would also be granted under part 40 (See 54 FR 49863; December 1, 1989).

The grant of an exemption under part 40 must be based on special or exceptional circumstances. It is not appropriate to carve out a generally applicable exception to a rule. Also, an exemption must be based on circumstances not contemplated as part of the rulemaking. The exemption process is not designed to revisit issues settled in the rulemaking process.

Section 40.1 would also emphasize that other parties involved in the testing process—such as consortia, contractors, and agents—"stand in the shoes" of the employer. They are, therefore, subject to the same obligations and requirements as the employer. If an employer is required to do something, so is the consortium that is conducting testing for the employer. If the consortium fails to do something correctly, the employer is in noncompliance.

The Department seeks comment on how best to resolve one problem that we have noted in administering the drug testing rules. In some cases where an employee has tested positive for drug use, the employee has sought review of a subsequent personnel action in an available forum. In some cases, the decisionmaker in that forum has decided that the test was procedurally invalid and ordered relief (*e.g.*, reinstatement). Employers have been uncertain about whether such a determination overrides the employer's obligation to comply with DOT drug testing rules.

This problem could arise in a number of ways. For example, suppose an employee tests positive. The employer discharges the employee, who files a grievance as provided in a labor-

management agreement. An arbitrator decides that the test was invalid because of something part 40 does not regard as a "fatal flaw" (*e.g.*, the collector failed to note on the custody and control form that the specimen temperature had been taken) or on the basis of evidence not provided for in part 40 (*e.g.*, a test of a urine sample in a laboratory not certified by the Department of Health and Human Services (DHHS)). The arbitrator orders the employee reinstated. DOT rules prohibit the employer from allowing an employee who has tested positive from performing a safety sensitive function without going through the steps provided in DOT rules (*e.g.*, evaluation by a substance abuse professional (SAP), passing a return-to-duty test, being subject to follow-up testing). Does the arbitrator's decision authorize (or obligate) the employer to return the employee to safety-sensitive duties without complying with these regulatory provisions? Should this question be answered differently in situations in which other decisionmakers (*e.g.*, the National Transportation Safety Board in an FAA certificate case, a court) or other fact situations (*e.g.*, a disputed determination that there was a "fatal flaw" in the testing process or a determination that a combination of lesser flaws was sufficient to invalidate a test) are involved.

One important consideration in answering this question, at least in the arbitration context, is that requirements of the DOT drug and alcohol testing rules are based on Federal safety law. It is well established that labor and management cannot agree to establish testing requirements for covered employees that are inconsistent with Federal rules. It seems unlikely that an arbitrator appointed under the authority of a labor-management agreement could, by ordering a result which is contrary to DOT rules, obviate the employer's duty to comply. But how would the employer know what its obligations were in a specific case? Would there need to be a DOT advisory or decisional mechanism established to provide this information to employers?

Section 40.3 Definitions

This section contains definitions applying to both drug and alcohol testing. Definitions specific to drug or alcohol testing would be found in §§ 40.41 and 40.75, respectively.

Subpart B—Drug Testing

Section 40.25 Specimen Collection Procedures

The Act requires the split sample method to be used for drug tests under the FTA, FRA, FHWA, and FAA rules. By the "split sample" method, the Act means a procedure in which urine specimens obtained for drug testing are subdivided into two containers and processed as two specimens. This procedure makes a second, sealed specimen available for testing at a second DHHS-certified laboratory if the test of the first specimen is "positive."

The existing rule spells out a split sample procedure, but makes it an employer's option. Reflecting the statute, the proposed rule would mandate the use of this procedure for the four operating administrations that the Act covers. Since the Act does not cover RSPA or the Coast Guard, the use of split samples will remain optional for employers whose employees are subject only to these two rules.

The Department proposes that the primary and split samples, with accompanying paperwork, would flow from the collection site to the DHHS-approved laboratory used for the test of the primary sample. What happens to the "split" is described under § 40.29.

The Department understands that the National Institute on Drug Abuse (NIDA) is currently considering reducing the urine specimen volume for a primary or single test from 60 to 30 ml. This amount, in our view, is sufficient to allow for all testing called for under part 40 procedures. The Department consequently endorses this proposed change, which would also be important in operating a split sample system successfully. Under the proposed split sample procedure, the primary sample, therefore, would be 30 ml, with an additional 15 ml collected for the "split." The minimum sample volume, which the collection site person would ask the employee to provide, would be 45 ml for the split samples procedure and 30 ml in the single sample procedure.

Under the existing rule, there have been a number of problems with employees being unable to provide a 60 ml sample. The proposed change should mitigate this problem. The Department also seeks comment on whether the change from a 60 ml to a 30 ml sample (45 ml in the case of a split sample) would pose significant problems for laboratories, in terms of their being able to have sufficient urine for initial testing, confirmation testing, and reanalysis.

For split samples, the proposal envisions the donor providing the entire 45 ml sample in a single collection container. The collection site person would then pour the urine into two separate specimen bottles for shipment to the laboratory. The proposal would permit a variation on this procedure in emergency or unusual circumstances (*e.g.*, a post-accident test at a remote location where the normal testing kit was not available). In this situation, the employee could urinate into one container, with a portion being poured into a second. Both would be processed and sent to the laboratory. The Department seeks comments on whether this variation is advisable and on any other collection methods that might be workable for split samples.

If the employee could not produce a 45 ml sample, the employer would direct the employee to drink up to 24 ounces of fluid in a period of up to two hours. This is a modification of the current "shy bladder" procedures designed to avoid any possibility of side effects from drinking too much water.

Section 40.29 Laboratory Analysis Procedures

In view of the statutory requirement for split samples under four of the Department's drug testing rules, procedures for laboratory handling of split samples are set forth in greater detail than in the present rule. The split sample would be logged in and stored securely, with the seal remaining intact. If the test of the primary specimen were negative, the laboratory would dump the split sample. If the test of the primary sample is confirmed positive, the lab would continue to hold the split specimen for a year (or longer if a legal challenge were pending) to ensure that it remained available for a second test. If the employee requested a test of the split specimen (through the medical review officer (MRO)), the first laboratory would ship the unopened split sample to a second DHHS-approved laboratory for testing. If the test of the split sample fails to confirm the presence of drug(s), then the entire test would be canceled.

Section 40.33 Reporting and Review of Results

Paragraphs (e) and (f), which deal with the reanalysis of specimens, would be amended in light of the mandatory use of split samples under four of the Department's drug testing programs. Under paragraph (e), where the single sample method of collection is used, the MRO would, if the employee asked within 72 hours of learning of a verified positive test, order a reanalysis of the

specimen. If the reanalysis were negative at the level of detection (*i.e.*, showed no presence of the drugs for which the sample originally tested positive), the test would be canceled. This is the same procedure as is followed under the existing rule. The difference is that the right of the employee to obtain a reanalysis of the primary specimen would not be available in cases where the split sample method of collection is used. The Department believes that the right to have a split sample tested sufficiently protects employees, and that having both a reanalysis of the original specimen and a test of the split specimen available would be unnecessarily duplicative and costly.

Paragraph (f) proposes a similar procedure with respect to split samples. As with reanalysis, testing of the split sample would only be for the presence of drugs for which the primary sample had tested positive. Under this procedure, if the split sample had been lost, or sufficient urine for testing were unavailable, the test would be canceled, since the statute creates a right to having the split sample tested.

The 72-hour notice window is the same time frame found in the existing part 40. Some operating administration regulations, however, provide that a request may be honored as long as 60 days from the date the employee learns of a positive test result. The Department seeks comment on whether a period longer than 72 hours is needed, and, if so, what that period should be (*e.g.*, a week, 10 days, 30 days, 60 days).

Section 40.41 Definitions

This is a new section, separating out those definitions pertaining only to drug testing from other definitions in part 40. There is a new definition of "canceled test." As the definition explains, a canceled test is neither positive nor negative, just invalid. The term includes a sample which has been rejected by the laboratory.

Subpart C—Alcohol Testing

This subpart sets forth the alcohol testing procedures that all transportation employers covered by the FAA, FHWA, FRA, FTA, and RSPA alcohol testing rules would implement. These uniform procedures are intended to ensure consistency in the administration of alcohol testing nationwide, whether an employer is an airline based in Atlanta or a small motor carrier in Oregon.

Persons familiar with the Department's drug testing rules will notice some similarities between those rules and the proposed alcohol testing procedures. The Department is proposing rules concerning the collection site and the collection site person (called the "breath alcohol technician" (BAT) and the "alcohol testing site," respectively, in the alcohol testing procedures), a testing form, preparation for and administration of initial and confirmatory tests, confidentiality, safeguarding, test records, what to do if an employee cannot provide an adequate amount of breath, and what errors in the process are "fatal flaws" that invalidate a test. Except for the "fatal flaws" section, all these provisions have parallels in the drug testing procedures.

The differences between this subpart and the drug testing procedures are equally noteworthy. The drug testing procedures call for the donation of a quantity of urine, its packaging, transmission to a NIDA certified laboratory for testing, and the use of an evidentiary chain of custody. A medical review officer is used to interpret lab results, so as not to label someone who has legitimately ingested a substance as an illegal drug user .

The alcohol testing procedures would use breath for purposes of determining the alcohol concentration as measured by a breath testing device that provides a definitive, quantitative result at the alcohol testing site. Therefore, packaging, chain of custody, and transmission rules are not needed. No testing laboratories would be involved, and therefore there would be no need for laboratory certification or procedure rules. Because the issue to be determined is whether an impermissible quantity of a legal substance (ethyl alcohol) is in the person's system—whether it comes from use of an alcoholic beverage or medication—a medical review officer to interpret the results would not be needed. The result is that these alcohol testing procedures would be shorter and less complex than the drug testing procedures.

As the foregoing discussion suggests, perhaps the most important decision underlying these proposed procedures is to rely exclusively on breath testing, rather than involving testing of blood, saliva, hair, or urine specimens, or evaluations of motor or cognitive functions as part of the process. After careful consideration of the scientific, economic, practical and legal issues involved, the Department believes that the choice of breath testing is consistent with its commitment to an accurate and fair testing program.

Analysis of breath for alcohol (specifically ethanol) has been practiced for many years, both in the clinical diagnosis of intoxication and for traffic law enforcement purposes. In light of the use of breath test devices for law enforcement purposes, the National Highway Traffic Safety Administration (NHTSA) developed Guideline Specifications (49 FR 48855; December 14, 1984) to ensure that the equipment meets certain minimum performance specifications.

Instruments meeting the NHTSA specifications are included in a "Conforming Products List of Evidential Breath Testing Devices" (CPL), which is used in the purchase of instruments for law enforcement purposes. Instruments on this list enjoy wide acceptance in the judicial community and have met court scrutiny for precision and accuracy. These instruments are reliable in measuring an accurate alcohol concentration from breath, as long as the operator is appropriately trained and the instrument maintained in accordance with the manufacturer's guidelines.

The precision and accuracy of the instruments, combined with their judicial acceptance, make breath testing instruments of evidential quality the most appropriate method to use in testing for alcohol misuse in the transportation industries covered by the proposed regulations of the five affected DOT agencies. Breath tests provide an immediate result. Results are obtained nearer to the time at issue than is possible with blood testing. This is a significant advantage in that it enables an employer to remove an employee who tests positive from performing safety-sensitive duties quickly.

Chain of custody issues that would arise with blood testing do not arise in breath testing. The needs for special collection facilities, certified testing laboratories, and the use of medically trained personnel would not be present in breath, as opposed to blood, testing. The operating cost per test is also lower. Breath tests are much less intrusive than blood tests, from the employee's point of view.

Also, properly conducted breath tests can accurately reflect the alcohol content of the pulmonary arterial blood which, in the initial or absorption phase of alcohol assimilation, gives a truer picture of alcohol influence on the central nervous system than a venous blood sample. In the post-absorptive phase, a quantitative breath test result will yield comparable results to blood analysis (arterial or venous).

This is not to say that blood testing is not a legally valid means of establishing alcohol concentration, on the basis of which it is appropriate to take action with respect to an employee. For example, existing Coast Guard alcohol testing regulations provide for post-

accident alcohol blood tests in some situations. The validity of these procedures which are subject to evidentiary hearings, has long been recognized in administrative and court proceedings, and it is not brought into question by the Department's proposal to use breath testing in other contexts.

The Department is aware of a number of other methods of testing for the presence of alcohol that are being marketed or developed (*e.g.*, measuring alcohol content in saliva or eye vapors). As other technologies become available, the Department is willing to consider the possibility of their use in its alcohol testing program. The Department would evaluate the merits of such testing methods or devices with respect to such factors as their accuracy and reliability under field conditions, acceptability as evidential devices, intrusiveness, ability to provide a result and a printed record of a result promptly, and cost.

At the present time, the Department believes that, viewed against these criteria, none of the alternative testing methods of which we are aware is now appropriate for use under the Department's regulations. While there may be promising techniques under development that ultimately could meet all the Department's criteria, they are not sufficiently developed at this time to warrant inclusion in this rule.

With respect to screening devices i.e., devices which do not use a scientifically recognized method to establish a quantified alcohol concentration), some are less accurate and would record false positives and/or false negatives (especially at lower alcohol concentrations). It would be difficult to establish that the initial tests had been conducted to establish compliance with the rules because the screening devices could not provide the same type of records as EBTs. Nevertheless, the Department seeks comment on whether non-evidential screening devices should be permitted in some contexts (*e.g.*, in an airport, to perform initial tests of air crew personnel at the gate, with an EBT available at a central location to perform confirmation tests of airline employees who tested positive on the screen within 15 minutes). If screening devices were to be allowed, other procedural requirements of part 40 and the modal rules may have to be changed. For example, since screening devices cannot record a sequential number and result of the initial test, what other records would be needed for this purpose?

We view the proposed testing method and testing device requirements as performance standards. If, in the future, the current drawbacks of other testing methods are resolved or the needed capabilities are developed for other testing methods, we will consider permitting their use for alcohol testing under the Department's rules. For further discussion of testing methods, readers are referred to the relevant discussion in the common preamble.

Section 40.51 The Breath Alcohol Technician (BAT)

To ensure that tests are conducted properly and accurately, each BAT would have to be trained to proficiency in the use of the particular EBT he or she would operate and in following properly the procedures in this Part. The NPRM proposes that the training would have to cover several elements, including operation and methodology of the breath testing instrument, the specific procedures of this rule, and, where needed, performing checks of external calibration on the EBT. The Department seeks comment on whether it would be cost-effective to include additional elements in BAT training (*e.g.*, concerning the pharmacology and physiology of alcohol).

To ensure that the BAT is trained to proficiency, the NPRM would require that each course of instruction contain a "hands on" or practical application component that clearly demonstrates the BAT's ability to properly use the EBT to produce an accurate result, in accordance with the procedures outlined in this rule. If the BAT is also going to perform checks of external calibration of the EBT, proficiency in doing so would also have to be demonstrated. The employer would maintain records of BAT training and proficiency. The rule further proposes that courses of instruction consistent with the NHTSA model course for EBT operator training, or other state-approved courses for breath testing device operators may be used to meet the training requirement. The Department seeks comment on whether there should be a minimum number of hours required for such training.

The NPRM proposes that a direct supervisor of the employee being tested could not, in ordinary circumstances, be the BAT, in order to avoid any appearance of bias. However, if it is impracticable for anyone else to do the job, the supervisor could do so, where not prohibited by operating administration rules (*e.g.*, with respect to reasonable suspicion tests). The Department seeks comment on whether the discretion to use a supervisor as a BAT should be further limited (*e.g.*, by absolutely prohibiting the use of a supervisor except in the case of post-accident testing). The Department also seeks comment on whether, if a person other than a BAT conducts a test in unusual circumstances (*e.g.*, a law enforcement officer who arrives at the scene of an accident before the employer's BAT), the result may be used under the Department's rules.

One issue that has occurred to the Department is that it would adversely affect the perception of the integrity of the process, and perhaps the defensibility of individual tests, if the BAT were intoxicated at the time of testing or had been seen consuming alcohol prior to conducting tests. Consequently, the Department seeks comments on whether this section should include a provision to address this concern (*e.g.*, a requirement that the BAT be alcohol-free while on duty, a pre-duty abstinence requirement for BATs, and/or a requirement that a BAT pass an alcohol test before testing others). If there were such a requirement, what should the consequences of violation be and how could the requirement be enforced?

Section 40.53 Devices To Be Used in Alcohol Testing

The Department proposes that evidential breath testing devices (EBTs) used in meeting the requirements of this rule would have to be listed on the Conforming Products List (CPL) published periodically by NHTSA. The CPL is published in the **Federal Register** and updated periodically as new technology and changes to breath testing instruments warrant. For many years, NHTSA has evaluated and field tested breath testing devices for their technical and scientific capabilities for use in law enforcement as evidential tests of breath alcohol content. By inclusion on the NHTSA CPL, a given model of breath testing device is certified as providing accurate and reliable results. In addition to being listed on the NHTSA CPL, EBTs used to meet the requirements of this rule would have to have certain other capabilities relevant to specific provisions of the rule. The Department seeks comment on whether there are additional quality control measures manufacturers or employers should take to make sure that individual devices are made and operated properly (beyond those proposed elsewhere in this NPRM).

First, the EBT (itself, or via a separate printer that would be present at the collection site) would have to be able to print three copies of each test result (either simultaneously or consecutively). Second, the EBTs would also have to number each test sequentially, with the numbers visible to both the BAT and the employee before each test and printed out on the

result. The purpose of this requirement is to identify each test result as pertaining to a specific employee. In effect, the employee's signature on the form prior to the test would signify "I am about to take test No. 243." The test result would say "Test No. 243".

Third, the EBT would also have to be able to do an "air blank" or test of the ambient air to ensure that when nobody was breathing into the instrument, it reported zero. An air blank, in other words, is a check of internal calibration. This check of internal calibration of the instrument, conducted both immediately prior to and immediately following each breath test further ensures the accuracy of the result. The EBT would also have to be able to generate printed records of the air blanks along with each test result. Fourth, an EBT would have to be capable of performing a check of external calibration (i.e., a test of its ability to produce a quantitative result consistent, within a given tolerance, of a known alcohol concentration standard).

Checks of external calibration of the instrument using known alcohol concentration standards are essential to validating the accuracy of the EBT. Each EBT model used to meet the requirements of this rule would have to have a Quality Assurance Plan (QAP) provided by the manufacturer and approved by NHTSA. The QAP would specify the manufacturer's recommended methods and frequency for checks of external calibration. This rule also proposes that EBTs would have to be capable of distinguishing ethyl alcohol from acetone at the .02 or greater level.

The Department understands that some EBTs (especially some of those using infrared technology) may now not be programmed to do so, with the result that someone with elevated acetone levels in his or her system (*e.g.*, a person with diabetes) could have a .02 result despite not having ingested any alcohol. The Department believes, based on information from manufacturers, that these specific functions outlined above are available or can be made available with relatively little technical difficulty. The Department seeks comments on this point, as well as on the incremental cost of these items.

Employers would be required to inspect, maintain, and calibrate EBTs. The work would have to be performed by the manufacturer or a certified representative of the manufacturer. BATs who have completed specific training in calibration and maintenance of EBTs may perform such duties if certified by the manufacturer. We seek comment on whether there are means to ensure the quality of work performed in calibration and maintenance of the instruments such that a wide variety of people could perform these tasks. Records of calibration and maintenance would have to be maintained for five years, a period of time equivalent to that required for the retention of positive test records.

Each EBT manufacturer would have to develop and submit to the Department a quality assurance plan (QAP) for each EBT model listed on the NHTSA CPL. This plan would tell the employer how and when to perform checks of external calibration, taking into account variations in EBT use that would affect the frequency of such checks (*e.g.*, stationary vs. mobile use, high vs. low temperatures, and low vs. high numbers of tests). The QAP would establish tolerances for each instrument that define the acceptable limits of deviation from the known alcohol concentration standards. Other inspection, maintenance, and calibration requirements would also be stated. The Department seeks comment on other factors which QAPs should cover.

Employers would have to comply with the QAP. In particular, if an external calibration check revealed that the EBT was out of calibration, the employer would have to take the EBT out of service and fix the problem before the device could be used again for DOT-mandated employee testing.

The Department seeks comment on a number of other questions concerning maintenance and quality control for EBTs. Could there be a problem with manufacturers making their QAPs either too easy (to make customers happy) or too hard (to avoid liability) that NHTSA review would not be able to correct? Are manufacturers qualified to establish such plans? Should manufacturer representatives or technicians do repairs? Do manufacturers make such persons available as part of their normal business practices, and would a requirement to use them have negative cost or quality control impacts? Are state or local government or law enforcement personnel available and qualified to perform repair, maintenance, etc.? Who else would be appropriate to perform maintenance on EBTs to ensure that they work properly? Finally, should there be a technical advisory committee (*e.g.*, composed of representatives of manufacturers, law enforcement agencies, users, academic experts) to provide information to the Department on technical breath testing issues?

The final paragraph of this section would require the employer to store the EBT securely when it is not being used. The purpose of this is to prevent anyone from tampering with the device.

Section 40.55 The Alcohol Testing Site

The requirements for an alcohol testing site are less detailed than the drug testing collection site rules. The site must afford aural and visual privacy to the person being tested, to protect the confidentiality of the process. Any number of arrangements could satisfy this performance criterion, such as a room, a van, or a partitioned-off area. While testing is going on, or when the EBT is present, the site must be able to be secured. Essentially this means that the BAT must have the EBT under his/her control at all times and be able to limit access to the testing area to authorized personnel. For example, while a temporary partition might meet the privacy requirement, it may or may not meet the security and control requirement.

One exception to collection site requirements would be a situation in which meeting all privacy requirements would be impractical, and a test would not happen at all unless it happened in a nonconforming site. We propose this exception only for unusual, spur-of-the-moment situations (like a post-accident test that could not be conducted in a timely manner if all privacy requirements had to be met), not for regular, predictable, matter of course situations. The BAT would provide privacy protections for the employee to the maximum extent feasible.

The BAT, in order to avoid potential mistakes, could administer only one breath test at a time. This refers to actual operation of the EBT only. Assuming that adequate privacy could be maintained, other employees could be waiting, filling out forms, observing the 15-minute period before a confirmatory test, etc. The BAT is also prohibited from leaving the collection site while the testing process is under way, including the waiting period.

Section 40.57 The Alcohol Testing Form

This section would mandate the use of one of the two types of testing forms. One type of form is generated by the EBT and would contain all the necessary identification data, space for required signatures, and breath test results. The form would be used when the EBT prints only the test result and this result is then attached to a standard form containing the test identification data and required signatures. Employers would not be authorized to alter or

customize these forms, so that all alcohol testing forms used nationwide under the rules incorporating part 40 would be standard. The form would be produced in triplicate, with copies to the employee, the employer, and the BAT. The form, whether EBT-generated or a standard printed form, would contain the date and time, sequential test number, employee identifying data, BAT identifying data, and certification statements about the test with signatures by the employee and the BAT.

Section 40.59 Preparation for Testing

The pre-testing procedure would be a relatively simple one. After presentation of identification by the employee (and by the BAT, if requested), the BAT would explain the testing procedures and tell the employee what is required. The BAT and the employee would fill out the testing form and sign it. This would include entering the sequential number of the test that the device indicates is about to be taken.

If the employee refuses to take the test (i.e., by refusing to sign the form or provide breath, or otherwise preventing the test from taking place), the BAT would note the refusal on the form, stop the testing process for that employee, and immediately inform the employer. The employer should provide the BAT with instructions concerning the employee's leaving the collection site.

The proposal would also direct the BAT to start a new test if, for some reason, an event occurred to invalidate the test. For example, if, after the initial test, the second post-test air blank did not show a 0.00 reading, the BAT would run a new initial test using a new form with a new sequential number. If a similar event happened on a confirmatory test, the BAT would start a new form for the confirmatory test with the new sequential number and affix it to the form used for the valid initial test. The Department seeks comment on whether it would be better to have space on the form to record repeat tests in this situation rather than to have a new form filled out.

Section 40.61 Administration of the Initial Test

The first part of the testing process would be to make sure that the EBT is operating properly with respect to detecting the presence of alcohol. In the employee's presence, the BAT would do a "dry run" operation of the EBT by conducting an "air blank" test (*e.g.* a test of the ambient air, assumed to contain no ethyl alcohol). If the device reads anything other than a zero (0.00), the BAT would know something was wrong. If the initial attempt at conducting an air blank test fails (*e.g.* the EBT registers something other than 0.00) the BAT could re-run the air blank once more. The test of the employee would not proceed unless a 0.00 reading was obtained. If the instrument again fails to provide a 0.00 result on the air blank, the EBT cannot be used for testing until a check of external calibration is conducted and the instrument is found to be within the tolerance limits on a known alcohol standard of 0.00.

Next, the BAT, in the presence of the employee, would take an individually-sealed mouthpiece (for the sake of sanitation and to avoid any possible contamination of the mouthpiece by alcohol from previous users) and place it into the EBT. In order to get a sufficient quantity of deep lung air, the employee would be instructed to blow into the mouthpiece for at least six seconds, or until the EBT indicates that an adequate amount of breath has been obtained. If the employee could not produce an adequate amount of breath, the procedures of § 40.65 would apply.

Immediately following the testing of employee's breath, a post-test air blank would also have to be performed, to ensure that the device reads 0.00 after the breath test. Once again, if the instrument did not provide a 0.00 reading on the air blank, the BAT may attempt one additional air blank. If a 0.00 reading still was not obtained, use of that EBT would be discontinued and the previous breath result would be invalid. The Department seeks comment on whether it is necessary to have both the pre- and post-test air blank results printed out and attached to the alcohol testing form. Comments are also sought on whether a post-test air blank is necessary on all tests, or only on those where the breath test result is 0.02 or greater.

If the EBT does not print the test result directly onto the testing form, the resulting printout would be attached to the form in the place provided with some means that would show clear evidence of removal (*e.g.*, tamper-evident tape). The BAT and employee would again sign the form, citing the sequential test number. (However, if the employee refuses to sign, it would not be considered a refusal to be tested, since the employee has in fact taken the test.) If the employee does refuse to sign the form after the result is obtained, the BAT should so note on the form in the remarks section.

In the event the printed result does not match the result displayed on the EBT, the employee and the BAT would both initial or sign a record of such disparity on the form. The test result would be invalid. The Department seeks comment on whether malfunctions of the EBT equipment should result in the employee not being subject to another test using that EBT or another instrument or whether, if the error is immediately detected by the BAT, the BAT would start over and immediately administer another test.

If the result is less than 0.02, the test is "negative." The BAT would report the negative result to the employer. Notification of negative test results may be done telephonically or electronically, but must be followed up with the employer's copy of the testing form. If the result is 0.02 or greater, a confirmatory test would be needed.

The Department notes that, under the alcohol testing legislation, the initial test need only indicate the consumption of alcohol. It is not statutorily required that the initial test be of evidential quality, produce a quantitative result, or have elaborate safeguards. Consequently, it would be legally possible, under the statute, for the Department to permit the use of other testing techniques (*e.g.*, non-evidential breath testing devices) for initial tests, so long as they were capable of identifying alcohol concentration of 0.02 or greater.

The consequences of "false negatives," which may occur with some non-evidential techniques, present serious safety concerns. The Department believes, in addition, that use of non-evidential testing methods would make little sense in the context of this rule. An EBT would have to be available to conduct a confirmatory test very shortly (within 30–60 minutes) after a "positive" initial test in any case. For this reason, the employer would have to incur the costs of EBT availability, to include a properly trained BAT. It would probably be less expensive to use the EBT that is already there for the initial, as well as for the confirmatory test than to use other technologies. Use of EBT technology on the initial as well as any required confirmatory test provides the additional advantage of a more scientifically accurate, sensitive, and specific test result for alcohol content on all tests conducted. Use of non-evidential methods for testing also raises issues of how to document test results and how to prevent fraudulent or "doctored" records of employer compliance with testing requirements. In particular, disposable testing methods present problems in ensuring that initial test results of employees who are in violation of the alcohol misuse standards are not ignored and that the evidence of such violation hidden or

destroyed. The Department seeks comment on this matter.

This discussion is in the context of an extensive, multi-modal testing program, including random testing as well as testing triggered by reasonable suspicion of the occurrence of an accident. Greater protections are needed in such a program, especially in the absence of procedural protections present in some existing programs that may use non-evidential testing methods in some circumstances. For example, the Coast Guard post-accident alcohol testing program can involve an administrative proceeding at which the employee has the opportunity to challenge test results before a license is revoked or an investigative inquiry at which further evidence could be introduced. In any event, the use of non-evidentiary alcohol testing devices alone would not meet the statutory requirement for verification in the testing program proposed by the five modal NPRMs and these proposed procedures.

Section 40.63 Administration of the Confirmatory Test

The confirmatory test could be a second test on the same EBT as the initial test. The statute does not require that the confirmatory test use a different technology. The Department believes that the reliability of EBTs on the NHTSA CPL is such that using the same device would have no adverse effect on the accuracy of tests. In order to guard against any possibility of alcohol on the used mouthpiece affecting the result of the confirmation test. A new mouthpiece would be used for the confirmation test.

Before the confirmatory test, a fifteen-minute waiting period would be observed. The purpose of the waiting period is to ensure that the presence of mouth alcohol (residual alcohol present in the mouth from the recent use of food, tobacco or hygiene products) does not artificially raise the test result. The BAT would instruct the employee to avoid actions that could increase mouth alcohol (*i.e.*, using tobacco products, mouthwash, breath spray, cough drops, lozenges, or other food or medicinal products containing alcohol) during the waiting period. The test would proceed even if the employee disregarded the instructions, however, since they are for the employee's protection. This rule proposes that the 15 minute waiting period be observed before the confirmatory test rather than before the initial test as a means to reduce lost time and costs in administering the testing program. Since no adverse actions may be imposed on the basis of the initial test results, the employee protections afforded by the waiting period are only necessary for the confirmation test. It is assumed that the vast majority of employees will not have impermissibly consumed alcohol immediately prior to testing and that the time necessary to prepare for the initial test and complete the form will, in fact, provide ample opportunity for residual mouth alcohol to dissipate.

The Department seeks comments on the costs and benefits of having this waiting period before all initial, rather than confirmatory, tests. The Department also seeks comment on the proposal to establish a 20-minute maximum for the waiting period, between initial and confirmation tests. The purpose of establishing a maximum limit for the waiting period is to prevent the manipulation of confirmation results by affording time for the metabolism of alcohol so that results will be lower than first recorded on the initial test. Should there be greater flexibility in the timing of confirmation tests?

In addition, the Department is looking at the issue of whether, to provide additional assurance of an accurate result, a second confirmatory test should be performed when the first confirmatory test is 0.04 or greater. This could help to assure employees of the reliability of results, particularly if the initial test and first confirmation test results were not identical.

Confirmation test results should only be higher than initial test results when an employee has very recently consumed alcohol and is in the absorption phase of alcohol metabolism. Two tests administered after the 15-minute waiting period may provide additional evidence that the result is a true and accurate record of alcohol concentration and could not be due to residual mouth alcohol or any possible interference with the instrument. One variation on a "second confirmation test" procedure would be to require a second confirmation test only when the initial and first confirmation tests differed by more than a given amount (*e.g.*, plus or minus .01 or .02). The Department seeks comments on these matters. Administering three tests (one initial and two confirmation tests) is not required practice in most law enforcement settings. The Department believes that the proposed requirement for pre- and post-test air blank readings on initial and confirmation tests provides sufficient safeguards for ensuring the internal calibration of the instruments. Adding a third test is not required by the statute. A third test would complicate the procedures, increase the opportunity for administrative errors leading to unnecessary invalidation of results, and increase costs.

Typically, under proposed operating administration rules, a confirmed result of 0.04 alcohol concentration or greater requires the employer to remove the employee from performing his or her safety-sensitive duties, pending SAP evaluation to return to work (Consequence A). A result of 0.02 alcohol concentration or higher, but lower than 0.04 alcohol concentration, requires the employer to withhold the employee from performing a safety sensitive duty until the employee tests less than 0.02, or for a prescribed number of hours (Consequence B). Someone who tests negative (less than 0.02) may continue to perform safety-sensitive duties (Consequence C). The NPRM proposes that when the confirmation result is different from the initial test result, the lower of the two results be used for the purposes of determining consequences. For example, if the confirmation result is between 0.02 and 0.04, even though the initial test result was greater than 0.04, the employee would be subject to only the consequences for results in the 0.02–0.04 range. Likewise, if the initial result was 0.02–0.04 and the confirmation test was greater than 0.02 (including greater than 0.04) the consequences of a 0.02–0.04 result would apply. It should be noted that operating administration proposed rules have some exceptions to this general pattern (*e.g.*, an employee must have a result of 0.02 or below to "pass" a return-to-duty test). Under the NPRM's proposal to rely on the lower of the two EBT test results for the assignment of consequences, the following outcomes would occur:

Initial test	Confirmation test	Consequence
0.04 or greater .	0.04 or greater .	A
0.04 or greater .	0.02 or greater but less than 0.04.	B
0.02 or greater but less than 0.04.	0.02 or greater (including 0.04 or greater).	B
0.02 or greater (including 0.04 or greater).	less than 0.02 ..	C
less than 0.02 ..	none	C

The Department seeks comment on the merits of this proposal. Does it present any significant problem in terms of the defensibility of positive test results (*e.g.*, because the result of the initial test, as a practical matter, may sometimes determine the level of consequences)? Should the result of the confirmation test govern in all

instances, regardless of the initial test result?

This section also proposes a procedure for notification of the employer of test results by the BAT. The proposed procedures address the timeliness and methods of transmitting this information.

Section 40.65 Inability to Provide an Adequate Amount of Breath

What happens if the employee allegedly cannot, because of a medical condition, provide sufficient breath to result in a valid test? (This problem is analogous to the "shy bladder" problem in drug testing).

First, the employee would have to attempt to provide sufficient breath. This means that the employee would have to attempt to breathe into the EBT. Failure to attempt to provide breath is treated as a refusal to be tested, and the BAT would note such failure to attempt the test on the testing form and immediately notify the employer. If the employee attempts to provide breath and is unable to do so (*e.g.*, cannot sustain a breath long enough, or cannot provide sufficient deep lung air) the BAT would so note on the form and immediately notify the employer, who would direct the employee to seek a medical evaluation to document his/her inability to provide a breath sample due to medical reasons. The evaluation would have to be done by a physician acceptable to the employer, in order to help maintain the integrity of the process (*i.e.*, to help prevent a situation in which the employee selects a physician who could reasonably be viewed as being biased in favor of the employee). The provision is not intended to allow an employer to arbitrarily veto the use of a physician other than one preferred by the employer. The physician would answer one basic question. Does the employee have a medical condition which has, or with a high degree of probability could have, precluded the employee from providing an adequate amount of breath? If yes, there is no "refusal." If no, the employee is deemed to have refused the test. The Department seeks comment on whether an employee who is unable to provide an adequate amount of breath should be prohibited from performing safety-sensitive duties until the medical evaluation is conducted and the physician's determination made.

It should be noted that this inquiry by the physician would be on a case-by-case, test-specific basis. Physicians would not, under this provision, be authorized to issue a blanket statement that an individual was permanently unable to provide an adequate amount of breath. Such a statement could amount to a waiver from the testing requirement, which would be contrary to the objectives of the Act.

Section 40.67 Invalid Tests

This section proposes a list of "fatal flaws" in the testing process, any one of which would invalidate a test. Other testing procedures errors do not necessarily invalidate a test. The Department seeks comments on whether items should be added to or deleted from this list.

Most of these items are self-explanatory. The Department specifically seeks comment on whether exceeding the 20-minute maximum for the waiting period before the confirmatory test, as well as failing to observe the 15-minute minimum, should invalidate a test. Our view at this time is that the 15 minute minimum waiting period is essential to protect the employee's right to a fair and accurate test. Any failure to provide at least the 15 minute waiting period before the confirmation test would result in the confirmation result being invalid. Because the 20 minute maximum on the waiting period is not an employee protection procedure (in fact, additional delay could be helpful to employees), if the waiting period between tests exceeds 20 minutes, the confirmation test would remain valid. The Department seeks comment on whether, if the BAT notices a potentially fatal error in the testing process (*e.g.*, the BAT has failed to sign the form or has failed to run a post-test air blank), before the employee has left the alcohol testing site, should the BAT be able to direct the employee to take another test to correct the problem. Should it make any difference if the error is a "machine error" by the EBT device as opposed to a human error by the BAT?

One "fatal flaw" that could create difficulty is a situation in which a check of external calibration indicates that the instrument is not properly calibrated. The NPRM proposes that, in this situation, all positive results back to the last check of external calibration that established the instrument's accuracy would be invalidated. This result appears to have merit technically, but the retroactive invalidation of results may create a number of problems in the administration of the program and employers' personnel decisions. Since confirmed results are available immediately and once notified employers are required to take action prohibiting the performance of safety-sensitive duties by employees who are found to have violated the alcohol misuse standards, tests invalidated at a later date may result in the reversal of personnel actions, including a restitution of back pay. The Department seeks comment on the necessity of this provision and suggestions for dealing with problems it could potentially cause if it is made part of the final rule. It appears, for example, that an employer could conduct more frequent external calibration checks than required by the manufacturer's QAP (*e.g.*, after every positive, at the end of every test day) to mitigate problems for subsequent personnel actions.

Section 40.69 Availability and Disclosure of Alcohol Testing Information About Individual Employees

This section would be parallel to similar material in the drug testing procedures. The general rule is that information is confidential and may not be released to third parties without the employee's written consent. The employer could release information in the context of a proceeding relating to an employee benefit, to DOT agency action against the individual (*e.g.*, an action to revoke a certificate), or to an NTSB safety investigation, however. The employer would also have to make information available to DOT offices having regulatory or review authority.

Information would also be made available to the employee upon written request. Employers or their agents could not charge employees for more material than the employees requested (*e.g.*, for an entire package of information when the employee requested only a statement of the test result). The Department seeks comment on this provision.

This section uses the term "employer." Since the employer is responsible for the compliance of other parties to the process (*e.g.*, consortias, contractors, agents, BATs, etc.), we thought it unnecessary to specify these other parties here. The Department seeks comment on whether other parties should be named in this section.

Section 40.71 Maintenance and Disclosure of Records Concerning EBTs and BATs

This section would require employers to maintain records of the inspection, maintenance, and calibration of EBTs, compliance with the manufacturer's QAP, and records of the training and proficiency of BATs. The access requirements and disclosure protections are parallel to those in § 40.69. Employers who contract with other parties for alcohol testing services

would be required to ensure that their contractors followed this requirement.

Section 40.73 Definitions

The proposed subpart would define several terms that are used only here, or used in a different sense than in the drug context. *Air blank* would be defined as a test of ambient air. *Alcohol* would refer to ethyl alcohol, in whatever form. The proposed rule regards alcohol in the system, whatever its source, as a safety problem. Someone who registers a .03 concentration as the result of use of a product containing alcohol, even if for medical purposes, is no less impaired than he or she would be at the same alcohol concentration after drinking an alcoholic beverage.

The rule would use the term *alcohol concentration*. The more familiar "blood alcohol concentration" could be misleading, since these procedures do not call for the use of blood. The concentration is expressed in terms of grams of alcohol per 210 liters of breath, as indicated by an EBT.

Collection site, initial test, and *confirmation test* all are terms used in the drug testing portion of the part 40. Separate alcohol testing-specific definitions are used here, however. The *breath alcohol technician* (BAT) is analogous to the collection site person under the drug testing procedures, and *alcohol testing site* is analogous to *collection site.*

An *evidential breath testing device* (EBT) is any breath testing device that NHTSA has approved and put on its conforming products list. It is not relevant for purposes of this rule whether the courts in any particular state have accepted a given device for use in driving under the influence (DUI) or other legal proceedings in that state. As a matter of Federal law, NHTSA-approved EBTs would be used for all tests under these rules, regardless of the status of a device under state law.

An *invalid* test is one which has been declared invalid under the provisions of § 40.67. It is neither positive nor negative. The concept is similar to that of a canceled test in the drug testing procedures. For example, if a negative test is needed before a worker may begin performing a safety-sensitive function, an invalid test would not suffice, and the employee would have to have another test conducted. Likewise, if a test result of 0.04 or higher is declared invalid, the consequences of the test result would not apply.

Section 40.81 Reporting Drug Testing Information to the Department of Transportation

The DOT Office of Drug Enforcement and Program Compliance (a unit of the Office of the Secretary whose function is to coordinate DOT drug and alcohol testing programs) created a working group with representatives from the operating administrations to develop a comprehensive plan for a Management Information System (MIS) to obtain and analyze employer drug program data. This group drew on the experience of the FRA and FAA which already had reporting requirements in their regulations.

On November 27, 1989, the General Accounting Office (GAO) published a report on the status of the program promulgated by the DOT regulations. A primary recommendation in the GAO report was that "The Secretary of Transportation adopt evaluation criteria and provide the administrations with guidance on the types of program information they should be getting from employers to evaluate program success."

Although 49 CFR part 40, as a procedural rule, is applicable to each of the Operating Administration's drug testing rules, implementation of each administration's program is somewhat different, reflecting differences in the transportation industries. Collecting and managing program data from each of the industries is essential to evaluation of the effectiveness and credibility of the drug testing program. The DOT working committee appointed to develop an appropriate MIS for DOT has identified standard data elements which are critical to the review and management of the DOT and operating administrations' drug programs. This data will be the basis for monitoring implementation, compliance and enforcement, and evaluating the effectiveness of the drug testing programs. The regulated employers are the appropriate source for most drug testing data. DHHS certified laboratories can provide only laboratory analysis data, medical review officers can only provide drug test verification information, and collection facilities can only provide specimen collection data. Employers, however, receive the information from labs, MROs and collection facilities and therefore can provide the necessary cumulative data. The data that would be gathered by the proposed MIS for program evaluation could permit adjustments of different program elements. It is difficult to indicate what changes could be made without first gathering and analyzing the data. The data could show a lack of need for testing for certain drugs or indicate a need for modifying testing requirements based on such factors as the type of position or success of a particular company's anti-drug program. The Department believes that it is necessary, first, to determine that its programs are operating, are meeting their objectives as efficiently as possible and, second, if not, to make modifications to ensure that they do. The Department believes that the costs of reporting being proposed are both cost beneficial and effective, but welcomes public comment on this issue. One example of the use of data that would be gathered by the proposed MIS for program evaluation concern potential adjustments of the random testing rate. The main purpose of random testing is deterrence. Relatively higher random testing rates are likely to be more effective as a deterrent to illegal drug use than relatively lower rates. At the same time, relatively higher random testing rates are more expensive to industry. Decisions concerning random rates necessarily are based on considerations of deterrence, the effectiveness of current measures, and cost. The information the proposed system would gather would make rational, well-informed decisions about adjustment to random testing rates possible.
